## PRESSURE WASHERS

For light-duty (under 5 hours/week), occasional cleaning o shops, roofs, siding, and light equipment.

- **Trigger gun is standard**
- **Max. intake water temperature from garden hose is 140°F**

**Electric compact model No. 4KP61** has a durable plastic housing with a high-low pressure wand, chemical metering valve, ground fault interrupter, 35 ft. power cord, and General triplex pump.

- **Lightweight with handle for ease of portability**
- **Easy to operate: Turn on one heavy-duty rocker switch an pull trigger**

**Gas-driven model No. 1H078** has General triplex, oil-bath pump Briggs & Stratton engine with cast-iron block and steel sleeves and stainless steel cleaning wand.

- **Two quick-connect nozzles: 15" high pressure and brass soap injection**
- **Heavy-duty chassis with pull bar, hose hanger and durable powder coat finish**

Detergent injection for No. 1H078 is controlled by use of the soa nozzle. No. 4KP61 has metering valve on the unit for regulatin soap flow.

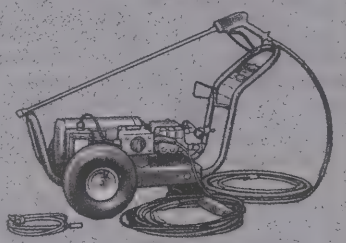
## ELECTRIC COLD WATER PRESSURE WASHERS

For medium-duty use (5-20 hours/week) in cleaning automobiles, equipment, shop floors, food processing. Use anywhere water and electricity are available. Especially suited for indoor use due to low noise and no fumes.

Industrial quality single-phase electric motors are used with heavy-duty On-Off controls. All have capacitor starts, thermal overload protection, and 35 ft. power cords with ground fault circuit interrupters (GFCI) for operator safety.

230V models Nos. 1H075 and 1H074 come without electrical plug ends. No. 1H076 uses a NEMA 5-20p 20 amp plug.



Industrial General triplex water pumps have three ceramic plungers and an oil bath crank case. Oil-end of pump has limited 5-year part warranty.

- **Soap injection with quick-connect brass nozzle; do not use acids**
- **Trigger gun and stainless steel wand**
- **25 ft. high-pressure, wire braid hose**
- **Ideal for: Food service, showers, nursery, gutters, floors, school, swimming pools, food processing**
- **Max. intake water temperature from garden hose 140°F**
- **Easy to operate: Simply turn on one heavy-duty toggle or rotary switch and pull trigger**
- **Heavy-duty chassis designed for industrial use. Specially treated steel with durable powder coat finish**
- **Comes with 15° high-pressure nozzle and a brass soap injection nozzle**

## GAS ENGINE COLD WATER PRESSURE WASHERS

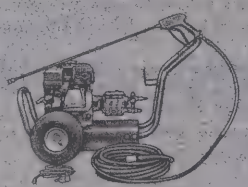
**For outdoor use** including agriculture, automobiles, trucks, equipment, contract cleaning, mobile washing, well drilling. Use where water is available but not electricity.

**Industrial General triplex water pump** with three ceramic plungers and oil bath crank case. Maximum water intake temperature is 140°F.

**Standard on all gas engine cold water pressure washers:**

- **Trigger gun for remote operation**
- **Soap injection assembly with brass soap nozzle**
- **50 ft. of high pressure wire-braid hose**
- **Spring-loaded feet to absorb vibration**
- **Pneumatic wheels**
- **Pressure relief valve opens automatically if excessive pressure develops**
- **Ideal for: Marina, agriculture, mobile wash, golf course, aviation, well drilling, heavy construction**
- **Uses 10W30 non-detergent pump oil, No. 4ZF21; and 10W30 detergent-dispersant engine oil, No. 4F743**

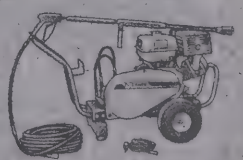
**Direct-drive models** Nos. 1H080 and 1H079 are for medium-duty use (5-20 hours/week). Powered by Briggs and Stratton Industrial Plus engines which are coupled directly to the pumps.



- **Engines have low-oil alert shutoff and recoil start**
- **36" stainless steel wand and 2 quick-couple nozzles: 15° high pressure an brass soap**

**Belt-drive models** Nos. 1H071 and 1H070 are for heavy-duty use (20+ hours/week). Designed for longer life due to belt which absorbs engine vibration and reduces water pump RPM.

- **Belt runs on adjustable cast-iron pulleys; high-impact plastic belt guard**
- **4-spray nozzles for varied spray patterns: 0°, 15°, 25°, 40°**
- **48" variable pressure wand assembly**
- **Stainless steel variable pressure wand has built-in soap nozzle. Pressure and soap easily adjusted with the twist of a handle**



**No. 1H070 has a 6-gallon detached marine fuel tank.** Requires 12V U-1 garden tractor battery (not included).

# HOT WATER PRESSURE WASHERS

**For medium-duty use** (5-20 hours/week) where high pressure and hot water (up to 190°F) are needed, such as degreasing, sanitizing, and heavy grime washing. Especially adept at cleaning in tough construction, trucking, farming, food processing, restaurant, etc. Use anywhere water and electricity are available.

**Industrial quality single-phase electric motors** are used to drive the water pump and water heater burner. Both motors have heavy-duty On-Off controls, capacitor starts, and thermal overload protection.

Industrial-strength high pressure pump made by General is coupled to the motor (direct drive) and features three ceramic plungers and an oil bath crank case. Oil-end of pump has limited 5-year part warranty.

**Vertical coil** made of 1/2" cold-rolled steel pipe and features Landa's unique stainless steel heat-saving retention plate. Coil has limited 5-year part warranty.

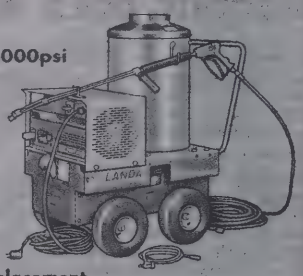
**Safety pressure relief valve** opens automatically if excessive pressure develops. Resets automatically.

**Trigger gun control** for remote operation at the gun.

**Variable pressure washing wand** has built-in soap nozzle. Control of pressure and soap can be adjusted simply by turning a handle on the wand.

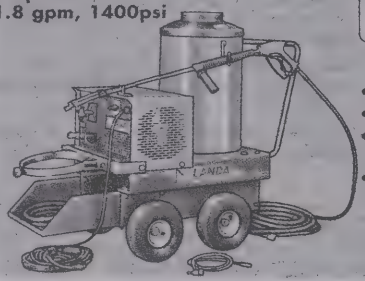
**Soap injection assembly** is standard with a quick connect union that allows for remote injection of soap at the wand. Do no use acids.

**Standard with 35 ft. power cord** and ground fault circuit interrupter (GFCI) for operator safety.



**230 unit No. 1H064 comes without electrical plug. Nos. 1H065, 1H066, 1H067, and 5GH72 use a NEMA 5-20p 20 amp plug.**

**50 ft. high pressure wire-braid hose** is temperature, chemical, and oil-resistant.



LANDA® PRESSURE WASHERS GOLD SERIES

CERTIFIED TO ETL LISTED UL-1776

No. 1H067
oil-fired
2.0 gpm, 1000psi

No. 5GH72
propane
1.8 gpm, 1400psi

Replacement Parts Available 1-800-323-0620

- Portable, double-axle chassis
- Triplex General pump
- Trigger gun, variable pressure wand, soap injector
- 50 ft. high pressure hose

**LANDA LIMITED WARRANTY**
5-year limited warranty on coil. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

- **Water is supplied to pressure washer with garden hose (not included). Max. intake water temperature 140°F**
- **Water output temperature approx. 190°F**
- **High limit safety temperature control**
- **Comes with 15° high pressure nozzle**
- **Easy to operate. Simply turn on one switch and pull the trigger**
- **Handles easily with pneumatic wheels, push handle, hose hanger**
- **Heavy-duty, tandem-axle chassis made of specially treated steel with durable powder coat finish**

Oil-fired models Nos. 1H067, 1H066 1H064, and 1H065 use #2 diesel fuel kerosene, or #1 home heating oil for the water heater burner. 5 gal. polyethylene fuel tank is rustproof and easy to remove for cleaning.

Propane models are supplied with gas regulator, LP valve shut off, 10 ft. of gas hose and tank carrier with snug-fit band. Tank is not supplied; minimum tank size is 30 pounds. While tank carrier is supplied, tank must be removed from machine during operation. Use vapor type of propane. Do not use a liquid type tank such as used on forklifts.

Combination steam cleaners/pressure washers Nos. 1H065 and 1H068 have convenient steam valve that resists water flow and converts hot water into "wet steam" at 250°F. PSI in steam mode is 350°F.

# HOT WATER PRESSURE WASHER AND FLAT SURFACE CLEANER

## GAS ENGINE HOT WATER PRESSURE WASHER

**For outdoor, heavy-duty use** (20+ Hr/Wk), such as heavy equipment cleaning on a job site or in the field where hot water is needed, but electricity is not available.

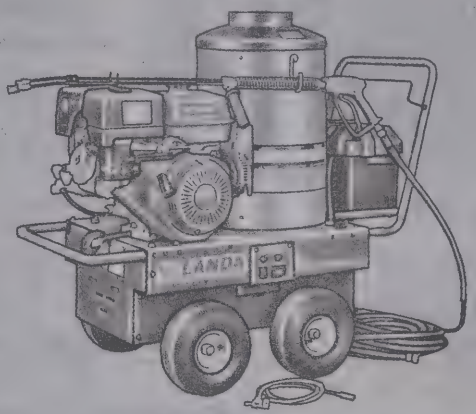
**Direct-drive General triplex pump** with three ceramic plungers and an oil bath crankcase.

**Industrial-strength engine,** 11 HP Honda has electric start (rope stand-by). Low-oil alert shutoff; gas capacity is 1.7 gal.

**Landa's Duracoil** made of cold-rolled steel pipe with a unique heat-saving baffle. Coil is surrounded by a blanket of insulation; covered by Landa's 5-year limited warranty.

**No need for generator** with 12V DC burner assembly; battery box and cable included; 12V battery not included. Group 24 90 amp rating required.

**Safety pressure relief valve** opens automatically if excessive pressure develops. Resets automatically.



**Trigger gun control** for remote operation at the gun.

**Variable pressure washing wand** has built-in soap nozzle. Control of pressure and soap can be adjusted simply by turning a handle on the wand.

**Soap injection assembly** is standard with a quick connect union that allows for remote injection of soap at the wand. Do not use acids.

- **High limit safety temperature control**
- **Max. water intake from garden hose (not included) is 140°F**
- **Comes with 15° high pressure nozzle**
- **50 ft. of high pressure wire-braid hose resistant to temperature, oil, and chemicals.**
- **Water output temp. approx. 190°F**

LANDA® PRESSURE WASHERS GOLD SERIES

LANDA® PRESSURE WASHERS GOLD SERIES

**No. 5GH53**
**Water Jet-Surface Cleaner Attachment**

## FLAT SURFACE CLEANER

**Cleans flat surfaces** fast by attaching to either a hot- or cold-water pressure washer (up to 4000 psi and 200°F). Spray bar, with two jet spray nozzles, spins at a rate of 2000 RPM causing the water to hit the surface 66 times per second for consistent and streak-free, deep cleaning power. Landa brand (30-585).

**Variable height adjustment** of spray bar so you can blast off concrete but not dig up asphalt or wood.

**Holster-mounted spray gun** for quick spot cleaning of hard-to-reach places; water flow automatically switched at will.

- **Maximum pressure: 4,000 PSI; Dimensions: 48L x 22W x 37"H**
- **Pneumatic wheels and swivel front caster for easy maneuvering into corners**
- **Rotary union has industrial ball bearings, tungsten carbide seat and stainless steel housing**
- **Fatigue-free trigger handle for operator safety**

**No. 5GH53.** Shpg. wt. 60.0 lbs. List $1575.00. Each.....**$1544.00**

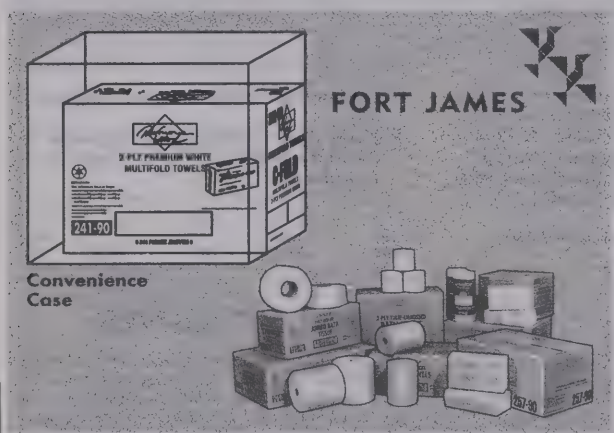
# RECYCLED TISSUE, TOWEL AND NAPKIN PRODUCTS

## ENVISION®

The Envision line is America's first complete system of towel, tissue and napkin products designed to meet Environmental Protection Agency (EPA) Guideline levels for Postconsumer Fiber Content. Today, all Envision products not only meet, but significantly exceed these guidelines. Purchasing Envision products is an effective way to "Think Globally and Act Locally" with 100% recycled Envision products.

- **Made with 100% Total Recycled Fiber Content**
- **Certified by Fort James to significantly exceed E.P.A. guidelines for Postconsumer Fiber Content**
- **Virgin fiber-free**
- **Made by Fort James, winner of the E.P.A. Administrator's Award for Innovative Recycling Leadership**
- **All shipping cases, cartons, roll cores and paper wrappers contain 100% recycled and at least 10% postconsumer fiber.**

Grainger is offering Envision® in three performance categories. They include Premium "Best", Near-Premium "Better", and Economy "Good" products. This allows the Envision® brand to meet your full range of needs while at the same time benefitting the environment.



**Envision® Preference® Ultra Premium** products offer the ultimate in performance. They provide the highest levels of quality and performance with unsurpassed environmental benefits. Use for upscale, luxury office buildings, healthcare centers and lodging facilities.

**Envision® Preference® Near-Premium** products offer better quality performance. Ideal for mid-range office buildings, healthcare centers foodservice and lodging facilities.

**Envision® Acclaim® Economy** products offer consistent and reliable performance at the lowest cost per use. Ideal for high traffic areas in public facilities, schools, office buildings, foodservice and healthcare centers.

## CONVENIENCE CASES

When storage space is limited and large quantities of product are not needed, choose Convenience Cases. They contain smaller quantities of Envision bath tissue, folded towels, and roll towels. This reduces the overall size and weight of the case for easier handling and storage. (These products are also available in regular size cases.)

### ENVISION® BATH TISSUE

**No. 1D508 Envision® Preference® Near-Premium Bath Tissue.** A high quality 2-ply 500 sheet roll for applications where quality and appearance are important. Sheet size 4½ x 4½", 500 sheets/roll, 24 rolls/case. Fort James brand. (124-90).

**No. 1D508.** Shpg. wt. 12.0 lbs. List $22.69. Each.....**$17.96**

**No. 1D509 Envision® Acclaim® Economy Jumbo Roll Tissue.** Jumbo rolls have more feet per roll than standard rolls. These Jumbo 9" rolls last up to six times longer than standard tissue rolls. Fewer roll changes mean reduced labor and maintenance costs. 1000 ft., 2-ply, four rolls/case. For use with dispenser No. 2U256. 1⅝" core. Fort James brand (121-90).

**No. 1D509.** Shpg. wt. 10.0 lbs. List $28.48. Each .....**$22.63**

### ENVISION® FOLDED TOWELS

**No. 1D495 Envision® Preference® Ultra Premium C-Fold Towels.** These premium soft and absorbent C-Fold Towels feature a unique patented honeycomb emboss design and two heavy paper plies. Offer your guests, tenants and customers the ultimate in luxury. Sheet size 10¼ x 13¼", 120 towels/sleeve, 12 sleeves/case. For use with dispenser No. 4CJ95 (white) or No. 1CF38 (chrome). Fort James brand (254-90).

**No. 1D495.** Shpg. wt. 17.0 lbs. List $32.29. Each .....**$25.55**

**No. 1D505 Envision® Preference® Ultra Premium Multifold 2-ply Towels.** Feature a unique, patented honeycomb emboss that gives these premium towels a thick, luxurious and soft-to-the-hand feel. Sheet size 9¼ x 9½", 125 towels/sleeve, 8 sleeves/case. For use with dispenser No. 4CJ95. Fort James brand (241-90).

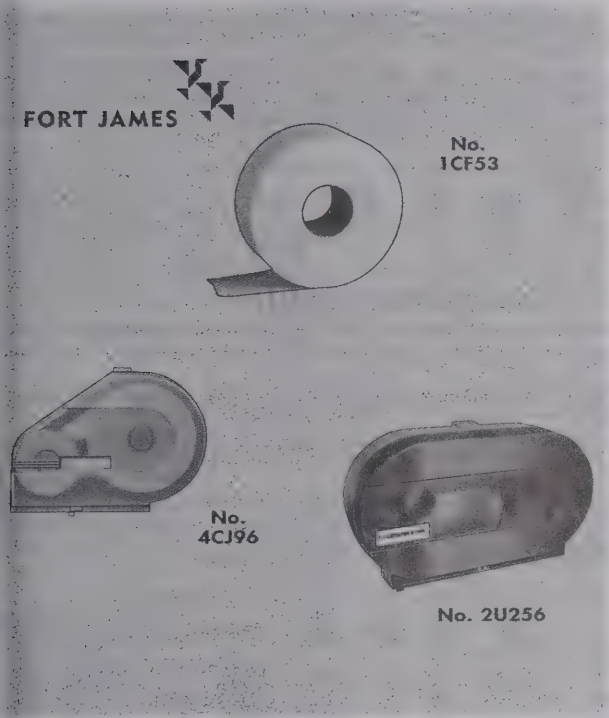
**No. 1D505.** Shpg. wt. 7.1 lbs. List $17.10. Each .....**$13.55**

### ENVISION® ROLL TOWELS

**No. 1D506 Envision® Acclaim® Natural Hardwound Roll Towels.** Economical, lightweight, natural colored 350 feet roll towel. Standard size rolls. Six 350 ft. rolls/case. 7⅞" wide. 1½" core. For use with dispenser No. 2U235 (smoke gray) or No. 2U236 (beige). Fort James brand (268-90).

**No. 1D506.** Shpg. wt. 17.0 lbs. List $28.32. Each .....**$22.40**

**No. 1D507 Envision® Preference® Ultra Premium Hardwound Roll Towels.** Offers the ultimate in softness and absorbency. Ideal for upscale facilities with high traffic washrooms. Six 350-ft rolls/case. 7⅞" wide. 1½" core. For use with dispenser No. 2U235 (smoke gray) or No. 2U236 (beige). Fort James brand (269-90).



**No. 1D507.** Shpg. wt. 24.0 lbs. List $37.40. Each .....**$29.60**

**No. 1D504 Envision® Preference® Perforated Roll Towels.** Excellent 2 ply towel is strong and absorbent, 100 sheets/roll, sheet size: 11 x 8.8". 12 rolls/case. 1⅝" core. Fort James brand (265-90).

**No. 1D504.** Shpg. wt. 9.0 lbs. List $23.69. Each .....**$18.77**

# JUMBO ROLL TOILET TISSUE DISPENSING SYSTEM, FACIAL TISSUE & TOILET SEAT COVERS

## ENVISION® Acclaim® ROLLSAVR® JUMBO ROLL TOILET TISSUE DISPENSING SYSTEM

**Jumbo roll tissue.** Soft, facial quality toilet tissue available in one and two-ply 9" and 11¾" diameter rolls. Jumbo rolls have more feet per roll than standard rolls. 9" rolls last up to six times longer and 11¾" rolls last up to 10 times longer than standard rolls. Fewer roll changes mean reduced maintenance costs. 3" core. Sold in cases.

**Sleek, simple design** of this dispensing system complements any washroom. Formed of high impact, smoked grey plastic, the dispenser accommodates one and two-ply rolls.

**Easy installing, easy dispensing.** Dispenser has three-sided, serrated edge so tissue can be torn off at any angle. Convenient design allows dispenser to be mounted on either side of washroom stall.

**Total traffic managing system** for high traffic areas. Dispensing system can reduce maintenance costs, stub roll waste, pilferage, and tissue run-out.

**Single-handed operation** for faster roll changes. See-through door allows maintenance personnel to monitor roll tissue supply at a glance.

**Security** comes from a special locking mechanism providing smooth, long-lasting operation reducing vandalism and pilferage.

# COMPACT™ CORELESS BATH TISSUE SYSTEM

**Compact™ Coreless Bath Tissue System** offers double, or even triple, the capacity compared to standard 500-sheet rolls, in a traditional look and user-friendly dispensing system that customers are comfortable with.

**Compact™ Coreless Bath Tissue:** No core in this roll, so there's more room for soft, absorbent bath tissue. You get 1000, or 1500, 2-ply sheet instead of the 500 in a standard size roll. Increase service intervals between roll changes, while being easy to handle.

**Compact™ Coreless Bath Tissue Dispenser:** These two roll dispensers are available in a variety of styles that fit with any decor. The capacity of a Compact Covered Dispenser is equal to a 9-inch single giant roll system, and takes up less space. Covered dispensers allow for complete one-at-a-time roll usage, while protecting the spare roll.

**Compact™ Coreless Adapter Spindles:** Double the capacity of existing universal bath tissue dispensers. These spindles adapter kits can turn conventional size roll dispensers into a Compact Coreless Bath Tissue System.

## BIGFOLD® TOWELS

Soft, absorbent towels specially design to unfold completely right form the towel dispenser. Allows a larger area for more effective hand drying per sheet. Big Fold Towels are big on savings, as much as 20% over C-fold towels. They fit in your existing C-fold cabinets, which reduce change over costs. Towels dispense one at a time, so less waste occurs from fall out or other dispensing problems. Helps to reduce maintenance cost by saving time and reducing the number of trips to refill dispensers, towels are easier to load, and more towels fit in the cabinet than C-folds. Uses dispenser No. 4CJ95.

# DISPOSABLE WIPERS

## LIGHT-DUTY PRECISION WIPES®

- **Lower lint count when dispensing**
- **Soft, nonabrasive finish**
- **Anti-static polyshield reduces lint and protects wipers**

Both wipes deliver quality performance in basic wiping situations. 4½ x 8¼" wipes are specially designed for smaller surfaces and light touch-ups. Precision Wipes in standard 15 x 16¾" sheets are for general wiping. White color.

## MEDIUM-DUTY PRECISION WIPES®

- **2-ply and soft finish for extra strength, absorbency and protection**
- **Extra soft finish for use on delicate surfaces**

Paper wiper with extra soft finish for use on delicate surfaces. Spill-resistant, pop-up box features anti-static polyshield that protects against static electricity build-up and reduces lint generation during dispensing. White color.

## WETTASK® REFILLABLE WIPING SYSTEM

Reduces the risk of cross-contamination by delivering a fresh, clean wiper each time. Simply load the bucket with WetTask® wipers, pour chemical solution of your choice over the roll of wipers to a preferred level of saturation, then thread wiper through the opening of the lid for continuous, one-at-a-time dispensing.

- **Utilizes high-density polyethylene bucket dispenser**
- **Reduces total solvents used, and reportable VOCs**
- **Provides consistent saturated wiper each use**
- **Tailor your cleaning solvent type and usage to your need**

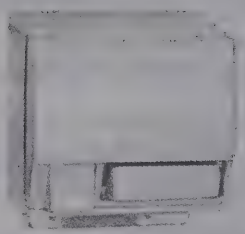
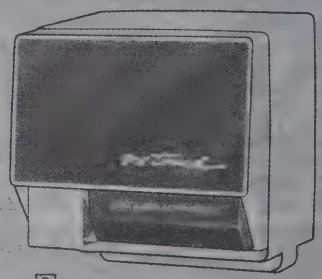
# WARM AIR HAND DRYERS

WORLD® DRYER®



A No. 5W630

E19860



B No. 6H009

C No. 5W634

Replacement Parts Available
1-800-323-0620

D No. 6H010

Hand dryers can save 90% of the cost of paper towels, including storage, disposal, and related plumbing costs for clogged drains. World warm air dryers are clean, sanitary, and reduce wastebasket overflow. Push-button or automatic. Registered to ISO 9002.

### PUSH-BUTTON DRYERS

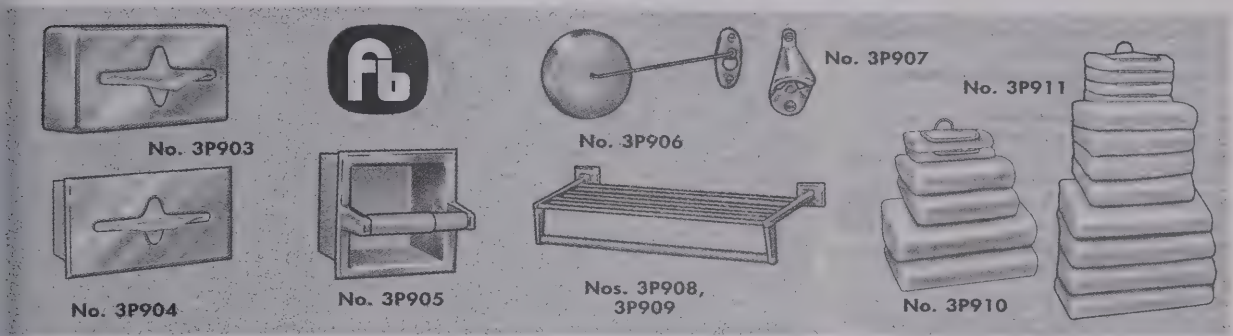
Push button to start dry cycle; cycle runs for 30 seconds. Mechanical timer withstands heavy usage.

### AUTOMATIC DRYERS

Dryers turn On automatically when hands are placed under nozzle; dryer turns Off when hands are removed. Clean and hygienic; hands touch nothing after they are cleaned. Energy-saving dryer is never left running. 10-Year parts warranty.

### MODEL "A" DRYERS

- **Heavy-duty construction with 1/4" thick cast iron cover**
- **Porcelain enamel finish won't break, dent, or scratch**
- **10-Year parts warranty**
- **Well-suited for heavy industrial plants, office buildings, schools, fast food restaurants, park and recreation facilities, and theaters**
- **Surface mount**



### AIRSPEED DRYERS

- **Durable 1/8" thick diecast zinc cover**
- **Triple-plated, brushed chrome finish hides smudges and fingerprints**
- **5-Year parts warranty**
- **Economical and well suited for lighter usage: light industrial facilities, office buildings, warehouses, churches, laboratories, hospitals, and day care centers**
- **Surface mount**

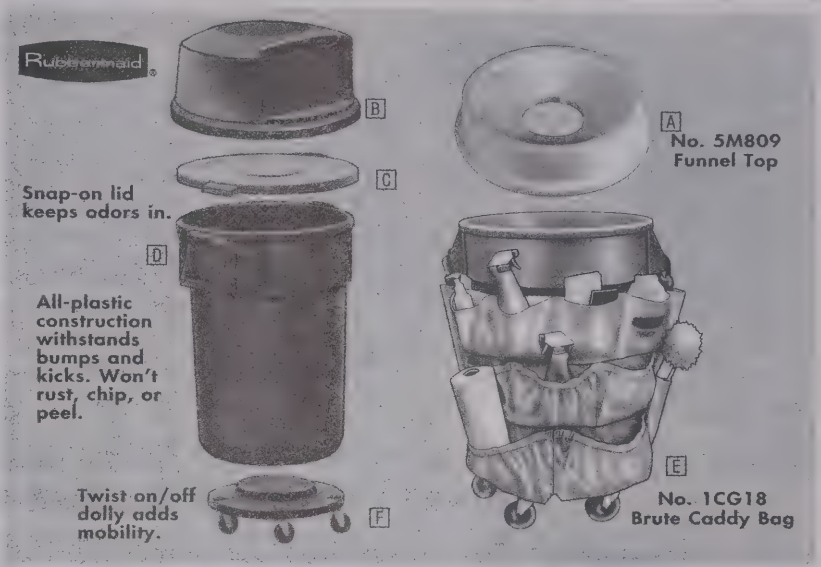
# BRUTE® ROUND CONTAINER SYSTEMS

Rugged, all-polyethylene construction withstands tough use and temperature extremes. Won't rust, leak or dent. Seamless construction permits easy cleaning. Rim and base reinforced for added durability. Built-in handles provide non-slip lifting. Molded base grip allows for easy, two-handed lifting. Gray, white and yellow Brute® containers are USDA approved and NSF tested/certified.

### A ROUND BRUTE® FUNNEL TOP

The funnel-top design guides refuse into the container and out of sight. 6⅞" center hole dia.

### B DOME TOPS (Round Styles)



Smooth, light weight, strong surface is made of durable Structural Web construction. Structural Web process allows dome to have an upscale smooth gloss finish that is CSFM fire rated. Swing self-closing lid fits 32, 44, 55 round Brute® Containers. Dome tops also fits 55 gallon steel drums.

### C FLAT LIDS

Resist cracking and discoloration from exposure to sunlight. Recessed lid design allows easy stacking of containers. Contoured lids prevent moisture accumulation. Snap-on lid keeps odors in. 10, 20, 32, 44, and 55-gallon capacity.

### D ROUND BRUTE® BASES

Well-suited for restrooms, cafeterias, factories, hospitals. Crush resistant construction makes containers tough enough to withstand crushing blows.

### E BRUTE® CADDY BAG

Quickly turn Round Brutes® into a mobile cleaning cart. Multiple pockets provide easy access to cleaning tools and supplies. Elasticized holding straps fit firmly and easily on 32 and 44 gallon containers.

### F BRUTE® CASTERED DOLLY

Twist-on, twist-off, 5-wheel round dolly fits 20, 32, 44, and 55-gallon round bases. Structural foam construction. 300 pound capacity.

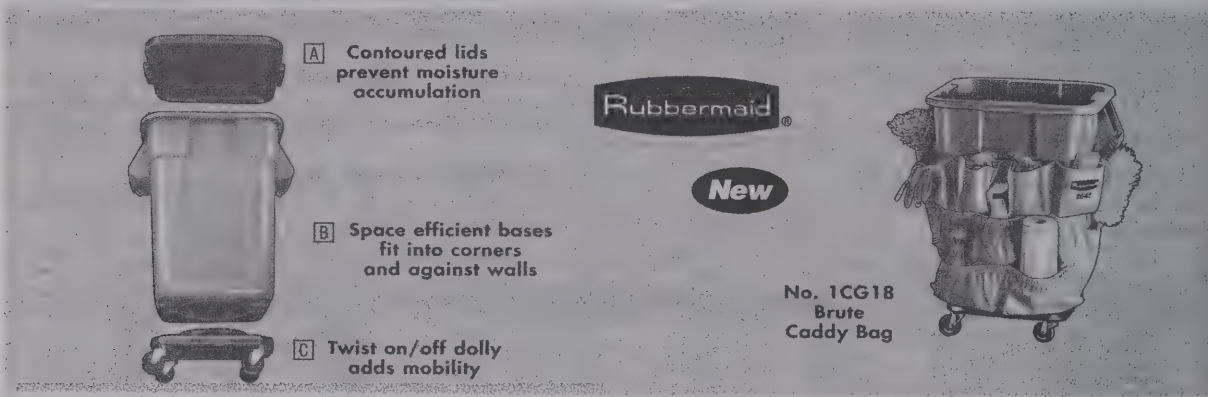
# CONTAINER SYSTEMS



## BIG WHEEL SQUARE BRUTE® CONTAINER SYSTEMS

Rubbermaid's 50 and new 95 gallon Square Brute® Big Wheel containers are perfect for mobile collection and general refuse or material handling. 50 gallon container has built-in 8" rubber wheels that provide easy, stable mobility, particularly when negotiating stairs. Attached, tight fitting, hinged lid swings back and locks out of way when opened. Molded in handle provides easy turning. 50 gallon Square Brute® Big Wheel container is USDA approved and NSF tested/certified.

95 gallon Square Big Wheel container has 12" plastic recessed wheels and axle caps eliminate interference and guard against breakage while transporting to collection areas. Integrally molded in lift points have reinforced ribbing for strength and are designed to evenly distribute loads throughout the container body. 95 gallon container is compatible with all automated and semi-automated lifting systems with municipalities for curb side trash collection. Both containers are made of seamless, leakproof polyethylene construction that doesn't rust, dent, or corrode.

## SQUARE BRUTE® CONTAINER SYSTEMS

Square Brute® shape holds up to 14% more capacity in the same space as a round container. Fits into corners, against walls, or under counters. Containers lock side-by-side to conserve space. Square shape is more stable when container is placed on its side for trash removal or leaf pickup. Gray, white and yellow Square Brutes® containers are USDA approved and NSF tested/certified.

### A FLAT LIDS and DOME TOP

Polyethylene construction with ultraviolet inhibitors prevents cracking and discoloration from exposure to sunlight. Recessed lid design allows easy stacking of containers. Contoured lids prevent moisture accumulation. 28 and 40-gallon capacity.

### B SQUARE BRUTE™ BASES

Space efficient—up to 14% more capacity than conventional round containers. Fit into corners and against walls. Store under counters and in closets.

### C CASTERED DOLLIES

Four-wheel square dolly fits 28 and 40-gallon square bases. 300 pound capacity.

### BRUTE CADDY BAG ACCESSORY

Quickly turn your Square Brutes into a mobile cleaning cart. Multiple pockets provide easy access to cleaning tools and supplies. Elasticized holding straps fit firmly and easily on 40-gallon containers.

## ADVANTAGE™ CONTAINER SYSTEM

For office cleaning, food service operations, retail stores, hospitality and lodging, and other medium duty refuse needs. Ergonomically designed for easy handling, improved safety and efficiency. D-shape allows can to fit securely against body when carrying for improved leverage and reduced lifting strain. Stores flat against walls or in closets for space efficiency.

Side mounted, hinged lid system remains attached to container for continuous hygiene and sanitation. Large handles are ergonomically designed for comfort and control. Large molded-in handle of base provides additional leverage for lifting and emptying. Patented snap-lock dolly system releases container with one step, eliminating awkward body movements. Non-marking casters reduce floor cleaning rework and provide quicker operation.

No. 1CG18 Brute Caddy Bag turns the Advantage System into a mobile cleaning cart. Elasticized holding straps fit firmly and easily on 32-gallon Advantage container.

# INDOOR WASTE RECEPTACLES, SELF-CLOSING CONTAINER, AND OILY WASTE CONTAINERS

## INDOOR WASTE RECEPTACLES

Square, rectangular, and round containers available in a variety of shapes, colors, and sizes. Ideal for workstations, copiers, vending areas, restrooms, lobbies, and entranceways. Durable and crack resistance. Choose either free swinging utility lids that open at the lightest touch for hand-free trash collection and quickly close to keep contents from public view, or the Style Line dome lids which have an upscale appearance and are rated by CFSM for fire rating.

**NOTE: In table below, tops keyed with the letter A fit bases keyed with the letter B; C tops fit D bases; E tops fit F bases; G tops fit H bases; and I tops fit J bases.**

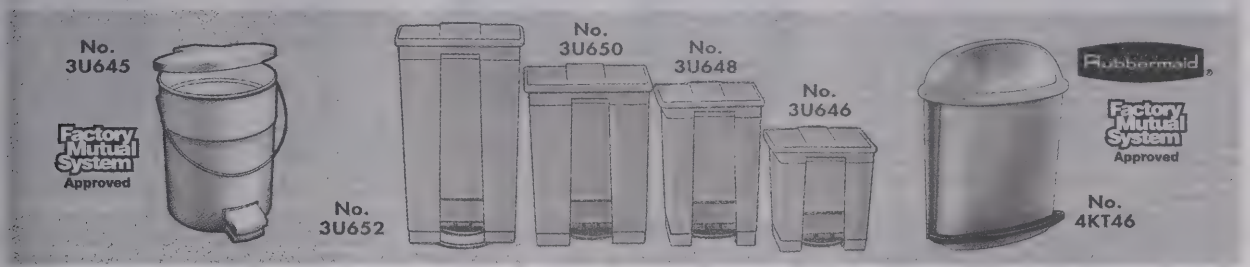
## WASTEMASTER™ SELF-CLOSING CONTAINER

Use fire safe steel receptacle in offices, corridors, washrooms, cafeterias, factories, stores, medical facilities, and schools. Full length piano hinge securely joins top to steel base. Steel guide rods prevent top from swinging backward and holds top at a 90° angle for easy bag removal. Folding steel retainer bands hold poly bags securely. Two 6 x 9½" disposal openings are protected by springless self-closing push door. Stainless steel legs have nylon buttons to protect floors. 24 gallon capacity. White Powder-Coated finish. Meets OSHA standards. 14" sq. x 35½"H. United brand (T1424).

**No. 4HC30.** Shpg. wt. 32.0 lbs. List $151.64. Each.....**$128.95**

- FM Approved for safe disposal of solvent soaked rags and other combustible materials

## OILY WASTE CONTAINERS



- **All plastic construction for use in spark free environments—won't rust, corrode, or leak**
- **Pedal operated lid allows free operation to open to 60° allowing easy access; tight fitting lid closes automatically**

# PLASTIC STEP-ON CANS

**4½, 8, 12, 18 and 23-Gallon Plastic Step-On Cans.** Red or white foot-pedal operated containers with self-closing lids keep hands clear of infectious waste, reducing the risk of contamination. Rugged plastic construction won't chip, dent, or rust. Heavy-duty pedal assembly makes for quiet, durable operation. Tight-fitting lid with built-in deodorant holder works along with a leak-proof base to control the spread of germs. 4½ gallon model features a removable rigid liner with bail. 23 gallon has stainless steel wheel assembly for quick and easy transport. The red receptacles comply with the OSHA Bloodborne Pathogens Regulation, approving the use of red closeable, leakproof containers for the temporary containment of infectious waste. FM Approved for fire safety.

**14.5 gallon, Pedal Rolltop Containers** are available in white, red, and beige and are foot-pedal operated with self-closing lids to help keep hands clear of infectious waste, reducing the risk of contamination. Rolltop lid design opens without drawing odors into the air and eliminates the need for overhead clearance. Slim, oval shape fits into confined spaces, and rugged plastic construction won't chip, dent, or rust. Complies with OSHA's requirements and is FM Approved.

# SMOKING URNS AND WASTE RECEPTACLES

## FLOOR/WALL SMOKING URNS

**Floor and Wall Smoking Urns** resist rust, dents, and warping. Will not mark floors and walls. Urns are made of long-lasting materials, and have practical and functional designs that compliment their surroundings. Wall models include fasteners and instructions, one-piece self-closing top, and easy-to-empty, easy-to-clean insert cups. Floor models have a large-capacity metal ashtray top which lifts off for quick emptying and cleaning.

Ash/Trash containers combine refuse collection and smoking control. Rugged construction resists dents, scratches, and weather; perfect for entrances and smoking areas. Ashtray can be permanently attached or left unattached for easy lift off maintenance. Available with or without trash doors. Models with doors are FM Approved.

## NATIONWIDE BRANCH NETWORK WITH LOCAL ACCESS IS YOUR SHOPPING ADVANTAGE

**Grainger's network of more than 350 local branches provides you nationwide access to our broad selection of product offerings. And with 30-minute "Will Call" service or 24-hour shipping on in-stock items, help is as close as a phone call away. Check the Branch Locations listed in the front of this catalog for the location closest to you.**

# RECYCLING CONTAINERS

**Durable plastic containers** promote fast, easy, efficient recycling. "We Recycle" or "White Paper Only" recycling information imprinted on containers. Variety of sizes, shapes, and tops to fit your recycling needs. Containers and tops sold separately.

## DESK-SIDE CONTAINERS

**Soft-sided wastebaskets are** well-suited for recycling white and colored paper in the office.

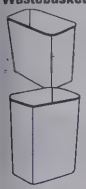
## STATION RECYCLING CONTAINERS

**Slim Jim, square, and round containers and tops** have the capacity to handle areas of high paper generation near copiers, mailrooms and high bottle/can usage in cafeterias and vending areas. Recycling Box handles computer paper and glass/cans. No. 3XH25 Receptacle Dolly makes it easy to transport Slim Jim containers from station to station or to central collection containers.

## COLLECTION CONTAINERS

Used for collecting recycled materials from individual recycling containers. Brute dolly No. 5W007 fits round Brute containers for easier transport.

## TRANSPORT CONTAINERS



Move recycled product easily from work area to dock recycling collection stations and bailers with Cube or Tilt truck. Will fit through standard doorways and elevators.

# TRASH CAN LINERS

## TOUGH GUY TRASH CAN LINERS

**TOUGH GUY TRASH CAN LINER ADVANTAGES:**

- Made from top quality Linear Low Resins
- Star seal bottoms are virtually leakproof
- Available in 5 strengths tailored to meet your needs
- Provide maximum film strength
- Packed in convenient cartons that convert quickly to easy-to-use dispensers

**Use Rating within type of liner:**
LW = Lightweight Refuse
M = Medium Refuse
H = Heavy Refuse
H+ = Heavy Plus
XH = Extra Heavy Refuse

**BLIZZARD SERIES.** White color. For extra heavy loads.

(†) Note: these liners are manufactured with Linear Low Density polyethylene (LLDPE) which is 27% stronger, 10 times more puncture proof, and 6½ times more tear resistant than regular type low density polyethylene (LDPE). When comparing gauge thickness LLDPE liners will be less thick than LDPE liners without affecting bag strength.
(‡) Gusset Seal Construction.

# TRASH CAN LINERS AND DISPENSER

## TOUGH GUY TRASH CAN LINERS

**CRYSTAL SERIES.** High density liners feature a unique blend of 90% linear low (HPDE) and 10% linear low (LLDPE) resins for superior puncture resistance and strength. Prime virgin resins for added strength. Natural high density liners are USDA and FDA approved for food containment.

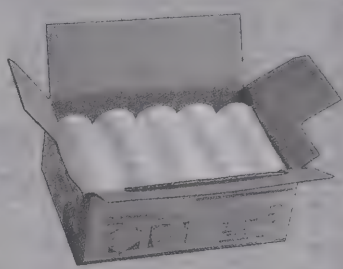
## ROL-OUT® CORELESS ROLL LINERS



No. 3U765 Dispenser

**ROL-OUT TRASH CAN LINER ADVANTAGES:**

- 100% prime virgin resin
- Thinner, stronger films
- Superior bag construction with star seal bottom; no gussets or side seams
- Better inventory control
- Convenient dispensing with easy-to-find bag opening
- Consistant quality time after time

**Coreless roll liners** provide a user friendly system for more convenient and efficient dispensing and inventory control. 100% prime virgin resin polyethylene film results in stronger, more dependable trash bags. These films are thinner, but stronger than film produced from blended polyethylene. All linear low (LLDPE), high density (HMW-HDPE), and Super-Flex are manufactured of prime virgin resin polyethylene.

**Positive source reductions**—100% prime virgin resin trash liners use less raw material and energy to produce and place less solid waste into landfills. USDA and FDA approved on clear and white colors. State of the art construction: star bottom seal, no side seams, full dimension. All cases of liners are labeled with size, gauge, case count and poly weight. All liners comply with ASTM standards.

### USE RATING WITHIN TYPE OF LINER

| Use Code | XXXH+ | XXXH | XXH | XH | H | M | LW |
|---|---|---|---|---|---|---|---|
| Bag Holds | up to 200 lbs. | up to 120 lbs. | up to 80 lbs. | up to 65 lbs. | up to 50 lbs. | up to 35 lbs. | up to 20 lbs. |
| Type of Trash | Sharp, heavy construction. Meets highest OSHA Standards | Sharp, heavy construction, metal scrap, masonry | Sharp, heavy, irregular waste, abrasive materials | Most refuse, landscape items, sharp, light metal and wood | General refuse, cans, bottles, glass (unbroken), limited sharp | General refuse, paper, magazine, limited cans, limited wet | Paper, tissue, light, non-sharp, non-wet |

## ROLL LINER DISPENSER

- **The unique design dispenses one liner at a time**
- **Durable, easily filled, can be wall or cart mounted for convenient use**
- **White color, baked enamel**

**No. 3U765.** Shpg. wt. 2.8 lbs. List $24.08.
Each ..... **$18.31**

**A FULL LINE OF TRASH CANS AND RECEPTACLES IS AVAILABLE**

**See pages 1919-1928**

# TRASH CAN LINERS-CORELESS ROLLS

## ROL-OUT CORELESS ROLL LINERS

**PREMIUM SUPER-FLEX LINERS.** New technology resin gives this film exceptional puncture resistance and stretch. The strength is equal to bags 80% to 100% thicker. For the toughest, most demanding applications.

**PRIME TECH LINERS.** Linear low density industrial standard for typical trash. Stretchable and tear resistant.

**NU TECH LINERS.** High density liners with excellent load strength. Ideal for heavy trash (no sharp objects).

# HOSPITAL LINERS

## ROL-OUT HOSPITAL CAN LINERS

- Printed waste bags are clearly identified for specific waste disposal in both English and Spanish
- Printed with waterbased inks only, in random repeat pattern
- Liners come in bright colors made from Heavy Metal-Free (HMF) pigments: RED for Infectious Waste, YELLOW for Infectious Linen, WHITE for Non-Contagious Linen, GREEN for Soiled Linen, BLUE for Soiled Linen
- Easily identified by the use of the Universal Biohazard Symbol

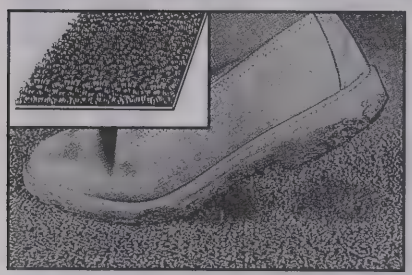
# FLOOR MATTING

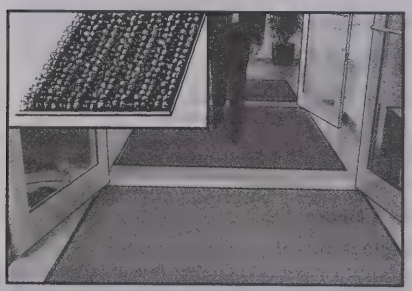
## NOTRAX STAGES™ ENTRANCE SYSTEM



### Three-Step, Color Coordinated Entrance Matting System

Preventive maintenance begins at the front door with the right floor matting in the right places. Introducing Stages™ Entrance Matting, the first color-coordinated matting system designed to stop dirt and grime before they enter your facility.

Engineered for performance, Stages™ Entrance Matting begins outdoors, with Prelude Scrape Clean™ aggressively scraping dirt and debris from shoes. One step inside and Encore™ takes over, scraping dirt *and* absorbing moisture. Ovation™ completes the process, brushing residual dirt and drying remaining moisture.



With the right matting in the right places you can trap and hide dirt—keeping it out of your building. The end result? Lower maintenance costs, protected floors and attractive entryways.

### NOTRAX PRELUDE SCRAPE CLEAN™†

- Durable outdoor entrance mat — coarse fibers scrape debris
- Vinyl back prevents shifting
- Nonabsorbent face yarn can be used for inside or outside entrances
- Loop-twist pile holds dirt below the surface • 1/4" thick

## NOTRAX CUSHION-STAT™

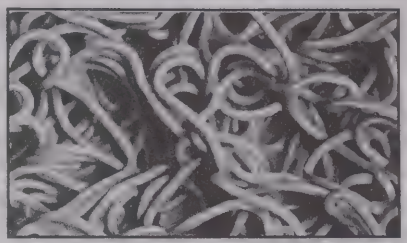
- Reduces uncontrolled static discharge
- Eliminates the hazards of losing data or damaging equipment
- Vinyl sponge relieves leg and back fatigue, improves efficiency
- All sides are safety beveled to reduce tripping hazards
- 3/8" thick • Brown color

**Applications**
- Computer Work Rooms/Anti-Static
- Production Lines/ Anti-Static

| Size (Ft.) | NOTRAX Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 2 x 3 | 825S0023BR | 3UM42 | $32.66 | $29.40 | 5.0 |
| 3 x 5 | 825S0035BR | 3UM43 | 81.76 | 73.60 | 13.0 |

## NOTRAX SWITCHBOARD™

- Nonconductive corrugated matting insulates against shock
- Dielectric strength up to 30,000 volts/AC RMS
- Recommended maximum use 17,000 volts/AC RMS
- Conforms to ANSI/ASTM D-178 J6-7 Type 2, Class 2
- Meets OSHA requirements
- 1/4" thick • Black color



**Applications**
- High Voltage Equipment

| Size | NOTRAX Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 3 x 12 ft. | 830C0036-12 | 5T434 | $218.04 | $196.25 | 61.0 |

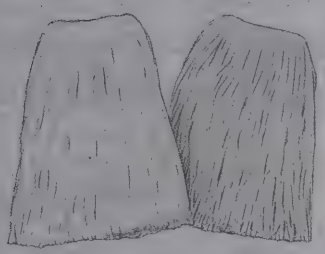
## FINISH MOPPING SYSTEM



- **Flat mopping system reduces labor costs**
- **Provides 100% floor coverage**
- **No splashing; easy to handle**

Delivers 200-300 sq. ft. of coverage with a single mop load compared with 100 sq. ft. average coverage with a traditional mop using a wringer/bucket combination. Eliminates need for a wringer. Finish System mop fits snugly into bucket, absorbing right amount of finish needed for a smooth even finish coat. Two sediment screens inside bucket keep dirt down in bucket, out of finish and off floors and finish mop. When mopping is done, simply leave mop head and frame in bucket and snap on the air-tight lid. Keeps mop and material fresh until next use.

Finish System Starter Kit includes bucket, lid, two sieves, four casters, six mop heads and frame. Requires handle No. 4W320, sold separately. Rubbermaid brand.

# MOP WRINGERS AND BUCKETS

A No. 2W532

B No. 2W531

## PLASTIC MOP WRINGERS

Maximum water evacuation with little effort. 25-35% lighter than metal wringers. All styles feature non-slip handles, corrosion resistant bodies and hardware, and durable gearing for long, safe use. Mop wringers feature smooth, non-porous skin that stands up to harsh cleaning chemicals and cleans easily to maintain appearance.

### A DOWNWARD PRESSURE WRINGERS

Accommodate all mopheads (including those with rectangular mophead gripper). Heavy-duty use. Self-meshing, self-lubricating teeth for smooth operation. Wringer channels water directly into bucket. Extra high back to reduce spillage.

### B SIDEWARD PRESSURE WRINGERS

Tension spring linkage with enhanced water evacuation design for general use applications.

| Key | Wringer Pressure | Mop Capacity | Color | Rubbermaid Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|

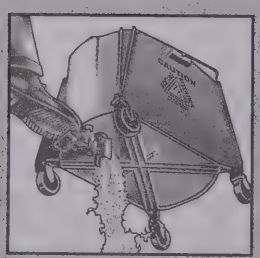
## PLASTIC MOP BUCKETS

Wide stance and low center of gravity for stable, easy movement over uneven floor surfaces or doorways. Feature multilingual "Caution" imprint on side.

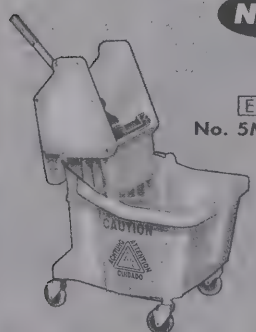


C No. 3U665

C **35 qt. capacity.** Structural web construction combines impact resistance of structural foam with a smooth skin for easy cleaning. Low front design minimizes mop lift into bucket. High back with top and bottom handles, and large spout with ledge detail allow for easier, safer dumping. Built-in floor scraper holder. Single bail has ergonomic grip and stops for easy lifting and handling. 3" all plastic, non-marking, swivel caster feature a removable axle for ease of cleaning and maintenance. Rubbermaid brand.

**44 qt. capacity.** Duramold plastic body resists denting, chipping, and peeling. Resists corrosion by cleaners, chemicals, germicides, waxes, and water. Features 3" non-marking swivel casters. Rubbermaid brand.

## EZMT™ MOP BUCKET



D No. 5M888

D EZMT™ bucket eliminates the bending and heavy lifting involved with emptying a mop bucket. Foot operated bottom drain mechanism releases water into floor drain. Sediment screen traps dirty residue, helping keep mop and water cleaner longer. Rubbermaid brand.

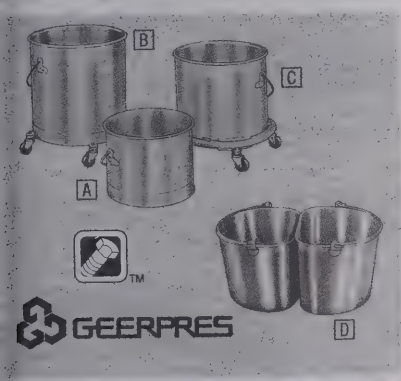
## GALVANIZED MOP WRINGERS



### A ZINC ELECTROPLATED DOWNWARD PRESSURE WRINGERS

**1-stroke operation** pushes water straight into bucket. All-metal, hot-dipped galvanized, welded and riveted construction. Solid-steel gear shaft, double-staggered metal gears for slipproof operation. Long-wearing steel bushings. Ergo wringers are ergonomically designed to reduce repetitive strain injuries. Geerpres.

### B SIDE-SQUEEZE WRINGER

**Heavy-gauge** zinc electroplated steel wringer. Resists corrosion. Highest water extraction, hopper cap. (442 cu in.) Large drain openings, handles up to 40-oz. mops. Special linkage system and 5/8" solid steel shaft put more force on mophead.

## GALVANIZED MOP BUCKETS

**A thru C 5 and 8 Gallon Round Stainless Steel Buckets.** Rolled, open rim reinforces buckets and prevents accumulation of dirt and bacteria. 1-piece design prevents leaks and makes bucket easy to sanitize. Bail ears are positioned below buckets rim to avoid interference with wringer placement.

**D Half-Round Stainless Steel Buckets.** Fastened together by an overlapping lip for stability. Feature tapered sides for nesting, compact storage. Permanently etched gradations for easy, accurate mixing, and safe, easy lift bails. Each bucket has a 5 gallon capacity. Geerpres brand.

## GALVANIZED MOP BUCKETS

### 8 GALLON ROUND BUCKET

**8 Gallon Round Bucket.** More usable capacity than oval buckets, more durable than plastic buckets. Hot-dipped galvanized after bucket is formed. Zinc coating prevents leaks and corrosion. Bails are welded below rim to prevent interference with wringer. 1/8" thick steel reinforcing band protects bucket rim. 2" casters. Geerpres brand.

### 26 QUART OVAL BUCKET

**26 Quart oval bucket.** 24-gauge corrosion-resistant, pregalvanized steel. Heavy corrugation for added strength. Mechanically locked, hand soldered seams withstand the abuse of heavy mopping. Reinforced top ring, riveted bail ears and embossed measurement gradations. Use with No. 2W316 side-squeeze top ringer (see listing above). White brand.

# FLOOR BRUSHES AND STREET BROOMS

## BRUSH & BROOM BLOCK MATERIALS

### PERMA-SWEEPS™

High-density foam block brush with long-wearing synthetic fill. Acid, solvent, oil, fungus and liquid resistant for wet or dry sweeping applications. Rugged synthetic block will not warp, crack, split, or house harmful bacteria. Excellent for hospital, laboratory, and food service applications. All Perma-Sweep™ 18 and 24" brushes include guaranteed replacement against cracking, warping or breaking, when used with handle No. 3H389 (See page 1947).

### WOOD BLOCK SWEEPS

Hardwood block with natural fiber fill for general purpose sweeping. Natural fiber retains liquids, performs well in wet applications. Hardwood block is kiln dried, finished and lacquered to resist moisture and cracking.

### FLOOR BRUSHES—FINE SWEEPING APPLICATIONS

- **Scratch-free sweeping on wood, ceramic tile, linoleum, smooth concrete, marble, and polished surfaces**
- **For use with threaded handles Nos. 1A839, 3H384, 3H389, 3U790. See page 1947**

# FLOOR SQUEEGEES, PLASTIC PAILS AND BASEBOARD CLEANING SYSTEM

## FLOOR SQUEEGEES

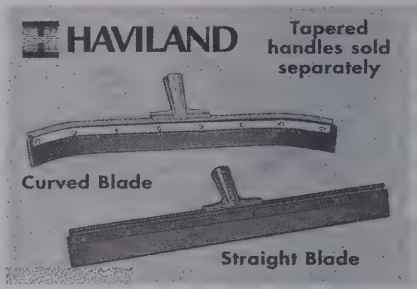
**Neoprene Rubber:**

- For garages, service stations, and heavy industrial applications
- Long wearing, abrasion resistant

**Non-marking Rubber:**

- For hospitals, schools, restaurants, and food processing applications
- Resists most animal and vegetable products and by-products

**Sponge Rubber:**



- For uneven and grouted floors
- Quick dry on smooth surfaces

**Curved Blade:**

- Allows greater control when moving large amounts of liquids

**Straight Blade:**

- Push or pull in cleaning applications
- For cleaning against walls and between objects

# SWEEPER, DUST PANS, CLOSET ORGANIZERS, AND CADDIES

## DUAL ACTION FLOOR SWEEPER

**Dual Action Commercial Sweeper** has a rugged commercial design for years of reliable use. Well suited for sweeping floors and carpets in lobbies, hallways, offices, theaters, and most other public areas.

- **Two brushes: natural boar brush for fine cleaning, crimped nylon brush for heavy debris**
- **Dual-debris canisters with one-touch cleaning doors**
- **Wide 7" sweeping path covers larger areas quickly**
- **Low profile cleans under furniture**
- **Soft bumper protects furniture and corners**
- **4 natural bristle corner brushes**
- **Soft rubber wheels and brushes conform to floor surface**
- **Rubbermaid brand (4213)**

**No. 4HC27.** Shpg. wt. 4.8 lbs. List .....$70.70.
Each.....$56.60

## DUST AND LOBBY PANS

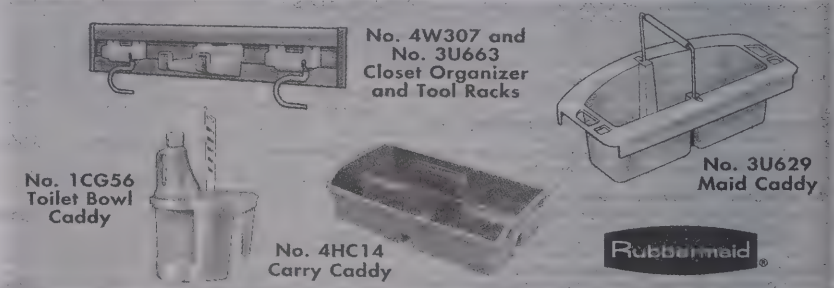
### RUBBERMAID MODELS

**Heavy-Duty Dust Pan.** One-piece molded plastic eliminates sharp edges and maintains a straight edge on floor for more efficient pick-up. Has molded-in teeth for counter dusting/cleaning. Can be used with broom for most commercial and industrial floor sweeping.

**Lobby Dust Pan** is ruggedly constructed. Strong 36⅝" aluminum handle swings freely or snap-locks into upright position. ABS pan and scuff guards protect floors. Quiet, lightweight, and rustproof. Use with a broom to collect floor sweepings without bending over. For most commercial, industrial, and institutional facilities.

**Lobby Broom** is color coordinated to match lobby dust pan No. 5W637. Use in public areas. Polypropylene bristles won't shed or absorb water, ensuring longer product life. Wood handle painted for user safety. For all floor sweeping applications. 27" handle length, 33" overall length.

### WHITE MODELS



**Janitor Dust Pan** constructed of 20-gauge steel for heavy-duty use. Durable one-piece construction with corrugated ribs for added stiffness and strength. Baked black enameled finish with beveled edge.

**Lobby Dust Pan** for office areas, theaters, or other public areas. Self-opening and closing to provide simple, trouble-free operation. 30" handle. Black enamel finish.

# CHEMICAL PROPORTIONERS AND DISPENSERS

## CHEMICAL PROPORTIONERS

**Hydro Streamlines and AccuDoses™** are non-electric mixing/dispensing systems for centralized and/or point-of-use control. Streamlines and AccuDoses™ offer single or multiple chemical dispensing for multiple applications. Designed and built with quality and efficiency in mind, they offer push button ease, metering tip accuracy, tamper resistance and simple installation. All units feature chemically resistant components with stainless steel or ABS molded cabinets for wide range chemical compatibility and long term durability. Streamlines are built with siphon breakers to protect the fresh water supply from contamination. AccuDoses models have the added protection of air gap eductors to prevent backflow.

- **2 sets of 14 metering tips included**
- **All mounting hardware included**

- **Fourteen color-coded metering tips determine blend proportions. (2 sets included in 2- and 3-button proportioners)**
- **Includes all mounting hardware**

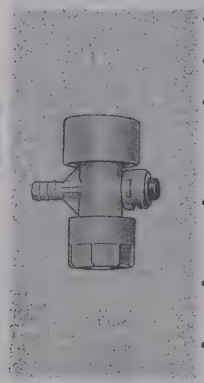
### THE SELECT FOUR PLUS

Two dispensers in one: a single-product system on the left side dispenses at 4 GPM for filling mop buckets or small equipment for floor cleaning applications, while the right half is a 4-product dispenser filling at a 1 GPM rate, great to fill spray bottles for various housekeeping and building service applications. Small enough to fit easily into a janitor's closet or to mount on a rack, yet provides all the dispensing requirements of a comprehensive institutional cleaning regimen. Hydro brand (876).

**No. 3U580.** Shpg. wt. 11.0 lbs. List.....$257.50.
Each.....**$245.00**

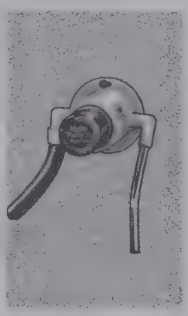
## DRUM MOUNTED LIQUID PROPORTIONER



- **Includes 12 metering tips**

Ideal for use in health care facilities, restaurants, hotels, schools, car washes, supermarkets, service stations, and many other applications. The HydroMaster automatically mixes liquid chemical concentrate with water and dispenses the proportioned solution into any container. It eliminates the mess, guesswork and waste involved with manual mixing. The HydroMaster utilizes the tap water supply and features a standard hose connector. A siphon tube drops through the bung of a chemical drum and draws concentrate through a metering tip to produce the desired dilution ratio. When the drum of concentrate is empty a swivel adapter allows drum changes without disconnecting the water supply line. Hydro brand (206).

**No. 3U581.** Shpg. wt. 2.9 lbs. List .....$60.50.
Each.....**$57.50**

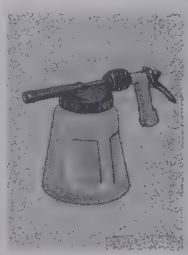


## HYDROFLO FAUCET PROPORTIONER

- **Dispense at the touch of a button**
- **Eliminate manual mixing time**
- **Prevent wasting of concentrate by delivering a predetermined dilution each time**
- **Includes an integral siphon breaker and 14 metering tips**
- **Will not corrode like metal proportioners**
- **Hydro brand (640)**

**No. 3U583.** Shpg. wt. 0.5 lbs. List.....$28.10.
Each.....**$26.70**

## CHEMICAL CONCENTRATE DISPENSERS



**Reliable:** The Hydro-Pump II consistently dispenses 1 oz. per push with water-thin or viscous products. Plunger recovers quickly for the next push. **NOTE:** Not for use with chlorine, iodine, or d-limonene based products.

**Easy to install:** Fits almost anywhere because it's small. Inlet and outlet ports swivel 360° to accommodate any set-up. Pump functions in any orientation (horizontal/vertical). No-drip spout directs discharge to container. Hydro brand (614).

**No. 3U582.** Shpg. wt. 2.0 lbs. List.....$26.95.
Each.....**$25.65**

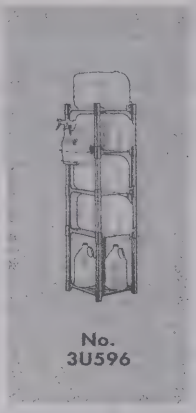
## AUTOMATIC FOAMING HOSE END LIQUID PROPORTIONER

- **14 color coded metering tips included**

Connects to standard hose, operates at normal water pressure. Side handles allow ease of operation.

**Unique Design for Richer Foam.** HydroFoamer's unique injection concept for automatically mixing the proper amount of chemical with air and water maximizes use of the available tap water energy and produces thicker, richer foam for longer soak time.

**Designed for Durability.** Barrel and lid are injection molded of polypropylene for chemical resistance and strength. 96 oz. capacity. Hydro brand (481).



**No. 3U584.** Shpg. wt. 2.7 lbs. List.....$50.70.
Each.....**$48.15**

# PUMPS, TRIGGER SPRAYERS AND BOTTLES

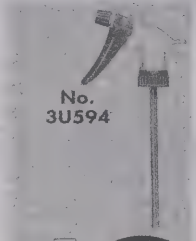
## DISPENSING RACK

**Organizes liquids using minimum space**—uses only 14 x 15½" of floor space, and is less than 5 ft. high. Strong, safe, stable. Easy assembly—snaps together without nuts, bolts or screws. Fully loaded, stores up to 20 gallons of liquid plus supplies. Fill spray bottles without spilling. Designed with 11" extension legs to easily accept 5 gallon dispensing containers. Tolco brand (190165).

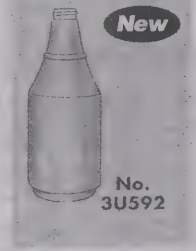
**No. 3U596.** Shpg. wt. 10.0 lbs. List $191.16.
Each.....$95.70

No. 3U596

## WIRE BASKET



Wire basket for storing spray bottles. Use with plastic racks. Tolco brand (190166).

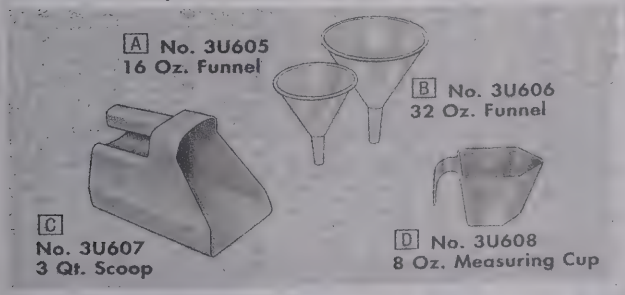


**No. 3U598.** Shpg. wt. 10.0 lbs. List $14.89.
Each.....$11.18

## TRIGGER SPRAYER AND SPRAY BOTTLES

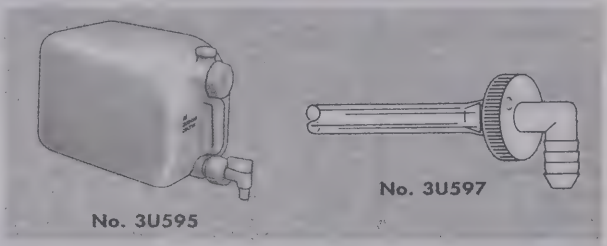
**Versatile Sprayers** handle a variety of liquids. Comfortable trigger-type operation, large spray pattern. Adjust nozzle from fine mist to jet stream for a variety of jobs. Nos. 3U594 and 3U603 fit 24 and 32 oz. bottles. No. 4TH69 for heavy-duty jobs. No. 1CH73 fits 24 oz. bottle; No. 1CH72 fits 32 oz. bottle.

**Round Spray Bottles** in 24- or 32-oz. sizes. Molded oz./ml and dilution scale.



No. 3U594

No. 3U592



| Description | Stock No. | List | Each | Lots 12 | Shpg. Wt. |

## FUNNELS, SCOOP AND MEASURING CUP

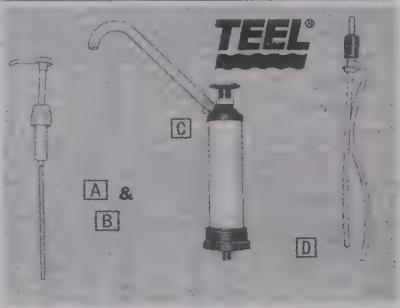
| Key | Description | Tolco Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| A | **16 oz. Plastic Funnel.** 5½" high, 5⅜" diameter top. Natural color. | 240138 | 3U605 | $4.38 | $3.27 | 0.1 |
| B | **32 oz. Plastic Funnel.** 6⅝" high, 6½" diameter top. Natural color. | 240118 | 3U606 | 7.82 | 5.84 | 0.1 |
| C | **3 qt. Polyethylene Scoop.** White. | 240120 | 3U607 | 6.14 | 4.60 | 0.6 |
| D | **8 oz. Polyethylene Measuring Cup.** Oz./ml scale molded inside. | 240121 | 3U608 | 1.40 | 1.05 | 0.1 |

## 5 GALLON DISPENSING CONTAINER

**DURABLE VENTED DISPENSING CONTAINER No. 3U595**

Holds 5 gallons of liquid. Extended faucet to fill bottles and other containers without spilling. Molded graduations. Tolco brand (180160).

**FILLING TUBE ASSEMBLY No 3U597**



Adapts standard 5 gallon dispenser to proportioner discharge hose. Tolco brand (180161).

**No. 3U595.** Dispensing Container. Shpg. wt. 2.5 lbs. List $29.05.
Each.....$21.79

**No. 3U597.** Filling Tube Assembly. Shpg. wt. 0.1 lbs. List $6.12.
Each.....$3.07

## PUMPS

**Plastic Pumps** are designed for durability and long, trouble-free service. Sized to fit containers up to 55 gallon capacity.

| Key | Description | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| A | **1 oz. Plastic Pump.** Senior Rieke adapter to fit 5 gallon pails. 15" tube length | 3U599 | $4.80 | $3.60 | 0.2 |
| B | **1 oz. Plastic Pump.** 38/400 white adapter and return spring. For gallons. Flexible 11" dip tube. | 3U600 | 4.00 | 3.00 | 0.2 |
| C | **Drum Pump.** 3/4 to 2" adapter. 8 oz. per stroke. Polyethylene and polypropylene. Fits 3/4" and 2" drum openings and 5 gallon pails w/Senior Rieke spout. | 1N426 | 14.75 | 10.60 | 0.8 |
| D | **Plastic Siphon Pump** for metal drums. 2" IPS fine-thread adapter. 33" tube, 36" hose | 1N420 | 13.75 | 8.97 | 1.0 |

## PAIL LID OPENER

No. 3U604

Use to open plastic pails and drums. Glass-filled plastic construction. 8" in length. Green. Tolco brand (250131).

**No. 3U604.** Shpg. wt. 0.2 lbs. List $9.80. Each.....$7.32

(*) High Viscosity Coatings will require a pressure feed system for proper paint delivery to the spray gun. Note: Thinning may be required. (●) Best; (◆) Better; (○) Good; NR = Not Recommended. Note: Finish quality is dependent on material, equipment used, and application techniques. Chart provided is for informational purposes only. Consult with owner's manual, sales representatives, or refer to specifications indicated by coating material before beginning operation.

# CONVENTIONAL SPRAY GUNS

DEVILBISS
*The Right Way To Finish*

CONVENTIONAL SPRAY GUNS

Model FLG Spray gun and cup outfits come complete and ready to spray, featuring durable, lightweight engineered resin components which allow compatibility with both solvent and waterborne paints. These models offer high performance with the ability to operate from air compressors as small as 1½ HP (check gun CFM requirements with your air compressor's CFM delivery). Gravity feed models include a quantity of cup liners for spraying upside down without leaking. Liners also make clean-up quick and easy.

FLG SUCTION FEED MODELS

(includes a one quart aluminum drip free cup)

A No. 4TH33 #2 air cap recommended for smaller jobs, low cfm requirements are ideal for use with small air compressors.

C No. 4TH32 #1 air cap ideal for high performance spraying.

FLG GRAVITY FEED MODELS

(includes 20 oz. acetyl gravity feed cup)

B No. 4TH36 #2 air cap provides good atomization with low cfm requirements.

D No. 4TH35 #1 air cap allows high performance spraying with efficiencies of gravity feed design.

Model JGA spray guns have long been the "standard of the industry," and feature drop forged aluminum gun bodies for durability, stainless steel fluid tips, needles and fluid passages for compatibility with a wide range of paint applications. Model GFG gravity feed spray guns have same features as the JGA, without stainless fluid passages.

JGA SUCTION FEED MODELS

(includes a one quart aluminum drip free cup)

E No. 4TH09 features the #9000 air cap which allows automotive type finishes when used with low to medium viscosity paints.

F No. 4TH07 features the #80 air cap which is ideally suited for spraying heavier paints.

GFG GRAVITY FEED MODEL

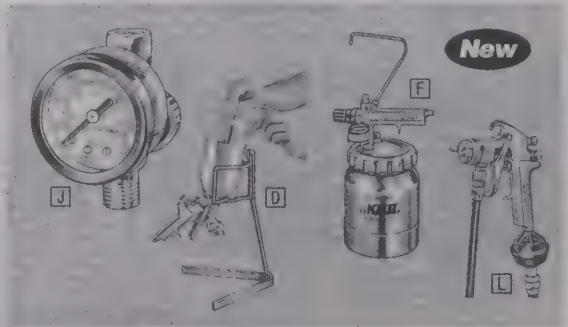
(includes a one quart aluminum, drip free gravity feed cup)

G No. 4TH08 includes two fluid tips (.055"/.063") for spraying a wide range of paint viscosities. Includes quantity of cup liners for upside down spraying with "no drips."

JGA PRESSURE FEED MODEL

H No. 4TH06 will handle most low to high viscosity paints when used with a pressure feed cup or tank. Can be used with No. 4TH14 one qt. attached cup, No. 4TH11 two qt. remote cup, or a pressure tank set-up.

**Conventional Guns Vs. High Volume, Low Pressure (HVLP) Spray Guns**



**Conventional spray guns atomize paint at higher air pressures, typically 30-60 psi. HVLP spray guns atomize paint at air pressures less than 10 psi (measured at the air cap). Lower air pressures mean less "bounce back" and less wasted paint.**

(*) Type JGA spray guns only.

# HVLP SPRAY GUNS

All DeVilbiss HVLP spray guns operate from standard compressed air systems. These spray guns meet current environmental laws for "High Transfer Efficiency" spray equipment.

Model FLG–HVLP spray gun and cup outfits offer high performance with the ability to operate from air compressors as small as 3 hp (check gun cfm requirements with your air compressor's cfm delivery). Gravity feed model includes a quantity of cup liners for spraying upside down without leaking. Suction and gravity feed models come with a No. 4TH22 air adjusting valve for easy air pressure adjustment at the spray gun handle.

FLG SUCTION FEED MODELS (includes a quart aluminum drip free cup)

A No. 4TH34 with the #3 air cap requires only 23 psi inlet air pressure to achieve maximum 10 psi air cap pressure for HVLP compliance. Includes two fluid tips. (.086"/.070")

FLG GRAVITY FEED MODELS (include a 20 oz. acetyl gravity feed cup, with cup liners).

B No. 4TH37 with the #3 air cap alows high production spraying of many different paints. Includes two fluid tips. (.070"/.063")

FLG PRESSURE FEED MODEL (includes two fluid tips—.063"/.070").

C No. 4TH38 with the #3 air cap with two different fluid tips can be used with No. 4TH11 two qt. remote cup, or a pressure tank set-up.

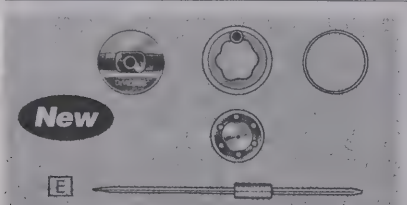
Model JGA -HVLP Spray guns utilize the same industry standard features of the conventional JGA, with all of the added benefits of HVLP technology. Achieving a fine finish with low overspray, JGA-HVLP models feature that famous lightweight "fit and feel". The model GFG-HVLP gravity feed spray gun has same features as the JGA-HVLP, without stainless fluid passages.

JGA SUCTION FEED MODEL (includes a one quart aluminum drip free cup)

D No. 4TH17 features the #57 air cap which provides the fine finishes of a conventional air cap, with the low overspray of HVLP design.

JGA GRAVITY FEED MODEL (includes a one quart aluminum, drip free gravity feed cup)

E No. 4TH20 requires only 11 cfm @ 40 psi—ideal for use with smaller air compressors. Includes a quantity of cup liners for upside down spraying and easy clean up.



PRESSURE FEED MODELS (both models can be used with No. 4TH14 one qt. attached cup, 4TH11 two qt. remote cup, or a pressure tank set-up.)

F No. 4TH18 will handle most low to medium viscosity paints, requiring only 11 cfm of air @ 40 psi.

G No. 4TH19 includes a .070 fluid tip and is used for spraying medium to high viscosity paints.

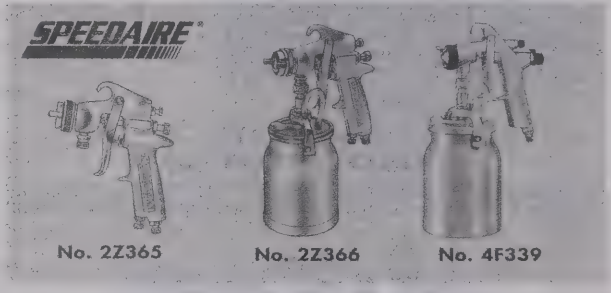
## A GENERAL PURPOSE SPRAY GUNS

**Speedaire General Purpose Spray Guns** are ideal small, occassional painting projects. All models include internal and external mix caps.

- **No. 2Z497 is bleeder type gun, pressure feed only**
- **Nos. 2Z363 and 2Z364 are convertible bleeder/non-bleeder type guns. Also convertible from siphon feed to pressure feed. Can be used with a pressurized paint tank system.**
- **No. 2Z364 features quick change siphon/pressure control**
- **Connections: Air-1/4" NPSM(M)*, Fluid-3/8" NPSM(M), except 2Z497**

REFER TO CHART ON PAGE 1962 FOR COATING CAPABILITY

(*) For NPSM(F) to NPT(M) adapter, use Stock No. 2F373. For NPSM(F) to NPT(F) adapter, use Stock No. 2F383.



## B PROFESSIONAL SPRAY GUNS

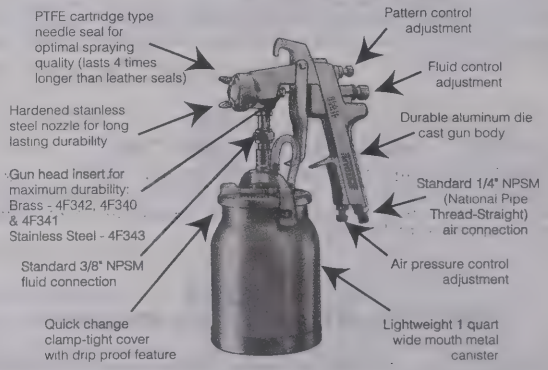
**Speedaire Professional Spray Guns** are designed for commercial, maintenance, and small/medium production line applications. All models are non-bleeder, siphon feed type guns with external mix.

- **Nos. 4F338 and 4F339 have stainless steel fluid nozzles and innovative air cap that minimizes paint build-up**
- **All Professional models can be used with pressure feed system**
- **No. 4F338 features lightweight, compact design for easy maneuverability**
- **Connections: Air–1/4" NPSM(M)*, Fluid–3/8" NPSM(M)**

REFER TO CHART ON PAGE 1962 FOR COATING CAPABILITY

(*) For NPSM(F) to NPT(M) adapter, use Stock No. 2F373. For NPSM(F) to NPT(F) adapter, use Stock No. 2F383

## C INDUSTRIAL SPRAY GUNS



**Speedaire Industrial Spray Guns** are designed for assembly/production line and automotive body shop applications. Constructed with hardened stainless steel nozzle/needle and PTFE seals for extended life. New air cap design reduces paint build-up and minimizes downtime for clean up. All models are non-bleeder, siphon feed guns with external mix.

**All Industrial models:**

- **Deliver high quality finish**
- **Offer maximum durability, corrosion resistance and easy maintenance**
- **Can be used with pressure feed system**
- **Connections: Air–1/4" NPSM(M)*, Fluid–3/8" NPSM(M)**

**REFER TO CHART ON PAGE 1962 FOR COATING CAPABILITY**

(*) For NPSM(F) to NPT(M) adapter, use Stock No. 2F373. For NPSM(F) to NPT(F) adapter, use Stock No. 2F383.

(*) CFM required is for continuous operation, for intermittent operation; CFM required will be reduced. (†) Measured with guns 8" from surface.

# SPEEDAIRE HVLP SPRAY GUNS

Operate from standard compressed air systems. Use high volume of air delivered at low pressure and low velocity to atomize paint. As a result, far less material is lost in overspray and bounce back than with conventional spray guns. Spray guns meet current environmental regulations for "High Transfer Efficiency" spray equipment. Guns feature a self-aligning air cap to ensure a perfect spray pattern every time, hardened alloy steel fluid nozzle, forged aircraft aluminum air cap and head, and an aluminum body. Used to apply most industrial, marine, wood, plastic, and automotive finishes. All models are external mix, non-bleeder guns. Fluid inlet is 3/8" NPSM(M)(National Pipe Straight Thread), and air inlet is 1/4" NPSM(M). For NPSM(F) to NPT(M) adapter use Stock No. 2F373. For NPSM(F) to NPT(F) adapter use Stock No. 2F383.

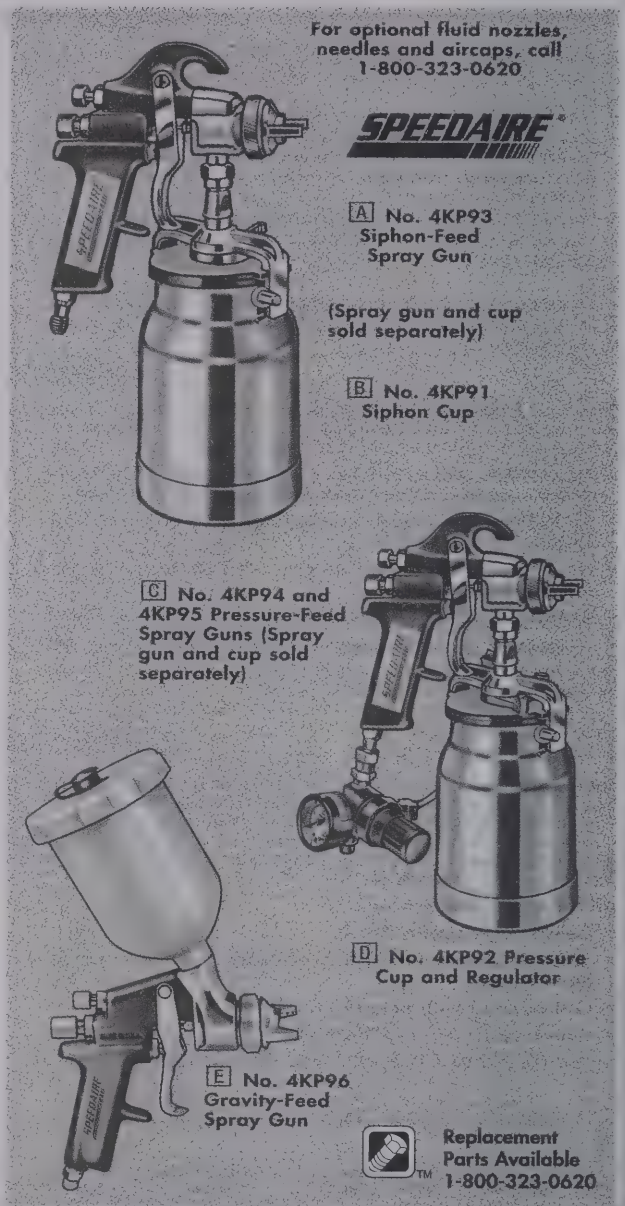
## A No. 4KP93 SIPHON-FEED HVLP SPRAY GUN

085" nozzle. Excellent for applications with frequent color changes or small production operations. Use with 1 quart cup No. 4KP91. Can be used with a pressure-feed system for heavy viscosity materials.

## B No. 4KP91 1-QUART SIPHON CUP

Quick release lever and wide mouth for easy filling and cleaning. Includes internal anti-drip shield. Use with spray gun No. 4KP93 only.

## C Nos. 4KP94, AND 4KP95 PRESSURE-FEED HVLP SPRAY GUNS



For applications where large quantities of material are to be applied quickly or where material is too heavy to be siphoned from a container. Use with pressure-feed cup No. 4KP92, pressurized tank or pump. No. 4KP94 gun with .030" nozzle. No. 4KP95 with .045" nozzle.

## D No. 4KP92 1-QUART PRESSURE CUP

Use with spray gun Nos. 4KP93, 4KP94, and 4KP95. Pressure adjustable from 1-10 PSI. Includes check valve, manual relief valve, safety relief valve, precision regulator, and gauge. Maximum pressure 10 PSI.

## E No. 4KP96 GRAVITY-FEED HVLP SPRAY GUN

Convenient gravity-feed cup ideal for application of small amounts of paint or expensive paints. Superior atomization for all automotive and industrial thin and medium viscosity materials. Forged aluminum handle, head and air cap. Includes wall-mount hanger and wrench. Includes nylon 22oz. gravity-feed cup.

# HIGH VOLUME/LOW PRESSURE SPRAY EQUIPMENT

## HV/LP PAINT SPRAYER

**SPECIFICATIONS**
**Manufacturer's Model:** HV2000
**Motor:** 115 V, 10 Amp.
**Maximum Air Flow:** 54 CFM
**Maximum Pressure:** 4 PSI
**Cup Capacity:** 1 Quart

Campbell-Hausfeld High Volume/Low Pressure (HV/LP) sprayers control the liquid being sprayed with a high volume of air at low pressure. This maximizes transfer efficiency and minimizes overspray, compared to conventional (non-HV/LP) spray equipment.

This Campbell Hausfeld Professional Series HV/LP sprayer is designed for small and medium sized professional and maintenance applications, especially railings, machinery, equipment, trimwork, cabinets, and furniture. It lightly applies a coat of latex, lacquer, stain, sealers, varnishes, enamels, and other oil and water based materials. Thinning may be required for heavier materials.

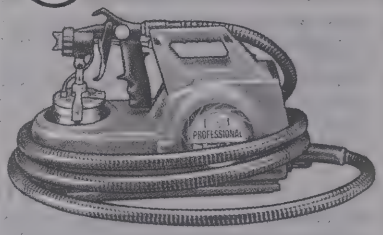
- **Air flow regulator and material control on gun for fine tuning spray pattern**
- **System is complete, no compressor needed**
- **2 Stage, tangential turbine for high volume air flow**
- **30 foot maximum hose length**
- **86% maximum transfer efficiency for less wasted material, more savings**
- **Cleaner air quality, less pollution**

**INCLUDES:**

- **Extra needle and nozzle for thin materials**
- **Heavy-duty gun with quick-release cup—large mouth for easy cleaning**
- **15 foot professional quality hose—stores around housing**
- **Viscosity stick to check proper thinning**
- **Cleaning brush and wrench for gun disassembly**
- **Strainer cones to filter out impurities**
- **Brass quick-connect fitting on hose for easy use**
- **Polypropylene housing—sturdy and easy to clean with built-in gun holder**
- **Easily accessible storage compartment for accessories**
- **Filtration system filters air to turbine and motor**
- **Balanced carry handle**
- **Lightweight 15 lbs. unit**

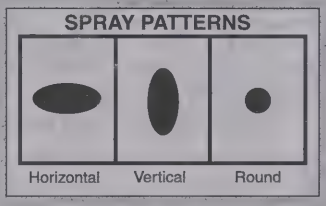
**No. 3JR91.** Professional High Volume, Low Pressure Paint Sprayer. Shpg. wt. 20.0 lbs.
List $275.00. Each..... **$229.00**

### REPLACEMENT BLOWER FILTER



**Filter for the above HV/LP Sprayer No. 3JR91.** Replacement recommended after approximately 10 hours of operation.

**No. 3JR92.** Turbine Filter. Shpg. wt. 0.3 lbs.
List $8.19. Each..... **$6.80**



Campbell

Replacement Parts Available

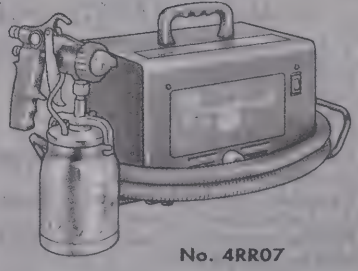
Made In U.S.A.

No. 3JR91

## PROFESSIONAL HV/LP PAINT SPRAYER



- **All-metal professional gun with molded handle for heat deflections, 1.00mm needle/nozzle set installed**
- **Three stage turbine delivers 65 CFM**
- **25 foot hose**
- **Two large foam filters allow for extended use**
- **Lightweight, portable design with hose rack allows for easy mobility around the job site**
- **Durable metal housing contains a storage compartment for storing accessory kit**
- **Easy to use controls for air flow, material flow, pattern size and pattern shape adjustments**
- **Accessory kit includes; gun wrench, cleaning brush, viscosity stick and .75 mm needle/nozzle set**

High volume, low pressure technology delivers excellent professional finish quality, with significant material savings, due to the high transfer efficiency (up to 90%). HVLP is ideal for woodworkers, cabinet shops, and other professionals who work with wood, metal and other surfaces. Great for spraying coatings such as water-bornes, lacquers, enamels, stains, and polyurethenes. Motor: 115V, 10 Amp. Maximum Air Flow: 65 cfm. Maximum Pressure: 6 PSI. Cup Capacity: 1 Quart. Campbell Hausfeld brand (HV3500)

***New* No. 4RR07.** Professional HV/LP Paint Sprayer. Shpg. wt. 28.0 lbs.
List $681.45. Each..... **$649.00**

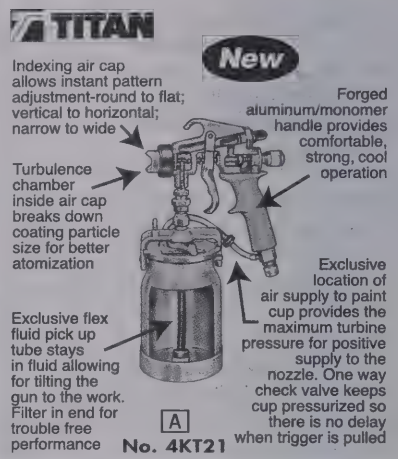
# HIGH VOLUME/LOW PRESSURE SPRAY EQUIPMENT



**Titan HV/LP Sprayers** provide up to 85% paint transfer efficiency (more paint on the item to be painted), by reducing over spray, improving air emission quality. All titan sprayers meet or exceed HV/LP regulations. Titan professional HV/LP units have higher output (6 & 8 PSI @ 80 CFM) that provide faster production speeds, give finer atomization, and will spray most paints and coatings (some coatings may have to be thinned).

**Titan HVLP Electric Turbine Sprayers** allow the user to spray with HVLP capability at the job site. No compressed air is requiered. They operate on 110V, 60 Hz, 15 amp circuits and can be used with extension cords. All Titan sprayers are furnished with industrially rated tangential turbines with dual air filtration, providing clean filtered air to the spray gun as well as cooling air for the turbine/motor for greater durability.

## [A] No. 4KT21 PRO-FINISH HV/LP SPRAY GUN/CUP

- **Fits on most other manufacturers' turbine systems without adapters**
- **Furnished with .051" nozzle/needle and 0 air cap**
- **Stainless steel fluid passages, nozzle, and needle**
- **Precision manufactured air cap provides quality atomization**
- **Easy to operate fluid and air volume control knobs**
- **Spray pattern adjustable from 11/16" round to over 15" wide ellipse style**

**No. 4KT21.** Shpg. wt. 3.0 lbs. List.....$338.75.
Each.....**$333.00**

## [B] No. 4TJ06 HV/LP ATOMIZING KIT

- **Provides user the ability to use almost any type of paint or coating by changing to the appropriate air nozzle, and fluid nozzle**
- **Comes complete with 1 each #1, #2, #3, and #4 air nozzles, .029, .043, .073 and .118 fluid/needle set**
- **Also furnished with 2 qt. cup gaskets and an extra one way air valve**
- **Fits No. 4KT21 spray gun and gun furnished with Nos. 4KT22, 4KT23 and 4KT24 HV/LP sprayers. Titan brand (773-164).**

***New* No. 4TJ06.** Shpg. wt. 2.0 List $247.15. Each.....**$235.00**

## [C] No. 4KT22 PRO-FINISH TS-40 TURBINE SPRAYER

- **3 stage turbine delivers 6 PSI and 80 CFM**
- **Achieves superior atomization of a wide range of coatings**
- **Furnished with 3/4" x 20' air supply hose and quick disconnect**
- **Pro-Finish spray gun with 1 quart cup**

**No. 4KT22.** Shpg. wt. 24.0 lbs. List.....$925.00.
Each.....**$906.50▲**

## [D] No. 4KT23 PRO-FINISH TS-50 TURBINE SPRAYER

- **4 stage turbine delivers 8 PSI and 82 CFM**
- **Applications include new high solids and water based paints**
- **Pro-Finish spray gun (.051" nozzle, 0 air cap) and 1 quart cup**
- **20' air supply hose and quick disconnect**

**No. 4KT23.** Shpg. wt. 24.0 lbs. List.....$1295.00.
Each.....**$1256.00▲**

## [E] No. 4KT24 PRO-FINISH TS-50P TURBINE SPRAYER

- **4 stage turbine delivers 8 PSI and 82 CFM**
- **Ideal for on-site applications requiring higher speed production**
- **Spray most high solids and water based paints as well as standard high quality coatings**
- **Equipped with both 1 quart cup and 2.5 gallon pressure pot**
- **Built in compressor provides air pressure for supply pot**
- **Turbine removable from cart for use with cup only, on smaller jobs**
- **All steel cart assembly with industrial rated wheels/pneumatic tires**
- **Furnished with Pro-Finish gun, and 20 ft. of fluid and air hose**

**No. 4KT24.** Shpg. wt. 112.0 lbs. List....$2075.00.
Each.....**$2000.00▲**

(▲) Net prices, not subject to discounts.

## [F] No. 4KT20 TURBINE HV/LP AIR SUPPLY HOSE

- **3/4" I.D. semi-rigid hose x 20 ft. long**
- **Fits all manufacturers' turbine guns**

**No. 4KT20.** Shpg. wt. 4.0 lbs. List.....$79.50.
Each.....**$77.95**

## 2-QUART PRESSURIZED CANISTER

For use with latex, enamel, lacquer, stain, acrylic, and primer coatings. Compatible with all Speedaire, Binks and Titan CSA spray guns except No. 2Z497. Maximum working pressure in canister is 50 PSI. Most painting applications require 10 PSI for enamels and 5 PSI for thinned lacquers. Includes regulator and gauge. Safety valve relieves at 55 PSI.

**No. 4F344.** Shpg. wt. 5.9 lbs. List ..... $117.75.
Each ..... **$82.50**

- **Includes 6-ft. air and material hoses**
- **Allows for twice the material capacity versus standard spray gun canisters**
- **Provides extra maneuverability, eliminating a cup connection to your spray gun**
- **Ideal for spray applications in tight areas or difficult angles**

## PRODUCTION PAINT TANKS

For use with internal or external mix spray guns by professional painters or production line operations. Leakproof Thiokol (polysulfide) gasket compatible with most materials. 3/8" NPSM(M) paint line connector. 1/4" NPSM(M) air line connector. Speedaire brand.

**No. 6Z899 2½-GALLON TANK**

- **Features pressure regulator and gauge, bleeder valve, and ASME safety valve**
- **Deep drawn seamless design; galvanized steel tanks prevent potential leakage problems associated with welded units**
- **Lightweight unit has diecast lid and 4 clamp-on lugs**
- **Tank exterior protected from impact damage by plastic sleeve**
- **Accepts 1-gallon paint can**
- **Max. working pressure: 50 PSI**

**No. 4F966 10-GALLON, HEAVY-DUTY ASME PAINT TANK**

- **Compatible with all 5-gallon plastic and metal containers**
- **Dual regulator with gauges allows you to adjust tank and spray gun pressures**
- **Tank constructed of ASME certified galvanized steel**
- **Features carry handles, 6 C-clamps with T-bolts, and ASME approved safety relief valve**
- **Max. working pressure: 110 PSI**

| Material Capacity (Gal.) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|
| 2½ | 6Z899 | $159.98 | **$107.80** | 14.0 |
| 10 | 4F966 | 835.14 | **708.00** | 78.0 |

**REPLACEMENT LID GASKETS**

Come in packages of 2.

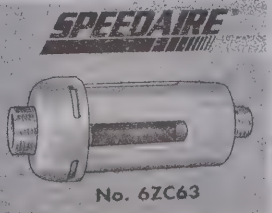
**No. 1R395.** for 3-gallon tank No. 2Z367. Shpg. wt. 0.4 lbs. List ..... $11.00.
Each Package of 2 ..... **$7.90**

**No. 4F967.** for 2½-gallon tank No. 6Z899. Shpg. wt. 0.1 lbs. List ..... $11.75.
Each Package of 2 ..... **$8.25**

## 200 PSI GENERAL PURPOSE AIR HOSE

Tube and cover made of PVC reinforced with polyester. Provides reliable service in normal use. Hose made in whole or part from recycled materials. Swan brand.

| I.D. Size (In.) | Fitting Size (In.) | Length (Ft.) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| 3/8 | 1/4 NPSM(F) | 15 | 1Z096 | $9.50 | **$8.40** | 1.5 |
| 3/8 | 1/4 NPSM(F) | 25 | 6W952 | 14.15 | **12.60** | 2.6 |



## 200 PSI MATERIAL HOSE ASSEMBLIES

For use with paints, solvents, gasoline, and insecticides: Neoprene cover is resistant to oils, greases, solvents and mild chemicals and acids. Nitrile tube has good resistance to most paints, solvents, oil and other petroleum products. Do not use with lacquer or lacquer-based paints. Speedaire brand.

| I.D. Size (In.) | Fitting Size (In.) | Length (Ft.) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| 3/8 | 3/8 NPSM(F) | 15 | 1Z530 | $16.95 | **$14.65** | 3.0 |

## DISPOSABLE IN-LINE DESICCANT FILTER/DRYER

- **Removes water, oil and dirt**
- **Changes color when replacement is needed**
- **Mounts directly to spray gun inlet**
- **1/4" NPT female inlet and male outlet**
- **Compact and lightweight**

Ideal for paint spraying applications, filter/dryer provides final protection against painting failures by removing oil aerosols and moisture that may have bypassed main air filtration system. Unit mounts directly to spray gun inlet for most efficient type of filtration. Removes oil, water and dirt by using a sintered bronze element for dirt, an oil removing filter media for oil vapor, and a desiccant drying agent for water vapor. Silica gel in clear plastic filter changes color when replacement is needed. 15 CFM. Max. PSI 125, max. temp. 130°F. 40 micron. **Package of two.** Speedaire brand.

**No. 6ZC63.** Disposable Air Filter/Dryer. Shpg. wt. 0.4 lbs.
List $12.50. Each ..... $11.95

# AIR POWERED PAINT SUPPLY PACKAGES

## REGULATED FLUID AIR POWERED PAINT SUPPLY PACKAGES

**Pre-assembled and ready to operate,** ARO ASAP™ paint packages save time by selecting the right components for production line spray applications. Works with conventional or HVLP spray guns set up to work with paint supply systems. The packages come in two styles, pail/drum cover mount or wall mount. Latest technology in paint supply systems, which has advantages over conventional pressure pot paint tanks. Paint is pumped instead of being pressurized in a container. This means that the paint does not have to be transferred into a separate container, but can stay in its original container that it came in. The container is not pressurized, so pressure vessel codes do not apply. Self-flushing pump cleans up easily, allowing for quick color change.

**All pre-assembled and piped packages include:**

- **A reliable ARO diaphragm pump**
- **Combination air filter/regulators to control both gun and pump separately**
- **2 GPM fluid pressure regulator that provides smooth and consistent material flow**
- **Siphon tube, wall mount units come with siphon hose and tube**
- **Grounding straps**
- **Stainless steel covers or wall mount brackets**
- **Quick-change air coupler set**

**Supply systems work with most Speedaire, DeVilbiss and Titan spray guns, sold separately, see index**

### No. 6CX42 - 5 GALLON PAIL

- **Pump delivers up to 7.5 GPM of material**
- **Comes with 5 gallon plastic pail**
- **Can be used with optional agitator, No. 3JR62**

### No. 6CX43 - WALL MOUNT

- **Siphon tube can be used in 5 gallon pail or 55 gallon drums**
- **Pump delivers up to 7.5 GPM of material**

### No. 6CX44 - 55 GALLON DRUM

- **Pump delivers up to 7.5 GPM of material**
- **Can be used with optional agitator, No. 3JR64**

| Fluid Port (M)NPS (In.) | Air Inlet NPS (In.) | CFM | Maximum Op. Press | Pump Materials Body | Checks | Diaphragms | ARO Model | Stock No. | List | Each | Shpg. Wt. |

# PAINT SUPPLY PACKAGES

## AIR-POWERED AIRLESS PAINT SUPPLY PACKAGES

**What is Airless Spray?**

Airless Spray is the process of forcing a material, under high pressure, through a small orifice. The restriction created by the small orifice causes the material to atomize. This produces very little overspray. Airless Spray is an excellent method of applying finishes to steel structures, storage tanks, buildings, concrete, and heavy equipment. It is also good for spraying adhesives and lubricants.

### A 5-GALLON AIRLESS SPRAY PACKAGE

No. 4RR02 package includes a 28:1 (carbon steel construction) pump, airless spray gun with swivel and tip, 25 feet of material hose, air line regulator. Also includes an air-operated (No. 3JR62) material agitator.

### B 28:1 CART-MOUNTED AIRLESS SPRAY PACKAGE

No. 4RR01 portable package includes a 28:1 (carbon steel construction) pump, airless spray gun with swivel and tip, 25 feet of material hose, portable cart, material filter, suction tube and air filter/regulator.

### C 30:1 CART-MOUNTED AIRLESS PRAY PACKAGE WITH STAINLESS STEEL

No. 4RP97 portable package features corrosion-resistant stainless steel pump, material filter/dampener, air line regulator, pump muffler, suction hose - all mounted on a heavy-duty cart.

### D 45:1 CART-MOUNTED AIRLESS SPRAY PACKAGE WITH STAINLESS TEEL

No. 4RP98 portable package features corrosion-resistant, stainless steel pump, material filter/dampener, air line regulator - all mounted on a heavy-duty cart.

### E AIRLESS SPRAY GUN

No. 4RP99 used for airless spray paints, lacquers, and other light fluids.Gun features 316 stainless steel wetted parts with non-clog tungsten carbide check seats. Includes tip guard and nut. ARO brand (651533).

***New*** **No. 4RP99.** Shpg. wt. 2.5 lbs. List..$365.00. Each.....**$353.50**

### F 4RP96 HIGH-PRESSURE SPRAY WASH PACKAGE (WALL-MOUNTED)

For the high-pressure cleaning of engines, construction equipment, plant structures, fleet vehicles. For use in applying degreasers, detergents, cleaning solutions, water and other cleaning fluids. Package includes 10:1 pump, wall-mount, 55-gallon suction tube assembly, 40 feet of material hose, high-pressure control handle with spray wand/tip and air line lubricator.

### AIRLESS SPRAY AND SPRAY CLEANING PUMP ORDERING DATA

| Key | Ratio | Flow Rate (GPM) | Body Material | Packings | Aro Model | *New!* Stock No. | List | Each | Shpg. Wt. |

## FLUID PRESSURE REGULATORS

**Ideal for HVLP or conventional spray systems,** these downstream pressure regulators work by reducing pressure to spray guns (or other devices) to a constant pressure, thereby eliminating unwanted "wink" or "pulse" patterns on your intended spray surface

### 6CX49, 6CX50, 6CX51 AND 6CX52 LOW PRESSURE,3 GPM REGULATORS

Used where medium to high flow rates are required. Features: Corrosion resistant stainless steel or Zinc/Aluminum construction. Patented "floating" ball and seat arrangement insures proper regulation. Easy access seat plug permits immediate access to the regulator's ball and seat for quick maintenance

### 6CX46, 6CX47 AND 6CX48 HIGH PRESSURE, 3 GPM REGULATORS

Used where high flow rates are required. Available in carbon steel or stainless steel. Patented "floating" ball and seat arrangement insures proper regulation. Easy access seat plug permits immediate access to the regulator's ball and seat for quick maintenance.

| Regulator Style | Ports (In.) | Regulated Pressure Range | Maximum Inlet Press. | GPM | Materials of Construction* Base/Bonnet | Seat | Ball | Diaph. | ARO Model | Stock No. | List | Each | Shpg. Wt. |

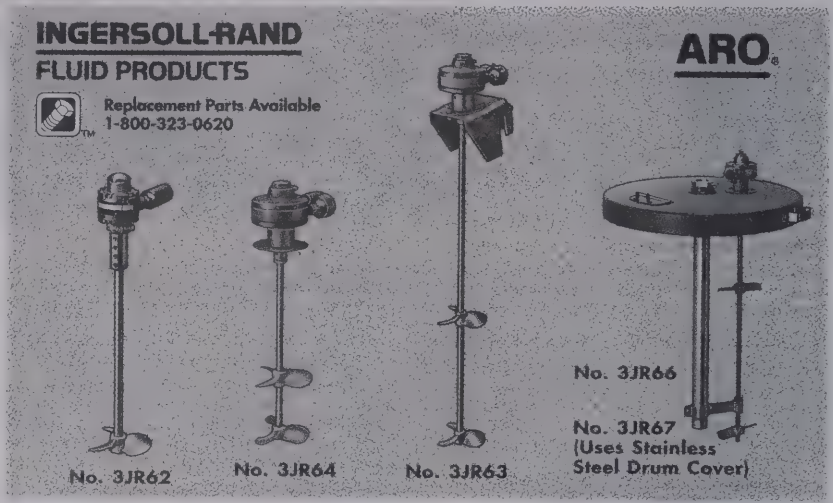
| | 3/8 | 1000-3000 PSI | 6000 PSI | 3 | S/S | T/C | — | — | 651780-A3B-B | **6CX48** | 565.64 | **496.50** | 17.0 |

(*) Material Code: Z/A = Zinc-Aluminum; T/C = Tungsten Carbide; C/S = Carbon Steel; S/S = Stainless Steel
Important: Always check for material compatibility between your fluid and desired regulator material

# MATERIAL AGITATORS, DRUM COVERS, SIPHON TUBES & HOSE

## AIR OPERATED AGITATORS



**These ARO material agitators** are available in a variety of mounting styles, shaft and propeller lengths and diameters to handle a wide range of mixing requirements. Constructed of rugged corrosion-resistant materials, including 316 series stainless steel, these material agitators provide dependable, maintenance-free operation. Do not use with pressurized paint tanks.

No. 3JR62 mounts on No. 3JR65 drum cover or Nos. 4ZC72, 6CX40 and 6CX42 paint supply packages.

No. 3JR64 can be used with Nos. 6CX44 or 6CX45 paint supply packages or on drum cover.

No. 3JR63 hangs on the side of an open 55 gallon drum.

Nos. 3JR66 steel cover and 3JR67 stainless steel cover units include: cover, agitator, 2 x 34" pipe extension, and 2" NPT (F) bung opening (No. 3JR66) or 1" return port (No. 3JR67). Accepts siphon tube from wall mount paint systems.

| Container Size (Gal.) | Mounting | Air Motor HP | Air Motor RPM | PSI | Air Motor Inlet NPT (F) | Shaft Length (In.) | Propeller Diameter (In.) | Material | ARO Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|

## DRUM COVER—5-GALLON

**Use with 3JR62 agitator** - drum cover also accepts siphon hose from wall-mounted stub-type pumps.

**No. 3JR65.** 5 Gallon Drum Cover. Aro Model Shpg. wt. 3.0 lbs. List $101.07. Each.....**$92.75**

## SIPHON TUBES, HOSES

**3JR61 Siphon Tube Assembly** - 55-gallon size can be used either directly on container with 2" NPT bung opening or from a wall-mounted, stub-type pump.

**3JR58 Siphon Hose** - 3/4" x 6' hose with stainless steel fittings, for use with 3JR61 siphon tube.

**3JR68 Siphon Tube Assembly with Filter and Check Valve** - same features as the 3JR61, only more suited to corrosive or high viscosity fluids. Constructed of 316 stainless steel.

**3JR59 Siphon Hose** - 1" x 6' hose with stainless steel fittings, for use with 3JR68 siphon tube.

*Spray it, stack it, stamp it and more with these hard-working products.*

# AIRLESS SPRAYER PUMP DESIGNS

Airless sprayers provide contractors, maintenance painters, and production lines with a device which sprays heavier coatings faster than conventional sprayers. Airless sprayers are more convenient and faster than conventional sprayers, but coating finish quality is not as high. **Benefits experienced with airless sprayers are the use of non-reduced paints and greater coverage per pass with less overspray than conventional sprayers.** Several types of pump designs for airless sprayers are available. Following is a basic description of pump types and their associated characteristics.

**POWER PAINTERS:** Motor armature drives piston which creates a vacuum, moving paint up from cup. Paint is then pressurized and pushed through tip at approximately 2500 PSI.

**DIAPHRAGM PUMP:** Motor drives high speed diaphragm which moves back and forth creating a pumping action that siphons spraying material. Single acting. Used for light body latex paints, oil, and solvent based material in **light commercial applications.**

**PISTON PUMP:** Compressed air or electric motor drives gears which are coupled to piston pump, producing pressure on both up and down stroke (dual acting). Pump provides more positive displacement of material. Used for most materials, especially heavily bodied architectural coatings.

## AIRLESS SPRAYER AND COATING MATERIAL COMPATIBILITY CHART

### CHECK OWNER'S MANUAL FOR PROPER APPLICATION AND THINNING INFORMATION

**FINISH QUALITY IS DEPENDENT ON MATERIAL, EQUIPMENT USED, AND APPLICATION TECHNIQUES. CHART PROVIDED IS FOR INFORMATIONAL PURPOSES ONLY. CONSULT WITH OWNER'S MANUAL, SALES REPRESENTATIVE OR REFER TO SPECIFICATIONS INDICATED BY COATING MATERIAL BEFORE BEGINNING OPERATION.**

## CHOOSING THE RIGHT SPRAY TIP

Airless tips control the spray pattern, normally elliptically shaped from 2 to 36" wide, and determine the amount of coating being applied. As the orifice size increases, while maintaining the same fan width size, the volume of coating applied to the same area will increase. Using a larger fan width size while maintaining the same orifice size, will result in the same amount of material being applied over a larger area, in a thinner layer.

## WHEN TO CHANGE THE TIP

Most protective coatings (paints) are very abrasive and will cause tip wear-out conditions. All coatings differ in their make-up so it is impossible to state how many gallons can be sprayed before changing a tip. A good rule of thumb is around 100 gallons. A tip will normally spray in a narrower pattern when worn out. The pattern will not have feathered edges, and will be more rounded. Worn out tips result in using much more coating than expected. New tips produce coating finishes consistent with the coating manufacturer's recommendations, thereby reducing coating failures.

## CHOOSING THE CORRECT TIP FOR THE JOB

All Titan airless tips are constructed from Titan's own tungsten carbide material and used for airless applications alone. They have been tested by outside sources and found to last significantly longer than competitor's. They are also manufactured to provide consistent tip sizing for both pattern width and orifice size. They can be used on any manufacturer's airless pump. The Titan adjustable tip provides both orifice adjustment and pattern width adjustment and is a self-cleaning tip to keep downtime to a minimum. The SC-5 reversible tips provide an easy way to clean tip clogs without removing the tip from the gun, or to allow quick tip changes for differing work. Flat tips are available as a cost savings alternative for use with coatings that don't clog the tips quickly.

# AIR BRUSH SETS, DETAIL SPRAY GUN AND PRO-FINISH CSA GUN

## TITAN PRO-FINISH HV/LP GUN

- **Meets California Rule 1151**
- **Converts conventional compressed air systems to HV/LP**
- **No additional pressure regulation required**

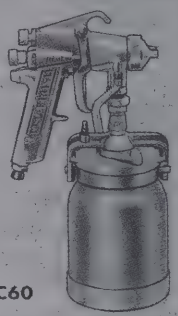
**Pro-Finish CSA gun converts shop** (standard compressor) air into high volume, low pressure air at gun. 10:1 pressure reducer engineered into gun downgrades PSI input, allowing excellent transfer efficiencies. Soft, low velocity pattern reduces overspray and bounce back. Spray gun can be used with most finishes in industrial, marine, wood, plastic, architectural and automotive industries. When sprayed at 10 PSI or less (100 PSI input), unit complies with SCAQMD air quality rules 1136 and 1151.

**24 oz. forged aluminum gun** has dual air diffuser system for both fan air and atomizing air providing even distribution. Operates from paint kitchen pumped supply systems, pressure pots or coupled remote supply cups, with no change in paint lines or controls. Unit includes .051 needle/nozzle set and #0 air cap. Maximum air consumption on continuous duty is 16 CFM at 100 PSI. Air requirements vary depending on application and duty cycle.

No. 4ZC60 includes 1 quart dripless paint supply cup with quick release lever and wide mouth for easy color change.

**No. 4ZC59.** Shpg. wt. 1.8 lbs. List ..... $380.00.
Each ..... **$366.75**

**No. 4ZC60.** Shpg. wt. 3.7 lbs. List ..... $427.45.
Each ..... **$412.75**

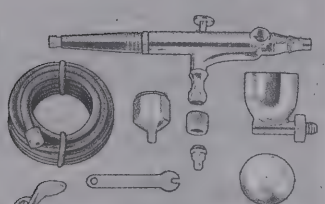


TITAN

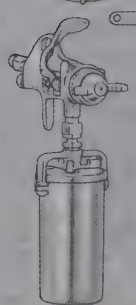
— Standard 3/8" NPSM fluid connection

No. 4ZC59

— Standard 1/4" NPSM threads air connection. For NPS(F) to NPT(M) adapter use Stock No. 2F373. For NPS(F) to NPT(F) adapter use Stock No. 2F383.



No. 4ZC60



SPEEDAIRE New

No. 4RR09

No. 4RR10

No. 4RR06

## GENERAL PURPOSE AIR BRUSH KIT

Ideal for the automotive detailer, the hobbyist, or the artist.

- **Dual action trigger allows user to vary the fluid amount (and line width) while spraying**
- **Adptable to most air systems including air compressors, C02 tanks, and aerosol propellent cans**
- **Includes: air brush, 22 cc jar assembly, 7 cc metal color cup, 60 cc jar with lid, 6 ft. PVC air hose, air hose adapter, head wrench, hanger and impact resistant molded case**

***New*** **No. 4RR09.** Shpg. wt. 20.0 lbs. List $51.45. Each ..... **$49.00**

## PROFESSIONAL AIR BRUSH KIT

Ideal for detailing cars, trucks, motorcycles, crafts, artwork and more.

- **Dual action trigger with adjustable stop for precise control**
- **Detachable gravity feed cup is adjustable with swivel**
- **Adaptable to most air systems including air compressors, C02 tanks, and aerosol propellant cans**
- **Includes: air brush, 7 cc gravity feed cups with lid, 6 ft. PVC air hose adapter, head wrench, impact resistant molded case**

***New*** **No. 4RR10.** Shpg. wt. 20.0 lbs. List $72.45. Each ..... **$69.00**

## TOUCH-UP SPRAY GUN

Ideal for the hobbyist and auto body shops. For touch-up jobs, detailing, edging and customizing automobiles. Universal control trigger for left or right-hand use. Siphon feed, external mix air cap, non-bleeder operation. Fluid and pattern size adjustment controls.

- **Die cast aluminum, nickel plated body and trigger**
- **Solid brass air caps**
- **Adjustable for vertical or horizontal patterns**
- **1 qt. canister**
- **Requires 3.4 CFM at 50 psi**
- **1.8 mm fluid nozzle sprays all medium to high viscosity fulids**
- **Sprays larger pattern size, 9.0"**
- **Maxium pressure 70 PSI**

***New*** **No. 4RR06.** Shpg. wt. 3.2 lbs. List $61.95. Each ..... **$59.00**

*Spray it, stack it, stamp it and more with these hard-working products.*

# AIRLESS PAINT SPRAYERS

## AIRLESS PAINT SPRAYER

**SPECIFICATIONS**
**Manufacturer's model:** AL2320
**Motor:** 1/2 HP, 115 Volt, 60 Hz, 7.1 Amps
**Flow rate:** .33 GPM (Gallons Per Minute)
**Maximum pressure:** 2800 PSI
**Maximum tip size:** 0.015"

Campbell Hausfeld .33 GPM airless paint sprayers are used for small commercial painting projects or maintenance jobs whenever painting needs to be completed quickly and easily.

- **Suction feed diaphragm pump**
- **Quiet operation at 65 dB**
- **100 ft. maximum hose length**
- **Sprays up to 140 sq. ft. per minute**

**INCLUDES:**

- **.015" reversible tip**
- **25 feet of 1/4" high pressure hose**
- **Instructional VHS video tape**
- **6 ounces of pump protector (concentrated)**
- **Heavy-duty tubular cart with semi-pneumatic tires**

(▲) Net prices, not subject to discount.

**Quick-Clean Adapter**

Allows connection to garden hose to create a complete self-cleaning system for water-based paints.

**Brass By-Pass Fitting**

Increases durability and longevity of unit.

**Quick-Connect Inlet**

Quick and easy connecting and disconnecting of suction assembly with no special tools or wrenches.

**Diaphragm pump** driven by totally enclosed 1/2 HP, 115V, 60Hz motor. Develops pressure to 2500 PSI. Sprays up to one gallon every 3 minutes.

**Oil side pressure control** and tungsten valves provide long life. Unique push-button valve ensures consistent priming.

**Lightweight spray gun** minimizes operator fatigue and includes replaceable in-line filter and safety lock.

Instructional video demonstrates use and care of unit.

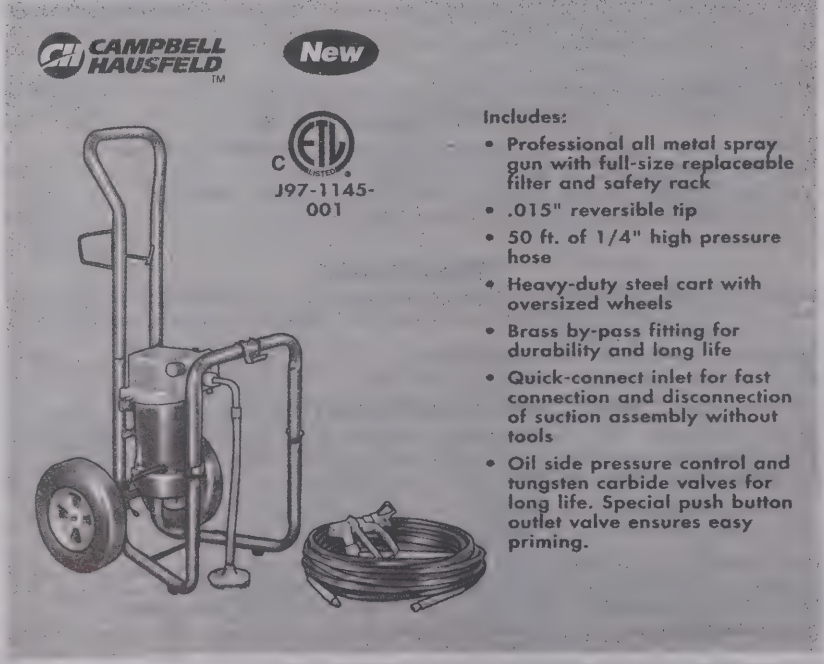
**No. 4ZC74.** Shpg. wt. 49.0 lbs. List.....$545.00.
Each ..... **$399.00▲**

Replacement Spray Gun for No. 4ZC74. Can be used with any airless sprayer. Equipped with .013" reversible tip and 100 mesh in-line barrel filter to reduce clogging and extend tip and gun valve life. Heavy-duty light weight plastic. Use gun filter No. 4KP84.

***New* No. 4RR08.** Shpg. wt. 1.0 lbs. List....$72.98.
Each ..... **$69.50**

## HIGH FLOW AIRLESS PAINT SPRAYER

**SPECIFICATIONS**
Manufacturer's model: AL2450
**Motor:** 3/4 HP, 115 Volt, 60 Hz, 7.1 Amps
**Flow rate:** .44 GPM (Gallons Per Minute)
**Maximum pressure:** 2800 PSI
**Maximum tip size:** .017" sold separately



Campbell Hausfeld .44 GPM airless paint sprayers are used for medium sized commercial, professional, and maintenance type painting jobs where speed and ease of use are important.

- **High-output, suction feed diaphragm pump**
- **Quiet operation at 62 dB**
- **Large, totally enclosed, fan-cooled 3/4 HP AC Motor**
- **125-Ft. maximum hose length**
- **Sprays up to 160 sq. ft. per minute with .017 tip**

**No. 3JR90.** Shpg. wt. 63.0 lbs. List.....$779.00.
Each ..... **$563.50▲**

Replacement Spray Gun for No. 3JR90. Can be used with any airless sprayer. Equiped with .015" reversible tip and 100 mesh in-line filter to reduce clogging and extend tip and gun valve life. Heavy-duty metal construction. Use gun filter Nos. 3JR86 and 3JR87.

***New* No. 4RR04.** Shpg. wt. 1.0 lbs. List...$135.98.
Each ..... **$129.50**

# AIRLESS SPRAYER ACCESSORIES

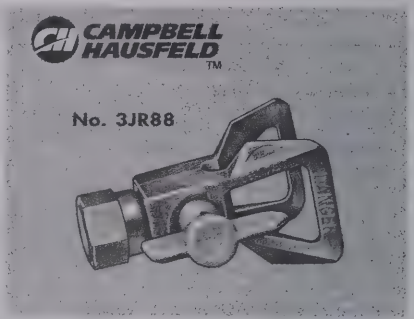
## AIRLESS SPRAY GUN TIPS

**Self-cleaning reversible spray tips** for use with Campbell Hausfeld airless sprayers. Suitable for use with both latex and oil based paints. Replacement recommended every 50 to 75 gallons of paint. Constructed of tungsten carbide.

011" tip for use with with numbers 3JR90, 4F990, 4ZC74, 6Z756, and 4Z242.

**No. 4KP85.** Shpg. wt. 0.3 lbs. List $29.00. Each ..... $26.95

.013" tip for multi-purpose materials. For use with Nos. 3JR90, 4F990, 4ZC74, 6Z756, and 4Z242.



**No. 4KP86.** Shpg. wt. 0.3 lbs. List $29.00. Each ..... $26.95

.015" tip for multi-purpose materials. For use with Nos. 3RJ90, 4ZC74, 6Z756, and 4Z242.

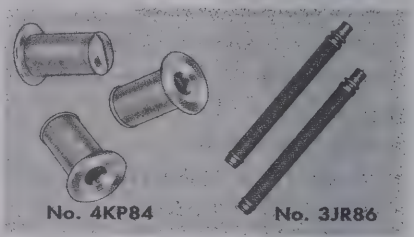
**No. 4KP87.** Shpg. wt. 0.3 lbs. List $29.00. Each ..... $26.95

.017" tip for heavy viscosity materials. For use with 3JR90 only.

**No. 3JR88.** Shpg. wt. 0.3 lbs. List $29.00. Each ..... $26.95

## SPRAY GUN FILTERS

**Spray gun filter for Nos. 4ZC74, 6Z756, and 4Z242.** Package of three 100 mesh filters. For use with .011, .013, and .015" spray tips.

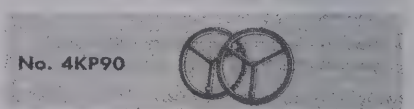


**No. 4KP84.** Shpg. wt. 0.5 lbs. List $9.50. Each ..... $8.95

**Airless spray gun filter for No. 3JR90 gun.** Package of two 50 mesh filters. For use with .017" spray tip.

**No. 3JR86.** Shpg. wt. 0.1 lbs. List $6.95. Each ..... $6.95

**Airless spray gun filter for No. 3JR90 gun.** Package of two 100 mesh filters. For use with .013 and .015" spray tips.



**No. 3JR87.** Shpg. wt. 0.1 lbs. List $8.39. Each ..... $7.95

## SUCTION TUBE FILTER

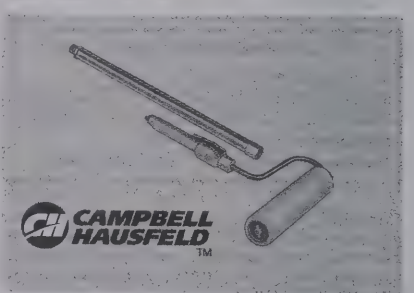
Cleans out impurities in paint. For use with Nos. 3JR90, 4ZC74, 6Z756, and 4Z242.

**No. 4KP90.** Shpg. wt. 0.2 lbs. List $8.39. Each ..... $7.95

## AIRLESS SPRAYER ROLLER ATTACHMENT

**Roller attachment** increases versatility of airless sprayers. Attaches to any airless sprayer, providing continuous paint application through internally fed roller. Can also be used with a paint tank with the included coupling converter. Includes 3/8" nap and 18" extension for hard-to-reach areas. Handle has Grip-Touch trigger. Constructed of aluminum and stainless steel. Fits Campbell Hausfeld airless spray guns Nos. 4ZC74, 6Z756, 4Z242, and 3JR90.

**No. 6Z119.** Shpg. wt. 3.0 lbs. List $138.50. Each ..... $99.00

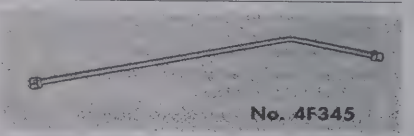


### REPLACEMENT ROLLER COVERS

3/8" Nap. For smooth surfaces like drywall and plaster. Standard with roller.

**No. 1R448.** Shpg. wt. 0.2 lbs. List $9.70. Each **$7.99**; Lots 4 ..... $7.59

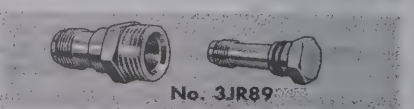
3/4" Nap. For medium-rough surfaces such as textured walls and ceilings.



**No. 1R449.** Shpg. wt. 0.2 lbs. List $10.65. Each **$8.79**; Lots 4 ..... $8.35

## SPRAY WAND

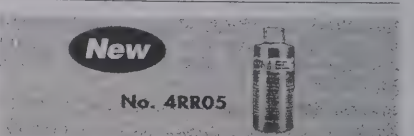
**Durable Zinc Plated Steel Wand** for stand-up painting of floors and hard-to-reach walls and ceilings. 24" spray gun extensions. Fits Campbell Hausfeld airless spray guns Nos. 4ZC74, 6Z756, 4Z242, and 3JR90.



**No. 4F345.** Shpg. wt. 0.4 lbs. List $43.00. Each ..... $39.00

## REPLACEMENT INLET/OUTLET VALVE

Brass inlet/outlet valve for Campbell Hausfeld sprayers Nos. 3JR90 and 4ZC74. Replacement recommended after spraying approximately 250 gallons of paint.



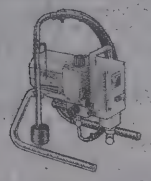
**No. 3JR89.** Shpg. wt. 0.8 lbs. List $50.99. Each ..... $42.50

## PUMP PROTECTOR

Can be used with any airless sprayer to reduce rust and lubricate valves. Just add 2 ounces to 1 gallon of water, run the solution through the sprayer, and your pump is protected until the next time it is needed. 1 quart bottle makes 16 applications.

***New* No. 4RR05.** Shpg. wt. 2.0 lbs. List $7.88. Each ..... $7.50

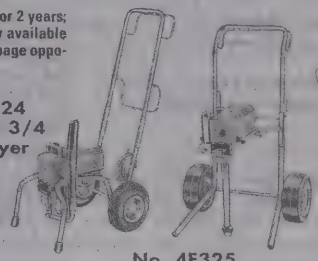
*Spray it, stack it, stamp it and more with these hard-working products.*



# AIRLESS PAINT SPRAYERS

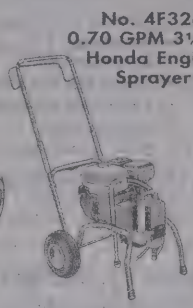
**TITAN LIMITED WARRANTY**

Titan warrants drive train and pressure control for 2 years; all other components for 1 year. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.



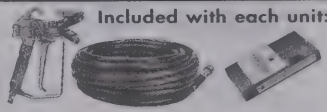
TITAN

LRB3731 (Except No. 4F326



No. 4F964 Single-Pump 0.47 GPM 3/4 HP Sprayer

No. 4F324 0.47 GPM 3/4 HP Sprayer



No. 4F325 0.70 GPM 1 HP Sprayer

No. 4F326 0.70 GPM 3½ HP Honda Engine Sprayer

Included with each unit:

- LX-80 Gun with .017 reversible tip and 50 ft. of 1/4" high pressure airless hose
- Instructional video tape

**A variety of portable airless sprayers** available, including gas and electric powered models. For the application of finishing and architectural coatings. For use by professional painters, plant maintenance personnel, property managers and small manufacturing finishing operators. Titan airless sprayers provide dependability, ease of operation, and long life.

**Compact and portable.** Units are portable piston design sprayers that fit into the trunk of most vehicles. Easily transportable to, from, and around job site.

**Modular fluid selection** features hard chromed piston and fluid section that is easily removed and serviced quickly. Unitized packings are simple to insert or remove. Inlet and outlet valves are easily accessible and can be reversed if wear occurs. Most wear items are interchangeable from one unit to another.

**Units feature** automatic pressure relief valve for safety and quick clean-up, self-adjusting packing for positive seal, tungsten carbide valve seats, 50 ft. of 1/4" high pressure airless hose, and LX-80 gun with .017 reversible tip. Accurate pressure control from 0 to 3200 PSI. Can use up to 150 ft. of 12-gauge extension cord. Also included with unit is the instructional video tape, "From Start to Clean-up, The Safe Approach to Airless Spraying," which details step-by-step safe and proper operation of airless spray equipment.

### No. 4F964

- Lightweight integral frame
- 0.47 GPM delivery
- 0.021 maximum tip size
- 200 ft. maximum hose length
- 0 to 3200 PSI operating pressure
- Amperage draw: 9.0
- 3/4 HP universal motor
- 60 mesh filter
- Suction tube feed

### No. 4F324

- Cart model with hose rack and pneumatic tires
- 0.47 GPM delivery
- 0.021 maximum tip size
- 200 ft. maximum hose length
- 0 to 3200 PSI operating pressure
- Amperage draw: 9.0

## LUBRICANT FOR PISTON TYPE AIRLESS SPRAYERS

No. 4TJ07

Keeps upper piston free of dried coatings which lengthens packing life and helps maintain spray pressure. Compatible with most water based and solvent based paints and coatings. Convenient 8 oz. squeeze bottle with tip up applicator spout. Also suitable for all competitive piston airless spray pumps.

***New* No. 4TJ07.**
Shpg. wt. 7.0 lbs.
List.....$4.97.
Each.....**$4.83**

# AIRLESS SPRAYER ACCESSORIES

## AIRLESS SPRAY GUN

- **Comes with reversible tip**
- **All-metal 20-oz. lightweight construction**
- **3600 PSI maximum pressure**
- **Fits most common airless hose connections**
- **Built-in 60 mesh filter**

**Titan LX-80 airless spray gun** for use with any airless sprayer. Tungsten carbide ball valve, seat, and swivel assures wear resistance and durability. Ball bearing swivel for greater operator comfort and control. Ergonomically designed 4-finger trigger for easy spraying. Built-in 60 mesh filter reduces clogging and increases tip life. Equipped with 10" pattern 0.017" orifice. SC-5 reversible tip to resist clogs. Forged aluminium body and spring steel trigger guard for long life.

**No. 6Z662.** Airless spray gun. Shpg. wt. 1.5 lbs. List $180.00. Each.....**$177.00**

## SAFETY GUARDS

The Titan guards are constructed from a high quality monomer with a material that provides positive grounding. The integral retaining nut allows for use with existing airless spray guns. Safety guards must be used to comply with OSHA regulations.

**For use with SC-5 reversible tips:**

**No. 4KT08.** Safety Guard (641-100). Fits Titan, Graco, and Wagner S/T spray guns. Shpg. wt. 0.2 lbs. List $19.50. Each.....**$18.50**

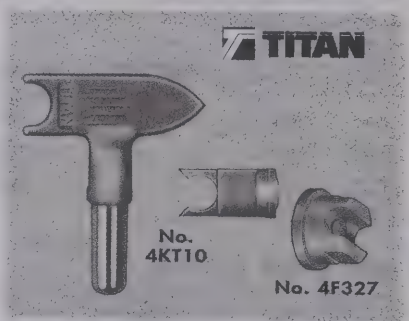
**No. 4KT09.** Safety Guard (641-400). Fits Campbell-Hausfeld spray guns. Shpg. wt. 0.2 lbs. List $19.50. Each.....**$18.50**

**For use with Titan adjustable or flat tips:**

**No. 6X096.** Safety Guard (450-100). Fits Titan, Graco, and Wagner S/T spray guns. Shpg. wt. 0.2 lbs. List $19.50. Each.....**$18.50**

**No. 4KT07.** Safety Guard (450-400). Fits Campbell-Hausfeld spray guns. Shpg. wt. 1.0 lbs. List $19.50. Each.....**$18.50**

## ADJUSTABLE AIRLESS SPRAY TIP



**Adjustable airless spray tip features** universal design that fits any airless gun. Achieves fan widths from 4 to 22" by turning adjustment knob. Reduces material cost by allowing selection of proper fan width for object being sprayed. Tip clogs can be eliminated by turning adjustment knob to full open. Tungsten carbide wear parts for long life. Titan Tool Inc. brand (341-028).

**No. 6X095.** Shpg. wt. 0.2 lbs. List.....$56.00. Each.....**$51.90**

## REVERSIBLE SELF-CLEANING TIPS

- **Quickly clear clogged tips without disassembly; Just reverse tip, squeeze trigger to blow out clog**
- **Posi-lock assures tip is either in spray or clean out position and tip is safely installed in guard for safe operation**
- **One seal for all coatings - from latex to hot solvents**
- **Pressure rated to 5000 PSI**

**See Airless Tip terminology, page 1968**

## AIRLESS FLAT TIPS

- **Sold in vials of 5, same size tip**
- **Same high quality tungsten as used in reversible and adjustable tip**
- **Best used on non-filled coatings that do not clog often**
- **Use with any airless gun**

**See Airless Tip terminology, page 1973**

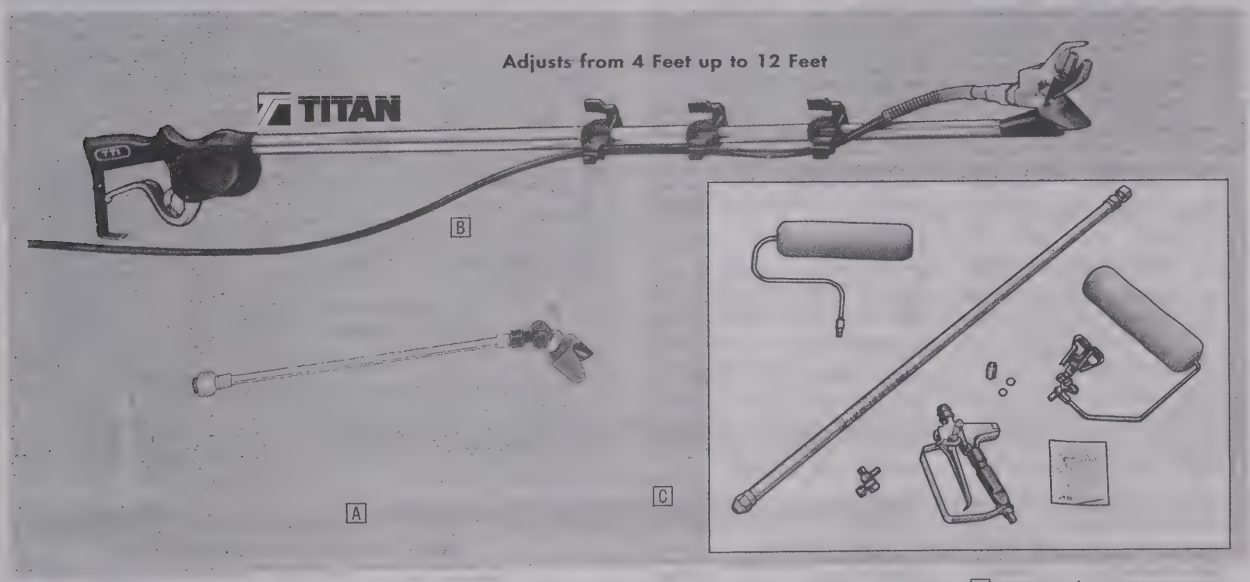
## AIRLESS PAINT SPRAY HOSE



- **Will fit all of our airless sprayers**

**HPC Hytron® Hose by Dayco Eastman** conveys water-based and solvent-based paints, lacquers, and thinners. Compatible with most major brands of airless sprayers. Reinforcement: 2 braids of synthetic fiber with carbon-filled, static conductive elastomer strip between braids. Cover: abrasion-resistant, bonded polyurethane. Max. working pressure: 3000 PSI. Burst pressure: 12,000 PSI (4:1 safety factor). Temp range -40°F to 180°F. Min. bend radius: 2.0". Hose ID: 1/4". OD. .520". fitting: 1/4" (F)NPS. Separate 1/4" male/male adapter also included.

| Hose Length (Ft.) | Dayco Eastman Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 25 | HPS04-25 | 4Z429 | $57.00 | $48.50 | 3.0 |
| 50 | HPS04-50 | 4Z430 | 88.00 | 62.00 | 4.9 |

## SPRAY GUN EXTENSION, TELESCOPING POLE GUN, AND SPRAY/ROLL APPLICATION KIT

### A AIRLESS SPRAY GUN EXTENSION

**Titan 12" spray gun extension** comes with anodized aluminum swivel head that rotates 260° to ensure painting from all angles of hard-to-reach areas. Large fluid passages enable spraying of materials with heavy viscosities. Includes tip guard for use with standard flat tips or Titan adjustable tip No. 6X095 (tips sold separately, see page 1973). Compatible with Binks, DeVilbiss, JGB, Sherwin Williams, Graco, Nordson and Spee-Flow. Titan Tool Inc. brand (611-12/630)

**No. 3X686.** Titan spray gun extension.
Shpg. wt. 0.6 lbs. List.....$57.40.
Each.....**$54.50**

### B TELESCOPING AIRLESS POLE GUN

**Lightweight Titan telescoping airless pole gun** is a combination pole extension and airless spray gun. Three sturdy four-foot aluminum sections extend the operator's reach from 4 feet up to 12 feet quickly and easily.

**Simplifies painting of high ceilings** and other hard-to-reach areas. Positive-hold lever mechanism secures each section in place without turning or slipping. Uses standard 1/4" airless hose (not included) held in place by clips along the pole.

**Spray pattern and width can be controlled** by adjusting pressure applied to trigger. Self-cleaning, positive shut-off when not triggered. Spray tip head swivels to any position. Easy to operate and clean. Can be used with any professional airless paint sprayer. Titan Tool Inc. brand.

**No. 4Z622.** Titan telescope pole gun. Shpg. wt. 8.0 lbs. List.....$415.00.
Each.....**$395.00**

### C SPRAY/ROLL APPLICATION KIT

**Titan Spray Roll Application Kit offers** variety of airless spray painting tools for many painting conditions. When using proper combination of tools, painter can either spray with pole extension for hard-to-reach areas, power roll when spraying is not possible, or spray and roll simultaneously on high profile surfaces such as unfinished block. Adaptable to any airless sprayer.

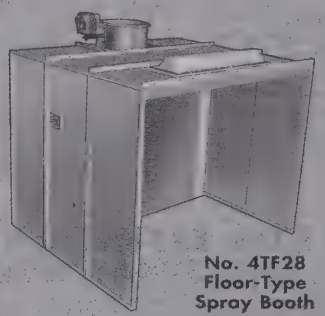
**Kit includes** Titan L-70 inline airless gun, 3 ft. extruded pole extension, 260° swivel head for flexible spraying, spray roller head assembly with reversible tip for simultaneous rolling and spraying, and inner feed pressure roller assembly for high production rolling. Roller assembly allows airless sprayer to feed 9" roller for greater speed. Titan Tool Inc. brand.

**No. 4F332.** Shpg. wt. 8.0 lbs. List.....$335.00.
Each.....**$319.00**

# PAINT SPRAY BOOTHS

- **High efficiency particulate removal**
- **Designed for maximum overspray control**
- **High capacity overspray capture**
- **Booth includes filter rack and clips for pads, hanger assembly, and grid pegs to hold roll media in place**
- **Complies with NFPA 33, OSHA, EPA, NEC, BOCA**

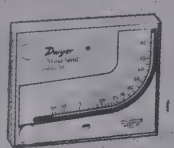
**Speedaire Double Filtration Spray Booths** are made of self-supporting 18-gauge galvanized sheet steel. Precision-flanged panel sections are punched on six inch centers and are easily assembled with supplied hardware. The bench style booth is floor mounted and has a "bench" located at normal working height. Floor booths have full floor to top work openings. Designed for either top or rear venting exhaust systems (see Individual Stock Nos. for size specifications of duct work required).



**Booths with Exhaust Fan and Motor** are available with belt-driven tubeaxial exhaust fan with hazardous location motors. Motors are 3-phase, 230/460V, 1725 RPM, 60 Hz, ball bearing. To order, see "4TF" combinations in chart below. Booth, fan, motor, motor pulley, and bolts are packed separately. Motor/fan combinations shown are for a maximum of 25 feet duct length at 1/4" static pressure.

**Includes:** All nuts and bolts, drawings and assembly hardware. Light fixture(s): 48" 4-tube fluorescent light fixture, 110 volt. (Explosion proof fixtures and 277 volt systems available on special request.) Fixture is UL and ETL listed, vaporproof, Class I, Div. 2, Groups A, B, C, D. Includes 15" x 53" x 1/4" clear tempered glass lens and gasketed seal. Fixture uses a rapid-start, energy efficient ballast system. Fixture accepts 40 watt bi-pin fluorescent lamps (not included). To order tubes, see Index under Tubes, Fluorescent. Light Assembly is designed to be serviced from the rear of the fixture.

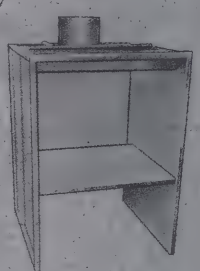
**Draft Gauge (Manometer):** Provides the operator a visible monitor of filter loading. Diminished air flow within the booth provides a standard and indicator by which to replace the filters.



**Filter Pads:** Pad Arrestor Booths: Filters supplied with this booth are made from continuous filament glass fibers with an open weave pattern for maximum paint collection. These filters are approved and listed: Class 2 by Underwriters Laboratories and conform to OSHA Standards. Size: 20" x 20" x 2" deep. Grid retainers are also included. Roll filter media is not included.

SPEEDAIRE®

No. 4TF28 Floor-Type Spray Booth



- **High efficiency particulate removal**
- **Designed for maximum overspray control**
- **High capacity overspray capture**
- **Booth includes filter rack and clips for pads, hanger assembly, and grid pegs to hold roll media in place**
- **Complies with NFPA 33, OSHA, EPA, NEC, BOCA**

**Draft Gauge included with all units**

FREE DELIVERY on orders of $900 or more

## OPTIONAL ACCESSORIES

Fiberglass paint collector media is designed for use in all spray booth overspray applications and is especially useful in high production situations. The 2½" thick, dry filter media (15 grams per sq. ft.) is progressively layered front to rear (air entering to air leaving) to enhance filter efficiency. Loosely woven construction allows paint to load evenly throughout service life. Easily cut to desired length with scissors. Media is simply rolled up and discarded after use. Widely used in conventional as well as downdraft spraybooth applications.

Expanded paper, high capacity media provides excellent efficiency and very high holding capacity. The high capacity paint collector media utilizes eight layers of expanded kraft. The first three layers employ extremely large baffle openings for maximum particulate holding capacity. For use with a wide range of coatings and especially with heavier, tacky-type coatings, conventional coatings and in situations requiring extended service life.

# WOOSTER® PAINTBRUSHES

Professional paintbrushes have high-quality filaments or bristles, durable rust-resistant ferrules, and balanced hardwood handles. They provide increased paint capacity to reduce work time, a smooth finish with less brushmarks, and much better overall performance than economy brushes which are made for maintenance and utility painting.

### ULTRA/PRO® Nylon/Polyester

**Nos. 3UW39-3UW45** for all water-based and oil-based paints, acrylics, enamels, 1-part epoxies. Complete coverage, full cut-in control. Treated wood handle, rust-resistant ferrule.

### MAJESTIC™ Black China Bristle

**Nos. 3UW15-3UW17** for oil-based paints, enamels, polyurethanes, varnishes. Smooth finish quality, high production. Treated wood handle, rust-resistant ferrule.

### JOE™ Black China Bristle

**No. 3UW25** for oil-based paints, enamels, polyurethanes, varnishes. Very high capacity, smooth finish quality. Solvent-resistant handle, rust-resistant ferrule.

### V130™ Gray China Bristle

**Nos. 3UW46-3UW47** for oil-based paints, varnishes. Oval style for added control and smooth layoff. Solvent-resistant handle, seamless steel ferrule.

### BENT RADIATOR Black China Bristle

**Nos. 3UW31-3UW32** for oil-based paints, enamels, polyurethanes, varnishes. Long 13-3/4" wood handle reaches behind pipes, furniture, other fixtures.

### PREP CREW™ Masonry Coater™

**No. 3UW30** for thick-bodied paints and waterproofing, foundation or roof coatings. Natural tampico fiber. Polypropylene pistol grip handle reduces wrist fatigue. Built-in bucket clip.

### GOLDEN GLO® Nylon/Polyester, Utility

**Nos. 3UW33-3UW38** for all paints (latex, acrylics, oils, 2-part epoxies). Good capacity, resists wear. Solid plastic handle, brass-plated steel ferrule.

### AMBER FONG™ Brown China Bristle, Utility

**Nos. 3UW22-3UW24** for oil paints, varnishes, stains. Good capacity, smooth finish. Solid plastic handle, brass-plated steel ferrule.

### CHIP™ White Bristle, Tossaway

**Nos. 3UW18-3UW21** disposable brush for utility painting, stains, glues, roof coatings, coal tar epoxies. Unfinished wood handle.

# WOOSTER® PAINT ROLLERS

Including standard-size roller covers in 9" lengths, high-production rollers in 18" lengths for industrial and floor topping applications, and trim tools for edging and irregular surfaces.

### SUPER/FAB® Roller Covers

**Nos. 3UW67-3UW71** for all flat paints, stains, waterproofing. High capacity, complete coverage, non-bubbling, smooth finish. Strong copolymer Sherlock® core will not delaminate.

### PRO/WOOL® Roller Cover

**No. 3UW76** for all paints (flat to gloss) including acrylics, enamels, varnishes. Handmade natural shearling, high capacity, very smooth finish.

### PRO/DOO-Z™ Roller Covers

**Nos. 3UW78-3UW81** for all paints, primers, enamels, floor coatings, polyurethanes, epoxies. Shed-resistant, high capacity, non-bubbling. Strong copolymer Sherlock® core will not delaminate.

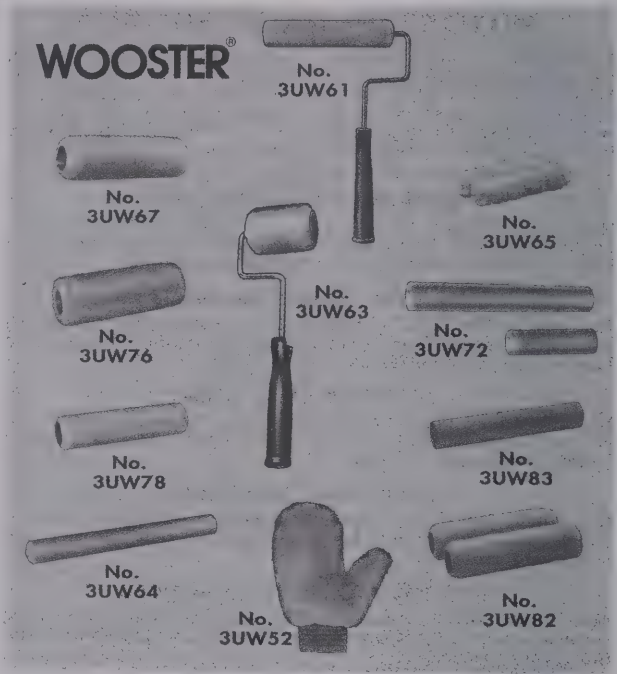
### MOHAIR BLEND Roller Cover

**No. 3UW64** for all oil-based paints, enamels, floor coatings, epoxies, polyurethanes. Shed-resistant, non-bubbling. Natural painting qualities with added durability.

### MINI-KOTER™ System

**Nos. 3UW61-3UW62** for all flat paints and stains. For trim work and hard-to-reach areas behind radiators, cabinets. Wire shank frame with threaded plastic handle, 6½" roller cover. R128 is 10½" long; R129 is 26½" long.

### MINI-KOTER™ Twin Packs



**Nos. 3UW65-3UW66.** Two replacement covers for use with the Mini-Koter frame. For all flat paints or stains.

### PORCUPINE® Spiked Roller

**Nos. 3UW72-3UW73.** Spiked roller relieves surface tension by eliminating gas bubbles in high-build or catalyzed epoxy floor coatings. Can be used further into the curing cycle. Smaller pins for smooth results.

### PHENOLIC ROLLER

**Nos. 3UW83.** Durable, solvent-resistant roller for spreading and leveling mastics, anti-slip floor toppings, other heavy coatings.

### PAINTER'S CHOICE™ 2-Pack Roller Covers

**No. 3UW82.** Disposable covers for flat paints, mastics, coal tar.

### SUPER TRIMMER Roller & Replacement

**No. 3UW63/4KR09** for all paints. Shed-resistant 4" roller, frame with threaded plastic handle. Use on small areas, trim, or striping parking, factory, playground areas. Use with pole No. 3H384.

### SYNTHETIC MITT With Thumb

**No. 3UW52** for painting pipes, railings, wrought iron, chains, and other uneven or detailed surfaces. For all paints.

# ROLLER PAINTING TOOLS

Industrial and maintenance quality roller frames for 9" or 18" covers, extension poles to increase reach when painting walls and ceilings or applying floor toppings, and paint trays/bucket/screen.

### SHERLOCK® Roller Frame

**No. 3UW50**. Durable copolymer cage keeps the roller cover round. Quick-release spring prevents roller walk-off. Twin bearings eliminate graying and streaking in paint. Comfortable grip, fits all extension poles.

### SHERLOCK® WIDE BOY™ Adjustable Frame

**No. 3UW53**. Holds 1½" standard and 2¼" jumbo diameter rollers up to 18" long. Rigid tubular steel, durable, lightweight. Includes 1½" and 2¼" endcaps. Fits all extension poles.

### UTILITY ROLLER FRAME

**No. 3UW51**. Sturdy 5-wire cage provides support for the roller cover. Galvanized 1/4" shank. Threaded plastic handle.

### SHERLOCK® Extension Poles

**Nos. 3UW55-3UW59**. Rugged fiberglass outer pole, hexagonal aluminum inner pole prevents twisting. Change length in 6" increments with quick-adjust lever. Universal threaded tip.

### WOOD EXTENSION POLE, Threaded Tip

**No. 3H384**. Smooth, durable hardwood with clear lacquered finish. Full 60" long. Aluminum tip, standard threads.

### PLASTIC PAINT TRAY

**No. 3UW75**. Solvent-resistant polypropylene 2-quart tray. Larger 11" width. Designed to spread paint evenly onto the roller.

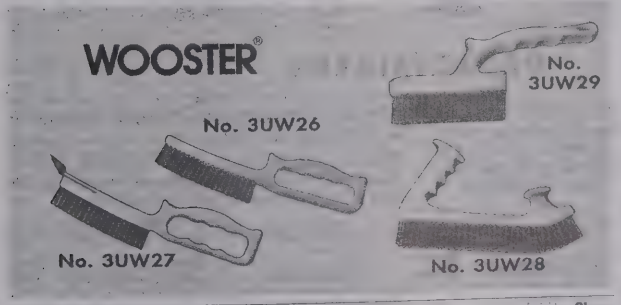
### METAL PAINT TRAY

**No. 3UW74**. Rust-resistant bright steel 1-quart tray. Ladder-lock legs, ribbed bottom. Larger 11" width for easier roller refills.

### WIDE BOY™ Paint Bucket

**No. 3UW48**. Five-gallon capacity. Built-in roll-off area easily loads 9-18" rollers, No-tip design, 14 x 24 x 10" D. Polypropylene bucket, galvanized steel handle. Paint bucket swivel casters available (No. 3A817, stem 3).

### WIRE SPREADER SCREEN



**No. 3UW49**. Load roller directly from 5-gallon bucket. 10" wide and 1½" long. Heavy-duty expanded wire, reinforced edges on all sides.

# WOOSTER® PREP CREW™ SURFACE PREP TOOLS

Heavy-duty brushes of exceptional quality, featuring comfortable, full-sized handles, staggered tufts for better coverage, and more wire than found in average brushes.

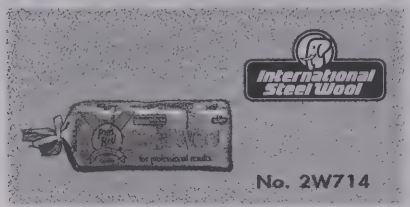
### LONGNECK® Wire Brush

**No.3UW26**. Wrap-around handle protects fingers. Industrial quality with maximum wire content. Removes flaking paint, rust, scale from any surface. Cleans concrete, brick, other masonry.

### LONGNECK® Wire Brush With Scraper

**No.3UW27**. Longneck brush with heavy-duty 3" steel scraper that has a baked-on, rust-resistant finish.

### PREP-PLANE® Wire Brush



**No.3UW28**. Plane-shaped design for two-handed use, reduces work time. Angled tip to reach tough spots. Maximum wire content. Removes flaking paint, rust, scale from any surface.

### CORNER CLEANER® Wire Brush

**No.3UW29**. Small size with pointed end for hard-to-reach areas. Finger grips and thumb rest for more control. Removes paint, rust, scale from any surface.

| Item Description | Block Size | No. of Tufts | Length Clear | Wooster Model | Stock No. | List | Each | Shpg. Wt. |

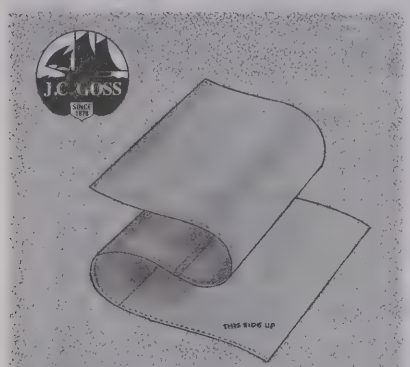
| CORNER CLEANER® Brush | 5 x 1 | 64 | 1¼ | 1823 | **3UW29** | 6.80 | **5.78** | 0.5 |

# DROP CLOTHS AND PAINTING ACCESSORIES

No. 2W714



## INDUSTRIAL GRADE STEEL WOOL

**Made of the highest grade steel,** these heavy-duty steel wool pads are used in cleaning and finishing applications such as surface preparation, paint removal, wood refinishing and metal polishing. By using the correct grade of steel wool, difficult cleaning and finishing jobs are easily handled.

**Available in seven grades** ranging from 0000 (finest) to 3 (coarse). Complete description of application for each grade are on every package. Packaged in sleeves of 16 individual pads. International Steel Wool brand.

| Type | Grade | Application | Stock No. ②③ | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **Finest** | 0000 | Buffs woodwork, shellac, lacquer and varnish (use with wax or oil). | **2W709** | $3.06 | **$2.97** | 0.8 |
| **Extra-Fine** | 000 | Buffs cabinetry and new wax finishes. Polishes aluminum, copper, brass and zinc. Removes minor burns from wood and leather. Removes paint drips and splatters. | **2W710** | 2.84 | **2.75** | 0.8 |
| **Fine** | 00 | Buffs final finish on painted trim. Cleans screens and frames. | **2W711** | 2.52 | **2.45** | 0.8 |
| **Medium-Fine** | 0 | Cleans aluminum, copper, brass, zinc and other metals. Removes rust from metal tools. (Use with light oil for best results.) | **2W712** | 2.32 | **2.25** | 0.8 |
| **Medium** | 1 | Cleans linoleum, rubber asphalt and other resilient floors. Prepares wood for the first coat of paint and smooths raised grain. | **2W713** | 2.32 | **2.25** | 0.8 |
| **Medium-Coarse** | 2 | Cleans glass brick, rough metal or stone surfaces. Removes rust and dirt from garden tools and machinery, scuff marks and old wax from floors. | **2W714** | 2.12 | **2.06** | 0.8 |
| **Coarse** | 3 | Removes old paint and varnish. | **2W715** | 2.12 | **2.06** | 0.8 |

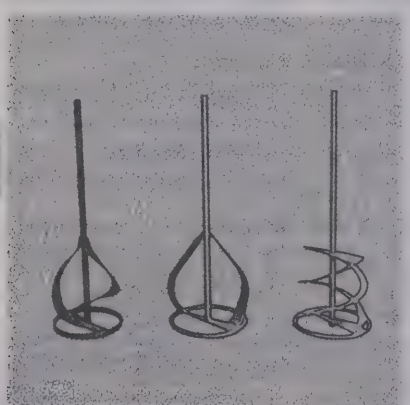
② These products are covered by California Proposition 65. California purchase or shipments, see first page of Grainger Branch Listing or call any California branch.
③ These products are covered by OSHA Hazard Communication Standard, and Material Safety Data Sheets (MSDS) are available. See page opposite inside back cover.

"This Side Up" label assures proper use

No. 5H908

## CANVAS DROP CLOTHS

**Well-suited for covering finished floors,** carpets and furniture when painting, sanding, staining, or mixing materials.



**Excellent as dust cloths** and for protecting furniture and equipment when temporarily or permanently stored indoors.

**Allows easy gathering and hauling of debris,** leaves, trimmings, and scraps.

**Used by painters,** furniture movers, contractors, schools, landscapers, plants, factories, maintenance crews, and warehouses.

- **Mildew-resistant thread, double stitched for durability**
- **Helps avoid paint drop damage**
- **Heavy-duty, durable 8-oz. canvas**
- **All "tripproof" seams are on the underside for added safety**
- **"This Side Up" labeling reminds user to always keep the clean side down**
- **Consistent quality—no patching or use of scraps**
- **Strong, flexible, washable**
- **Off-white color**
- **JC Goss brand**

| Description | Cut Size (Ft.) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **Runner** | 4 x 15 | **5H910** | $29.75 | **$20.83** | 4.5 |

| **Drop Cloth** | 12 x 15 | **5H909** | 77.75 | **54.45** | 13.0 |

## DRUM MIXERS

Computer designed mixers for varying density liquids and dry materials. Mixer revolves clockwise, material circulates downwards from the perimeter of the container and upwards in the center for a thorough mixing action without splashing or introducing water.

Heavy-gauge steel and welded parts. Painted finish. Used with portable drills and drill presses with 1/2" chucks.

| Description | Head | Shaft (In.) | Max. Speed (RPMs) | Applications | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| **Light-duty Mixer** | Round Head: 4" dia.—Low viscosity | 7/16 Hex x 23 | 800 | Fast mixing paints, inks, liquids | **6A820** | $16.20 | **$13.22** | 1.4 |
| **Medium-duty Mixer** | Round Head: 4⅝ dia.—Med. viscosity | 7/16 Hex x 23 | 700 | Interior/exterior paints, latex paints, wallpaper adhesives, concrete sludge | **6A821** | 33.00 | **26.40** | 2.0 |
| **Heavy-duty Mixer** | Spiral Head: 4¾ dia.—High viscosity | 7/16 Hex x 23 | 500 | Ready-mix mortar, plaster, gypsum pastes, carpet adhesives, granulates | **6A822** | 36.60 | **29.30** | 2.3 |

# RUST-OLEUM® SYSTEM SELECTOR GUIDE

**How To Use This Guide: To determine the system that best meets your needs, use the description below to determine the exposure conditions. Select the surface type to be coated, then choose the best coating system and primer according to the key feature for a given system. (If a specific stock no. is given, that indicates that specific product is recommended. Systems Include multiple stock nos.).**

## MILD ENVIRONMENTS

**Characterized By: Outdoor weathering, mild industrial fumes, and normal humidity with mold and mildew conditions.**
**Surfaces Include: Exterior or metal structures, shipping docks, doors, conveyors, piping, electrical equipment and storage tanks.**

### FOR COATING STEEL

| Key Features | Finish | Primer |
|---|---|---|
| **Several primers available based on surface preparation requirements and exposure conditions.** | 7600 or 3400 Industrial Oil-Based Enamels (See page 1990) | 7600 or 3400 Industrial Enamel Primers (See page 1990) |
| **Mold and mildew resistant. Can be applied on damp surfaces at temperatures as low as 18°F (–8°C).** | No. 6A396 Dairy White (See page 1989) | No. 6A394 Red Primer<br>No. 6A395 White Primer<br>(See page 1989) |
| **Good gloss retention indoors and outdoors, low odor. Thin and clean up with water.** | 5200 System High Performance Water-Based Acrylics (See page 1992) | No. 5H925 Red Primer<br>No. 5H893 Gray Primer<br>(See page 1992) |
| **1-coat application to tightly-bonded rust with minimal surface preparation. Moisture, chemical and abrasion resistance.** | 9100 System High Performance Epoxy (See page 1993,1996) | Not Applicable |
| **Direct to metal (DTM), fast dry, good gloss and color retention, soap and water clean-up. Low odor.** | 3100 Speedy-Dry DTM Water-Based Acrylics (See page 1992) | Not Applicable |
| **Outstanding color and gloss retention. High build, ideal for direct to sound rust.** | 9800 DTM Urethane Mastic (See page 1992,1996) | No. 1F766 Red Primer<br>No. 1BW42 Light Gray Primer<br>(See page 1991) |

### FOR COATING GALVANIZED STEEL/ALUMINUM

| | | |
|---|---|---|
| **Compatible with variety of surfaces and previous coatings. Good gloss retention, indoors and outdoors. Low odor. Thin and clean with water.** | 5200 System High Performance Water-Based Acrylics (See page 1992) | No. 5H925 Red Primer<br>No. 5H893 Gray Primer<br>(See page 1992) |
| **Direct to metal (DTM), fast dry, good gloss and color retention, soap and water clean-up. Low odor.** | 3100 Speedy-Dry DTM Water-Based Acrylics (See page 1992) | Not Applicable |
| **Outstanding color and gloss retention. High build, ideal for direct to sound rust.** | 9800 DTM Urethane (See page 1992,1996) | None |

### FOR COATING CONCRETE/MASONRY

| | | |
|---|---|---|
| **Compatible with variety of surfaces and previous coatings. Low odor. Thin and clean up with water.** | 5200 System High Performance Acrylics (See page 1992) | No. 5H925 Red Primer<br>No. 5H893 Gray Primer<br>(See page 1992) |
| **Direct to metal (DTM), fast dry, good gloss and color retention, soap and water clean-up. Low odor.** | 3100 Speedy-Dry DTM Water-Based Enamel (See page 1992) | Not Applicable |
| **Outstanding color and gloss retention. High build at 340 g/l VOC.** | 9800 DTM Urethane Mastic (See page 1992,1996) | None |

## MODERATE ENVIRONMENTS

**Characterized By: Frequent fumes and spillage of mild chemicals, product spillage, chemical cleaning. Intermittent high humidity and moisture, mold and mildew conditions. Surfaces Include: Walls, ceilings, conveyors, piping, motors/pumps, filling equipment, work tables, blending tanks, case loaders, hand rails.**

### FOR COATING STEEL

| | | |
|---|---|---|
| **Good gloss and color retention. Variety of colors.** | Industrial Oil-Based Enamels (See page 1989) | Industrial Oil-Based Enamel Primers (See page 1989) |
| **Outstanding gloss and chemical resistance. Minimum surface prep. Use 9700 for VOC compliance at 340 g/l.** | 9400 or 9700 Polyurethane (See page 1995 or 1992,1996) | No. 7A983 Red or No. 7A984 Buff High Solids Epoxy Primer (See page 1993,1994) |
| **Mold and mildew resistant. Can be applied on damp surfaces at temperatures as low as 18°F (-8°C).** | No. 6A396 Dairy White (See page 1989) | No. 6A394 Red Primer or No. 6A395 White (See page 1989) |
| **Good gloss retention indoors and out; low odor. Thin with water, soap & water clean-up.** | 5200 System High Performance Water-Based Acrylics (See page 1992) | No. 5H925 Red Primer, or No. 5H893 Gray Primer (See page 1992) |
| **Direct to metal (DTM), fast dry, good gloss and color retention, soap and water clean-up. Low odor.** | 3100 Speedy-Dry DTM Water-Based Acrylics (See page 1992) | Not Applicable |

| **For heavy foot, and heay weight, rubber-tired vehicle traffic, constant moisture and frequent chemical spillage. Low-odor.** | 6500 100% Solids Epoxy (See page 1997) | 6500 100% Solids Epoxy (See page 1997) |
| **Anti-slip floor coatings for areas where safety is a concern. Various profile levels available.** | AS5400, AS6000, AS6500 AS9100 Systems Anti-Slip Epoxy Floor Coatings (See pages 1998 and 1999) | 9100 High Performance Epoxy over metal floors only (See pages 1993,1996) |
| **ROOFS** | | |
| **Rusted Metal -- Direct to sound rusted metal. Premium leafing aluminum. Provides reflectivity for heat loss.** | 3915 DTM Fibered Aluminum (See page 2001) | None Required |
| **Clean Metal/Concrete & Masonry -- Tough durable protection. Water-based. High-build. Provides reflectivity for heat loss.** | 3990 High Build Acrylic Elastomeric (See page 2001) | No. 5200 Water-Based Acrylic Primer rusted areas only (See page 1992) |
| **Built-Up -- Provides waterproofing and weatherproofing maintenance. 3972 water-Based has zero VOC.** | 3971 Fibered Asphaltic (See page 2000) 3972 Fibered Asphaltic (See page 2000) | 3970 Asphaltic Primer (See page 2000) |
| **ASPHALT-INDOORS AND OUTDOORS** | | |
| **Direct to metal (DTM), fast dry, good gloss and color retention, soap and water clean-up. Low odor.** | 3100 Speedy-Dry DTM Water-based Acrylics (See page 1992) | Not Applicable |
| **Good gloss retention indoors and out; low odor, water-thinning and clean-up, low risk of flammability.** | 5200 System High Performance Water-Based Acrylics (See page 1992) | No. 5H925 Red Primer (See page 1992) |
| **Fast dry. Adheres to concrete, blacktop and grass. Weather and abrasion resistance for durability.** | 2300 System Labor Saver Marking and Striping Paint (See page 2003) | Not Applicable |
| **VEHICLES** | | |
| **Protects against weathering, road salt, and grime on semi-trailers and cabs, fork lifts, fleet vehicles, and delivery trucks** | | |
| **Quick-drying system minimizes equipment down time.** | 1500 System Speedy Dry Oil-Based Enamels (See page 1991) | No. 5H968 Yellow Primer (See page 1991) |
| **Best long-term gloss retention and resistance to chipping and corrosion. Use 9700 for VOC compliance at 340 g/l.** | 9400 Polyurethane (See page 1995) 9700 Polyurethane (See page 1992,1996) | No. 1F766 Red Primer (See page 1992,1996) No. 1D460 Gray Primer (See page 1992) |
| **Extremely fast drying. Good color and gloss retention. Low odor, water thinning, non flammable.** | 3100 Speedy Dry DTM Water-Based Acrylic (See page 1992) | No. 1D460 Gray Primer (See page 1992) |

# VOC REGULATIONS AND ICON DESCRIPTIONS

Several Federal, State and Local regulatory authorities have enacted regulations to reduce volatile organic compound(VOC) emissions from various commercial and consumer products. These products include architectural and industrial maintenance (AIM) coatings, aerosol spray paint, and general purpose cleaners.

Architectural coatings are those formulated and recommended for field application to stationary structures and accessories to those structures, to portable buildings, to pavements or to curbs. Included in the category of architectural coatings are typically several subgroups; Industrial Maintenance Coatings, Roof Coatings, High Temperature Coatings and Metallic Pigmented Coatings. Each of the subgroups has an applicable VOC limit.

Spray Paint is not an Architectural Coating. Spray Paint that is packaged in a pressurized disposable can is for hand-held application or for use in specialized equipment for ground traffic/marking applications. Within the Spray Paint category, each subcategory (Non-flat paint products, Clear coatings, Primers, Fluorescent coating, etc.) has an applicable VOC limit.

Similarly, general purpose cleaners, those recommended for all-purpose cleaning, have VOC limits.

The State, Local and (proposed) Federal rules differ in their categories, definitions and limits. The following restrictions apply to sales of Rust-Oleum® AIM Coatings, spray paint, and general purpose cleaners.

## ARCHITECTURAL AND INDUSTRIAL MAINTENANCE (AIM) - VOC REGULATIONS

1. Not for sale in Maricopa County, AZ. (Rule 335)
2. Not for sale in Jefferson County, KY. (Regulation 1.16)
3. Not for sale in Massachusetts. (310 CMR 7.25 (11))
4. Not for sale in New Jersey. (NJAC 7:27-23)
5. Not for sale in Bronx, Kings, Nassau, Queens, Richmond, Rockland, Suffolk, Westchester Counties and New York City. (Part 205)
6. Not for sale in portions of Clackamas, Multnomah and Washington Counties, OR. (OAR 340-22-1000)
7. Not for sale in Brazoria, El Paso, Galveston, Harris, Jefferson, Orange, Chambers, Collin, Denton, Fort Bend, Hardin, Liberty, Montgomery, Waller, Dallas and Tarrant Counties, TX. (31 TAC 115)
8. Not for sale in Southwest Clark County, WA. (SWAPCA 493-300)
9. Not for sale in San Joaquin, Stanislaus, Madera, Fresno, Tulare, Kings, Kern, Imperial, Sacramento and Santa Barbara Counties, CA.
10. Not for sale in Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, Santa Clara, Solano, Sonoma, Los Angeles, Orange, San Bernardino, Riverside and Ventura Counties, CA.

### NATIONAL AIM RULE

A rule covering AIM coatings throughout the United States, including the District of Columbia, the Commonwealth of Puerto Rico, the Virgin islands, Guam, American Samoa and the Commonwealth of the Northern Mariana islands is expected to become effective September 11, 1999. Products manufactured before the date will be "grandfathered," meaning they can be used and sold after the rule goes into effect. Note that the national AIM rule does not replace more stringent state and local rules-they remain in effect for regulated areas.

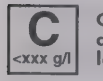
AEROSOL - VOC REGULATIONS

A. Not for sale in portions of Clackamas, Multnomah and Washington Counties, OR. (OAR 340-22-900)

B. Not for sale in southwest Clark County, WA. (SWAPCA 493-200)

C. Not for sale in California. (HSC 94520-28)

OTHER - REGULATIONS



† Not for sale in Minnesota. Contains zinc chromate.

+ Not for sale in California, New York, New Jersey, Massachusetts. Subject to General Purpose Cleaner VOC Rule.

❹ All products (except where noted) can be used in USDA regulated facilities based on FSIS Directive 11,000.4 (November 24, 1995). Users should verify that the color is acceptable to the local USDA inspector before using any coating.

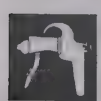
‡ Not subject to regulation in noted areas.

NOTE: Use of thinner may affect VOC compliance in some areas. Check product labeling.

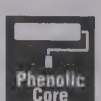
Compliant with VOC regulations for architectural and/or industrial maintenance coatings. VOC level is stated.

## APPLICATION ICONS

Throughout the Paint & Painting Supplies section of this catalog you will see icons like those listed below. They are designed to guide you as to how to best apply the product the icons are associated with, or to further inform you of the products special requirements.



Apply product using either a brush or roller.



Apply product using a squeegee.

Use of a mechanical mixer is required with this product.

Apply product using a spray gun.

Apply product using a phenolic core roller.

Two-component system. Product must be mixed with an activator for it to work properly.

# INDUSTRIAL OIL-BASED ENAMELS MILD TO MODERATE ENVIRONMENT

## INDUSTRIAL ENAMELS

RUST-OLEUM.

One-Gallon Cans

**OIL BASED FINISHES:**

- Use on steel and wood surfaces
- Lasting protection against corrosion
- Exhibits superior color and gloss retention
- Tough, flexible film resists abrasion, chipping and peeling
- Withstands mild chemicals

**OIL BASED PRIMERS Nos. 5A270 & 5H928 Environment: Mild**

- General Purpose zinc chromate for use on new, lightly rusted, abrasive blasted, or previously painted steel
- Use No. 5A270 Yellow under light-colored topcoats
- Use No 5H928 Red under dark-colored topcoats

**Nos. 6H500 & 6H499 Environment:Moderate/Severe Coastal**

- Heavy-duty for use on new, clean, heavily rusted, previously painted, or abrasive blasted steel
- Apply where a thicker film build is needed (up to 3 mils per coat). Can apply directly to sound rust

**No. 5A260 Environment: Moderate**

- Use on dry or slightly damp sound rusted surfaces
- Penetrates rust to base metal and drives out air/moisture
- Can be exposed up to one year without topcoating

**Nos. 5H888 & 6A931 Environment: Moderate**

- Use on clean metal, sound rust, slightly rusted or previously painted steel
- Can be exposed to general weathering for up to 6 months without topcoating

**DRY TIME AND COVERAGE (APPROX.)**

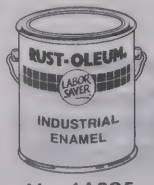
## 8400 SYSTEM FOOD/BEVERAGE ENAMELS

RUST-OLEUM.

One-Gallon Cans

**FINISHES:**

- Oil-based primers and finish containing fungicide additive
- Use in food/beverage plants and areas of high humidity or frequent cleaning
- Apply to steel, wood, masonry, concrete, ceilings, walls, structural steel, tanks, and equipment
- Use No. 6A396 as topcoat over properly primed steel or wood. Can apply at temperatures as low as 18°F (-8°C)



**PRIMERS:**

**No. 6A395 White Primer**

- Apply to clean, bare, or sanblasted metal, wood, wallboard

**No. 6A394 Red Primer**

- Apply to clean metal or directly to sound rusted metal

No. 6A395

**DRY TIME AND COVERAGE (APPROX.)**

# INDUSTRIAL LOW VOC OIL BASED ENAMELS MILD TO MODERATE ENVIRONMENT

## 3400 SYSTEM LOW VOC ENAMELS

RUST-OLEUM®

C <340 g/l

One-Gallon Cans

Finishes:

- Oil-based primers and finishes at VOC of <340 g/l
- Low VOC version of Industrial Enamels
- Protection of steel and wood against corrosion and weathering
- Resists mild chemical fumes and light abrasion
- Higher solids means greater coverage per can
- Can thin finishes up to 10%, primers up to 5%, without exceeding 340 g/l
- 333 Thinner (does not affect VOC)

NOTE: Nos. 1F736 and 1F726 primers should NOT be used on galvanized metal. Use water-based 5200 System Primers under 3400 System topcoats for galvanized metal applications.

| DRY TIME AND COVERAGE (APPROX.) | Finishes | Primers |

## 7600 SYSTEM LOW VOC ENAMELS

RUST-OLEUM®

C <420 g/l

One-Gallon Cans
Finishes:

- Oil-based primers and finishes at Low VOC of <420 g/l
- Low VOC version of Industrial Enamels
- Superior protection of steel and wood against corrosion and weathering
- Same long-lasting protection and beauty as Industrial Enamels
- Resists mild chemical fumes and light abrasion
- Higher solids means greater coverage per can
- 333 Thinner (does not affect VOC)

IMPORTANT! VOC regulations apply to this system in area 9. See page 1988.

**Please see back of label for complete product information and application instructions.**

❸ All products are covered by OSHA Hazard Communications Standard and Material Safety and Data Sheets (MSDS) are available upon request. See page opposite inside back cover.

(‡) Exception: This specific stock number is compliant or exempt in areas noted.

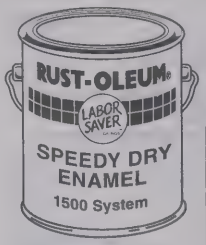
For color representations of coating systems listed on this page, please see the Rust-Oleum Color Selection Guide.

# INDUSTRIAL OIL-BASED ENAMELS AND PRIMERS MILD TO MODERATE ENVIRONMENT

## 1500 SYSTEM SPEEDY DRY ENAMELS

RUST-OLEUM

One-Gallon Cans



FINISHES:

- Fast-drying, use on steel and wood
- Use in maintenance, product finishing and color coding applications
- Smooth, high-gloss finish resists fading, dulling, cracking chipping and peeling
- Two-coat primer/topcoat system can be applied in typical 8-hour work day
- Reduces application time and down times

No. 5H968 RUST-INHIBITIVE PRIMER.

- Protects clean, abrasive-blasted, or slightly rusted metal from corrosion
- Excellent fast-drying shopcoat primer.

IMPORTANT! VOC regulations apply to this system in areas 1, 2, 3, 4, 5, 6, 7, 8, 9, 10. See page 1988.

No. 5H965

# HIGH-PERFORMANCE WATER-BASED ACRYLICS MILD TO MODERATE ENVIRONMENT

## 5200 SYSTEM WATER-BASED ACRYLIC

RUST-OLEUM®

C <250 g/l

One-Gallon Cans

FINISHES:

- May apply to primed galvanized steel
- Apply to most previous coatings without lifting; apply to sound rusted metal without sandblasting
- Ideal for food plants, offices, schools, hospitals, restaurants
- Low odor/low risk flammability
- May thin with water

PRIMERS:

- Use on new or previously painted wood, concrete, masonry, plaster, steel, aluminum and galvanized metal

No. 3UR05

## 3100 SPEEDY DRY DIRECT TO METAL WATER-BASED ACRYLIC

RUST-OLEUM®

C <250 g/l

One-Gallon Cans

FINISHES:

- Use on steel, aluminum, galvanized, metal, or previously coated and primed surfaces
- Ideal for equipment, machinery and other areas where minimal downtime is required
- Fast-drying
- Can be applied directly to properly prepared metal
- Dries up to 50% faster than conventional fast-dry oil-based enamels
- High gloss protection
- Use No. 1D460 primer under lighter color finish coats for greater hiding
- Thin with water

No. 1D464

# INDUSTRIAL EPOXY COATINGS MODERATE TO SEVERE ENVIRONMENT

## 5300 SYSTEM WATER-BASED EPOXY

RUST-OLEUM

C <340 g/l | 2 Components

One-Gallon Cans — Environment: Moderate to Severe

**FINISHES:**

- Water-based epoxy primer and finish coat system
- Apply to clean or sound rusted steel, galvanized metal, aluminum, concrete or masonry
- Ideal for use in food and beverage plants, clean rooms, hospitals, and schools
- Fast drying; 2-coat system can be applied in 3 hours
- Low odor, low flammability

No. 7H584

**DRY TIME AND COVERAGE (APPROX.)**

| | Finishes | Primers |
|---|---|---|
| Tack Free Hours: | 1-2 | 1/2-1 |
| Handle Hours: | 3-6 | 2-5 |
| Recoat Hours: | 1-2 | 1-2 |
| Practical Sq. Ft.: | 200-350 | 200-350 |

**PRIMERS:**

- For best results, apply one coat of 7H580, followed by one coat of 7H581, then desired finish color

| Description | Rust-Oleum Model | Stock No. ❸ | Price includes activator List | Price includes activator Each | Shpg. Wt. |
|---|---|---|---|---|---|
| Red Primer (activated) | 5369 | 7H580 | $65.14 | $52.05 | 13.5 |
| Gray Primer (activated) | 5381 | 7H581 | 69.39 | 55.50 | 12.2 |

| White | 5392 | 7H589 | 81.55 | 65.25 | 11.1 |

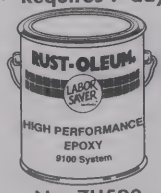
**IMPORTANT NOTE: 2-COMPONENT SYSTEM. One pint of activator (for finishes) or one quart (for primers) must be mixed with each short-filled gallon. Result is one full gallon (activated).**

## 9100 SYSTEM HIGH PERFORMANCE EPOXY

RUST-OLEUM

C <340 g/l | 2 Components

One-Gallon Cans — Environment: Moderate to Severe



**IMPORTANT NOTE: 2-COMPONENT SYSTEM. One gallon of activator must be mixed with one gallon of finish. Result is two full gallons (activated).**

**FINISHES:**

- High solids, high build epoxy mastic coatings
- Apply directly to sound rusted or clean steel, galvanized metal, previously painted steel, or properly prepared concrete and masonry surfaces
- Self-priming; no additional primer needed
- Minimal surface preparation required
- Products available for standard, low temperature, or water immersion applications

**For Low Temperature Applications: (select low temperature kit below). For use when applying at temperatures between 40° and 60°F.**

- For Water Immersion Applications: (select water immersion application kit below)
- For service inside process water tanks, sewage treatment basins and water storage facilities
- NOT recommended for potable water tanks
- Use on abrasive blasted steel, concrete or masonry surfaces to be immersed in either fresh or salt water
- Apply only at temperatures between 60° and 100°F; 2-coat application required
- Requires 7 day cure

No. 7H590

**Please see back of label for complete product information and application instructions.**

❸ All products are covered by OSHA Hazard Communications Standard and Material Safety and Data Sheets (MSDS) are available upon request. See page opposite inside back cover.

# INDUSTRIAL EPOXY COATINGS

## 9300 HIGH SOLIDS EPOXY PRIMERS

RUST-OLEUM®

C <340g/l | 2 Component

One-Gallon Cans — Environment: Moderate to Severe

- Apply to sound rusted steel surfaces, previous coatings
- Use as a primer for 9100 System Epoxy Mastic, 9700 System Low VOC High Solids Polyurethane, and 9800 System DTM Urethane Mastic
- Offer extended recoat opportunities for up to 30 days
- High build, rust inhibitive primer
- Low VOC at <340 g/l
- With recommended topcoats, provides excellent protection against corrosion, chemical spills and fumes, heavy abrasion, and high moisture exposure

IMPORTANT NOTE: 2-COMPONENT SYSTEM. One-gallon of activator must be mixed with one-gallon of primer. Result is two full gallons (activated).

No. 6A934

## 5800 SYSTEM HIGH PERFORMANCE LATEX INTERIOR PAINTS

RUST-OLEUM®

C <340 g/l | 2 Component

One-Gallon Can
Five-Gallon Pail — Environment: Interior only; mild to moderate

- Premium acrylic wall and ceiling paint
- Use on substrates such as cinder block, drywall, masonry, plaster, wood, or previously painted surfaces.
- Fast dry for minimum "down time"
- Easy to apply by brush, roller, or spray
- Easy clean-up with soap and water
- Superior gloss and color retention
- Stain resistant, washable finish
- Use in offices, hallways, locker rooms, warehouses and production areas
- Low Odor

## SELECT QUALITY PRODUCTS FROM LEADING MANUFACTURERS WITH PROVEN PERFORMANCE

Grainger features quality products from the brand name manufacturers you know and trust. More than 900 national brands are listed in the Brand Index at the back of this catalog.

# RUST-OLEUM® COLOR SELECTION GUIDE

Rust-Oleum Coating Systems for industrial/commercial maintenance applications will protect machinery, equipment, structural steel, walls, ceilings and floors for indoor and outdoor usage. Coatings will protect against rust, heat, moisture wear, chemical attack, and other harsh environments.

## LABOR VS. MATERIAL COST

Coating material costs generally account for only 10-15% of total job cost. Labor costs, including surface preparation, application, and clean-up, account for 85-90%.

## LABOR SAVER™ COATING SYSTEMS

Save time, money, and worry. Easier to use than most comparable coatings. Long lasting durability reduces frequency of painting. Each system offers one or more of the following features:

- Minimal surface preparation
- Low risk of flammability
- Easy clean-up with soap and water
- Easy and convenient to apply with brush, roller, or spray
- Low odor and fumes, even in enclosed areas
- Apply over a variety of substrates
- Fast drying
- Apply in a wide range of temperatures

FOR A COMPLETE LISTING OF RUST-OLEUM COATING SYSTEMS AND COLORS AVAILABLE, PLEASE SEE PAGES 1984-1999.

# RECOMMENDED SURFACE PREPARATION

Correct surface preparation is necessary to achieve the desired performance of any coating system. For correct surface preparation for a given system, refer to the System Selector Guide listed on pages 1980-1982. For coating concrete floors, first assess the environment to which the floor will be exposed. The amount of abrasion, chemical abuse, and severity of chemical contact will determine which floor coating should be used. SP ratings based on Steel Structures Painting Council recommendations.

**NOTE: Chemical cleaning of surface must be employed before any mechanical surface preparation.**

## CHEMICAL CLEANING

### SP1 Chemical Cleaning

The surface must be rinsed thoroughly and completely dry before the application of coating. Use one or both of the following techniques:

Cleaner/Degreaser - For removal of grease, oil and dirt.

Steam Cleaning - For removal of grease, oil, salt, acid, alkali, and similar chemical residue from large areas.

## SCRAPING AND WIRE BRUSHING

### SP2 Hand Tool Cleaning; SP3 Power Tool Cleaning

Hand and Power Tools - For removal of loose rust, loose mill scale, and deteriorated coatings. Prior to scraping and wire brushing, remove grease, oil, salt, chemicals, dust, and other contaminants by Chemical Cleaning. Removal of heavy rust scale, light mill scale, or previous coatings over existing areas usually requires SSPC-SP6 Commercial Grade Blast Cleaning.

## ABRASIVE BLASTING

### SP5 White Metal Blast Cleaning

Complete removal of all mill scale, rust, rust scale, and previous coating by abrasive blasting.

### SP6 Commercial Grade Blast Cleaning

Removal of at least 66% of all rust scale, mill scale, and previous coatings from each square inch of surface area by abrasive blasting.

### SP7 Brush-Off Blast Cleaning

Removal of loose rust scale, loose mill scale, and loose coatings by abrasive blasting. (Leave only tightly bonded material.)

### SP10 Near White Blast Cleaning

Removal of at least 95% of all rust scale, mill scale, and previous coatings from each square inch of surface area by abrasive blasting.

## CONCRETE/MASONRY - SURFACE PREPARATION

New concrete should be allowed to cure for 30 days before application of any coating. If there is any doubt about the dryness of the concrete, conduct a test by simply placing a weighted rubber mat, plastic sheet, or other nonporous material on the surface for 24 hours. Check the underside of the mat and concrete for signs of moisture. The substrate will be darker if damp. If moisture is found, allow additional dry time (10-14 days) and repeat test. If moisture persists, concrete surface cannot be coated.

Remove oil, dirt, grease, and other chemical contaminants by cleaning with No. 5H885 Cleaner/Degreaser, detergent, or other suitable cleaner. Rinse with water. Etch concrete with No. 6A935 Cleaning and Etching Solution. Rinse thoroughly and allow to dry.

Very dense, nonporous or chemically treated concrete may require abrasive blasting or sanding to assure proper coating adhesion. Determine porosity by pouring one ounce of water onto the concrete. If water soaks in, the surface is porous enough for coating. If water beads up on the concrete, the surface is not porous and treatment is warranted. The presence of laitance (fine white particles) will also require abrasive blasting, sanding, or abrading to assure removal.

## 9400 SYSTEM
## RUST-O-THANE® POLYURETHANE

**RUST-OLEUM®**

One-gallon cans

**IMPORTANT NOTE: 2-COMPONENT SYSTEM. For finishes, one gallon of finish activator must be mixed with one gallon of finish. Result is two full gallons (activated).**

**FINISHES:**

- **Use on primed or previously painted steel or concrete in severely corrosive industrial, chemical, and marine environments**
- **Ideal for trucks, buses, construction, highway and mining equipment, food/beverage and chemical industries**
- **Tile-like, super high gloss finishes**
- **Superior to epoxies and oil-based enamels in color/gloss retention**
- **Superior to epoxies and oil-based enamels in corrosion-, chemical-, impact-, and abrasion-resistance**

| Finish Description | Rust-Oleum Model | Stock No. ❸ | Standard Applications Price Includes Activator List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **Reducer (Thinner)‡ (All)** | 0190 | **5H949** | $33.81 | **$27.10** | 8.6 |

| **Recoat Hours:** | 16-24 | 1 | 2 |
| **Practical Sq. Ft.:** | 250-600 | 280-475 | 325-550 |

**Note: These coatings contain isocyanates. Respiratory protection equipment is required when using these coatings. ❸**

**SPECIAL PERFORMANCE ADDITIVES:**

**No. 5H952 DRY TIME ACCELERATOR**

**To accelerate drying and reduce tape time 3 to 4 hours,** add No. 5H952 Accelerator to 9400 finish. Adding 4 oz. accelerator per gallon of activated finish cuts both dry time and pot life in half. **Does not meet VOC Compliance requirements.**

**No. 5H953 LEVELING ADDITIVE**

When applying finishes by airless spray, add 4 oz. Leveling Additive per activated gallon of finish for faster application and improved appearance. Not required for air atomized spray applications. Can be used with Dry Time Accelerator above. **Does not meet VOC Compliance requirements.**

| Description | Rust-Oleum Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **Dry Time Accelerator** | 9402 | **5H952** | $11.50 | **$9.21** | 0.7 |
| **Leveling Additive** | 9404 | **5H953** | 6.60 | **5.25** | 0.7 |

**No. 1BW42**

**Please see back of label for complete product information and application instructions.**
❸ All products are covered by OSHA Hazard Communications Standard and Material Safety and Data Sheets (MSDS) are available upon request. See page opposite inside back cover.(‡) Exception: This specific stock number is compliant or exempt in areas noted.
For color representations of coating systems listed on this page, please see the Rust-Oleum Color Selection Guide.

# POLYURETHANE COATINGS SEVERE ENVIRONMENT

## 9700 SYSTEM LOW VOC HIGH SOLIDS POLYURETHANE

RUST-OLEUM®

C <340 g/l | 2 Component

One-gallon cans

**IMPORTANT NOTE: 2-COMPONENT SYSTEM. For finishes, one quart of activator must be mixed with each short-filled gallon of finish. Result is one full gallon (activated).**

FINISHES:

- Durable, high-solids (65-70%), low-VOC polyurethane
- Use on properly primed steel, previously coated surfaces
- Designed for heavy industrial, severe coastal, off-shore or chemical environments or vehicle refinishing
- Resists fading; superior gloss retention
- Excellent abrasion-, chemical-, and corrosion-resistance
- NOTE: A test patch is recommended on previous coatings to ensure compatibility• No thinning required

PRIMERS: 9100 Epoxy

- When exposed to heavy abrasion, acid, or alkali use 9100 System High Performance epoxies (except No. 7H597)

PRIMERS: 7H580 or 7H581

- Use No. 7H580 under dark-colored finishes (5369)
- Use No. 7H591 under light-colored finishes (5381)

PRIMER: 1D460

- Use 1D460 when fast dry times are required (3181)

No. 7U001

**DRY TIME AND COVERAGE (APPROX.)**

## 9800 DTM URETHANE MASTIC SYSTEM

RUST-OLEUM®

C <340 g/l | 2 Component

One-gallon cans

**IMPORTANT NOTE: 2-COMPONENT SYSTEM. For finishes, one short filled quart of activator must be mixed with each short-filled gallon of finish. Result is one full gallon (activated).**

FINISHES:

- Low-VOC, high gloss polyurethane applied at high film builds
- Apply directly to sound rust, prepared metal surfaces. No primer required
- Apply as finish coat to concrete/masonry primed with 9100 System High Performance Epoxy (except No. 7H597)
- Apply in aggressive environments such as heavy industrial, severe coastal, off-shore, chemical plants
- No thinning required
- High film build (3-5 mils dft) means more coverage, lower labor costs

PRIMERS:

- For clean metal exposed to heavy abrasion, acid or alkali; use 9100 System High Performance Epoxies (except No. 7H597)
- For extended recoat opportunities up to 30 days, use No. 7W003 or No. 7W001 Primer (9360/9370)

PRIMERS: Nos. 7H580 or 7H581 Environment: Moderate

- Use No. 7H580 under dark-colored finishes (5369)
- Use No. 7H581 under light-colored finishes (5381)

PRIMERS Nos. 1F766 or 1BW42 Environment: Mild

- Use No. 1F766 under dark-colored finishes (2068)
- Use No. 1BW42 under light-colored finishes (2082)

No. 4CH86

**DRY TIME AND COVERAGE (APPROX.)**

# INDUSTRIAL FLOOR COATING SYSTEMS

## 6000 SYSTEM WATER-BASED EPOXY FLOOR COATINGS

RUST-OLEUM®

C <340 g/l | 2 Component

**One-gallon cans** — **Grade: Moderate-Duty**

**IMPORTANT NOTE: 2-COMPONENT SYSTEM. One pint of activator must be mixed with each short-filled gallon of finish. Result is 1 full gallon activated.**

- **Use on concrete floors exposed to heavy foot, and occasional lightweight, rubber-wheeled vehicle traffic**
- **Apply to previously coated concrete floors, or concrete floors still slightly damp from cleaning**
- **Dries fast; accepts light traffic after only 16 hours**
- **Exhibits excellent abrasion- and chemical-resistance**
- **Protects against occasional steam, chemical, or water washings**
- **Protects against intermittent spills of mild chemicals**
- **Low odor; cleans up with soap and water**

No. 7H622

**DRY TIME AND COVERAGE (APPROX.)**

| | Finishes |
|---|---|
| **Light Traffic Hours:** | 16 |
| **Recoat Hours:** | 1-2 |
| **Vehicle Traffic Hours:** | 72 |

## 6500 SYSTEM 100% SOLIDS EPOXY FLOOR COATINGS

RUST-OLEUM®

C <250 g/l | 2 Component | Mechanical Mixer

**One-gallon cans** — **Grade: Heavy-Duty**

- **Self-leveling, odorless, 100% solids epoxy**
- **Use on concrete floors exposed to heavy foot and rubber-covered wheel traffic, intermittent chemical spills, splashes, and power washings**
- **Ideal for food/beverage plants, or anywhere fumes cannot be tolerated**
- **Stubbornly adheres to properly prepared concrete**
- **Excellent abrasion-, impact- and chemical-resistance**
- **Low viscosity; self-leveling properties**

**IMPORTANT NOTE: 2-COMPONENT SYSTEM.** One short-filled gallon of activator must be mechanically mixed with each short-filled gallon of finish. Result is 1 full gallon activated. Mixing two components with mixer blade No. 1E524 or equivalent is required.

**No. 1E524.** Mixing Blade. Shpg. wt. 0.7 lbs. List ..... $28.42.

# INDUSTRIAL FLOOR COATINGS

## FLOOR COATING PRODUCTS

RUST-OLEUM®

C <250 g/l

No. 6A935

No. 6A936

### NO. 6A935 CLEANING AND ETCHING SOLUTION (108)
One-gallon bottles

- One step, dual-action cleaning and etching solution
- Use on concrete, cement, masonry
- Creates "sandpaper rough" profile on very dense, non-porous concrete to improve coating adhesion
- Dissolves grease, oil, and encapsulates it for easy removal
- Easy to use, solvent free and nonflammable
- One gallon cleans up to 400 sq. ft.

No. 6A935. ❸ Shpg. wt. 5.2 lbs. List $25.87. Each..... $20.70

### NO. 6A936 ANTI-SKID ADDITIVE (200)
One-quart bags

- Specially refined aggregate carefully selected to provide skid resistance
- Use on floors with No. 5H886 Dust Control Sealer, or 6000 System Water-Based Epoxy Floor Coatings
- Add directly into the final coating, or broadcast immediately between coats
- Use 1 bag per gallon of floor coating

No. 6A936. ❸ Shpg. wt. 1.2 lbs. List $3.20. Each..... $2.56

No. 5H886

No. 4MG50

### NO. 5H886 DUST CONTROL SEALER (5010)
One-gallon cans — Grade: Mild-duty

- Clear, water-based acrylic; VOC < 250 g/l
- Prevents dusting on properly prepared new concrete, or old uncoated concrete floors
- Low odor; easy application; soap and water clean-up
- One gallon covers up to 500 sq. ft.

No. 5H886. ❸ Shpg. wt. 10.0 lbs. List $40.88. Each..... $32.75

### NO. 5A279 CONCRETE PATCHING COMPOUND
Two-gallon kit (2 component kit) — Grade: Heavy-duty

- 100% Solids Epoxy compound formulated to repair cracks and holes in concrete warehouse floors, ramps, garages
- Easy to use
- Excellent chemical- and abrasion-resistance
- Can be coated after only 4 hours

No. 5A279. ❸ Concrete Patching Compound (5499) Shpg. wt. 35.0 lbs. List $120.66. Each..... $96.60

*New*No. 4MG49. ❸ Silver Gray Floor Joint Sealant (5180). Shpg. wt. 1.0 lbs. List $13.20. Each..... $9.90

*New*No. 4MG50. ❸ Navy Gray Floor Joint Sealant (5186). Shpg. wt. 1.0 lbs. List $13.20. Each..... $9.90

## AS6000 SYSTEM ANTI-SLIP LOW PROFILE EPOXY

RUST-OLEUM®

C <250 g/l | 2 Components | Mechanical Mixer | Phenolic Core

One-gallon cans
Grade: Pedestrian; Light to Moderate-Duty

IMPORTANT NOTE: 2-COMPONENT SYSTEM. One quart of AS60 activator must be mixed with each short-filled gallon of finish. Result is one full gallon (activated).

- Premixed aggregate anti-slip, low VOC, water-based epoxy with a low profile
- Specially formulated for wet areas on concrete
- Provides slip resistance for pedestrian traffic in showers, locker rooms, pools, laundries and walkways
- Low profile ideal for areas with barefoot, recreational, or pedestrian traffic
- Easy to clean
- Apply with a phenolic "no nap" roller cover.

No. 4CJ46

**DRY TIME AND COVERAGE (APPROX.)**

# INDUSTRIAL ANTI-SLIP FLOOR COATINGS

## AS5400 SYSTEM
## ANTI-SLIP ONE-STEP EPOXY

RUST-OLEUM®

C <340 g/l | Mechanical Mixer | Phenolic Core

**One-gallon cans** **Grade: Pedestrian, Heavy-Duty**

- Anti-slip with premixed aggregate, epoxy ester for easy, one-step application
- Use on clean concrete or metal primed with 9100 System
- Provides slip resistance on aisles, walkways, stairs, and areas around machinery/doorways
- Apply to areas with heavy foot/light vehicle traffic

| Description | Rust-Oleum Model | Stock No. ❸ | List | Each | Shpg. Wt. |

## AS9100 SYSTEM
## ANTI-SLIP HIGH PERFORMANCE EPOXY

RUST-OLEUM®

C <250 g/l | 2 Components | Mechanical Mixer | Phenolic Core

**One-gallon cans** **Grade: Vehicular, Heavy-Duty**

**IMPORTANT NOTE: 2-COMPONENT SYSTEM. One quart of AS91 activator must be mechanically mixed with each short-filled gallon of finish. Result is one full gallon (activated).**

- Premixed aggregate, anti-slip, epoxy for maximum durability under heavy vehicle traffic
- Use on clean concrete or metal when primed with 9100 System (except No. 7H597)
- Provides slip resistance on ramps, walkways, forklift traffic, loading docks, stadiums
- Highly chemical resistant

| Kit Color | Rust-Oleum Model | Stock No. ❸ | Includes Activator List | Includes Activator Each | Shpg. Wt. |

# ROOF MAINTENANCE COATINGS

## BUILT-UP ROOFING PRODUCTS

RUST-OLEUM®

Phenolic Core

### No. 3UP95 FIBERED ASPHALTIC COATING (3971)

- For maintenance and repair of asphalt-based built-up roofing
- Single-component product packaged in 5-gallon pails
- Asphalt-based coating for use on asphalt-based roofing
- Provides excellent elongation properties, waterproofing, weatherproofing protection

### No. 3UP96 FIBERED ASPHALTIC EMULSION (3972)

- Single-component asphalt-based product packaged in 5-gallon pails
- Water-based, zero VOC version of No. 3UP35 for low VOC areas

### No. 3UP94 ASPHALTIC PRIMER (3970)

- Single-component product packaged in one-gallon cans
- Low VOC asphalt-based primer
- Use to prime/condition asphaltic surfaces, and in areas where No. 3UP92 was previously applied

No. 3UP95

**IMPORTANT! VOC regulations apply to this product in areas 2, 3, 4, 5, 7, 9, 10.** **See page 1988.**

**DRY TIME AND COVERAGE (APPROX.)**

## COMPANION PRODUCTS:

### No. 3UP92 E-PATCH® Emergency Roof Patch (3910)

- Two-gallon pails. Mixes with water instantly and stops leaks
- Dry granular materials for temporary repair of roof leaks
- Apply to built-up roofing or low-pitched metal roofing
- Can be applied during rain and periods of melting ice/snow

### No. 3UP99 URETHANE ROOF CAULK (3980)

- 11-oz. tubes
- Use on built-up roofing in conjunction with No. 3UP95 or No. 3UP96

### No. 3UP98 HEAVY-DUTY ROOF CEMENT (3974)

- Five-gallon pails
- Trowel-grade repair material for asphalt-based roofing
- Use to repair blisters, splits, flashings, plug leaks, bridge building materials

No. 3UP98

No. 3UP99

For color representation of coating systems listed on this page, please see the Rust-Oleum Color Selection Guide.

### NATIONWIDE BRANCH NETWORK WITH LOCAL ACCESS IS YOUR SHOPPING ADVANTAGE

Grainger's network of more than 350 local branches provides you nationwide access to our broad selection of product offerings. And with 30-minute "Will Call" service or 24-hour shipping on in-stock items, help is as close as a phone call away. Check the Branch Locations listed in the front of this catalog for the location closest to you.

# ROOF MAINTENANCE COATINGS

## SOUND RUSTED METAL ROOFING PRODUCTS

RUST-OLEUM®

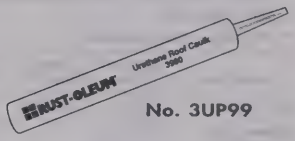
### No. 3UP93 DTM FIBERED ALUMINUM (3915)

- Five-gallon pail
- Single-component product; aluminum color
- Asphalt-based aluminum coating with premium grade leafing aluminum
- Apply direct to sound rusted metal or clean metal roofing
- High-build finish protects from effects of weather and corrosion
- Provides reflectivity to help keep cooling costs down

### No. 3UP99 URETHANE ROOF CAULK (3980)

- 11 oz. tubes; black color
- Single-component, moisture-cured urethane sealant
- Use on sound rusted metal roofing, or asphalt-based built-up roofing
- Ideal for seams, flashings, fasteners, and roof protrusions
- Extremely flexible, resists weathering, expansion, and ultra-violet rays

### No. 3UP97 NEOPRENE FLASHING CEMENT (3973)



- One-gallon cans; black color
- Single-component
- Trowel-grade material for repairing sound metal or clean metal roofing
- Use to patch leaking areas, protect fastener heads, seal joints, metal laps, bridge different building materials
- Ideal for areas where 3UP93 will be applied as finish coat
- Allows for expansion and contraction of metal panels

## CLEAN METAL AND CONCRETE/ MASONRY ROOFING PRODUCTS

RUST-OLEUM®

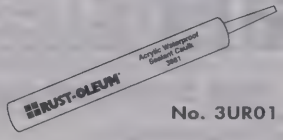
### No. 3UR02 HIGH-BUILD ACRYLIC ELASTOMERIC (3990)

- Five-gallon pails; white color
- Single-component product
- Water-based, 100% acrylic, fibered coating
- Ideal for clean metal roofing, concrete roof protrusions, block walls, and masonry areas
- Creates high-build application in one coat
- Provides tough, durable film for protection against weathering
- Provides reflectivity to help keep cooling costs down

COMPANION PRODUCTS:

### No. 3UR01 ACRYLIC WATERPROOF SEALANT CAULK (3981)

- 11-oz. tubes; white color
- For clean metal roofing or concrete/masonry
- Use to repair seams, small cracks, seal fastener heads, skylights, vents, laps, and voids
- Creates a tough, resilient acrylic seal



### No. 5A279 CONCRETE PATCHING COMPOUND (5499)

(NOTE: Two-component system)

- For concrete/masonry roofing protrusions, block walls
- Fills large cracks, voids, and mortar joints in parapet walls, copings
- Repairs spalled areas

No. 3UR02

No. 3UR01

# INDUSTRIAL SPECIALTY COATINGS AND PRODUCTS

## HIGH TEMPERATURE COATINGS

RUST-OLEUM®

C <250 g/l

For Icon Definitions, See Pg. 1988

**One-gallon (or as noted)** **Environment: Mild**

- Steel subjected to heat up to 1200° F (648° C)
- Excellent resistance to thermal shock
- No. 5H938 is packaged in a two-gallon can (4215)
- No. 5H942 is packaged as a two-gallon kit (4285)
- Important: Essential to measure the operating and maximum temperatures accurately with a surface thermometer, thermocouple, or similar device
- Surface preparation is critical in obtaining long term service from heat resistance coatings. (See System Selector for details)
- Must be heat cured

## SPECIALTY COATINGS

RUST-OLEUM®

### RUST REFORMER®

**Environment: Mild**

- One-gallon bottles. Covers approx. 700 sq. ft. (3575)
- Use on existing sound rusted metal only
- Chemically transforms rust on metal surfaces into a tough, inert barrier against further corrosion
- No topcoat required
- Solvent-based coatings can be applied to the dry finish after 3 hours.

No. 5W181③. Shpg. wt. 3.0 lbs. List $80.44. Each.....$64.40

C <250 g/l

For Icon Definitions, See Pg. 1988

### BLOCK FILLER

**Environment: Mild**

- One-gallon cans (5199)
- Acrylic coating formulated with special fibers to fill small pores and voids for a smooth finish
- Use on new or uncoated cinder or concrete block, stucco, common brick
- Compatible with variety of Rust-Oleum finish coats, including Industrial oil-based enamels, acrylics and epoxies
- Squeegee off excess material

No. 6H048③. Shpg. wt. 13.0 lbs. List $25.62. Each.....$20.50

## PURE STRENGTH® CLEANER/DEGREASER

RUST-OLEUM®

### 100% CONCENTRATED CLEANER/DEGREASER

**Environment: Moderate to Severe**

- Removes accumulated grease, grime, stains, cutting fluids, diesel oil, adhesives, gum, food products from metal, floors, machinery and equipment (3599)
- As powerful as xylene, toluene, or trichloroethylene, but safer to use
- Oil, grease stay in solution; won't re-deposit on surface
- Non-caustic, non-abrasive, non-acidic, economical to use

| Description | Rust-Oleum Model | Stock No. | List | Each | Lots/ Qty | Shpg. Wt. |
|---|---|---|---|---|---|---|
| 14-oz. Aerosol | 3599 | 5H884+ | $7.20 | $5.73 | $4.87/12 | 1.3 |
| 1-Quart Bottle | 3599 | 5H885 | 15.54 | 12.43 | 10.57/6 | 2.2 |
| 1-Gallon Bottle | 3599 | 5U697 | 47.38 | 37.95 | — | 8.0 |
| 5-Gallon Pail | 3599 | 6H083 | 236.88 | 189.75 | — | 40.0 |

### READY-TO-USE CLEANER/DEGREASER

**Environment: Mild to Moderate**

- 17-oz. foaming aerosol (3594)
- Removes grease from metal, previously coated surfaces, aluminum, bronze, stainless steel, fiberglass, tile, grout
- Foaming aerosol clings to vertical surfaces
- Effective in preparing surfaces prior to painting
- Non-caustic, non-abrasive, non-acidic, economical to use

No. 5U696③. Shpg. wt. 1.7 lbs. List $7.20.
Each.....$5.73
Lots 12.....$4.87

**IMPORTANT! VOC regulation + applies. See page 1988**

**Please see back of label for complete product information and application instructions.**

③ All products are covered by OSHA Hazard Communications Standard and Material Safety and Data Sheets (MSDS) are available upon request. See page opposite inside back cover. For color representatives of coating systems listed on this page, please see the Rust-Oleum Color Selection Guide.

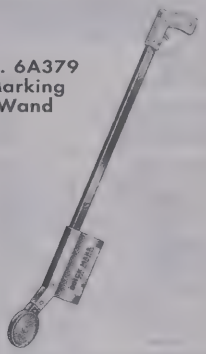
# MARKING AND STRIPING SPRAY PAINT

## HARD HAT® MARKING PAINT & WAND

RUST-OLEUM®

### MARKING PAINT

- 15-ounce aerosol cans
- VOC compliant, inverted-tip spray paint; no ozone-depleting chemicals
- Use on metal, concrete, blacktop, gravel, soil and grass
- Quick, easy marking of construction/evacuation sites, underground utilities, traffic safety areas
- Convenient, easy-to-use, large industrial size delivers up to 31% more product than conventional size aerosol containers
- NOTE: Paint will only spray when inverted. Can be used with Marking Wand No. 6A379



| Description | Rust-Oleum Model | Stock No. ❸ | List | Each | Lots 12 | Shpg. Wt. |

### No. 6A379 MARKING WAND

- Marks surfaces without back-straining or need for bending
- Easy loading, light touch spray control reduces fatigue, provides quick, accurate spraying

No. 5H911 Inverted Tip Marking Paint

No. 6A379 Marking Wand

## HARD HAT STRIPING PAINT & STRIPING MACHINE

RUST-OLEUM®

### STRIPING PAINT

- Designed to handle striping and zone marking jobs quickly and efficiently. Use with Striping Machine No. 6A940
- Use to mark aisles, lift truck routes, pallet positions, safe or dangerous areas
- Also for striping parking lots, stadiums, athletic facilities.
- Each can lays approx. 200 linear feet of 4 inch stripe depending upon application speed or surface porosity
- 18 oz. fill wt.
- For use only with striping machine No. 6A940
- Contains no ozone-depleting chemicals; VOC compliant

| Description | Rust-Oleum Model | Stock No. ❸ | List | Each | Lots 12 | Shpg. Wt. |
|---|---|---|---|---|---|---|
| Blue Striping Paint | 2326 | 6A380 ❷ | $9.05 | $6.15 | $5.84 | 1.5 |

No. 6A940 Striping Machine
•Stripe width is adjustable from 2" to 4"

## ACRYLIC TRAFFIC ZONE STRIPING PAINT

RUST-OLEUM®

C <250 g/l

### One-Gallon Cans

- Single-component, fast-drying, water-based acrylic coating
- Use on asphalt and concrete, interior or exterior exposures
- Use for large striping jobs such as large commercial parking lots, curbs, aisleways
- Fast drying (30 minutes); accepts traffic after 8 hours
- Apply by 1- or 5-gallon striping machines or by brush for quick touch-ups
- Blue available in 1-gallon size only
- Not for use with No. 6A940 Striping Machine
- Not intended for highway use

**DRY TIME AND COVERAGE (APPROX)**

## DEM-KOTE®

### DEM-KOTE® ALL-PURPOSE SPRAY PAINTS

**FINISHES: 12-oz. fill wt.**

- All-purpose, fast-dry spray paints provide good coverage and hiding in industrial/commercial applications
- For interior or exterior general-purpose applications
- Use on metal, masonry, wood
- Dry tack-free in 15-20 minutes; hard in about 1 hour
- High gloss and flat finishes

(Note: No. 5FW97 has an 11-ounce fill wt.)

**PRIMERS:**

- For spot priming and corrosion protection
- Dries tack-free in 5-10 minutes; recoat at any time
- Use No. 5FW87 under light-colored finishes
- Use No. 5FX02 under dark-colored finishes
- Each can covers approximately 5-8 sq. ft.
- All are VOC compliant in regulated areas

No. 5FW95

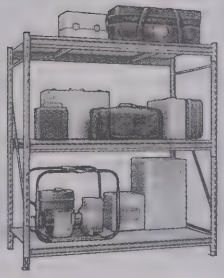
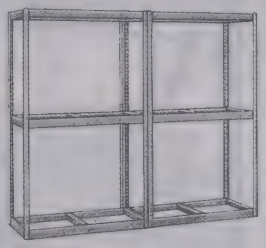
❷These products are covered by California Proposition 65. California purchases or shipments, see first page of Grainger Branch Listings or call any California branch
❸ All products are covered by OSHA Hazard Communications Standard and Material Safety and Data Sheets (MSDS) are available upon request. See page opposite back cover.
†Closely matches color finish of farm implement manufacturer's name that is shown.
For color representations of coating systems listed on this page, please see the Rust-Oleum Color Selection Guide.

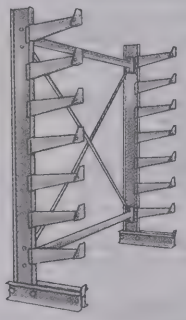
# RACK SELECTION GUIDE



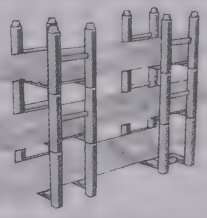
Racks are designed to store large and often very heavy unit loads that are on a pallet, in a container, or loose such as bar stock. The rack you choose depends on what you are handling and how you want to handle it. This guide provides basic information. Before selecting any product, please be sure to check local ordinances and understand code and seismic requirements.



STEEL KING | JARKE CORPORATION | tennsco | UNARCO Material Handling, Inc. | PENCO



Pallet Rack



Bulk Rack

Boltless Rack

Cantilever Rack

Mini-Module®

## PALLET RACKS

Used primarily to store items that are on pallets or in containers that are loaded primarily by mechanized equipment. Also used to store heavy bulk loads. The Unarco and Penco pallet racks conform to the 1997 RMI (Rack Manufacturers' Institute) Standard which reflects state of the art design, national building codes, and safety considerations.

Ordering Tips:

1. Measure the largest load you expect to store; be sure to include pallet in measurement. To allow for positioning, add 8" to width and 6" to the height. Be sure to start at the floor when measuring for height. Determine number of pallets per level.

NOTE: Do not double stack.

2. Determine the weight of the heaviest load. Multiply that by the number of pallets per level.

3. Determine the number of levels required by dividing the height of your warehouse space by the height of the maximum load from step 1 (be sure to include 6").

4. Refer to ordering data and check for beam weight capacity and dimensions. Take the number of beam levels and height requirements to select uprights. Be sure not to exceed total (weight capacity of all beam levels) load capacity for the uprights.

## BULK STORAGE RACKS

Bulk storage racks bridge the gap between conventional shelving and pallet rack. It is ideal for wide, bulky, heavy loads that are handled manually.

Ordering Tips:

1. See Pallet Rack above for sizing tips.
2. Choose the best product type for application.
3. Choose the best decking type for application.

## BULK RACK

Similar to pallet rack construction. Front and rear posts are welded together as one piece. Front and rear beams are independent of each other.

## BOLTLESS RACK

This product's construction is closer to shelving. Posts and the level supports are independent pieces. Although there are more pieces to assemble than the bulk rack, it is quick and easy since you won't have to hassle with any nuts and bolts. Priced below bulk rack, it's a more economical option.

## DECKING TYPES

Wire decking allows for a clear view of inventory. It maximizes the efficiency of sprinkler systems and may be mandated by local fire codes. The open design keeps dust and dirt from settling.

Particleboard decking is the most economical choice of decking while providing adequate strength.

Steel decking is the strongest and most durable option. It handles your most heavy-duty storage needs effortlessly while making it easy to slide bulky, heavy items on and off.

## CANTILEVER RACKS

Ideal for storage of large, rigid products such as bar stock, tubing, pipe and lumber. These racks may be positioned for front loads; however, they're also ideal for hard-to-store, space intense applications that can be picked from the side.

## UNITIZED PORTABLE RACKS

This is a very flexible system because you can change your layout configuration easily. It's a "portable" racking system that moves to where you need it. Ideal for very large, bulky items—this system allows you to stack products one on top of the other while preventing compression damage. Also, this is an economical system due to lower maintenance, minimal installation and efficient uses of warehouse space compared to floor loading.

# PALLET RACK

**Most compatible rack design**—our tear drop style pallet rack design makes it easy to add to or replace existing pallet rack bays without having to redo an entire warehouse.

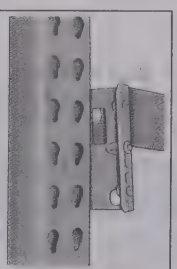
## CLOSED TUBE UPRIGHT FRAMES

**More cost effective design**—you can buy more capacity for less with our closed tube design versus open back columns and that means your system is more economical to install and maintain.

**30% - 40% more load carrying capacity**—offers greater flexibility in system design.

**200 times better resistance to torsional forces**—makes them better able to resist the twisting forces that tend to corkscrew ordinary rack.

**Pre-punched on 2" centers**—Lets you easily move beams to new locations as your needs change.

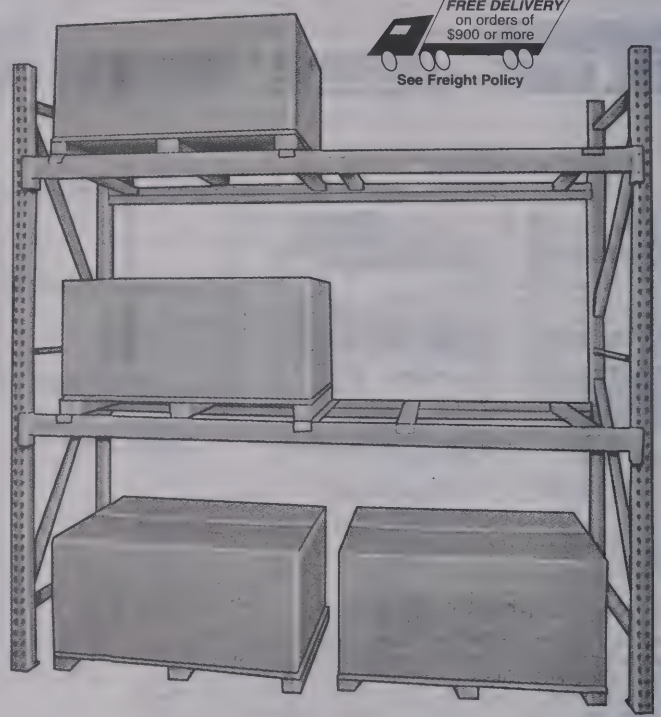


**All-welded construction**—provides maximum strength and simplicity of construction.

## BEAMS

**Built-in Gravity Lock**—beams can't be sprung or dislodged when struck from the bottom by a lift truck or pallet load.

**Reusable locking mechanism**—no tools needed when changing beam locations.



**Unarco's patented Gravity Lock System is built-in so it can't be lost, sprung or misplaced. It fits almost all tear drop style uprights.**

| Frame | 144 | 36 | 23,232 | I0131144036L | 4UK31 | 143.83 | 115.10 | 85.0 |
| Frame | 144 | 42 | 23,232 | I0132144042L | 4UK34 | 147.02 | 117.65 | 93.0 |
| Frame | 192 | 42 | 23,232 | I0132192042L | 4UK35 | 200.94 | 161.00 | 124.0 |

(*)All uprights are painted deco green. (**)Frame capacities are based on a maximum unsupported length of 54". The maximum unsupported length is the measurement between the floor and the top of the first beam or the maximum spacing between beams—whichever is greater. RMI specifications call for each upright to be anchored through the front and rear baseplates during installation. Anchor bolts are not included with these beams and must be purchased separately.

## TEAR DROP STYLE BEAM ORDERING DATA

| Description* | Dimensions, (In.) Ht. | Span | Max. Load Capacity/Pair | Unarco Model | New! Stock No. | List | Each | Shpg. Wt. |

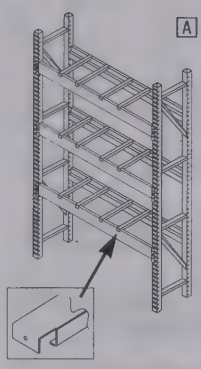
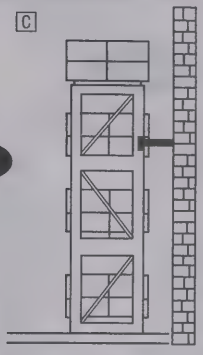
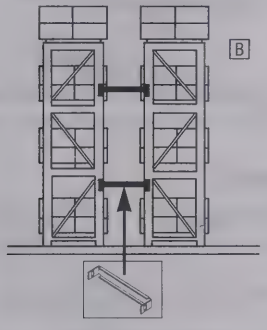
(*) All beams are painted safety orange.

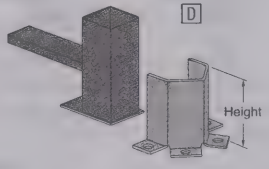




*As America's leading distributor, we know a thing or two about storage.*



# PALLET RACK ACCESSORIES



UNARCO
Material Handling, Inc.

## UNARCO PALLET RACK ACCESSORIES

**Row spacers should be position every 10 feet of height. Top spacer should be placed approximately 18" down from top of rack.**

### A FLANGED CROSSBARS

Help keep beams parallel. 36" or 42" long for use across long spans or with especially concentrated loads where step beams may have a tendency to spread. Provides additional load bearing surface to help support damaged or inferior pallets. R.M.I. Specification requires two crossbars for each pallet position. Pre-galvanized finish provides extra protection from rust and corrosion.

### B ROW SPACERS

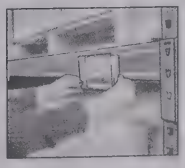
Permit 2" to 4" parallel load overhang. Allows loads to be positioned properly on beams for even load distribution. Ties two rows of rack together, giving back-to-back rack installation greater stability by spreading load forces. Available in 6", 8", and 12" lengths to prevent pallet load overhangs from hitting each other when loading and unloading. 2 connectors included.

**Warning: Row spacers are not load carrying members. Do not place pallets or pallet loads on them.**

### C WALL TIES

Connect to wall to provide extra stability for a single row of rack that can't be tied to another rack upright. 6" & 12" wide for proper load distribution. The number of wall spacers you use depends on a 5 to 1 formula. If the rack is 3 feet deep there should be a wall spacer at 15 feet high. (Ex. 3 ft. deep x 5 = 15 ft.). Pre-galvanized finish provides extra protection from rust and corrosion. T-Bolt connnector for rack column included. Appropriate wall anchors required but not included.

**Warning: Wall spacers should only be used with walls that are structurally able to stand the additional load put on them by the rack tie-in.**



### D COLUMN PROTECTORS

For use with any upright or end-of-aisle upright that can be damaged by lift trucks. Completely independent of the upright and are bolted into the floor for maximum protection. (Does not include bolts or floor anchors.) Painted safety orange for maximum visibility.

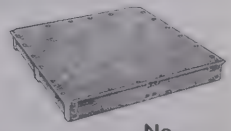
## SUPERSCAN LABEL HOLDERS

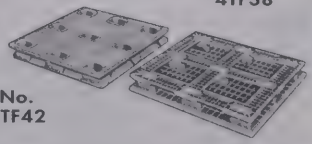
- **Special matte finish assures accurate bar code scanning**
- **Includes magnetic backing**
- **Extra large 4x6" size**
- **Includes laser/Ink jet compatible labels**

Magnetic backing allows for simple label relocation. Insertable feature lets you change or protect labels. Inserts are Laser/Ink Jet ready. Printing instructions included. 50 per box. Aigner/Cel-U-Dex brand (APX-46M).



***New* No. 4TR23.** Shpg. wt. 3.9 lbs. List $45.00. Each ..... **$44.80**

## HEAVYWEIGHT RACKABLE PALLETS



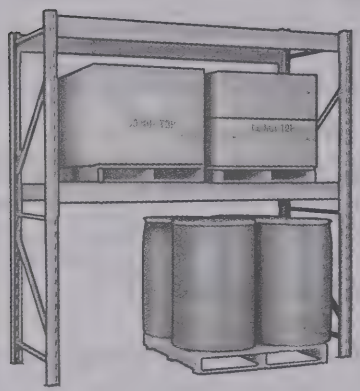
- **Constructed of maintenance-free, impact-resistant structural foam**
- **Recyclable**
- **No. 4TF38—40W x 48"D, 3500 lb. rackable load capacity**
- **No. 4TF42—40W x 48"D, 2000 lb. rackable load capacity**

ALLIBERT CONTICO

*New*

No. 4TF38

No. 4TF42



Structural foam pallets offer greater durability (outlasts wood on average of 50:1), is safer and easier to handle, and reduces the risk of product damage, commonly associated with wood pallets. Ideal for use on any type of unsupported rack.

***New* No. 4TF38.** Heavyweight Steel-Reinforced Rackable Pallet. Shpg. wt. 67.0 lbs. List $121.17. Each ..... **$109.05**

# PALLET RACKS

## DESIGNED TO STORE PALLETIZED AND HEAVY BULK LOADS HANDLED BY MECHANICAL EQUIPMENT

Rack Shown Consists of Two Frames and Four Beams

PENCO® New

Easily assembled Penco pallet racks provide safe, flexible storage to suit all your pallet storage needs. Not to be used as scaffolding.

**HOW TO ORDER:** Construct starter unit with two upright frames and two beams per shelf. Construct add-on units with one frame and two beams per shelf. Minimum of two shelf levels, or four beams, required per bay for safety.

### UPRIGHT FRAMES

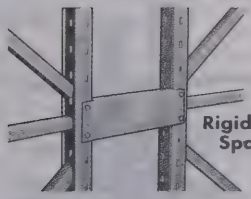
To determine proper capacity for your application see Rack Selection Guide on page 2005.

- **Choose from 18,000 lbs. (3W x 1¾"D) or 24,000 lbs. (3W x 2¼" D) capacity**
- **Posts come in 96, 120, 144, and 192" heights; 36 or 42" depth**
- **Beam support slots punched full length on 3" centers**
- **Prefabricated frame posts are 14-gauge, steel with welded braces and footplates**
- **Gray enamel finish**

### BEAMS

Capacity limits given in the tables are based on evenly distributed loads. Add 11% to capacity requirement for 3 pallets wide. Add 25% of one pallet load to required capacity for shock loads if needed.

- **Beams are 14-gauge, steel roll formed in one piece with overlapped seam**
- **Beam end connector is 3 x 8½" oversize reinforced 3-prong connection for tight fit and increased lateral stability**
- **Choose from 96, 108, and 120" lengths, 2¾" wide with a 1⅝" step and 1" ledge**
- **Easy to use, built-in safety lock keys**
- **Safety yellow enamel finish**



Racks are designed to store large and often very heavy unit loads that are on a pallet, in a container, or loose such as bar stock. The rack you choose depends on what you are handling and how you want to handle it. This guide provides basic information. Before selecting any product, please be sure to check local ordinances and understand code and seismic requirements.

# PENCO PALLET RACK ACCESSORIES

PENCO®

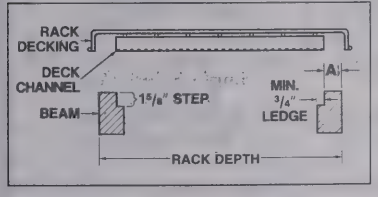
Accessories are for use with Penco Pellet Storage Racks listed on previous page

**Rigid Row Spacers.** Structurally connect and evenly space two rows of racks back-to-back. Made of 12-gauge steel. Hardware included. Gray enamel finish.

**Rigid 6" Wall Bracket.** Structurally connects racks to wall for additional stability. Made of 12-gauge steel. Hardware included for attachment to upright only. Gray enamel finish.

**Cross Bars.** Support loads smaller than pallet rack depth. For use on 1 5/8" step beams; not for use with plywood decking. 16-gauge steel. Heavy-duty style cross bars have flange which provides extra protection against displacement caused by material handling equipment. Nos. 3W565 and 3W567 have 996 lb. load capacity*; Nos. 3W566 and 3W568 have 830 lb. capacity*. Can be mounted to beams, hardware not included. Gray enamel finish.

**Frame Protector.** Anchors to floor and front of post to protect against material handling vehicles. 18" high. 11-gauge steel. Anchoring hardware not included. Safety yellow enamel finish.



| Description | Frame Depth (In.) | Penco Model | Stock No. | List | Each | Shpg. Wt. |

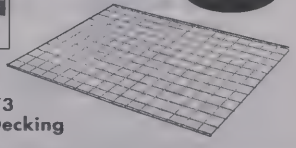
(*) Capacity per cross bar, based on evenly distributed loads. Two cross bars needed per pallet load. Capacity per pair of beams is not increased with addition of cross bars.

# STOR-MORE® GALVANIZED STEEL WIRE DECKING

## PALLET RACK DECKING

4-gauge wire construction with 2 x 4" mesh. Four rugged reinforcing underchannels are resistance welded with wire mesh at every intersection. Fits Penco and Unarco pallet racks and is also compatible with many other brands of pallet rack having a 36 or 42" depth and a 1⅝," step in the horizontal beam.



No. 3W553 Pallet Rack Decking

- **Pregalvanized to resist corrosion, then welded**
- **Open wire mesh design allows clear view of inventory and maximizes efficiency of overhead sprinkler system**
- **May help reduce insurance costs**
- **Will not trap dirt, oil, or debris**

**Easy to install — simply drop into place over rack beams. Front and back edges overlap beams to secure decking.**

New

No. 3VH73 Boltless Rack Decking

## HOW TO ORDER

1. Confirm that pallet rack depth is 36 or 42" and that beams have 1⅝" step with minimum 3/4" wide ledge.
2. Measure beam top surface "A". This measurement must be between 1⅝ and 1⅞".
3. Determine inside beam length between vertical uprights of rack. See below for decking needed.

**LOAD CAPACITY** of beams with decking must not exceed maximum beam or decking capacity. (Example: Beam capacity is 6225 lbs. per pair and decking is 7000 lbs. Load capacity of beams with decking is 6225 lbs.)

| Dim. (In.) D | Dim. (In.) L | Decking Required For Various Beam Lengths | Load Cap.* (Lbs.) | Stock No. | List | Each | | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| 36 | 46 | 96"-2 ea.; 144"-3 ea. | 3500 | 3W553 | $39.50 | $26.75 | ▲ | 27.0 |
| 36 | 52 | 108"-2 ea. | 3500 | 3W554 | 42.35 | 28.50 | ▲ | 30.0 |
| 36 | 58 | 120"-2 ea.; 132"-2 ea. | 3500 | 3W555 | 46.10 | 29.95 | ▲ | 32.0 |
| 42 | 46 | 96"-2 ea.; 144"-3 ea. | 3500 | 3W556 | 51.25 | 33.90 | ▲ | 35.0 |
| 42 | 52 | 108"-2 ea. | 3500 | 3W557 | 50.75 | 34.25 | ▲ | 37.0 |
| 42 | 58 | 120"-2 ea.; 132"-2 ea. | 3500 | 3W558 | 53.90 | 36.00 | ▲ | 39.0 |

(*) Per piece, based on evenly distributed load. Multiply load capacity by number of pieces needed for total capacity pair of beams. Due to rigidity requirements, decking capacities may exceed beam capacities.

(▲) Net prices, not subject to discounts.

## DECKING FOR BOLTLESS HEAVY-DUTY BULK STORAGE RACKS

1/4" diameter steel wire welded into 3 x 3" mesh with double wire on long sides. Overall diameter is 1/8" less than nominal. Fits boltless bulk storage racks on pages 2016 and 2020 as well as other brands of similar boltless rack systems. Old particleboard shelving can be replaced with this wire decking in order to meet insurance and fire regulations. This design conforms to the National Fire Protection Assn. (NFPA) rack storage requirements (231c).

**Jarke Steeltree®** Cantilever Racks offer the ability to store large amounts of long heavy material in small areas of space. Highly suitable for use in manufacturing plants, steel service centers, warehouses, machine shops, maintenance rooms, and plumbing supply houses when storing such items as sheet material, bar and tube stock, and other long bulky items. Facilitate manual or fork-lift handling of clumsy or extremely heavy product.Straight arms are fully adjustable on 3" centers and have a removable lip on the ends to prevent stored items from falling over edge. Bases are 7-gauge steel. Units available in 8-ft. high columns with 24" long straight arms and 12-foot high columns with 48" long straight arms. 8 ft. high columns are 11-gauge steel with 11-gauge arms, 12-ft. high columns are 12-gauge high strength steel with 10-gauge arms. Both styles available single and double sided in both starter and add-on units. Cantilever rack can be assembled as a single starter rack or with a continuous assembly of add-on racks to handle longer materials. All units have 6 ft. wide bracing. Gray enamel finish. Jarke brand.

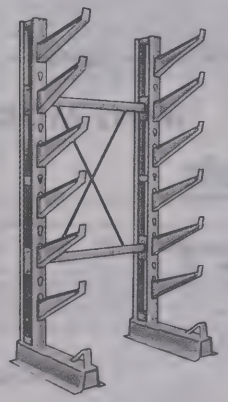
## BUTTON-ON CANTILEVER RACK



- 1000 Lb. capacity per arm
- Quick assembly
- Ideal for bar, pipe, and tubing
- Free standing or continuous
- Heavy loads and high abuse
- Especially suited for maintenance areas, tool rooms, and pipe shops

JARKE CORPORATION

New

For loads a person can reach and lift. Button-on lets you load up to 2000 lbs. at one time with a lift truck. . .or deposit materials manually for quick organized storage and retrieval. Provides an adjustable unit with as little as two columns, or assembles into a continous system that can grow as needed. Just "button" arms into position.

Button-on columns are 84" high and maded with 2 3-x-5" channels welded to 3/16" steel base. Arm adjustment key slots are 4" on centers. Arms are 16" inclined with 18° slope and uniquely designed just to button into position. They are all welded with 3/16" and 10 gauge steel. Brace is made from 1½ x 2½ tubing and heavy steel diagonals. Shipped unassembled and painted gray. Jarke brand.

## VERTICAL BAR RACK

- 3000 Lb. capacity
- Store short and long lengths vertically
- Use as island storage for continuous rows

Solutions for solving vertical storage problems in tool rooms—maintenance departments, machining centers, storage areas, or as a point of purchase display. Steel components bolt together for quick and easy assembly. 6" arms extend beyond shelves and act as dividers creating 9" bays for storage. The frame is constructed of 1½" angle iron, diagonal bracing, and 4 shelves of heavy gauge steel. Shipped unassembled, painted gray. Jarke brand.

STORAGE EQUIPMENT

# STACK RACKS & MINI-MODULE SHELVING

## STACK RACKS

- Tubular steel base replaces wood pallets
- Tubular corner posts allow safe stacking four or more units high
- Portable—can be used as high density or high selectivity storage system
- Removable posts save space and shipping costs
- 4,000 pound capacity handles heavy loads

The unique StacKing rack gives users more flexibility than any other storage rack system. Users can easily set up and change storage configurations without costly professional installation. Corner posts protect loads during handling and shipping, allows multiple level storage, without load-on-load contact, eliminating product damage. By replacing standard wood pallets, eliminates the continual costs of purchasing, leasing, repairing, and disposing of wood pallets.

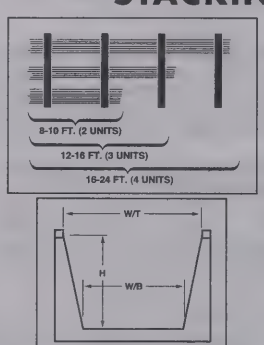
## MINI-MODULE®

JARKE CORPORATION

New



No. 4UK83

- No bolts, tools, or fittings required for set-up or take down
- Increase floor space
- Fast storage and retrieval of long material
- All welded steel construction

Efficient, low-cost mini-modules take only a minute to set-up. Sturdy, yet lightweight and easy to handle, they provide a highly flexible storage system for all types of materials. Mini-module installations are expandable in width, height, and length. Easily shift to meet changing storage requirements. Fast and convenient removal. Cut-off lengths can be returned to storage and quickly identified next time needed. Heavy-duty welded steel construction. Jarke brand.

# INDUSTRIAL STARTER AND ADD-ON PRODUCTION SHELVING

## SSI SCHAEFER ON-LINE SHELVING

New

- 8,000 lb. Bay load capacity (any)
- 550 lb. Shelf level capacity (any)

**Designed for production efficiency.** Reduces need for workers to leave workstation for supply/return. Parts slide forward on tilted shelves for easier picking. Empty return containers can slide out of the way on inverted shelves. Saves time, effort and money.

**Fast, easy, assembly.** Galvanized steel frames come pre-assembled. Shelf levels ship ready to assemble—with no nuts or bolts and complete with front and rear beams, shelf guides, and gray painted shelves.

**Cost-effectively utilizes valuable workspace.** Back-to-back double units maximize linear floor space.

**Mobile units** move parts to where they're needed. In single depth with four shelf levels.

Units include five shelf levels. Shelves can be easily rearranged in 2" increments. Add-on units of same depth can mix or match. Schaefer brand.

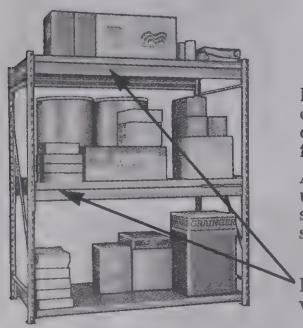
# HEAVY DUTY BULK RACKS

## FOR HAND LOADED STORAGE OF HIGH, WIDE, AND BULKY ITEMS

**Easy Assembly** - NO TOOLS REQUIRED

**Levels adjust on 2" Increments** to conform to storage requirements



**Load Capacities up to 2400 lbs.***

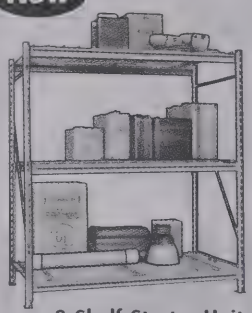
**Access contents from either side**

**Three types of deck surface** – Heavy Gauge Steel. Wire. Particle Board

**Durable Gray baked enamel finish**

Penco heavy duty bulk storage racks, also known as Wide Span Shelving. Choose from a wide variety of widths, depths and heights. NOT FOR FORK TRUCK LOADING.

3 Shelf Starter Unit with Heavy Gauge Steel Shelves



PENCO New

### STEEL DECK UNITS

Features smooth solid steel decks that are 1¾" high with double flange construction and full width reinforced pan.

Additional decks or add-on units may be added as necessary to accomodate changing storage needs.

Rigidity beams (included) provide superior lateral stability.

3 Shelf Starter Unit with Wire Decking

### WIRE DECK UNITS

Provides an outstanding surface for storage while allowing light to pass through and avoid the accululation of dirt. Waterfall design installs quickly over rigidity beams.

Wire is 4 gauge. Deck channels provide outstanding load carrying capacity. Add additional deck levels or add-on units as needed.

Finish is gray enamel.

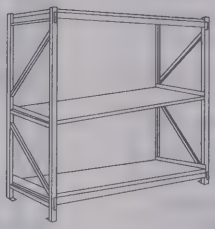
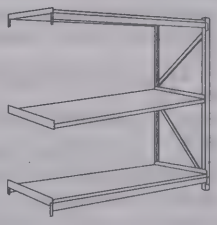
# HEAVY DUTY BULK RACKS



## BRIDGE THE GAP BETWEEN CONVENTIONAL SHELVING AND PALLET RACK



3-Shelf Starter Unit with Particleboard Decking

PENCO®

New

STARTER UNIT

ADD-ON UNIT

### PARTICLEBOARD UNITS

An economical solution to your bulk storage requirements. Plywood beams with supports and 5/8" particleboard decking. Extend the row with Add-on units.

**Starter Units** – Consist of 2 upright Frames and 3 pair of beams and the appropriate deck levels.

**Add-On Units** – Consist of 1 Upright Frame and 3 pair of beams and the appropriate deck levels.

Begin each row with a Starter unit and order Add-on units as required.

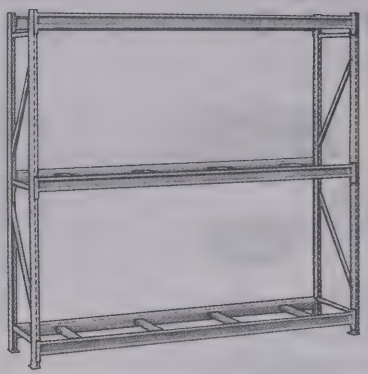
### DESIGN FEATURES

#### BEAMS

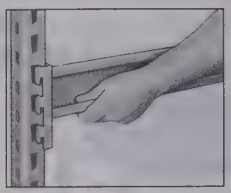
Patented Beam End connector helps prevent accidental dislodging (US Patent No. 4,928,834).

#### FRAMES

Upright Frames are made from heavy gauge steel, MIG welded into one rigid assembly containing posts, horizontal and diagonal braces, and foot plates. Frames have a capacity of 10,000 pounds vertical adjustment on 2" centers.

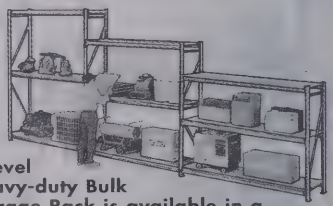


Bulk storage racks with steel decking shown above



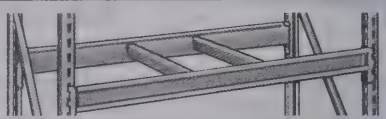
STORAGE EQUIPMENT

# HEAVY-DUTY BULK RACK

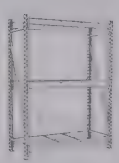


tennsco **New**

- Flexibility of installing your own decking
- 1400-2700 lb capacity per shelf
- Intended for hand loading bulky items
- Box beam construction for maximum strength
- Beams are electrically welded and made of 14-gauge heavy-duty steel
- Installs, disassembles, and expands easily—no tools required
- Adjacent units share a common upright for greater economy
- Levels adjust in 2" increments
- Medium gray finish

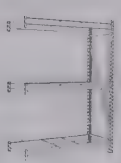


3-lug prong connector securely slides into tapered slots of uprights



3-level Heavy-duty Bulk Storage Rack is available in a variety of sizes. Can be expanded at any time

## BULK RACK WITH NO DECKING



This option gives you the flexibility of installing your own decking

### BULK STORAGE BENEFITS

Tennsco's Bulk Storage Rack is the most economical way to store and retrieve bulky items. It allows clean and convenient access from the front or rear, making it ideal for double entry aisleways. Because uprights are pre-welded it accommodates 10,000 pounds per upright while making assembly fast and easy. Use bulk storage racks wherever you need convenient storage and retrieval of heavier large, long or bulky items. Not for use with pallets or as scaffolding.

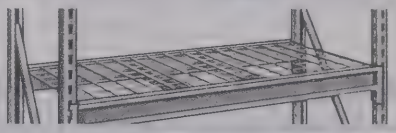
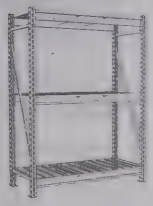
## A WORD ABOUT WIRE DECKING OPTION

Heavy-duty wire decking option provides galvanized steel wire decking that resists rust and corrosion. It allows a clear view of inventory and maximizes the efficiency of overhead sprinkler systems while conforming to the National Fire Protection Association (NFPA) rack storage requirements.



New



- Great Value—Combination of low cost, versatility and strength gives you more for your money
- Easy Installation—Unique design makes it a snap to erect or rearrange. Saves valuable labor hours
- Built-to-Last—State-of-the-art electronic welding of beams handles heavy loads and withstands the toughest use
- Peace-of-Mind—Connector design offers superior strength and safety mechanism to help keep personnel safe
- Medium gray finish

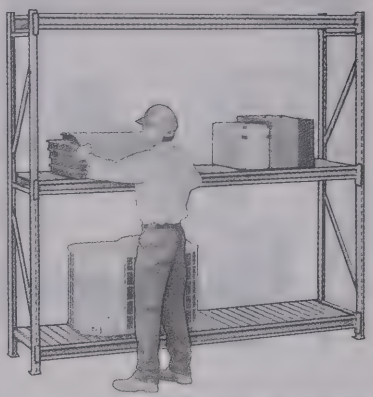
### HEAVY-DUTY BULK STORAGE RACK

Look closely at Tennsco's heavy-duty bulk storage racks and you'll see a real difference. Each upright is welded and preassembled, making installation fast and convenient. Beams for wire decking utilize a box beam construction method similar to the way many bridges are built for added strength and rigidity. For maximum weight load capacity, each beam is roll formed on the front and rear edge.



# HEAVY-DUTY BULK RACK

tennsco

## THE STEEL DECKING OPTION

Consider this option for your most heavy-duty storage applications. Ribbed decking is constructed of 22-gauge steel that is formed to produce a corrugated profiled shape. This technique offers a tremendous amount of rigidity even under heavy loads. You'll also find that loads also slide on and off the shelf easier and with less effort. Steel decking is provided in 1-foot sections and simply drops into recesses on cross beams for easy installation.

New

- Great Value—Combination of low cost, versatility and strength gives you more for your money
- Easy Installation—Unique design makes it a snap to erect or rearrange. Saves valuable labor hours
- Built-to-Last—State-of-the-art electronic welding of beams handles heavy loads and withstands the toughest use
- Peace-of-Mind—Connector design offers superior strength and safety mechanism to help protect personnel
- Medium gray finish

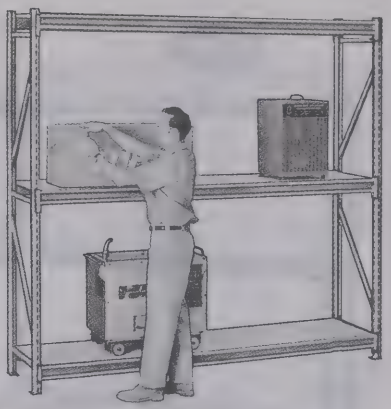
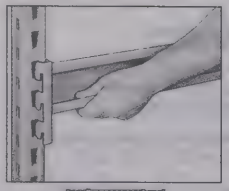
### EASY INSTALLATION

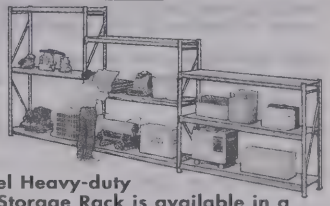


Tennsco Heavy-Duty Bulk Storage rack is literally a "snap" to put together. Because there are no bolts or tools required, these units go together in minutes. Simply snap beams onto slotted uprights at the desired height, place the decking of your choice and your finished. It really is that simple. When it's time to reconfigure, add additional levels or add to your installation, the same process makes it quick and easy.



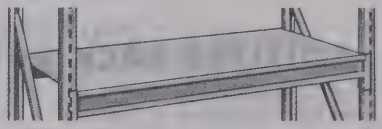
# HEAVY-DUTY BULK RACK

**tennsco**

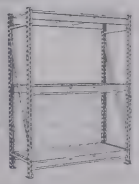


- 1400-2700 lbs capacity per shelf
- Intended for hand loading bulky items
- Box beam construction for maximum strength
- Beams are electrically welded and made of 14-gauge heavy-duty steel
- Easy installation, disassembly or expansion—no tools required
- Adjacent units share a common upright for greater economy
- Levels adjustable in 2" increments
- Medium Gray Finish
- Particleboard decking

New

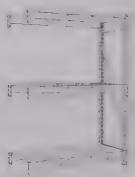


3-lug prong connector securely slides into tapered slots of uprights



3-level Heavy-duty Bulk Storage Rack is available in a variety of sizes. Can be expanded at any time

## BULK STORAGE RACK WITH PARTICLEBOARD DECKING



Particleboard Decking option provides sturdy 5/8" particleboard for general purpose storage use

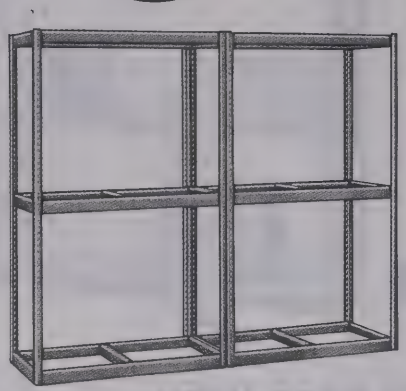
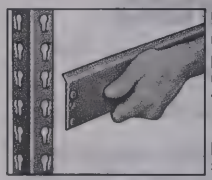
### SAFETY IS A NUMBER ONE CONCERN WITH TENNSCO



Tennsco's Bulk Storage Rack is designed with safety in mind. Beams connect to uprights with special tapered finger design attachment. This method of attachment locks beams safely on to the upright. The more weight applied to the beam the stronger it holds. You'll also find box beam bracing that keeps the entire unit rigid.



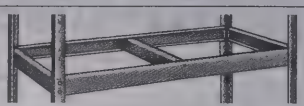
# BOLTLESS BULK RACKS

tennsco

- Exceptionally strong—stands-up to any industrial application
- Front to back deck reinforcements included: 4 ft.-1; 6 ft.-2; 8 ft.-3
- Decking levels adjust in 1½" increments to custom fit the application
- Fast assembly or reconfiguration. No bolts or clips required to attach shelf levels to uprights
- Unobstructed access from all four sides
- Medium Gray finish
- Intermediate "T" posts supplied with Add-on units

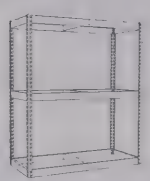
New

Double Shoulder rivets on shelf supports lock into upright without tools.



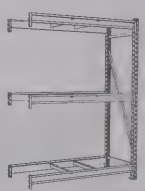
(Standard-duty post and shelf support shown.)

**DECK LEVEL OPTIONS**



- Standard-duty style offers 14-gauge angle steel construction for typical industrial load capacities
- Heavy-duty style offers 14-gauge channel steel construction for extra heavy-duty load capacities

## BOLTLESS RACK WITH NO DECKING



This economical option allows you the flexibility to provide your own decking for general storage use.

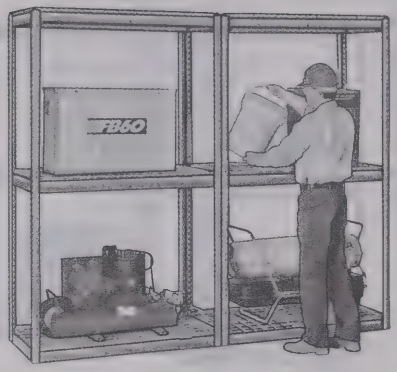
### BOLTLESS RACK BENEFITS

Boltless rack is ideal for applications that involve storing and retrieving large, long or bulky items. Tennsco's Boltless rack offers up to 8-foot wide openings and adjustable height levels to maximize available space for these types of items.

You can easily reconfigure Tennsco's Boltless Rack system at any time to meet changing storage requirements. This is all accomplished simply without special tools.

# BOLTLESS BULK RACK



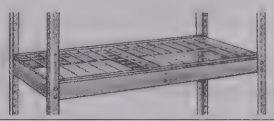
tennsco

## A WORD ABOUT WIRE DECKING OPTION

Bulk Rack wire decking provides galvanized steel wire decking that resist rust and corrosion. It allows a clear view of inventory and maximizes efficiency of sprinkler systems while conforming to the National Fire Protection Association (NFPA) rack storage requirements.

Wire decking simply drops into Boltless Rack supports. Wire decking is constructed of steel wire welded into 3 x 3" mesh.

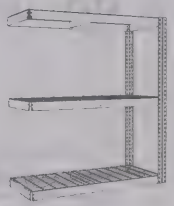
New



### GALVANIZED WIRE DECKING

- Pregalvanized to resist corrosion
- Open wire mesh design allows clear view of inventory
- Maximizes efficiency of overhead sprinkler system
- May help to reduce insurance costs
- Will not trap dirt, oil, or debris
- Easy to install—drop into place
- Standard-duty style offers 14-gauge angle steel construction
- Heavy-duty style offers 14-gauge channel steel construction

## BOLTLESS RACK WITH WIRE DECKING



This option provides galvanized steel wire decking that resists rust and corrosion.

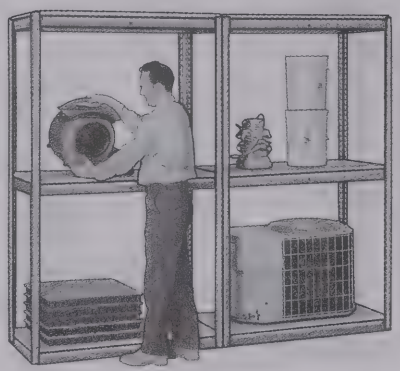
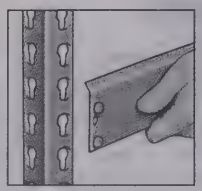
### TENNSCO BOLTLESS BULK RACK OFFERS VALUE & PERFORMANCE



Tennsco's Boltless steel framework combined with your choice of decking provides a strong yet cost-effective storage solution. Choose from a standard-duty support for maximizing each opening or the heavy-duty channel beam support to handle heavier loads over longer spans. Because all deck supports use double shoulder rivets on each end to lock supports into place it produces an exceptionally rigid framework without the need for sway braces that obstruct access.



# BOLTLESS BULK RACK

tennsco

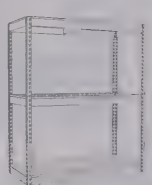
- Exceptionally strong – stands-up to any industrial application
- Choice of standard-duty supports that allow maximum spacing between levels or heavy-duty supports to handle heavier loads
- Decking levels adjust in 1½" increments to custom fit the application
- Fast assembly or reconfiguration. No bolts or clips required to attach shelf levels to uprights
- Unobstructed access from all four sides
- Medium Gray finish
- Particleboard deck option

New

Double Shoulder rivals on shelf supports lock into upright without tools.

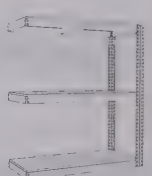
(Standard-duty post and shelf support shown.)

**DECK LEVEL OPTIONS**



- Standard-duty style offers 14-gauge angle steel construction for typical industrial load capacities
- Heavy-duty style offers 14-gauge channel steel construction for extra heavy-duty load capacities

## BOLTLESS RACK WITH PARTICLEBOARD DECKING



This option provides sturdy 5/8" particleboard for general storage use.

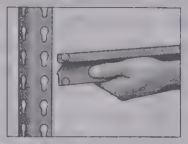
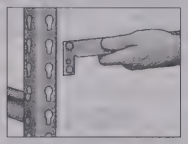
### BOLTLESS RACK APPLICATIONS



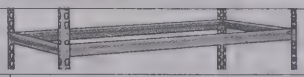
Tennsco's Boltless Rack is so versatile it can be used in hundreds of applications. Use it in warehouses for non-palletized item storage, parts centers for large or heavy component storage, maintenance supply areas, tool cribs even in backrooms within retail environments. No matter what the application, Boltless Rack's interchangeable components can be used throughout your organization for today's and tomorrow's storage needs.



# BOLTLESS SHELVING

**tennsco** New

- 500 to 1000 LB capacity per shelf
- Choice of space saving low profile shelf supports or medium profile supports for heavier shelf capacities
- Pre-configured with five levels
- Shelves adjust in 1½" increments to custom fit the application
- Fast assembly-no bolts required
- Select either the no-decking option or 5/8" particleboard decking option
- Medium gray finish



**DECK LEVEL OPTIONS**

**Medium Profile supports offer 850-1000 lbs. capacity for extra heavy loads.**

**Low Profile supports offer 500-600-lbs. capacity for typical industrial loads.**

## BOLTLESS SHELVING WITH NO DECKING

This option gives you the flexibility of installing your own decking.

# SHELVING SELECTION GUIDE

**Grainger offers shelving that fits practically any need! Shelving can be used in two general applications:**

1. General storage of items that are handled manually

2. Systems storage where the area is part of a process, warehousing, distribution, centers, tool cribs, etc.

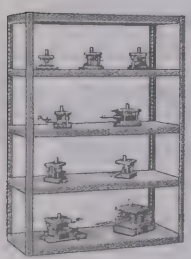
The manufacturers of steel and wire shelving within this catalog build and test their products to SMA standards. Guidelines specify steel shelving should meet or exceed a weight capacity safety factor of 1.65. References to shelf capacities are based on evenly distributed loads.

**ORDERING TIPS**

- **Always check local regulations**
- **Determine need—general or system related products**
- **Determine weight capacity per level (based on evenly distributed loads)**
- **Determine height, width, and depth of product to be stored**
- **How many products to be stored**
- **Space available for shelving**
- **Environment it will be stored in**

## INDUSTRIAL STEEL

(Page 2025-2029)



Brands: Penco, Tennsco, Schaefer

Weight Capacity: 500-800 lbs.

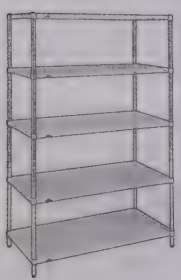
Sizes: 12-24" Deep, 24-48" Wide

Designed for: Strength and durability. Steel shelves attach to post with clips for easy adjustments.

Applications: Storage of cartons, boxes, and parts commonly found in manufacturing and commercial storage facilities.

## HEAVY-DUTY INDUSTRIAL STEEL

(Page 2030)



Brand: Tennsco

Weight Capacity: 800-1200 lbs.

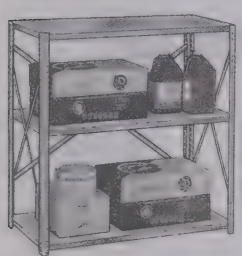
Sizes: 18-24" Deep, 36-72" Wide

Designed for: The toughest industrial environments. Heavy-gauge shelves attach to posts without the use of tools.

Applications: Storage of tools, dies, motors, and other products commonly found in tool cribs, garages, and machine shops.

## WIRE

(Page 2033-2035)



Brand: Intermetro

Weight Capacity: 600-800 lbs.

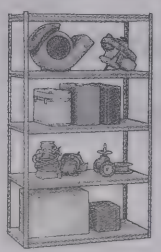
Sizes: 18-36" Deep, 36-72" Wide

Designed for: Corrosion resistance, ease of assembly and its attractive appearance. Open wire design allows flow through of light, dust, and water.

Applications: Great for the dynamic storage environment in freezers/coolers, restaurants, hospitals, and retail businesses. Its attractive appearance makes it ideal for product displays.

## COMMERCIAL STEEL

(Page 2031)



Brand: Edsal

Weight Capacity: 350-400 lbs.

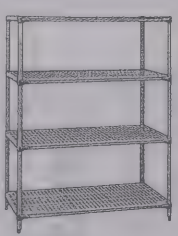
Sizes: 12-24" Deep, 36" Wide

Designed for: A low cost alternative for steel shelving.

Applications: Storage of small, lightweight products commonly found in stockrooms, janitorial closets, and offices.

## BOLTLESS

(Page 2023)



Brand: Tennsco

Weight Capacity: 500-1000 lbs.

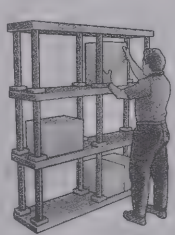
Sizes: 12-24" Deep, 36-48" Wide

Designed for: Ease of assembly at a low cost with convenient access from all four sides.

Applications: General storage of cartons, boxes, and parts. Great for tool rooms and dry storage closets.

## POLYMER/WIRE

(Page 2032)



Brand: Intermetro

Weight Capacity: 600-800 lbs.

Sizes: 18-24" Deep, 36-72" Wide

Designed for: Maximum corrosion resistance in damp, humid conditions.

Applications: Cooler/freezer storage. Also ideal for dry storage in laboratories, hospitals, and restaurants where a clean and sanitary environment is required.

## STRUCTURAL FOAM

(Page 2036)

Brand: Structural Plastics

Weight Capacity: 250-700 lbs.

Sizes: 16-36" Deep, 36-96" Wide

Designed for: Ease of assembly and corrosion resistance.

Applications: Its material makes it great for storing chemicals, oils, and solvents. Its modular design makes it ideal for active environments where change in storage configurations is constant.

## IF YOU'RE IN A BIND, CALL GRAINGER

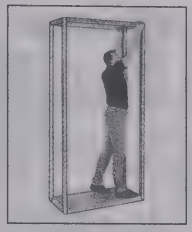
**If it's an emergency, chances are Grainger's got the items you need today. Grainger has more than 350 well-stocked branches nationwide, so you can replace, build, or repair it right away. And we're conveniently located. To find the branch nearest you, check the Branch Locations listed in the front of this catalog.**

# INDUSTRIAL OPEN & CLOSED SHELVING

## RAPID TECH SHELVING

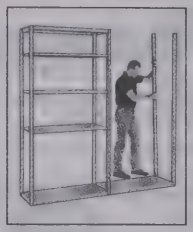
- **Assembles in minutes**
- **Requires no nuts, bolts, or tools**
- **Shelves can be tilted 6 or 12°**
- **Wide variety of accessories**
- **Gray baked on enamel finish**
- **Shelf capacity for extra heavy-duty shelves is 1,000 lbs., and 600 lbs. for heavy-duty shelves (based on evenly distributed loads)**
- **24" deep units come with extra heavy-duty shelves; all other units come with heavy-duty shelves**

**Cost effective Starter/Add-on design** allows fast, easy expansion. Starter units include fixed base and top shelf, three adjustable shelves, and four posts. Add-on units, which can be added on to either side, include fixed base and top shelf, three adjustable shelves and two posts.



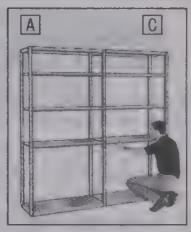
**No nuts, bolts, or tools needed** for assembly. Saves installation time and money. Does not require side braces. Add-on units include clips to "lock" units together as bays are added.

**Unique design of upright posts** permits "free" placement of shelves (in 2" increments) with no nuts, bolts, or clips maximizing bay lay out and shelf use.



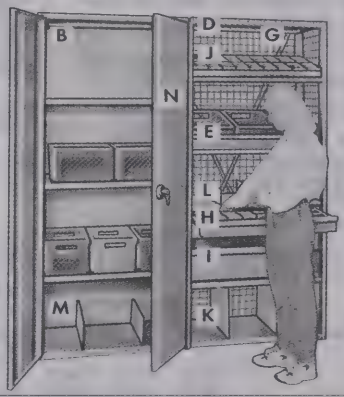
**Built-in flexibility.** Shelves may be tilted for ergonomic picking and better stock visibility. Add, remove, or rearrange shelves without disturbing adjacent units. Meet changing storage requirements quickly and easily.

**Customize units for specific storage needs.** Create small parts storage systems by adding drawers and insert boxes. Galvanized bin fronts are especially suitable for tilted shelves. Full height and free-standing dividers simply drop/insert into slots in shelves with no nuts, bolts, or grommets. Lockable, double swing, full-height doors secure stored contents when used with closed units.



7,500 lb. bay load capacity for Starter units, 5,500 lbs. for Add-on units.

1:00 Minute



2:00 Minutes

3:00 Minutes

**Cross braces, sold separately below, are only required every third bay**

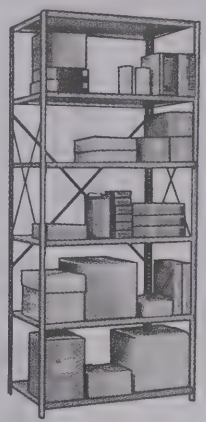
# INDUSTRIAL OPEN & CLOSED SHELVING

PENCO® CLIPPER® SHELVING

**Penco Clipper Industrial Shelving offers ease of assembly and adjustability.**

**Very Versatile - Choose from:**

- Open or Closed Construction
- 20 or 18 Gauge Shelves
- 5, 6, or 8 Shelf Units



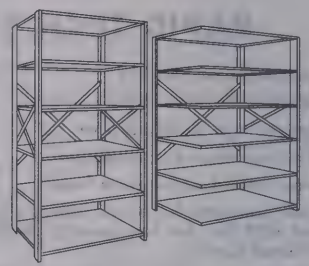
New

**14 GAUGE POSTS:**

- Front box posts specifically designed for multiple add-ons. Cut costs and assembly time for multiple units Easy, straight-in, straight-out shelf positioning—posts do not get in the way of shelf surface
- Punched on 1" centers for maximum shelf adjustment options

**HI-PERFORMANCE® SHELVES:**

- Box Beams with flanges welded on 3" centers for extra strength
- Corners lapped and welded; sides double flanged
- Gray enamel finish



Open Starter w/6 Shelves

Closed Starter w/6 Shelves

FREE DELIVERY on orders of $900 or more

See Freight Policy

Starter Unit  Add-On Unit

Begin each row of shelving with a starter unit. Order Add-On units for additional shelving in the row.

## PASS THRU SHELVING

**Access From Front & Rear** – can be used from two separate aisles.

**Box Posts Used On All Four Corners** – insures complete access to width of shelf. 87" high.

**20 Gauge Hi-Performance Shelves** – adjust on 1" centers with clips.

Pass thru shelving units are sold as starters only. Install units back-to-back and not be encumbered by back braces. Cross braces stabilize from front to back, and special braces attach to post and shelf for lateral stability.

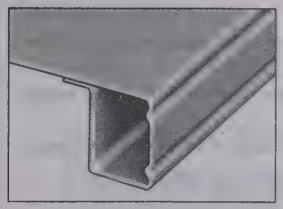
### USE INDUSTRIAL SHELVING THROUGHOUT YOUR ORGANIZATION

Tennsco Industrial shelving is one of the most versatile shelving systems available. Its design allows for both open and closed style storage. The open style is great for storing packaged items, containers, tools, etc. while allowing easy access. The closed style helps prevent items from accidentally falling off shelves and is ideal for storing small or fragile loose items. The closed style can also serve as room partitions.



Industrial shelving units are available in a wide range of sizes and can be used stand-alone or in groups to fit room dimensions.

*As America's leading distributor, we know a thing or two about storage.*

# INDUSTRIAL OPEN & CLOSED SHELVING

tennsco

Shelves use a structural box formation on front and rear of shelf to produce a load capacity up to 1,000 pounds!

New

## 20 GAUGE ADD'L SHELVES

(*) Based on evenly distributed loads.

### OUTSTANDING CONSTRUCTION, OUTSTANDING VALUE

Tennsco Industrial Shelving boasts the structural integrity of units costing much more. For example, the shelves use a box formation on the front and rear flanges. The face of the box is ribbed and the flange is welded every three inches. The shelf ends have three bends (most competing shelves only have two) for added front to back strength.

Industrial Shelving is designed for those applications that demand strength and versatility. Its solid Box Beam construction and heavy-duty steel shelves combine to increase load-bearing capacity up to 1,000 lbs. Depending on your weight capacity requirements, choose from 20 or 22-gauge steel versions.

# HEAVY-DUTY REINFORCED HIGH CAPACITY SHELVING

tennsco

New

- Reinforced shelf capacity of 2,000 lbs. for extra heavy-duty storage
- Ideal for storage of dies, motors, jigs, fixtures, and other heavy materials
- Shelves constructed of 16-gauge steel to withstand extra-heavy loads
- Complete with five shelves that adjust in 1½" increments
- Boltless design requires no tools for assembly

Reinforced shelving provides storage for extra heavy loads.

**The Heavyweight Shelving** – This is no ordinary shelving unit. Tennsco High Capacity shelving is designed to hold your heaviest loads. Its unique super-reinforced shelf with cross supports prevents shelf deformity. Although this kind of strength is typically found with bolted type units, Tennsco's High Capacity boltless shelving design makes it quick and easy to attach shelves to posts or rearrange. Medium gray finish.

Replacement Parts Available 1-800-323-0620™

**Sturdy, free-standing shelving units** - are ideal for stockrooms, tool cages, factory or office use. Can be easily arranged in numerous configurations without dismantling. Use as free-standing shelving units or attach multiple units to fit available space to satisfy most any storage need.

**Open Units** have four corner posts, 1 pair of back and 2 pair of side braces for strength and rigidity. **Closed Units** include 2 side and 1 back panel for support and security.

**Side and back panels** on closed units protect contents; reduce dust and dirt accumulation.

**22-gauge, triple flange steel construction** holds up to 400 lbs. capacity per shelf*.

**16-gauge posts and sway braces** provide strength and rigidity.

**Attractive enamel finish** in gray or tan is durable and rust-resistant.

## CHROME-PLATED UNITS

**Metro Open-Wire Shelving in Chrome** provides an attractive, durable finish ideal for product displays, general storage in factories, warehouses, laboratories, offices, electronic centers, retail stores, hospitals, nursing homes, hotels/motels, and restaurants.

**Chrome plated finish** provides durable shelf surface that resists corrosion

**Convenient 5-shelf packs** assist in maximizing space utilization

**600-800 lbs. capacity** per shelf maximizes valuable storage space

**Assembles in minutes** without the use of tools, saving time

**Tapered split sleeves** allow for ease of adjustment at 1" increments along the height of the posts

**Open wire design** minimizes dust accumulation and allows free circulation of air, greater visibility of stored items, and increased light penetration

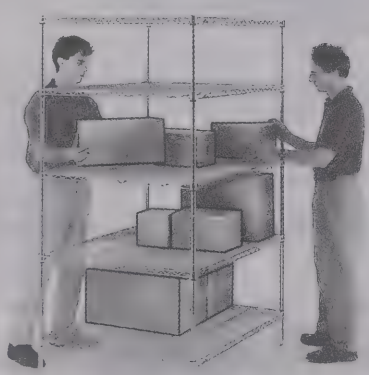
**Steel wires run front-to-back**- items easily slide on and off the shelf

**Built-in 1/4" shelf ledge** holds items on shelf minimizing accidental "bump off" during loading

**Leveling feet in posts** allow for adjustment on uneven floors

**NSF International Listed** assures products meet high standards for cleanability

**Shelving may be purchased as follows:**



1 Starter Unit consists of: (1) 5-pack of shelves and
(1) 4-pack of starter posts

OR

1 Add-on Unit consists of:

(1) 5-pack of shelves and
(1) 2-pack of Add-on Posts with "S" Hooks saving on the cost of two posts.

**Chrome plated wire carts also available, see page 2196**

Grainger will supply you with the dependable, brand name products you need to keep your operation running smoothly-plus the solutions you need to keep your operation running more profitably.

# SUPER ERECTA® SHELVING

## SUPER ERECTA BRITE™ UNITS

**Metro Open Wire Shelving in Brite Zinc** offers an environmentally friendly finish ideal for dry, general storage applications in warehouses, factories, offices, restaurants, hotels, retail stores, hospitals, or any location in need of dry storage solutions.

**Brite zinc finish** incorporates state-of-the-art brightening process and chromate bath, providing a look virtually identical to chrome at a lower price

**4 shelves per carton** offers a value packed, economical alternative to chrome

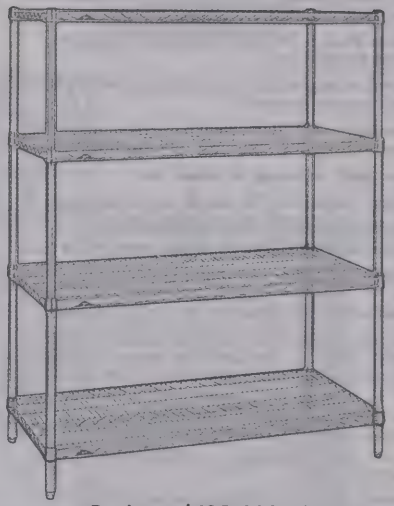
**600-800 lbs. capacity per shelf** maximizes valuable storage space

**Assembles in minutes,** without tools saving time and money

**Tapered split sleeves** allow for ease of adjustment at 1" increments along the height of the posts

**Open wire design** minimizes dust accumulation and allows free circulation of air, greater visibility of stored items, and increased light penetration

**Steel wires run front-to back** so you can easily slide items on and off the shelf



**Built in 1/4" shelf ledge** holds items on shelf minimizing accidental "bump off" during loading

**Leveling feet** in posts allow for adjustment on uneven floors

**NSF International listed** assures products meet high standards for cleanability

METRO

New

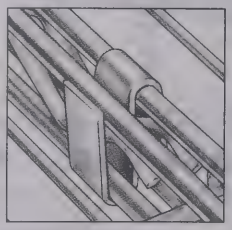
NSF

Registered ISO 9001-9002

**Shelving** may be purchased as follows:

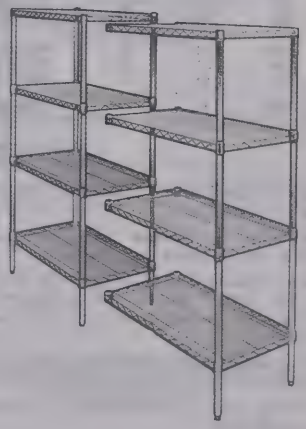
**1 Starter Unit** consists of:

(1) 4-pack of shelves and



(1) 4-pack of starter posts

OR



**1 Add-on Unit** consists of:

(1) 4-pack of shelves and

(1) 2-pack of Add-on Posts with "S" Hooks saving on the cost of two posts.

"S" Hooks allow add-on unit to be connected without adjacent posts.

(†) Includes 2 posts and 8 "S" Hooks

### SHELVING STARTER AND ADD-ON UNITS

Develop a custom storage installation by combining individual units in a variety of combinations utilizing "S" hooks. Starter Units consist of four posts and indicated number of Standard Super Erecta shelves. Add-On Units consist of two posts, indicated number of shelves, and two "S" hooks for each shelf.

# MODULAR PLASTIC SHELVING SYSTEMS

## DURA-SHELF™ BULK SHELVING & STORAGE

**Heavy duty plastic** - Provides load capacity up to 1500 lbs.

**Modular Design**-Permits multitudes of shelving configurations

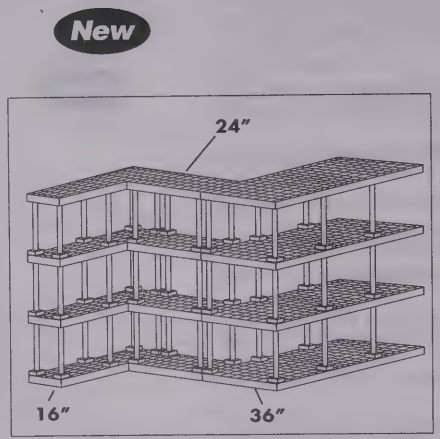
**Adjustable height**-Add or subtract shelves to satisfy spacing needs

**Lightweight and portable**-The right choice when remodeling, moving, & expanding

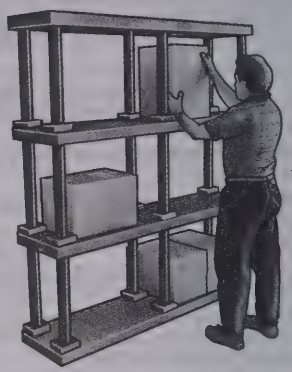
**Open grid shelving is ideal for:**

- **Wet, corrosive, & harsh environments**
- **Reducing dirt & dust accumulation**
- **Increased air flow & light penetration**

**No tools required** - Snaps together in seconds



**Versatile**-Choose from 16, 24, or 36" Depths.



Shelving made from strong, durable, high-impact plastic; impervious to oils, gas, acids, solvents, and most industrial chemicals

**Base unit includes:** 2 shelf levels and required posts*

**Add on unit includes:** 1 shelf levels and required posts*

(*) Quantity varies based on width selected.

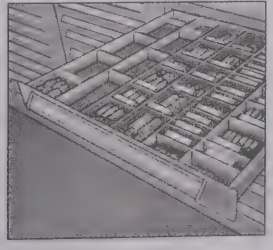
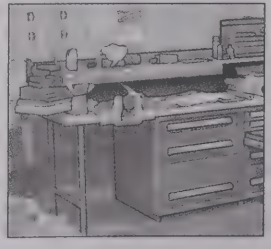
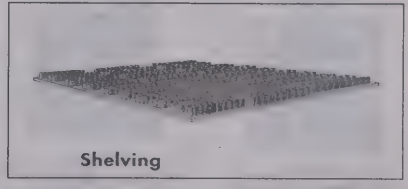
STANLEY Vidmar



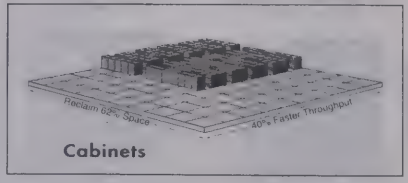
## TURN FIVE SECTIONS OF SHELVING INTO 2 ORGANIZED CABINETS



- **Vidmar storage cabinets save space; consolidate storage space by eliminating "reach room" required by shelving**
- **Stackable, modular cabinet storage conserves valuable floor space by storing vertically**
- **Two Vidmar cabinets can store inventory from 5 shelf sections; increased floor space fosters a more productive work environment**
- **Drawer storage keeps inventory clean and secure**
- **Organized drawer compartments cut retrieval time—taking inventory is as easy as opening a drawer**



Drawers practically double your storage capacity, because they put every cubic inch to work. That's because drawers don't need the "reach room" that shelving requires.



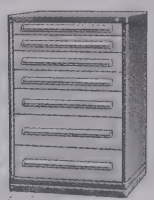
Having everything organized in a drawer makes everything easy to find and easy to reach. So you can cut retrieval time to make your business more efficient.

Vidmar cabinets from Stanley Storage Systems are totally modular, so they can be stacked to conserve floor space. Each cabinet is built to support up to 24,000 lbs.

Shelving

Cabinets

STORAGE EQUIPMENT



# VIDMAR PRECONFIGURED CABINETS

Preconfigured for easy selection. Examine your inventory to determine which cabinet, drawers and loading diagrams would best suit your needs. Select a cabinet and loading diagram for each drawer. Drawers are fully guaranteed against failure. Drawers hold up to 400 lbs. fully extended. Delivered with drawer interiors (loading diagrams) completely installed except the MT3189AL. All cabinets measure 30 in. W x 27¾"D. Available in Dark Blue.

All cabinets come with Lista's limited lifetime warranty

Lista modular storage cabinets provide high density storage with maximum capacity, organization, and access. The ultimate customizable drawer is the core of every Lista cabinet. With all-steel, welded construction, built-in locking systems, and baked enamel gray finish, Lista cabinets provide many years of trouble-free use.

**High quality, all-steel construction** — Designed for rugged environments to withstand years of use.

**Patented PrevenTip® Locking System** — One drawer-at-a-time feature prevents accidental tipping for increased safety.

**100% full extension drawers with 440 lb. capacity** — Provide complete access to the furthest corner of the drawer.

**Customizable drawer compartments** — Provides better organization for different sized parts and tools. With 36 slots on each side of drawer, user can adjust dividers to create custom compartments.

**Locking system** — Prevents theft and improves security. Includes two keys.

**Full width handles flush with housing** — Improves safety and appearance. Paper label and plastic cover included for labeling contents.

**No. 4VM39 Shelf Cabinet with Sliding Door** — Provides easy access to shelves. Stack on top of two side-by-side cabinets to save floor space or use as a counter unit.

# ROTABIN® REVOLVING SHELF STORAGE BINS

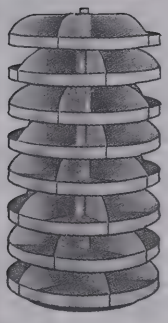
Improved accessibility and visibility vs. Linear shelving

Shelves revolve independently on ball thrust bearings

Scooped compartments make it easier to remove bulk parts

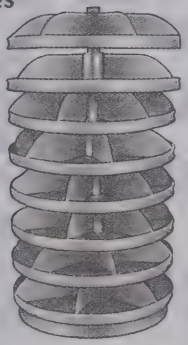
Beaded edges for safety and rigidity

New



Baked-on gray enamel paint

FRICK-GALLAGHER

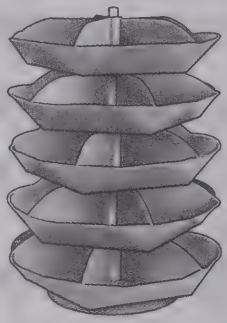


- Maximize storage space in minimum floor space
- More accessibility and visibility than standard shelving
- Ideal for use in corners and aisle ends
- Concentrate storage to cut parts picking time
- Shelves rotate easily even when fully loaded
- Easy, one-person assembly
- Works well in maintenance, assembly, and warehousing areas

FREE DELIVERY on orders of $900 or more
See Freight Policy

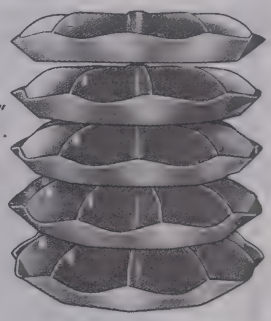
### 28" and 34" Dia. FLAT-BOTTOM SHELVES

28" Dia.



34" Dia.

Compartments divide 1" O.C. Additional bin dividers sold separately



Includes 6 permanent compartments per shelf. 500 lb. shelf capacity.

Includes 5 permanent compartments per shelf. 500 lb. shelf capacity.

### 44" and 58" Dia. SCOOP-BOTTOM SHELVES

44" Dia.

58" Dia.

Shelves are available with either 5 or 10 permanent compartments. 5-compartment shelves hold up to 625 lbs. 10-compartment shelves hold up to 500 lbs.

Includes 10 permanent compartments per shelf. 2000 lbs. shelf capacity.

Space saving Rotabin units concentrate storage of items traditionally issued from storerooms, tool cribs, or warehouse issue points. Circular units also fit in space that is often wasted, like corners and aisle ends. By concentrating storage they also cut parts picking time while improving both accessibility and visibility since parts never get lost at back of shelf. Flat bottomed units have shelf compartments that can be further divided on 1" centers using dividers that must be ordered separately. Shelves rotate independently on ball thrust bearings. Industrial-duty units have one coat baked-on gray enamel finish. Edges are rolled for smoothness, and seams are welded for strength. Shipped unassembled.

**ACCESSORIES**: Adjustable bin dividers for 28 and 34" diameter shelves. Polypropylene color-coded pans for 34" diameter shelves. High impact polystyrene small parts carriers for 28" diameter shelves. Extra shelves for 44 and 58" diameter shelf units. All are available separately, call 1-800-323-0620.

## STACKING, GALVANIZED STEEL CONTAINERS

- **Extremely strong, will not rust, break or wear out**
- **Hopper front design makes it easy to see and pick parts**
- **All sizes stack and inter-stack**

Ideal for storing disproportionately heavy or sharp parts which are unsuitable for plastic containers. Perfect for extreme temperature conditions under which polyethylene or polypropylene containers tend to crack or deform. Resistant to corrosive substances which damage plastic containers. Unlike painted or unfinished metal surfaces, hot-dipped galvanized surface will not scratch or rust.

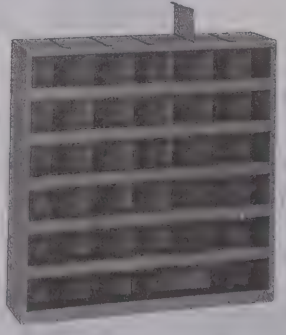
## ADJUSTABLE MULTI-PURPOSE STEEL BIN STORAGE UNIT

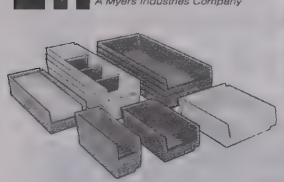


**Adjustable-opening bin** provides access and storage for a variety of small and large parts such as fasteners, electronic components, tools, plumbing, and electrical fittings.

**Five removable vertical dividers** enable the creation of multiple-width openings for larger objects. Space is provided for identifying contents of each bin. With all dividers in place, bin has (36) 4¾ x 3¾ x 3¾"H openings. Removing dividers increases opening width by multiples of 3¾".

**Scooped shelves** makes parts removal easy. Each opening has a fully hemmed lip to keep parts from spilling out.

**Interlocked and welded cold-rolled steel construction** provides rigid structural strength. Will not warp, twist, or sag. Rust and acid-resistant industrial gray baked enamel finish. Keyhole slots provided for wall mounting. Overall dim.: 4¾D x 23⅝W x 23⅝"H. Durham brand.



**No. 5W886.** Steel Bin Storage Unit. Shpg. wt. 21.0 lbs. List $83.30.
Each.....$62.65

DURHAM

- **Removable vertical dividers allow customized bin design**
- **Scooped shelves keep small parts within easy reach**

AKRO-MILS
A Myers Industries Company

New

- Works with 12, 18, and 24" deep shelving or vertical storage and retrieval units
- Sturdy polypropylene shelf bins outlast corrugated bins—paying for themselves in reduced replacement costs and less waste
- Neat and attractive appearance
- One-piece construction is waterproof and unaffected by grease or oil
- Choose from 13 sizes and 3 colors: red, blue and yellow
- Bin cups available only in white
- Sold in carton quantities only

## CORRUGATED SHELF BINS

Corrugated Recycles

Corrugated Bin Available Separately

- Economical 200-Lb. test B-flute corrugated board shelf bins are sturdy, durable, and easy to assemble
- Shelf bins tailored to fit 12, 18, and 24" shelving
- Hopper style front
- 4-Ply handylock lip
- Corrugated bin dividers available separately below
- White oyster finish provides neat, clean apperance which can be written on, making labels unnecessary

Sturdy, one-piece high quality 200-lb. test B-flute corrugated board shelf bins are used in warehouses, parts departments, and tool cribs to store and dispense bulk parts, assemblies, and hardware items. Fits 12, 18, 24 deep commercial and industrial shelving. Self-locking construction. Shelf bins and dividers are completely recyclable. Made using a minimum of 30% recycled materials. Bins come flat in bundles of 15 for 8½"H models, or 25 for 4¾" high models. Acorn brand.

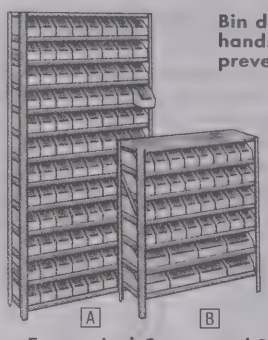
# STORE-ALL SHELVING UNITS AND PICK-RACK SMALL PARTS STORAGE



## STORE-ALL SHELVING UNITS

Sturdy Steel Shelving Units store a large number of parts and finished goods in a small area of floor space with these high-density units. Choose corrugated or molded polypropylene bins. Bin dividers and additional bins are available, see below. All units shipped unassembled. Gray enamel finish. Edsal brand.

Economical Corrugated Bins fold easily into shape; shipped flat in bundles; oyster white, one-piece, 200-lb. test, 4-ply, B-flute board, hopper style front.

Molded Polypropylene Bins - virtually indestructible and seldom need replacement. Waterproof bins unaffected by grease and oil. Front panel has molded-in label holder for cards or stick-on labels. Red color.

42" High Shelving Unit, No. 1W763, is sold without bins. 75" high units available separately, see Index under Shelving, Commercial.

Economical Corrugated Bins

Bin design frees both hands for picking and prevents spills

# STACK BINS, CONDUCTIVE BINS, AND BIN SYSTEMS

## HEAVY-DUTY HOPPERS

- Space efficient—front loading hoppers can be stacked five units high
- Rugged hoppers replace steel units
- Tough 100% recyclable, high density polyethylene plastic
- Each bin has a 150 lb. capacity
- 1/4" ribbed wall construction won't crack or rust; resists wrapping

**KADON** New

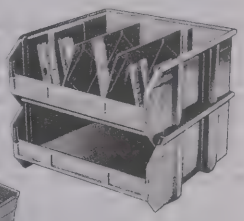
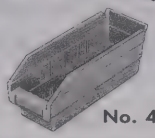
## CONDUCTIVE BINS AND DIVIDERS

- Extra thick, reinforced walls for rigidity
- Slotted label holders for easy identification
- Unaffected by humidity
- Bins are highly dissipative
- Electrostatic decay rate is tested to meet Mil Spec Mil-B81075B at less than 0.1 seconds
- Surface resistivity is less than 105 Ohms-per-square when tested per ASTM-D257



Ideal for storage and transportation of electronic components and parts, assemblies, and loaded circuit boards. Bins are molded with a carbon filled copolymer polypropylene material which protects sensitive electronic components from typical electromagnetic interference (EMI). Permanently conductive and unaffected by normal cleansers. Conductive bins can be stacked on one another, hung on No. 4RR25 Louvered Panel or No. 4RR26 Rack, or used on standard shelving. Optional conductive bin dividers are available separately. Quantum brand.

Stackable bins have a wide stacking ledge to ensure stability when stacking and anti-slide stop to prevent stacked bins from shifting forward. Molded-in hand grips for easy transportation.



Nestable bins allow easy and space-saving storage when empty.

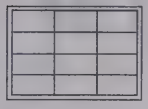
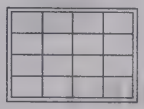
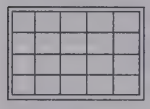
# STEEL PARTS STORAGE CABINETS AND DRAWERS



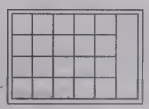
New



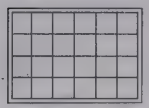
DURHAM



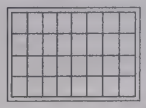
**Replacement Parts Available**
**1-800-323-0620**



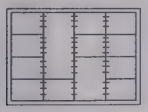
**12 Compartment Drawer**



**16 Compartment Drawer**



**20 Compartment Drawer**



**21 Compartment Drawer**

**24 Compartment Drawer**

**32 Compartment Drawer**

**Adjustable Compartment Drawer has nine removable dividers to create custom-size compartmments**

## SLIDING DRAWER PARTS CABINETS

Sliding drawer parts cabinets provide convenient storage of electronic components, machined parts, and bolts. Cabinets come with four steel drawers, each with a hinged steel top and molded polystyrene insert parts tray. Each compartment has a scooped bottom for easy access. Extra drawers can be ordered separately.

Drawers ride on sliding full-suspension racks fixed to the cabinet, and can be easily removed and carried to the job location. Drawer stops prevent unintentional pull-out. Each drawer has steel pull handle, closure latch, and a compartment locator guide.

Cabinets can be stacked and bolted together or bolted to a bench top or other rigid surface for added stability. Steel parts are rust- and acid-resistant. Gray enamel finish. Durham brand.

### SMALL CABINETS

Small, four-drawer cabinets are available without any drawers or with 12, 16, 20, and 24-compartment scooped drawers. No. 5W883 contains one drawer each of 16, 20, 21, and 24-compartments. 21-compartment drawer is ideal for crimping tools. Overall dim.: 11¾D x 15¼W x 11¼H.

Extra drawers for small cabinets come in 12, 16, 20, 21, 24, and adjustable compartment models. No. 6A275, 21-compartment drawer has special rectangular compartment ideal for electricians' crimping tools. All drawers have 20-lb load capacity. Drawers measure 9¼D x 13$\frac{5}{16}$W x 2"H.

### LARGE CABINETS

Large four-drawer cabinets are available without any drawers or with 24 or 32-compartment scooped drawers, or with a special adjustable compartment drawer. Adjustable drawer has plastic dividers which can be removed or arranged to accomodate large or small parts†. Overall dim.: 15¾D x 20W x 15"H.

Extra drawers for large cabinets come in 12, 16, 20, 21, 24 or 32 compartments or with an adjustable compartment tray. All drawers have 40-lb. load capacity and are 12D x 18W x 3"H.

# SMALL PARTS STORAGE CABINETS

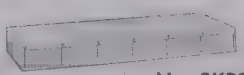
## JUMBO DRAWER PARTS CABINETS

DURHAM

Cabinets can be stacked with steel bin storage units below

Used to organize and store parts, components, or assemblies in factories, warehouses, garages, and workshops. These stackable cabinets eliminate clutter and provide a convenient storage center for small parts. Steel construction with vertical supports for added strength and rigidity. Steel drawers have formed steel runners for smooth operation. Stop feature at rear of drawer prevents accidental spilling. Drawer sides hold adjustable plastic dividers on 1" increments. Two movable dividers included per drawer. Gray enamel finish.

### EXTRA DRAWER DIVIDERS



Extra drawer dividers for Durham cabinets are available at additional cost. Dividers are shipped nearest distribution point. Call 1-800-323-0620 to order.

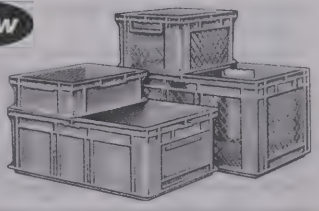
## HEAVY-DUTY STACKING CONTAINERS

**Unique, highly-engineered design** ensures exceptionally high load and stacking capacities and years of useful life.

**High cube utilization.** Different sizes stack and interstack. Sized to cube out 48 x 40" pallets for maximum efficiency and cost effectiveness.



**Extremely versatile.** Returnable, reusable. Perfect for closed loop distribution systems. Solid sides and bottoms are ideal for small or loose items and most conveyor systems. Mesh sides and bottoms provide visibility and ventilation - great for refrigeration or drying.

**Injection molded, high-density polyethylene** resists stress cracks, most solvents, and chemicals. Easy to clean. Ergonomically designed hand holes on all four sides for safe, comfortable manual handling. Gray color.

**5-YEAR LIMITED WARRANTY**

**Schaefer warrants its plastic containers for five years against defects in material or workmanship. Text of warranty available on request.**

## NEST AND STACK TOTES

**Save Storage Space**

- Stack when full, turn 180° and nest when empty
- Ribs under the lip prevent jamming when nested
- Side ribs ensure stability when stacked
- Large comfort grip handles

Durable polyethylene construction absorbs impacts and retains shape for repeated use in almost any application. Won't rust or corrode; resists solvents and chemicals. USDA listed for complying with FDA Regulations for use in meat and poultry plants. Lids sold separately below. Gray color. Akro-Mils brand.

AKRO-MILS

Textured bottoms provide a no-slip grip on conveyor belts

## HEAVY-DUTY DIVIDER BOXES

KADON

- Great for in-plant process
- 200 lb. load capacity
- 1/4" thick dividers can be positioned to create various size compartments down to 1 x 1"
- Flat bottom for conveyor use
- 100% recyclable, high density polyethylene plastic
- Designed for stacking to save space
- Excellent for large or small parts storage

New

## MODULAR TOTE BOXES

**Dividable Containers for Individualized Compartments**

- Optional dividers fit both long and short dimensions
- Strong stacking rims and external ribbing provide strength and rigidity

Store, organize, and handle small parts. Durable construction protects fragile items in storage and transfer. Molded from high-density polyethylene with reinforcing ribs for strength and shape retention. Widely used in factories, warehouses, retail stores, and hospitals. Boxes are gray; dividers are black. Akro-Mils brand.

# BINS AND BOXES

## ATTACHED LID CONTAINERS

- Textured bottoms provide a sure grip on conveyor belts
- Strong molded-in handle grips are ergonomically designed for easy lifting and carrying
- Reinforced hinge pins provide years of smooth lid operation

Stack for maximized storage and nest when empty to save space. Versatile, economical in order picking, closed-loop distribution and storage. Reduces distribution costs with repeated use. Made of lightweight, reinforced polyethylene for super strength and durability. Attached lids won't get lost. Interlocking lid strengthens load capacity of container and snaps securely closed. Grey color.

AKRO-MILS

Reusable shipping, distribution, and storage containers

All three sizes have the same footprint for easy pallet loading.

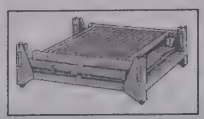
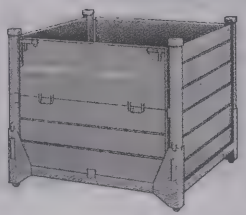
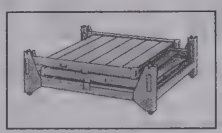
STORAGE EQUIPMENT

# CORRUGATED STORAGE CONTAINERS

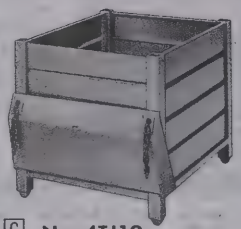


STEEL KING

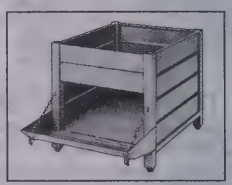




Ⓐ No. 4TJ25



Ⓑ No. 4TJ24



New

Ⓒ No. 4TJ19

- 4,000 pound capacity handles heavy loads
- Painted vista green inside and out for a durable, attractive finish

## Ⓐ ROUND CORNER CORRUGATED STEEL CONTAINER

- All-welded construction offers low maintainance, high strength, no assembly required
- Universal type stacking legs lets you stack up to four units high
- Fewer seams create a clean, practical design
- Rugged enough to withstand fork lift handling and interplant shipping

Heavy 11 gauge ribbed steel bottoms, 12 gauge ribbed steel sides, heavy ¼" thick gusseted stacking legs, and double thick top edges all contribute to a container designed for heavy duty industrial applications. 4½" underclearance allows handling with forklifts and other equipment. 24" usable depth.

## Ⓑ HOLD 'N FOLD CONTAINER

- Folds down 3:1 to reduce shipping costs and save space
- Tubular corner columns and base structure are more durable than other collapsibles
- Plug and socket stacking system allows stacking six units high

Combines the benefits of both standard collapsible containers and heavy-duty rigid containers. Stacks securely when empty, eliminating the need to use banding for return shipments. 33½" usable depth, 4" underclearance. Half-drop gates on both 48" sides for easy access to contents. No. 4TJ23 features solid corrugated steel sides and bottom; No. 4TJ24 features 2" x 2" wire mesh sides and bottom.

## Ⓒ WORKING STATION

- Adjustable hopper chute ergonomically dispenses small parts
- Tubular corner columns and base structure provide durability and reliability
- Plug and socket stacking system allows stacking six units high

The unique Workingtainer has a hopper door on the narrow side of container that is adjustable from fully closed to fully open, and nearly anywhere in between. Securely ship parts with the chute in the closed position, ready for assembly line, no additional movement of parts needed. 24 inch usable depth, 4½" underclearance. Chute is on narrow side.

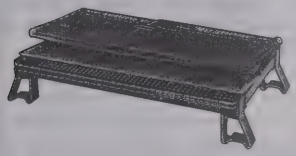
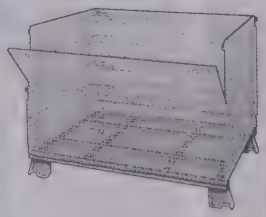
# WIRE STORAGE CONTAINERS



## STOR-MORE®

Front wall/gate folds down for easier accessibility



Mini-tainer

Fold down flat for easy storage

Open wire design allows full visibility for easy inventory checks, excellent ventilation, and improved cleanliness. Double wire reinforcements are found at load-bearing surfaces and along top edges of each wall. Units fold down flat for easy stacking—reduces return shipment costs and storage space. 4½" under-clearance allows for easy movement by fork or pallet trucks. 11-gauge wire. Gray-silver enamel finish. Stor-More brand.

## NW Nashville Wire Products

A heavy duty structure and welded channel base allows for 4-way entry access. Containers fold to reduce return shipping cost and storage space. Open wire construction allows visibility of inventory. Units safely stack up to four high. Baked-on gray finish. Nashville Wire brand.

# KEE KLAMP® SLIP-ON PIPE FITTINGS

**Kee Klamp, The Original and Most Often Used** slip-on pipe fitting in the World, since 1934.

**Kee Klamp fittings are hot-dipped galvanized** to ASTM A153 for corrosion resistance that will last for decades.

**Strong, Malleable Cast-Iron** Kee Klamp slip-on pipe fittings are constructed to ASTM A47-77-32510. The fittings are comprised of materials with tensile strengths of over 32,510 pounds, making Kee Klamp fittings not only the strongest slip-on pipe fittings in the world, but the safest as well.

**Simple, Cost-Effective Construction-** No drilling, bolting, or welding required. Simply slide Kee Klamp fitting over pipe and tighten set screw to 10 ft.lbs. (Hand-tight). It's so easy!

**With Kee Klamp fittings you don't have to worry** about the Electrolitic Corrosion that can occur due to contact between dissimilar metals because Cast Iron fittings and Steel pipe are like metals.

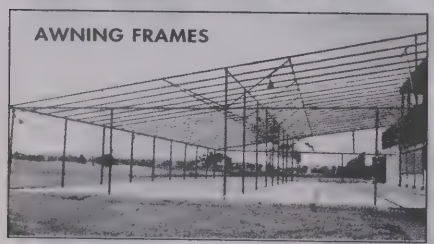
**Build Strong, Rigid Structures** with Kee Klamp fittings and standard Schedule 40/80 pipe or corresponding tube.

**1001 Applications-** You can build railing, racks, greenhouses, awnings, fencing, cages, and much more. There are countless applications for Kee Klamp slip-on pipe fittings.

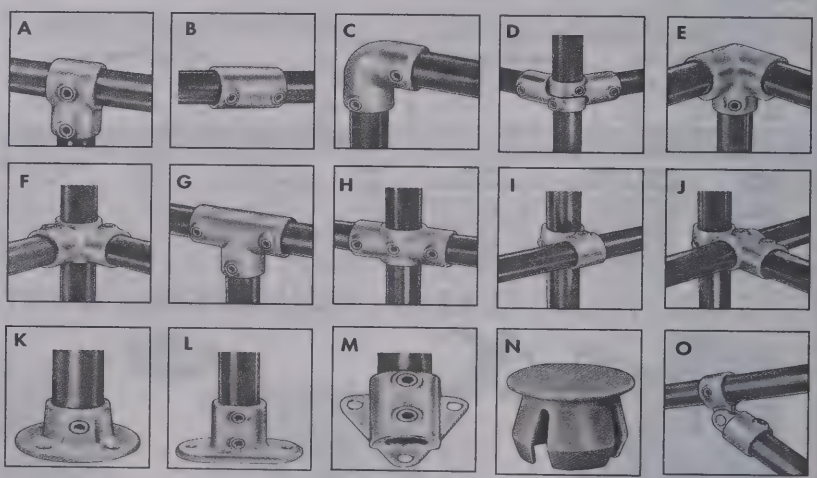
**Case-Hardened Set Screws** with the exclusive Kee Koat® finish are used to attach the fittings securely to the pipe.

**Kee Klamp fittings exceed** OSHA requirements for the construction of handrailing.

**A standard hex key** is the only tool needed to build with Kee Klamp slip-on pipe fittings. All 1" fittings use a 3/16" A.F. hex key, while all 1¼" and 1½" fittings use a 1/4" A.F. hex key.



*A.F.=Across Flat.



**NOTE**

Kee Klamp pipe fittings fit the following pipe inside diameters (I.D.) and outside diameters (O.D.). They also fit the following tube outside diameters (O.D.).

| Pipe ID | Pipe OD | Tube OD | Kee Klamp ID |
|---|---|---|---|
| 1" | 1.315 | 1 5/16" | 1 3/16" |
| 1¼" | 1.66 | 1 5/8" | 1.72 |

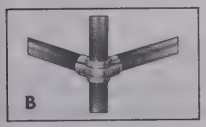
# HOLLAENDER™ SPEED-RAIL® FITTINGS



- Aluminum fittings can be used with galvanized carbon steel, stainless steel, black iron or aluminum pipe
- As strong as malleable iron at 1/3 the weight
- Corrosion-resistant
- Internal/external CamCar knurled set screws make complete contact unlike large malleable iron set screws
- Cheaper than welding or malleable iron
- Non-magnetic/Non-sparking; Can be constructed around operating machinery
- OSHA, BOCA, SBC and UBC compliant
- Can be used in corrosive applications–petroleum, chemical, wastewater and ocean areas
- Bright, attractive finish

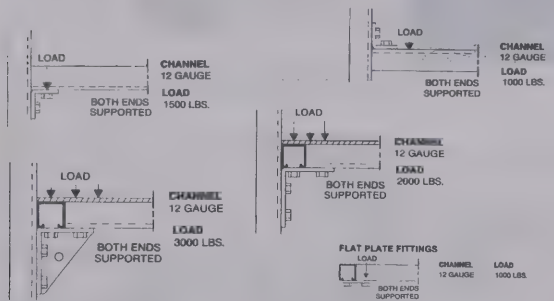
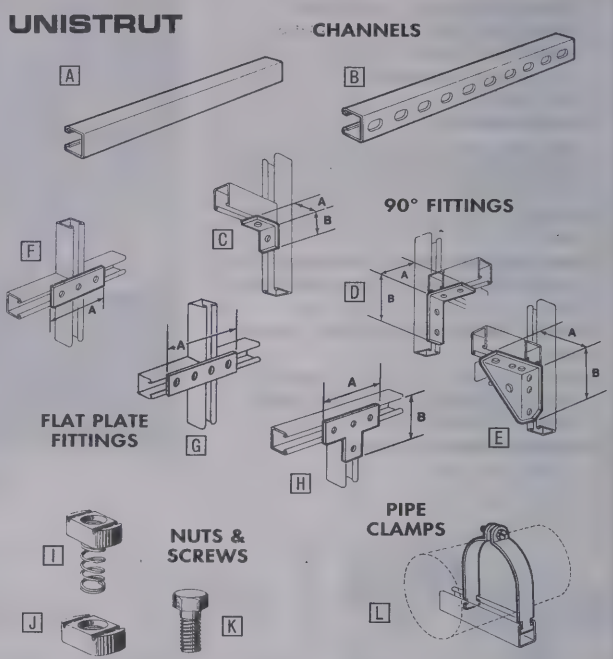
# UNISTRUT® METAL FRAMING

Industrial Systems





Mechanical Systems

The basic Unistrut® connection, a simple nut and bolt connecting a fitting to continuous channel, has evolved into a comprehensive engineering building system of standard components of metal framing. Systems for mechanical, industrial, and electrical supports have been developed to prove the potential of what can be built to meet your needs. Not to be used as scaffolding.

## UNISTRUT LOAD CAPACITIES

**90° Fittings (when used in position shown with both ends of 12 guage channel supported)**

**Unistrut® Finishes.** All channels and fittings are carefully cleaned and phosphatized after production, and a uniform coat of highly effective rust inhibiting acrylic enamel paint is applied and baked in. Color is Perma-Green. The finish will withstand 400 hours of exposure to salt spray in accordance with ASTM designation B117.

A, B **Channels.** Roll formed from 12-gauge low carbon strip steel. One side of channel has a continuous open slot with inturned lips. Attachments (described below) are secured to the framing member with hardened, toothed, slotted nuts which engage the lips. Channels are 1⅝" x 1⅝" x 10' long. No. 4A974 has slots on backside of channel measuring 9/16 x 1⅛" on 2" centers.

C **thru** H **Fittings.** Connect framing channels with other attachments. Fittings are punch-pressed from 1/4" thick hot rolled, pickled and oiled steel plate for a smooth surface. All fittings 1⅝" wide x 1/4" thick. Conform to ASTM specifications A575.

C, D, E **90° Angle Fittings.** No. 4A979 joins two channel members perpendicular. No. 4A980 joins three channel members perpendicular. No. 4A981 joins channel members for heavy-duty applications.

F, G, H **Flat Plate Fittings.** No. 4A976 is used to join channel members in a cross configuration. No. 4A977 is for joining channel members in a cantilever configuration. No. 4A978 is a "T" shaped fitting used to joint channels in a "T" configuration.

I **thru** K **Nuts & Screws.** Made from case-hardened steel. Nuts are 1/2". Available with or without spring which serves to hold nut in place while securing it. Screw is 1/2 x 15/16" hex head. Electro-galvanized finish. Sold in packages of 25.

L **Pipe Clamps. 1/2, 3/4, and 1"** universal clamps support both rigid steel and thin-wall (EMT) conduit. Connect to the continuous open slot of channels to support pipe. Clamps are punch pressed from strip steel and electro-galvanized (zinc) finished. Fed. Spec. No. QQ-Z-325C Type 1 class 3. Sold in packages of 10.

# SLOTTED ANGLE STEEL POSTS KIT

tennsco

- Make custom steel structures i.e. shelving, braces, racks, platforms, carts, etc.
- Simply bolt together—no drilling holes
- Cut to size using cutter shown below
- Rust-resistant galvanized steel
- Choose from 12 or 14-gauge thickness to handle normal or heavy-duty loads

### THE INDUSTRIAL ERECTOR SET

Can't find a shelving or storage unit that exactly fits your needs? Build it yourself with Tennsco's Slotted angle steel posts kit. Simply cut posts to length, add cleats and gussets where necessary and bolt together for a super strong structure.

**Kit contains:**

**5 slotted angle posts each 12 feet long and 38 cadmium plated 5/16 x ¾" bolts and nuts.**

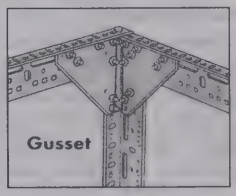
# GALVANIZED SLOTTED ANGLE CLEAT AND GUSSET KIT

- Bolt-on cleats join and reinforce slotted angle posts to create longer lengths
- Gussets reinforce corner joints
- Rust-resistant galvanized steel



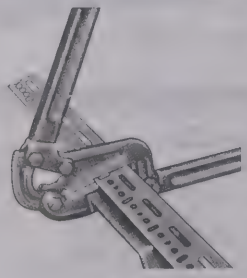
**No. 6X833.** Shpg. wt. 9.4 lbs. List $21.00.
Each ..... **$15.39**

tennsco

**Kit contains: six 12-gauge cleats 2¼" x 1½" x 9" long and six 14-gauge gussets 6" x 6" x 8⅝"**

Cleat

# SLOTTED ANGLE CUTTER



- Lightweight
- Portable
- Cuts angles up to 45°

Cuts predrilled and slotted angle posts. Use instead of hacksaw or power metal cutting saw to accurately cut slotted angle to desired lengths. Tool is positioned on floor and steadied with operator's foot. Hand action cuts through metal cleanly. Cuts slotted angle up to 3" wide, 1½ deep, maximum thickness of 1/8". Used for making braces, shelves, and tables. Length is 38". Hanging ring attached to handle. H.K. Porter brand (2790HKP).

**No. 4W296.** Shpg. wt. 14.0 lbs. List $372.06.
Each ..... **$316.50**

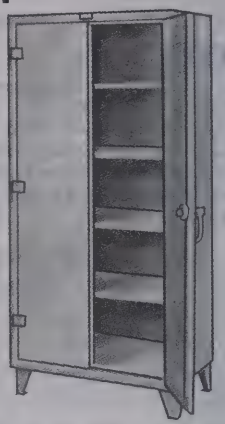
COOPER
CooperTools

H. K. PORTER

**Cuts without hacksaws or other power metal tools.**

**Tool is positioned on floor and steadied with operator's foot.**

# SECURITY CABINETS



## EXTRA HEAVY-DUTY WELDED CABINET

- Super strong, all-welded 12-gauge steel construction
- Sweep access from all 4 sides
- Bronze handle is stronger than aluminum
- Shelves adjust on 2" spacers rather for more storage options
- Shipped fully assembled

Sturdy, one-piece construction eliminates seams in back of cabinet. 14 gauge shelves adjustable on 2" centers support evenly distributed loads up to 1800 lbs. Bolt holes in feet enable securing to floor to prevent toppling. Electro-statically painted dark gray enamel finish.

Strong Hold

# E-Z BILT™ INDUSTRIAL STORAGE CABINETS

PENCO®

Unique European design Recessed Handle with 3 Point Latching

Full Height Reinforced Door Pan On All Doors For Extra Strength

Recessed handle with built-in lock

New

- Contemporary Design
- Doors open 180°
- Recessed Handle
- Attractive Gray or Putty Finish

**Storage Cabinets** have four shelves that are adjustable independently on 2" vertical centers.

36" wide shelves hold 150 lbs. each, 48"W cabinet shelves are reinforced to carry 400 lbs. each.

Penco E-Z Bilt™ Storage Cabinets are an ideal solution to your storage needs in offices, institutional or industrial environments.

**Doors open a full 180°** - Each door has three hinges and a recessed handle with built-in lock and two keys providing three point latching for secure storage of valuable items.

Finished with durable baked enamel in Gray or Putty color to blend with any decor.

**Combination Cabinets** have four half-shelves that adjust on 6" centers, evenly spaced opening size is 16¾W x 11"H, one full shelf with a fixed opening size of 36W x 13⅜"H, and an opening for hanging garments that measures 18W x 58¾"H. A coat rod with 2 hooks is included.

# HEAVY GAUGE VENTILATED LOCKERS

PENCO New

## ALL-WELDED LOCKERS

**Comes Welded Pre-Assembled** – Saves time.

**All-welded Construction** with 14-gauge doors, 16-gauge sides, tops, bottoms & shelves and 18-gauge backs to insure long life.

**Tops, bottoms and back span multiple frames** to assure lifelong rigidity.

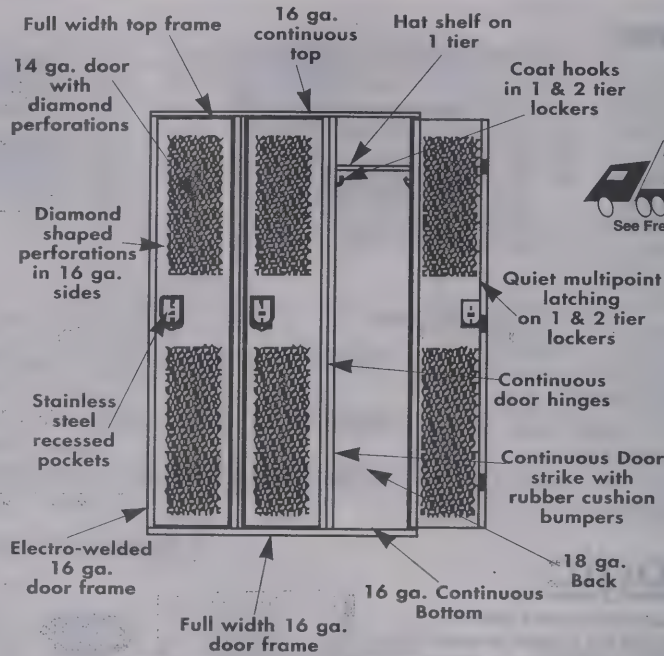
**Continuous Door Hinges** stand up to hard use.

**Diamond Perforated Doors and Sides** provide excellent ventilation for storage of athletic or work clothes. Good for quick inspections.

**Heavy-Duty Recessed Handles w/Stainless Steel Pockets on 1 & 2 Tier** – No protrusions on front of locker.

**Multi-point latching on 1 & 2 Tier Models** – Door can lock automatically with lock in place.

**Many Sizes/Styles** – Choose from 1, 2 or 6 tier in 1 or 3 wide.



Penco All-Welded Lockers offer superior resistance to hard use and abuse. All body parts are welded into a single rigid unit to resist damage for the life of the product. Will accept padlocks or built-in locks (purchased separately). All lockers must be anchored to the floor and/or wall for safety. Attractive gray enamel finish.

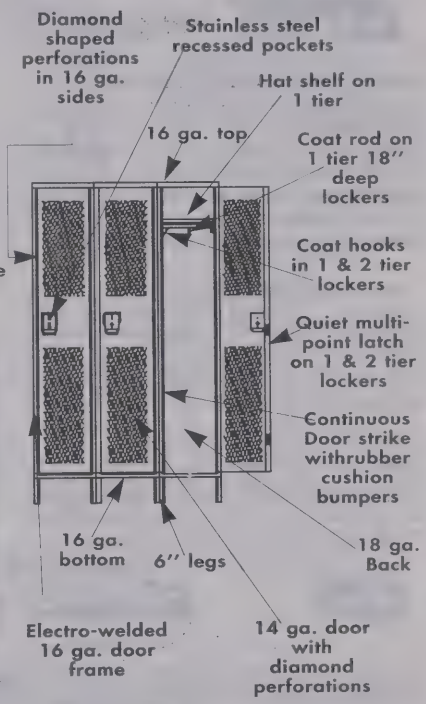
# HEAVY GAUGE VENTILATED LOCKERS

## INVINCIBLE II LOCKERS

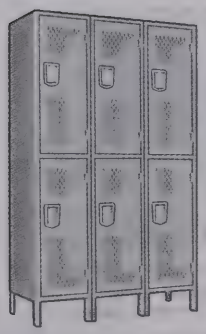
**Shipped Unassembled** – For shipping economy.

**Heavy Gauge Parts** – Same as All-Welded lockers.

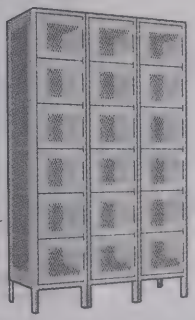
**Diamond Perforated Doors and Sides** – Excellent for applications requiring ventilation.



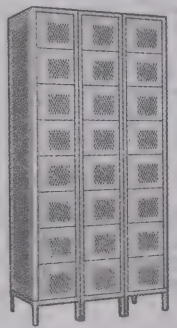
Penco Invincible II Lockers are similar to All-Welded Lockers except that they are shipped Knocked Down (KD) for on-site assembly and have 6" high legs to raise the locker off the floor. Will accept padlocks or built-in locks (purchased separately). Slope tops and closed front bases can be added as options. Attractive gray enamel finish.



**Heavy Duty Stainless Steel Recessed Pockets on 1 & 2 Tier** – No protrusions on front of locker.



**Multi Point Latching on 1 & 2 Tier Models** – Allows latching with lock in place.



**Many Styles/Sizes** – 1, 2, 6, 8 & 9 tier in 1 & 3 wide.

# PREASSEMBLED PERSONAL LOCKERS

## LOCKERS - ASSEMBLED

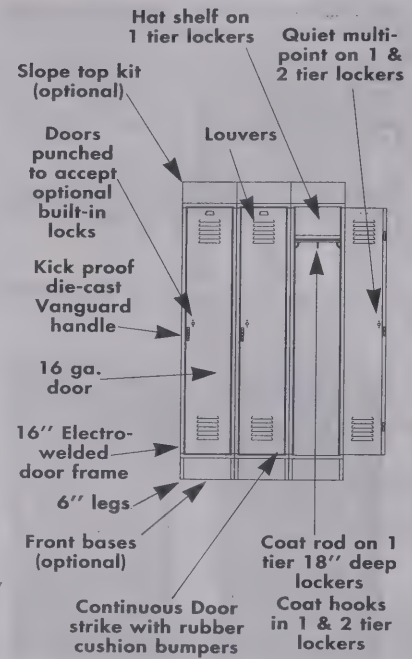
PENCO® Vanguard™

**Shipped Preassembled** – to save time

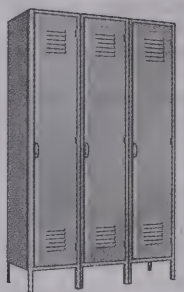
**Louvered Doors** – for ventilation with complete privacy

**Multi-point door latching on 1 & 2 Tier Doors** – Doors latch with lock in place

**Wide variety of styles & sizes** – for all types of applications



**Choice of 2 Colors** – Gray and Tawny Tan



1 Tier and 2 Tier lockers have the easy opening patented diecast pull-out Vanguard Handle with automatic latching. Coat hooks are also standard with 1 & 2 tier. 1 Tier 18" deep lockers also have a coat hanger bar. All 1 Tier lockers have a hat shelf 9" from the top. 5 & 6 Tier and 16 Person doors have friction catch door pulls. All Vanguard lockers accept padlocks and built-in locks. All lockers are raised above the floor with 6" legs. Slope Top Kits and Front Bases can be ordered as options. All lockers must be anchored to the floor and/or wall for safety.

See Freight Policy

**Quiet Construction** – Solid door; unique nylon glides silence the latch channel during closing.

**Flush Front Design** – Distinctive look; stainless steel recessed handles; no protrusions on front of locker.

**Automatic Door Latching** – Door will latch with lock in place.

**Available in 1 & 2 Tier; 1 Wide & 3 Wide** – 4 basic sizes to fit any room.

**Choice of 3 Colors** – Gray, Lake Blue & Hunter Green.

Guardian lockers feature quiet doors with durable Classic III stainless steel recessed pockets. Accepts padlocks or built-in locks (purchased separately). Lockers are constructed from 16 gauge doors and frames, and 24 gauge body parts. 6" legs and coat hooks are standard. 1 Tier has a hat shelf. All lockers must be anchored to the floor and/or wall for safety.

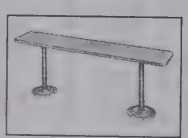
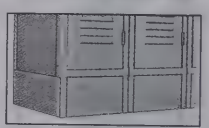
## PENCO LOCKER ACCESSORIES



**LOCKER ROOM BENCHES AND PEDESTALS**- A natural accessory for any locker area. Made from selected hardwood and finished with clear lacquer. Order pedestals separately.

Bench Pedestals are constructed from heavy duty steel tubing welded to the top and bottom flanges. Use two pedestals per bench. Hardware for fastening to the bench is included. Pedestal MUST be anchored to the floor (floor anchors not included).



**SLOPE TOP KITS**– Discourages use of top for storage. Available for preassembled and unassembled Vanguard lockers and Gray Guardian & Invincible II Lockers. Each kit accommodates a 3-wide group.

**FRONT BASES**– Fits between the 6" legs of preassembled and unassembled Vanguard lockers and Gray Guardian & Invincible II lockers. Presents a neater appearance and prevents debris under the lockers.

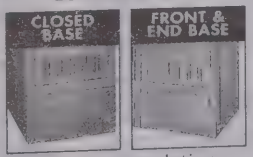
- **Solid steel construction for security and quiet operation**
- **Multi point automatic locking system for added security**
- **Flush mount doors and kick-proof handles prevent damage and unauthorized access**
- **Accommodates padlocks and combination locks(see page 2624)**
- **Choose from preassembled or unassembled lockers**

Tennsco lockers feature heavy-duty construction and vandal-resistant handles for secure storage of clothing and personal belongings. Rubber bumpers, cushioned locking channel and door stiffeners offer a smooth quiet operation while holding up to the toughest abuse.



Depending on the style, lockers are equipped with handy features like coat hooks or coat rods. All offer great features and good looks at an affordable price.

## SLOPING TOP

Prevents dust accumulation & use of top for storage.

## LOCKER BASES

Prevents accumulation of dust & protection from moisture.

** Raises locker 6" off Floor

- **Heavy 16-Gauge door provides durability**
- **Welded door frame construction forms a rigid, one piece "unibody" structure**
- **Steel recessed handles add safety with contemporary look**
- **3-point positive latching in enclosed channel provides security (single and double tier only)**
- **Vertical members are flanged, forming a continuous solid door strike**
- **Louvered door for improved ventilation**

### CITADEL, Edsal's Traditional Locker

- **Each part manufactured to exacting standards, assuring uniform fit and finish**
- **Lapped rear corners, formed front offset, large flanges on tops, bottoms, shelves, accurately punched holes for a strong, rigid locker unit**
- **Clean lines and an attractive finish help create the "right" environment**

**A & B Citadel Single Tier Lockers** offer maximum security, privacy and space for any personal storage need. Standard features include:

- **Ample height for hanging full length garments**
- **Conveniently located hat shelf.**
- **(3), single prong wall hooks and (1), double prong ceiling hook on 12" and 15" deep lockers**
- **Coat rod on 18" deep lockers**
- **Available in one or three wide configurations**

**C & D Citadel Double Tier Lockers** are the practical solution where space limitations do not allow for the use of a single tier locker system.

- **Extremely useful in warmer climates where short outer garments are worn and full length clothing is not required**
- **Double tier lockers have the same features, quality design and construction as our full size lockers with the exception of a hat shelf**
- **Available in one or three wide configurations**

**E & F Citadel Box Lockers** meet the storage needs of schools, industry, office and recreational facilities.

- **Available in 5 or 6 tier high configurations, one or three wide**
- **Individual compartment doors feature a strong steel hasp assembly**
- **To order number plates, built-in and combination locks, call 1-800-323-0620**

## ORDERING HAS NEVER BEEN EASIER!

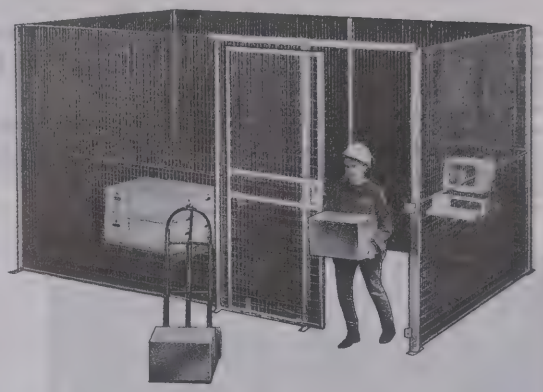
**Whether you phone, fax, write or stop by your local branch to place an order, Grainger can tailor sales terms to meet your needs. Ask about establishing an open line of credit or pay with your VISA, MasterCard, or American Express card.**

# WELDED WIRE PARTITIONS AND PREDESIGNED ROOM KITS

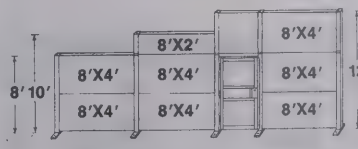
- More economical than woven wire
- Modular design enables fast installation and easy relocation
- Easily trimmed panels will not unravel when cut or damaged
- Galvanized finish is more durable than paint

**Welded wire partitions** provide security with an unobstructed view of operation and/or contents. Useful for quality control areas, shipping offices, tool and supply rooms.

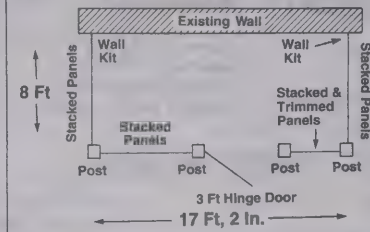
Modular panels stack together to form 8, 10, or 12 ft. high partitions. Panels are 8-gauge (0.162) galvanized wire welded into a 1½ x 3" grid. 1" bends on the top and bottom add rigidity and provide a mounting point to bolt horizontally stacked panels together (hardware included).



Heavy-duty 14-gauge 2 x 2" posts welded to 7 x 2 x 1/4" predrilled mounting plate. Posts are predrilled for panel attachment (hardware included). Hinged door is available with a 3 ft. clear width opening and a 94" clear height. Sliding doors are available with a 4, 6, or 8 ft. clear width opening and 96" clear height. Door track extends to prior panel post for increased strength. All doors include a cylinder lock with two keys for added security.



Qwik-Fence®



See Freight Policy

**Stack Panels as Shown to Form 8, 10, or 12 Ft. Partitions**

**8 Ft. Post** — **8 Ft. Post with 2 Ft. Post Extension** — **8 Ft. Post with 4 Ft. Post tension**

**Example of 17 Ft., 2 In. Wide x 8 Ft. Deep 3-Wall Room**

**PARTS LIST FOR EXAMPLE SHOWN**

| | | 1 | 7W343 | | |

**HOW TO ORDER:**

1. Make a rough sketch of proposed enclosure. Mark overall dimensions on drawing.
2. Determine location, size, and type of doors and indicate on drawing. To fill space above doors on 10 and 12 ft. high partitions, order a transom kit for the appropriate height for each door. Transom kit includes the appropriate height panel and mounting hardware. Panel needs to be cut to length.
3. Panels stack on top of each other to form 8, 10, and 12 ft. high partitions. Wall kit must be ordered for each connection point to existing walls.
4. Posts must be used between each panel, on both sides of door and at corners. Standard post is 8 ft. high. Order post extensions to make 10 and 12 ft. high posts.
5. For lengths less than 8 ft. wide, panels can be trimmed to size.

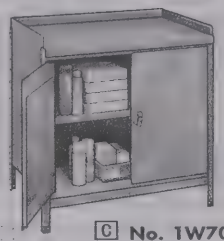
# ONE- AND TWO-DOOR WORK TABLE CABINETS

edsal



**No. 1W814 top can be mounted to form 2" deep tray shown here, or reversed to provide a smooth rimless work table**

A No. 1W814

B No. 1W909

C No. 1W703

**Work Table Cabinets**—provide safe, locked-in storage of valuable tools, merchandise, parts and serve as a work table with edge-stop on sides and back. Mount a drill press, grinder, or other bench tool or use as extra work space. Cylinder locks are built into the T-handle on the door for added security (keyed differently). All cabinets have gray powder coat finish and are shipped unassembled. Edsal brand.

A **No. 1W814** features a 2½ sq. ft. work surface which can be mounted to form a 2" deep tray or reversed to provide a smooth, rimless work table. Posts are 14-gauge steel, door 22-gauge, shelves 22-gauge, and panels 24-gauge. Three adjustable shelves inside 6.2 cu. ft. interior provide ample storage space.

B & C **Nos. 1W909, 1W703** feature 14-gauge steel cornerposts, 16-gauge steel top, 20-gauge doors. 19-gauge side and back panels provide 2" deep lip to prevent supplies from falling off top and can be inverted to obtain a flat surface. Double-door cabinet has 6 sq. ft. of work area and 18 cu. ft. of storage space. Single-door model has 4 sq. ft. work top and 12 cu. ft. of storage space. Full size center shelf adjustable on 1½" centers.

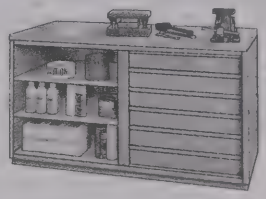
# CABINET BENCHES

edsal New



**Order as a basic bench and accessorize with locking sliding door set, 1 or 2 drawer sets (6 drawers each), or risers and back & end stops from page 2085**

Basic Bench

Bench with Sliding Door Set

Bench with 1 Drawer Set

**Cabinet Benches and Accessories** combine the benefits of versatile enclosed storage with a heavy duty working bench. Bench measures 60 or 72W x 30D x 34"H overall. Durable tan powder coat finish. Shipped unassembled.

**Choose from three different tops** for your specific application:

- **Butcher Block Maple Top**
- **Shop Top**
- **Plastic Laminate Top**

For more information regarding tops, see page 2086.

**Each basic bench cabinet** consists of a top, base, 2 end panels, a center panel, 2 shelves and a back.

**Shelves** measure 20"D x 29½ or 35½" wide and can be independently adjusted on 2⅜" centers.

**6 Drawer Inserts** add convenient, additional storage. Add to either (or both) sides of work bench cabinet. Drawers extend 75% for easy access; each drawer rated at 100 pound payload capacity.

**Sliding Door Kit** adds security and a neat, orderly appearance. Includes 2 doors and a lock; can be used with Drawer Inserts.

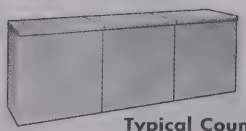
# SERVICE COUNTERS, TOOL/PARTS CABINET, AND WALL HUNG QUICK-VIEW CABINETS

## COMMERCIAL AND INDUSTRIAL SERVICE COUNTERS

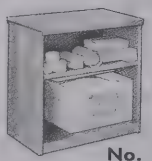


**Steel service counters** — offer convenient organization of service areas in offices, factories, and institutions, or as sales counters in hardware, supply houses and service stations. Counters stand 39" high. Gray powder coat finish. Shipped unassembled. Optional full closure door set with key lock available. Edsal brand.

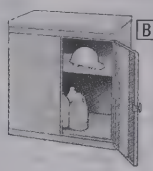
**Modular design** — permits easy installation of additional counter space if required, eliminating costly alteration charges.

**Easy-to-use shelf-clips** — allow readjustment without disturbing adjoining units. Counters feature two 24 x 36" 20-Gauge storage shelves – one lower (fixed) and one adjustable on 1" centers.

**24-Gauge embossed steel counter fronts and end panels** — provide a professional appearance and rigidity; resists kicking, scuffing, wear and tear.



**16-Gauge steel, box-formed top** provides maximum strength and load-carrying capacity.



edsal

Replacement Parts Available 1-800-323-0620

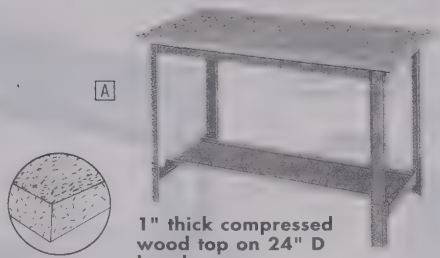
# ADJUSTABLE HEIGHT WORKBENCHES, BENCH DRAWER AND SHOP TABLES



## COMMERCIAL ADJUSTABLE HEIGHT WORKBENCHES

edsal

- 29 to 33" height adjustment in 1" increments
- 24 and 30" deep x 48, 60, and 72" wide

A

1" thick compressed wood top on 24" D benches

B

1 1/8" thick hardboard/ compressed wood top on 30" D benches

**Economical, sturdy workbenches** meet strength requirements for light manufacturing, assembly operations, maintenance service, shipping and receiving, stockroom, and similar type work. Also recommended for manufacturing plants, repair shops, school industrial classes and garages. Gray powder coat finish. Shipped unassembled. Edsal brand.

**Ergonomic, adjustable-height steel legs** are suggested for reducing the risk factors of Awkward Posture, Static Posture, and Repetition. See Index.

**Double electrical knockouts,** front and back, enable electrical service to be wired without having to cut holes in frame.

**Heavy-gauge welded steel frame** supports load capacities up to 200 lbs. per sq. ft., based on evenly distributed loads.

**12" deep steel lower shelf** is full width to add lateral support and allow storage of shipping and packing supplies, tools, parts.

### COMMERCIAL BENCH DRAWERS

**Commercial grade bench drawer** stores tools, spare parts, and other items for on-the-job convenience. Measures 12W x 18D x 4"H. Gray powder coat finish.

**Support panel** attaches easily to underside of all commercial and stock carts. Mounting hardware included.

Edsal brand.

**No. 1W682.** Commercial Grade Bench Drawer (WD1218).

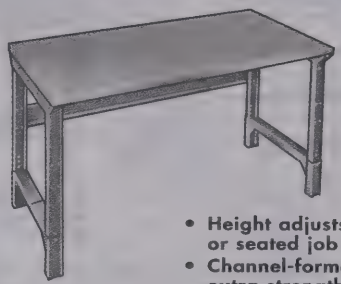
# INDUSTRIAL WORKBENCHES

## HEAVY-DUTY FLARED LEG INDUSTRIAL WORKBENCHES



edsal

New

- Flared leg design provides clearance for knees
- Channel-formed uprights add extra strength and rigidity

Industrial Workbenches for manufacturing, service shops, and maintenance operations. Legs have double electrical knockouts front and rear, adaptable to standard 1⅞" wide electrical box. Legs have punched holes for attaching stringer, lower shelf, and top. Feet can be bolted to the floor for added stability. Available 60 and 72"W, 30 and 36"D. Top, legs and stringer unassembled, shipped in separate cartons. Gray powder coat finish. Edsal brand.

## ADJUSTABLE HEIGHT STRAIGHT LEG INDUSTRIAL WORKBENCHES

- Height adjusts for standing or seated job requirements
- Channel-formed uprights add extra strength and rigidity

Heavy-Duty Flared Legs—Extra heavy-duty 32¼ " high welded bench legs constructed of 14-Gauge steel. 6,000 lbs. load rating per pair, based on evenly distributed loads.

Adjustable Straight Legs—Height adjusts from 29-33" in 1" increments. 16-Gauge ribbed steel uprights, 14-gauge top support, foot assembly, and lower cross members. 4,000 lbs. load rating per pair, based on evenly distributed loads.

# INDUSTRIAL WORKBENCH ACCESSORIES

Make your workbench more useful with the addition of these optional accessories. Accessories fit ALL Edsal bench styles, adjustable or flared leg, shown on pages 2083-2084. All components gray powder coat finish. Edsal Brand.

**A Electronic Workbench Riser**—Provide extra shelf space and convenient electrical outlets for use with power tools, test equipment, fans. Knockouts provided for four duplex receptacles and switch, order wiring kit separately. 19-gauge steel construction with 1½" high back stop.

**B Electronic Riser Wiring Kit**—Includes four duplex outlets, circuit breaker switch with pilot light, and 8 ft. grounded cord and plug; 15A 115 V service.

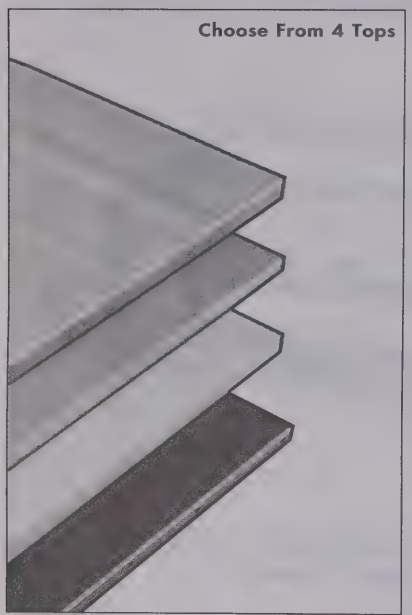
**C Standard Workbench Riser**—Increases usable work surface and storage capacity while keeping tools and parts close at hand but out of the way. Riser stands 12" high and is 10½" deep with 2" high back stop. Constructed of 16-gauge steel.

**D Back & End Stops**—Extend 3" above the workbench surface to keep parts and tools from rolling off sides and back. Bolts to Edsal workbench tops and can be used with other bench accessories. Corners of end stops are rounded for added safety. Kit includes two end stops, one back stop, and mounting hardware. 16-gauge steel construction.

**E Stackable Bench Drawer**—Provides convenient, secure storage for tools and other work materials. Attaches to underside of all Edsal bench tops; may be double stacked for additional storage. Can also be stacked on top of any flat work surface. Ball bearing rollers for smooth operation. Drawer is 17¼W x 20D x 6⅝"H. Has knock-out for cylinder key lock and padlock hasp. 18-22 gauge steel construction. Edsal brand (SD2014).

**Keylock is available separately.** Order Part #101-1824. Call 1-800-323-0620.

**F Lower Shelf**—Increases storage capacity of workbench. Keep tools, parts, and other shop items out of the way, but close at hand. 15" deep. 16-gauge steel construction.



**NOTE: Accessories fit ALL Edsal bench styles, adjustable or flared leg from 2084**

# WORK BENCH TOPS AND STEEL BENCH LEGS

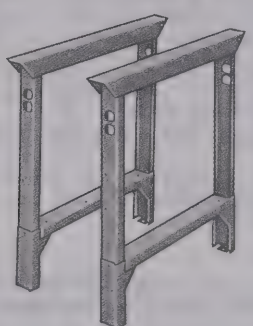
## WORK BENCH TOPS

**Butcher Block Maple** — resists damage by sharp tools and solid blows; provides maximum shock absorption for precision machined parts and dies. Ideal for tool and die work, electrical wiring, fabric cutting, industrial arts. Top quality, kiln-dried, hardwood maple strips laminated together. 1¾" thick. Oil rubbed natural finish.

**Shop Top** — resists oil and moisture. A versatile surface for almost any industrial application, especially where moisture is a problem such as hydraulics and pump repair. Top and bottom are 3/8" super hard, custom board sanded and sealed. Core is 45 pound density particleboard with edge bands made from clean lumber stock. 1½" thick.

**Plastic Laminate Top** — provides a nonconductive surface ideal for electronics assembly or repair and service of component parts. 1¾" thick. Melamine laminated, gray scrim satin finish.

**Steel Top** — will not absorb oil or crack. Smooth, gouge-resistant steel top is the number one choice for heavy duty use. 12-gauge steel surface reinforced with 14-gauge channels at each end. No sharp edges or corners. 1½" thick. Tough gray powder coat finish.



All tops ship complete with 60 or 72"W x 6"H steel stringer and fasteners.

# RETRO-FIT WORKBENCH COMPONENT KITS

Improve productivity by putting tools, parts and materials in easy reach. Work Wizard slotted upright tool supports can be retrofitted to any workbench except those with a steel top including many of the work benches found in this catalog.

### SLOTTED UPRIGHTS

Double-slotted easy to assemble steel uprights provide the framework for the Work Wizard workbench module retro-fit kits. Attach shelves, bins, overhead lighting, tool support and other add-on kits to the slotted uprights. (Not for use with steel top benches).

| Description | Dimensions (In.) Height | Width | Max. Load (Lbs.) | Mfr's. Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| Single Bay Upright | 53 | 30 | 400 | B102 | 4UR45 | $125.00 | $98.20 | 30.0 |
| Double-Bay Upright | 53 | 60 | 400 | B108 | 4UR46 | 160.00 | 146.40 | 35.0 |

### OVERHEAD TOOL SUPPORT

Increase productivity and protect tools by getting them off the work surface. Use overhead support to mount lighting or suspend a tool with an Aero-Motive balancer that can also be found on pages 3003 - 3003.

| Description | Width (In.) | Max. Load (Lbs.) | Mfr's. Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| Overhead Support w/Track | 60 | 50 | C101 | 4UR47 | $180.67 | $164.25 | 33.0 |

### SHELVING UNITS

Modular steel shelving attaches to any Work Wizard upright at any height. Small shelf mounts flat or with 15° tilt. Larger shelves tilt up to 20°.

| Description | Dimensions (In.) Depth | Width | Max. Load (Lbs.) | Mfr's. Model | Stock No. | List | Each | Shpg. Wt. |

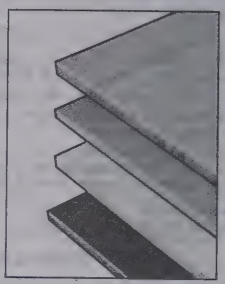
No. 7D094 Modular Bench with Four Drawers, One Door, and Shop Top

FREE DELIVERY on orders of $900 or more

See Freight Policy

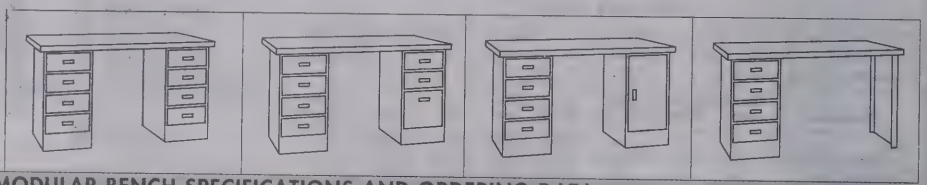
**Select the right combination of cabinet pedestals, panel legs and top designed to suit your specific task.**



Edsal's modular steel workbenches are designed to provide efficient use of available space and are constructed for years of tough, dependable service. Gray powder coat finish.

**Pre-configured modular benches can be mixed and matched or used free standing** — to form a 34"H workbench.

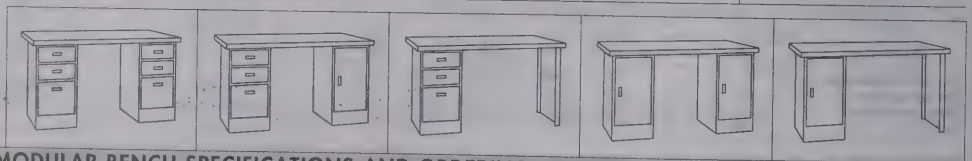
**Modern design and rugged construction** — make these benches an efficient, attractive work space for use in the front office or the warehouse.



**Box-formed Panel Legs** — provide maximum stability and an attractive furniture appearance.

**Drawer and Door pedestal's one piece, all-welded construction** — saves assembly time; sturdy, secure and built to last.

Choose from four available tops to create a Modular Bench to fit your specific needs: Butcher Block Maple, Shop Top, Plastic Laminate or Steel. For more information regarding tops, please see page 2090.



Customize your workbench with Edsal accessories shown on page 2085.

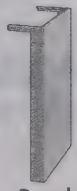
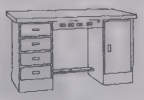
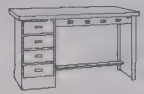
edsal New



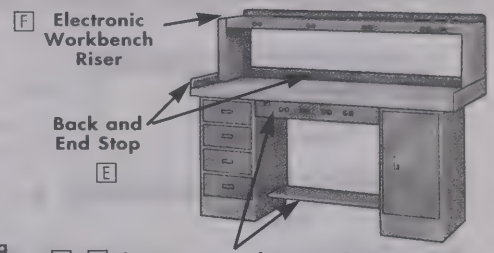
A 4-Drawer Cabinet Pedestal



B 3-Drawer Cabinet Pedestal



C One-Door Cabinet Pedestal



D Panel Leg

G Pedestal to Pedestal

H Pedestal to Panel Leg

G & H Electronic Panel & Foot Rest

**Wiring Kit No. 4TW73 Available. Please Order Seperately**

Make your modular bench from page 2088 into an Electronic Work Station with these optional accessories. All components gray powder coat finish. Edsal Brand.

## A B FOUR-DRAWER AND THREE-DRAWER CABINET PEDESTALS

Flush front, recessed handles and knock-outs for cylinder locks†. Drawers move smoothly and easily when fully loaded, 75 pound capacity. Box Drawers measure 13W x 23D x 5½"H inside clear. File Drawer is 11¾"H.

## C ONE-DOOR-CABINET PEDESTALS

May be used as a left or right swinging door. One adjustable shelf included.

## D PANEL LEG

Sturdy box-formed panel legs provide maximum stability and an attractive furniture appearance.

## E BACK AND END STOP

16-Gauge steel stop bolts to work bench top and extends 3" above workbench surface to keep parts and tools from rolling off sides and back. Corners of end stops are rounded for added safety. Kit includes two end stops, one back stop, and mounting hardware.

(†) Order optional Keyed Cylinder Lock #101-1824. Call 1-800-323-0620

## F ELECTRONIC RISER

Provide extra shelf space and convenient electrical outlets for use with power tools, test equipment, fans. Knockouts provided for four duplex receptacles and switch. 19-Gauge steel construction. Order Wiring Kit No. 4TW73 separately, below.

## G & H ELECTRONIC PANEL & FOOT REST

Easily convert a standard workbench to an electronic workstation by adding this convenient electronic panel and foot rest combination. Fits all available Edsal Modular Benches. Removable cover behind receptacle panels makes wiring quick and easy. Handy 9¼"D lower shelf/footrest adds support. Independent framework with provisions to accommodate 4 duplex receptacles. Order Wiring Kit No. 4TW73 separately, below.

Double Pedestal Workbench with Powered Riser

Plastic Laminate Bench Top Surface

Lista Technical Workbenches provide durable, well-designed workstations for electronic testing and repair, assembly, research and development, engineering, and other technical applications. Available with or without powered riser shelves.

**Modular cabinet pedestals**—With overall dimensions of 16⅞W x 28½D x 33½"H these drawers provide organized storage for parts or tools. File cabinet accepts letter-sized hanging folders. Drawers have 95% extension, 150 lb. capacity with a lock and two keys. Bright blue color.

**Aesthetically pleasing leg design**—Clean, attractive look for office, laboratory, or other technical areas.

**Plastic laminate bench tops**—Ergonomic radius/bullnose front edge provides large, clean work area. Light gray color.

**Powered riser shelves**—Provide six outlets for electronic equipment or lighting. Power strip is rated for 15 amps, 110V, 60 Hz. UL Listed. CSA Approved.

**Single pedestal technical workbench**—Includes a modular cabinet pedestal with two dividable drawers, one file drawer, and a footrest.

**Double pedestal technical workbench**—Features a three-drawer pedestal and a four-drawer cabinet pedestal with footrest. Cabinets are keyed alike.

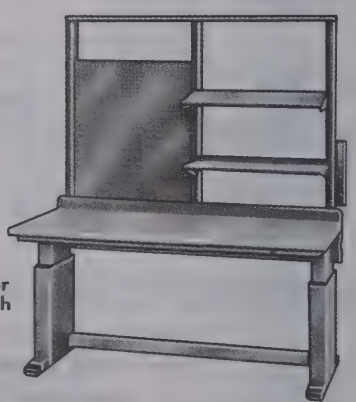
## OPERATOR ADJUSTABLE WORKBENCHES WITH ACCESSORY SYSTEMS

The Height-Right™ operator height adjustable workbench with FlexWorks® accessory system is an extremely flexible and ergonomic workstation. The Height-Right base is powered by an electric drive system. Speed of adjustment is one foot per minute. Painted bright blue. Includes plastic radius/bullnose bench top in light gray color.

FlexWorks Accessory System is included with each Height-Right workbench. This system includes two 48" high frame sections with slotted posts for adjustable shelves, a pegboard panel, a louvered panel (for storage bins), two 12" deep adjustable shelves, a 3" backstop, and a vertical five outlet power strip. Power strip is rated for 15 amps, 110V, 60 Hz, UL Listed. Bright blue color.

**Improved productivity** — Adjustment and flexibility of workbench and accessory system provides a wide range of options designed to meet workers needs.

**Enhanced aesthetics** — Attractive design and look for technical, assembly, and laboratory environments.



**15" adjustment range from 28 to 43"** — Unsurpassed flexibility and ergonomics to meet the need of any worker.

**Reliable operations** — Precision drive system has been tested for use under industrial conditions.

**Dynamic (moving) capacity of 600 lbs.** — Can support all products, tools, and equipment for most industrial tasks.

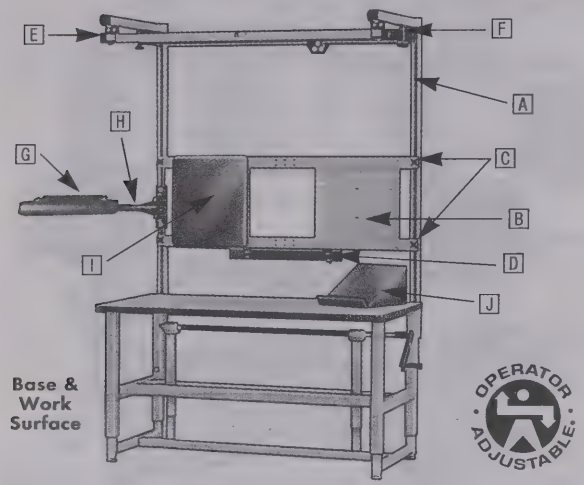
## OPTIONAL MODULAR ACCESSORIES



Modular accessories move vertically with adjusting work surface, making the Ergo-line a true ergonomic work station. Accessory uprights feature infinite adjustability. Air quick disconnect places shop air at surface. Modular drawers feature smooth rounded corners. ESD ground kit and wrist strap protects ESD sensitive components in a range of $10^6$ to $10^9$. Articulating bin extends up to 23½ from upright. Articulating monitor arm extends up to 27.5" from upright. Tool Balancer and trolley reduce fatigue and work surface clutter. Overhead lighting reduces eye strain.

# HEAVY-DUTY ADJUSTABLE HEIGHT WORKSTATIONS AND ACCESSORIES

New

AMD
ALL METAL DESIGNS, INC.

- **Modular Design—Complete or customize workstations as requirements change; just add uprights or other accessories (sold below) to the base and top**
- **Operator Adjustable™—Designed for multi-person use, workstations adjust to the comfort of each employee thanks to an easy-to-use mechanical lift**
- **Heavy-Duty Capacity—All steel, fully welded construction is virtually maintenance free; powder-coat finish resists scratches and flaking; 11-gauge steel frame handles a dynamic lift of 600 lbs. and static weights to 2,000 lbs.**
- **Bench is shipped fully assembled**

FREE DELIVERY on orders of $900 or more
See Freight Policy

## WORKSTATION BASES

All steel, fully welded 11-gauge base. 600 lb. lift capacity. 12" height adjustability with side-crank handle allows quick and easy adjustment by a single operator for proper positioning when standing or sitting. Beige, scratch-resistant powder coat finish. No assembly required.

## LAMINATE WORKSURFACES

High-pressure plastic laminate with particleboard core, 1¼" thick overall. Excellent general purpose surface. T-molding provides a smooth, durable edge. Beige laminate with black T-molding. Load Rating: 150 lbs. per sq. ft.*

## OPTIONAL ACCESSORIES†

Convert a basic AMD bench into a multifunctional workstation that improves workers' efficiency. Most accessories are factory installed to the Overhead Frame (except the Tote Holder). Tack board, Electric Bar, and Parts Bin Bar require Cross Bars. The length of cross bar, tool rail and light corresponds to the width of bench you choose. AMD workstation accessories can be added at any time.

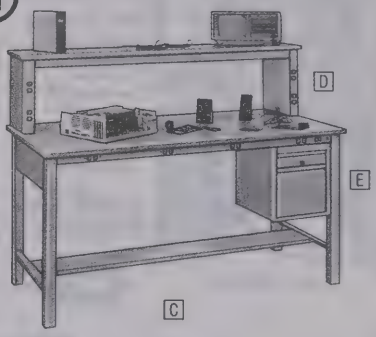
# ELECTRONIC WORKSTATIONS, WORKCENTERS AND TECH BENCHES



## PREMIER ELECTRONIC WORKSTATIONS

## ELECTRONIC WORKCENTERS

## ELECTRONIC TECH BENCHES

**Electronic workstations, workcenters, and Tech Benches** are available with your choice of Nonconductive plastic laminate or ESD Golden Oak Laminate Tops. Use plastic laminate tops in higher voltage applications where static electricity is not a problem. Nonconductive laminate surface prevents accidental grounding of electrified components for a safer work environment. Use ESD tops for sensitive, low voltage electronic work. ESD tops are designed to dissipate static electricity build-up to ground at a controlled rate of $10^5$-$10^9$ Ohms/square, reducing component failure. Modern design and heavy-duty steel construction provide long-lasting service and an attractive furniture appearance. Tough putty powder coat finish. Shipped unassembled. Plastic bins, wire reels, and tools not included.

A Combination Electronic Workstation has plenty of secure storage space with a built-in locking overhead cabinet, lower shelf and locking 2 Drawer Pedestal. Bin Rail, Wire Reel Holder, Under Bench Electrical Panel and Modesty Panel included. Complete with 7 duplex outlets, wiring, circuit breaker switches and pilot light.

B Electronic Workcenters are ergonomically designed to increase productivity. Adjustable work surface height from 26" to 34" in 1" increments. Complete with 18"H Electronic Riser, Bin Rail, Wire Reel Holder, locking 2 Drawer Pedestal and Under Bench Electrical Panel. Comes complete with 7 duplex outlets, wiring, circuit breaker switches and pilot light.

C The Standard Electronic Tech Bench is an economical answer to your assembly and repair needs. 60 or 72"W with lower shelf/footrest. Accessorize your bench to your specifications with a matching Tech Bench Riser, locking 2 Drawer Pedestal or Wiring Kit, (2 required; 1 for bench, 1 for riser.)

# INDUSTRIAL COMPUTER CABINETS

No. 4VM38

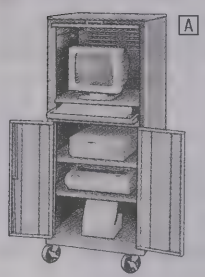
New

Lista's Computer Cabinet is an all-steel welded cabinet designed to protect personal computer equipment from debris and metal shards. Perfect for the machine shop, manufacturing area, automotive service area, or aircraft repair facilities. Bottom section features roll-out printer tray and bottom CPU shelf. Gray color.

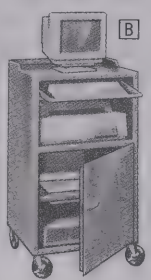
**Large monitor door with plexiglass window** allows users to view screen while protecting monitor from damage. Fits most monitors up to 20" in size.

**Air intake fan with filter** creates positive airflow within cabinet, protecting equipment while reducing dust and contaminants. Replaceable filter can be changed from outside of cabinet.

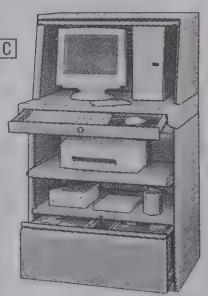
**Pull-out tray** locks out when in use. WIll accept standard and ergonomic keyboards and mouse (free mouse pad included).



**Roll-out printer tray** improves ergonomics by allowing user to access printer without reaching into cabinet.



**Rear access panel** allows access to back of equipment and cabling, yet too small to remove any components.



**Surge suppressor included.** Protects electronics from power surges and spikes. Six outlet power strip with 6 ft. cord.

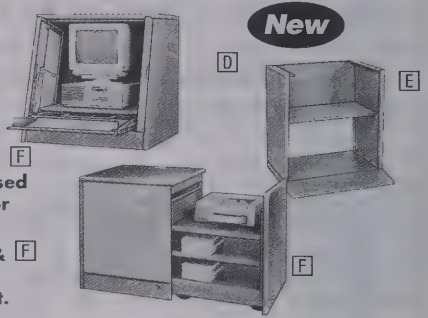
# COMPUTER SECURITY CABINETS



edsal

**Items D, E & F can be purchased separately, or combine D & E or D & F to form a complete unit.**

## PRODUCT FEATURES:

**Lockable steel cabinets** provide secure storage for your computer, paper and supplies. Separate locking upper and lower compartments. Accomodates desk top or tower style CPUs. Tough powder coat finish. Edsal Brand.

**Vented back** for air circulation, keeps equipment cool for longer life.

**Slide-out keyboard tray** with ergonomic wrist rest reduces fatigue; convenient storage area for office supplies.

**Mobile Units have 5" polyolefin casters** with 2 rigid, 2 swivel with brake; permits easy transport directly to your worksite.

### A MOBILE CABINET

**Lower compartment:** 22½W x 23D x 30"H with two adjustable shelves accomodates a wide range of CPU and printer sizes.

**Six-outlet power strip** with built-in surge protection for added security.

### B MOBILE STAND

**Top surface for monitor** – 47¾"H for easy viewing with 1½"H back & end stops.

**Lower cabinet with two-position shelf:** 24⅝W x 22⅞D x 22⅝"H accomodates a wide range of computer accessories and supplies.

**Fixed shelf** for sheet fed or continuous form printer. Plastic wire ties provided for cable management.

Convenient rear access holes for paper feed, cables and ventilation fan (not included).

### C PREMIER COMPUTER ENCLOSURE

**Expansive level desk top:** 35W x 8D x 41"H, area provides ample room for work in progress.

**Four postion roll-out printer shelf** is adjustable for any style or size equipment.

**Lateral file drawer** provides vast paper storage space for hanging files.

### D DESK TOP STATION

**Slide-in pocket doors** with inner compartments for storage of files or manuals.

### E OPEN PEDESTAL BASE

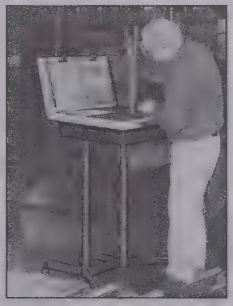
## QUALTECH WORKSTANDS



New

Optional Binder Holder atatches to No. 4TR98 to hold (3) 2½" binders

### DOCUMENT CENTER

- **Flexible 18" shaft with rugged six-way clamp mount for ideal positioning of information on machines, benches, desks, or walls**
- **Ten durable vinyl page protectors, supported by yellow wire frames, hold twenty 8½" x 11" pages flat**

Save production space and prevent clutter. Ideal for process information, quality control specifications, or set-up instructions.

### DOCUMENT STAND

- **Two 13" x 26" panels accommodate four 8½ x 11" documents which can be secured with four clips (included)**
- **Inclined writing panel discourages accumulation of debris**
- **High impact polystyrene panels and steel strand offers durability in harsh environments**
- **Clear, hinged cover on writing surface protects important paperwork**

Organize, display and protect inspection and procedure documents right where the work is happening. Protect valuable information on the production floor or the warehouse with a surface-mount document center.

### INSPECTION STAND

- **Flat, Cushioned Work Surface for easy inspection and parts protection**
- **Inclined Back Panel with clear hinged cover and security clips for display of specifications and procedures**
- **Locking Utility Drawer (20.5W x 19.5D x 3.25"H) secures tools and gauges**
- **Telescoping columns adjust 18" to provide an ideal personal work height**
- **Reading Light clearly illuminates parts and procedures**

Inspect parts, protect documents, secure tools and gauges in the shop or lab.

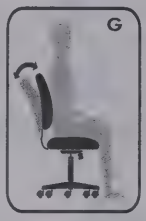
# OFFICE SEATING GUIDE, TERMINOLOGY, AND FEATURE COMPARISON CHART

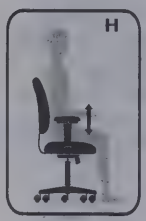
## OFFICE SEATING GUIDE

**A. Tilt Tension-** Increase or decrease the resistance of chair tilt.
**B. Infinite Tilt Lock-** Lock chair in any tilt position for greatest comfort.

**C. Pneumatic Seat Height-** Adjust until thighs and lower legs form a 90° angle.



**D. Back Height-** Set the lumbar support to the most comfortable lower back support position.



**E. Seat Back Depth -** For maximum comfort and support adjust so that front of seat is just behind the calf.

**F. Seat Angle -** Forward tilt to allow proper blood flow to lower body during intensive forward oriented tasks.

**G. Back Angle -** Adjust for optimum support, so lumbar cushion rests comfortably against lower back.

**H. Arm Height -** Adjust to maintain a proper 90° supported elbow angle.

## OFFICE SEATING TERMINOLOGY

### BASES

**Five-legged:** Pedestal base with five legs and support column rising from the center. More stable than four-legged bases of older chair designs.

**Sled:** Non-rolling chair with support members lying parallel to the floor, typically cantilevered.

### FOAM

**Fabricated:** Cut from a common blank mold, typically with square corners and simple contours. Typically less expensive than molded foam.

### ERGONOMIC DESIGN FEATURES

**Lumbar support:** Structural design of chair back provides additional support to the lumbar region of the occupant's back. Well-designed lumbar support will accommodate 95% of user population without requiring a back height adjustment.

**Waterfall seat front:** Rounded lip that relieves pressure underneath thighs.

### TEST STANDARDS

**BIFMA X5.1 (1985):** Durability, strength and stability standard for virtually all categories of office seating.

### MISCELLANEOUS

**Casters:** Wheels designed to give chair mobility. Made of a number of substances, including plastic, chrome, or steel. Casters typically have a plastic or rubber wheel. Can be covered by a full or partial hood and can have "fairing" to provide smooth edge transition with chair base.

**Glides:** For chairs intended for stationary use, available in different heights and shapes, including flat metal and plastic "bell" shaped.

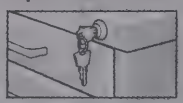
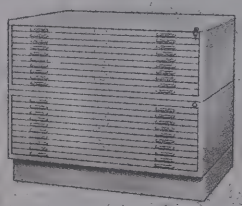
Standard sized shelving wastes a lot of space when it comes to storing record archive boxes. Not so with Tennsco Record Storage Shelving. This shelving's width and depth are designed to standard archive box dimensions. This maximizes every inch of floor space, giving you more storage in less space.

STORAGE BOXES AVAILABLE. SEE PAGE 2105

# FLAT AND VERTICAL FILING SYSTEMS



SAFCO®



Replacement Parts Available
1-800-323-0620

No. 5W264 shown with optional high base

Optional lock kit

Two No. 4KH59 shown with optional closed base

## FLAT FILING CABINETS

**5-Drawer flat files.** Versatile unit provides a working organization of papers. Optional bases available in two styles. All models have five drawers each 2⅛" high for storage of prints, artwork, keylines, and other large paperwork.

**10-Drawer flat files.** Ideal for high traffic project storage areas. Optional bases available. Model has ten drawers each 1" high for easy retrieval of materials and to minimize material damage.

**Stack these modular files up to five high on closed base or use individually** without any additional hardware. An integrated cap makes each file completely self contained. Heavy-gauge steel frame and front supports. Case-hardened ball bearing rollers for smooth, quiet drawer operation. Sturdy drawer rails ensure no-jam drawer alignment. Safety stops prevent drawers from being accidentally pulled out. Courtesy stops keep drawers from rolling while in open position. Hinged front depressor and rear hood protect sheets and keeps papers from curling. Antislip pads allow units to stack securely without bolting. 2W x 2"H chrome label holders and drawer handles included. Baked enamel finish. Tropic sand, black & gray color.

**Closed Base.** Raises files 6" off the floor. Front is recessed 2¾" from file for toe space. Shipped unassembled.

# PRINT & HAND-HELD CALCULATORS

**Casio offers a wide variety of calculators for office, business, home, and personal use. The following glossary will help you decide which is the best calculator for your needs.**

**SOLAR PLUS**—Calculations plus full memory protection no matter what the light conditions.

**SUPER SOLAR**—No battery needed—works even in candlelight

**DATA BANK**—Can hold private memoranda such as names, telephone numbers, addresses, dates, etc.

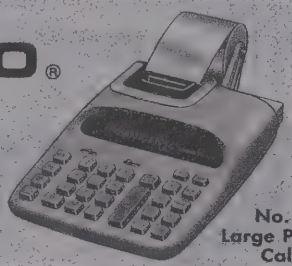
**CALENDAR**—A collection of calendars up to the year 2099. A set of symbols lets you know at a glance when specific days have scheduled events.

**SCHEDULE**—A complete schedule can be entered for both work and leisure by specifying the date, month, and year.

**BUSINESS CARD**—Each file programmable with company name, personal name, phone number, position, address, and department.

**WORLD TIME**—World time shows what time it is at virtually any point on the globe, including daylight savings time.

**SCHEDULED ALARM**—An alarm lets you know a scheduled time has been reached.



**TURBO SCIENTIFIC**—Calculates equations approximately 2½ times faster than traditional scientific calculators.

**TIME CALCULATIONS**—Eases troublesome calculations by converting hours and minutes.

# COMMERCIAL MICROWAVE OVENS

No. 6T392 No. 6T038

UL E4459 NSF

### DIAL TIMER, METALLIC CABINET No. 6T392

**1000 watts** output power.
**Stainless steel cavity** provides durability and ease of cleaning.
**6 minute lighted dial timer** is easy to set and read, clearly marked in 10 to 15 second increments.
**Sturdy door handle** for convenient access to oven interior.
**Heating time guide and instructions** located on control panel. Heating time guide charts the proper times needed to heat a variety of popular foods.
**Signal bell** for end of heating cycle.
**Rubber-sealed ceramic shelf** for ease of cleaning.
**See-through oven door** with interior light for maximum visibility inside oven cavity.
**Safety Approvals**—Commercial UL Listed (E44459), FCC, DHHS, and NSF.

### DIGITAL DISPLAY, STAINLESS STEEL CABINET No. 6T038

**1000 watts** output power.
**Stainless steel cavity and cabinet** is durable and easy to clean. Cavity has ceramic bottom shelf.
**Selectapower™** pulses microwave power to allow selection of heating speed and power level from 0 to 100 percent power. Eliminates overheating and crusting of edges.
**Digital display** shows programmed and elapsed heating times and percentage of microwave power.
**Two-way programming.** Use memory pads to lock in 10 different heating times and Selectapower™ setting—or program oven manually for up to 30 minutes.
**Express Defrost™** makes thawing frozen meats or poultry fast and easy. Automatically divides total defrost time into 3 stages using 3 power levels.
**Double Quantity Key** automatically provides best heating times for double servings with any of the memory pads.
**10 additional memory pad options.**
Memory lock prevents stored information from being erased during power interruptions or off times. No batteries required.
**Adjustable volume control** sets sound level for end of heating cycle.
**Safety Approvals**—Commercial UL Listed (E44459), FCC, DHHS, and NSF.

### SHARP LIMITED WARRANTY

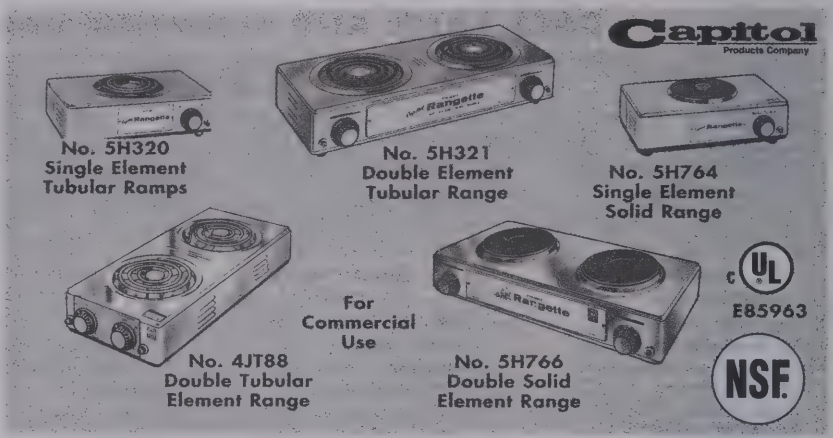
# TABLE RANGES AND COFFEE BREWERS

## TABLE RANGES

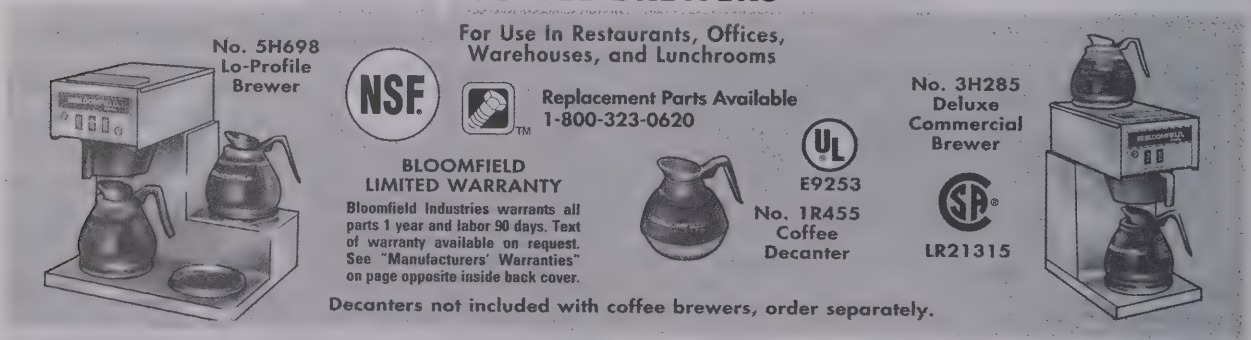


**Solid or Tubular Lift-Up Elements.** Single or double element models. Table ranges have fully chromed seamless/rivetless exteriors. Three-prong grounded plug, 120VAC. Commercial UL Listed (E85963); NSF approved. All units have safety signal lights that indicate when burner is On.

**Solid Elements features include:**

- **"Pot-Sensor" with double circuit thermostat control turns the power off automatically and maintains the precise desired temperature within 5°F**
- **Temperature range from very low "waterless cooking," melt or warm, to controlled boil and grill**
- **Tight fitting burner allows no spillage into mechanism**
- **Perfect total pan-to-element contact**
- **Infinite burners with Robertshaw controls**
- **Nos 4JT85 and 4JT86 have oversized burners**
- **20-year life solid elements**

**Tubular Elements features include:**



- **Robertshaw infinite controls**
- **Signal light**
- **3-ring, lift-up tubular elements**
- **Removable wells**

(*) One element has sensor. (†) Sensor element wattage. (‡) UL Listed for Canada (E85963).
The use of electric hot plates for HI-TEMP heat treating of metals and solids is NOT RECOMMENDED.

## COFFEE BREWERS

### KOFFEE-KING BREWERS

**Stainless steel Pour-over coffee brewers.** No plumbing required. Uses patented water delivery system for optimal coffee flavor. Makes 12 cups in minutes, up to 15 decanters per hour. One-piece drawn vertical stainless steel water tank. Porcelainized steel warming plates spin off for easy cleaning and have separate on/off switches to maintain proper serving temperature. Ready-to-brew light indicates proper water temperature to assure optimum coffee flavor. Order filter and decanters listed at right. Uses 15A @ 115VAC. UL Listed, NSF approved.

### LO-PROFILE BREWER

**Features three warming stations.** Robertshaw thermostat is preset at factory. Low watt density heating element. Heavy-duty 16 amp lighted warmer switches indicate whether warmer is On or Off. Dimensions: 16⅞H x 16¼W x 14"D. Bloomfield (8571).

**No. 5H698.** Shpg. wt. 27.0 lbs. List $416.00. Each.....**$386.00**

### DELUXE COMMERCIAL BREWER

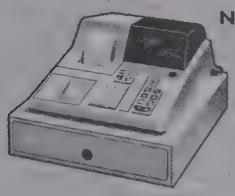
Two warming stations, one located on top of the brewer. Controls and heater are the same as in Lo-Profile Brewer. Dimensions: 16⅞H x 8¾W x 14"D. Bloomfield brand (8543).

**No. 3H285.** Shpg. wt. 25.0 lbs. List $385.00. Each.....**$343.50**

### COFFEE DECANTERS

10-12 cup capacity. Unbreakable polysulfon top with stainless steel bottom. Regular has black handle and spout. Decaf has orange handle and spout. Bloomfield brand (8895) & (8885).

**No. 1R455.** Regular. Shpg. wt. 1.3 lbs. List $23.00. Each.....**$18.40**



**No. 1R456.** Decaf. Shpg. wt. 1.3 lbs. List $23.00. Each.....**$18.40**

### FILTER PAPERS

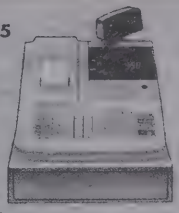
Carton of 1000 filter papers, Bloomfield brand (POF-1000).

**No. 5H418.** Shpg. wt. 4.6 lbs. List.....$15.00.
Each.....**$14.93**

# ELECTRONIC CASH REGISTERS AND BULLETIN BOARDS

No. 2W416

CASIO®



- Automatic confirmation of keyed entry reduces chance of mis-hit keys
- Buffer memory allows fast totalizing with no overlap
- Locking cash drawer for added security
- Modern, efficient operation with automatic ejection of 2½" wide paper receipts

- 10 departments
- 8 clerks
- 100 price look-ups

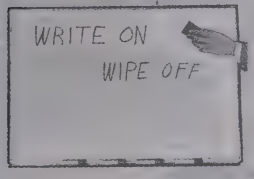
**CASIO LIMITED WARRANTY**

Casio warrants parts and labor 90 days, parts only 1 year. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

No. 5W235

- 40 departments
- 15 clerks
- 600 price look-ups

**Casio electronic cash registers** feature an easy-to-operate keyboard that confirms each entry. Buffer memory key entry so fast sales entries are possible with no chance of overlap. Register locks immediately and sounds an alarm whenever there is an error in key operation. Locking cash drawer with currency and coin compartments. Master and cash drawer keys are provided. Price look-up function memorizes prices allowing for quicker entry and will totalize by item on PLU report. Comprehensive management reports provide general control report and financial report, with versatile transaction totals and counters. Three payment media: cash, charge, and check. Two tax tables with tax status shift keys. Time and date stamp on receipt, with automatic advance. Received on account and paid out keys. Heavy-duty metal cash box. Removable cash drawer has four cash and five coin compartments.



**No. 2W416 features 10 departments** that record sales in 10 product categories and totalize by category. 100 price look-up feature memorizes prices for 100 items allowing quicker entry, and will totalize by item on PLU report. Eight clerk totalizers allow tracking of sales of eight clerks using clerk number system. Rear customer display and removable coin tray. Quiet high speed printer prints 2.4 lines per second on standard 2¼" (58mm) paper.

**No. 5W235 features 40 departments** that record sales in 40 product categories and totalize by category. 600 price look-up feature memorizes prices for 600 items allowing quicker entry and will totalize by item on PLU report. 15 clerk totalizers allow tracking of sales of 15 clerks using clerk number system. Pop-up rotary customer display. Quiet high speed printer prints 3.0 lines per second on standard 2¼" (58mm) paper. 2-ply paper capability.

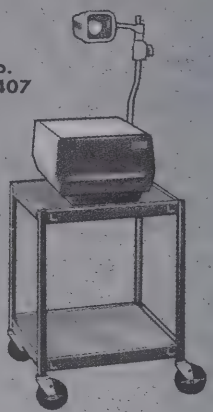
Computer Center



Paper catch basket not included

- Functional stands and cabinets hold necessary equipment used in offices
- Casters provide portability for easy moving to various locations
- Equipment shown on stands and cabinets not included

BRETFORD

No. 5W606
Cabinet Stand

No. 3W407

## COMPUTER CENTER

Adjustable sliding keyboard shelf may be arranged at perfect sit-down height. Three typing heights (25", 27", 29") give legs proper clearance and allow easy access to keyboard. Keyboard stays tucked away and protected while not in use or during transport. Printer shelf is adjustable from 14", 16", and 18" and has slot for bottom-feed printers. Locking knobs on both sliding shelves keep them in position. Shelves slide easily on adjustable chrome-plated steel rods. Top shelf: 33" high. Bottom shelf to floor: 6". Overall size: 24W x 33H x 18"D. Shipped unassembled. Putty finish. Bretford brand (EC4).

**No. 5W604†.** Computer Center. Shpg. wt. 48.0 lbs. List $310.00. Each ..... **$188.25**

## TV AND VCR CABINET STAND

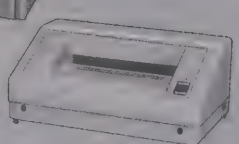
**Rugged mobile stand holds 20" TV's, VCR's, complete video systems, and other equipment.** Easily moves between offices or training rooms on 2" swivel ball casters. Steel construction, with hinges on cabinet doors for easy access. Storage cabinet has movable shelf and locking doors with two sets of keys. 15" clearance between top and middle shelf. Top shelf: 30 wide x 16" deep. Cabinet interior: 28W x 17H x 18"D. Overall size: 30W x 40H x 20"D. Stand includes UL Listed electrical assembly with 2 grounded outlets, 20 ft. grounded extension cord with built-in winder. Black powder paint finish. Shipped disassembled. Bretford brand (MPVC40E2).

**No. 5W606.** Cabinet Stand. Shpg. wt. 85.0 lbs. List $571.00 Each ..... **$347.25**

## MOBILE EQUIPMENT CART

- **110V, UL Listed electrical unit**
- **20 ft. grounded extension cord**
- **Welded steel construction**
- **4" quiet glide casters**
- **2 locking casters**
- **Black powder paint finish**

For audio visual presentations or equipment storage. Suitable for other uses in the office, school, or laboratory. Two steel shelves, 20W x 18"D, have smooth rounded edges. Table stands 26" high. Space between bottom and top shelves is 17". UL Listed electrical outlet panel. Bretford brand (MP26-E4).



**No. 3W407.** Equipment Cart. Shpg. wt. 30.0 lbs. List $213.00. Each ..... **$127.15**

(†) Equipment used for application purposes only. Office machinery not included.

No. 2W587

Prevent leakage of confidential data by reducing documents to illegible shreds.

No. 2W588

## PAPER SHREDDERS

- **No. 2W587 simultaneously shreds 12 sheets of paper; handles sheets up to 8½" wide**
- **No. 2W588 simultaneously shreds 16 sheets of paper; handles sheets up to 10" wide**
- **Cutting mechanism never needs oiling or sharpening**
- **Both units powered by 115V, 60 Hz thermal overload protected motor**

### POWERSHRED LIMITED WARRANTY

**Fellowes Manufacturing Co. warrants Powershred units 1 year; cutting cylinders are warranted for 5 years against mfg. defects. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

Designed for deskside, department, and office applications. Throat openings prevent operator from accidentally inserting fingers into cutting mechanism.

**No. 2W587 POWERSHRED 220.** Features automatic start/stop for simple one-handed operation. Console design with separate container for easy emptying.

**No. 2W588 POWERSHRED 300.** Medium duty shredder for use on a separate stand or table (not included). Handles 15" computer form without any additional attachments. Cuts through forgotten staples and paper clips. Continuous duty motor.

E.R. Wagner Manufacturing Co. CASTERS & WHEELS

Some considerations involved in the selection of the proper casters are:

- How much weight will each caster carry?
- What type of floor will the castered equipment be used on?
- Is overall height a consideration?
- Are there special attachment requirements, e.g. a threaded stem?

Using the table below, locate the caster application which most closely matches your needs. Then, refer to the caster section code indicated to locate the suggested casters for that application. See code explanation below.

Casters are arranged by capacity; the Section Code appears on each catalog page.

| Section Code A | Section Code B | Section Code C | Section Code D | Section Code E | Section Code F | Section Code G | Section Code H | Section Code I |
|---|---|---|---|---|---|---|---|---|
| Capacity Range 40-125 lbs. Furniture to Light Duty | Capacity Range 75-145 lbs. Light Duty | Capacity Range 75-450 lbs. Light to Medium Duty | Capacity Range 95-1200 lbs. NSF Certified | Capacity Range 220-1350 lbs. Medium and Heavy Duty | Capacity Range 200-8350 lbs. Heavy Duty | Capacity Range 330-22,000 lbs. Ultra Heavy Duty | Capacity Range Varied Specialty Casters | Wheels |

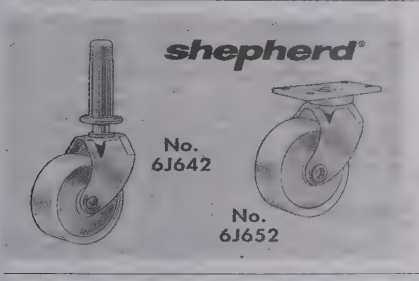
|---|---|---|---|

## CART CASTERS

- For lightweight serving carts, tea wagons, small TV stands
- Roll on carpeted or hard floors
- 2" Diameter clear plastic wheel with brass color finish horn
- Stem mount: 1½" long with 3/8" diameter plastic socket. Mounting height about 3"
- Load rating: 40 lbs. per caster
- 6 Casters per package



**No. 6J643.** Shpg. wt. 0.8 lbs. List $6.80. Each Pkg. ..... $5.52

## LIGHT-DUTY SWIVEL WHEEL CASTERS

- Economical plate or stem mount swivel casters for use on lightweight furniture such as small tables, cribs, playpens, and other juvenile furniture
- Roll on carpeted and hard floors
- Swivel on acetal resin bearings
- Rectangular plate mounting: 1¾ x 1¼" with four holes for wood screws
- Stem mounting: 1½" long with 3/8" diameter metal socket
- 6 Casters per package

## METAL BALL REPLACEMENT CASTERS

- Bright chrome finished ball casters offer outstanding mobility
- Tough, long lasting die-cast metal alloy stands up to hard use
- Self-lubricating; never need oiling
- All moving parts are enclosed to keep out lint, dust and foreign matter
- For use on office and heavyweight furniture and equipment; computer work centers, upholstered chairs, large cabinets and work tables, sofas, consoles and dressers
- Casters exceed performance standards of Business and Institutional Furniture Manufacturers' Association (BIFMA)

## TWINSTAR CASTERS

- For office chairs, furniture and equipment in both office and home
- 60mm diameter dual wheels rotate independently to provide excellent stability, traction, and reduce carpet fiber wear
- Body made of die-cast metal alloy for strength and long life
- Bright chrome plated hood
- No. 4JG37 has a hard (nylon) wheel tread for use on carpeting
- No. 4JG38 has a soft nylon wheel tread bonded with urethane for use on hard floors and chairmats
- Mount attachments for casters (Nos. 4JG39 - 4JG42) come in packages of 5
- Casters exceed performance standards of Business and Institutional Furniture Manufacturer's Association (BIFMA)
- Special Delrin self-lubricating bearings for quiet, effortless, and trouble-free swiveling

## LIGHT–MEDIUM DUTY NSF CERTIFIED WITH SWIVEL AND RIGID PLATE CASTERS

NSF

- NSF (National Sanitation Foundation) Certified
- Optional over-the-wheel positive lock wheel brake available for all swivel plate casters
- Dust cover standard on all swivel plate casters
- Bright zinc plate finish
- Swivel casters have large diameter double ball bearing heat-treated, hardened raceways for extra strength
- Heavy-duty rigid fork
- Wheels are made of soft natural rubber or Poly II materials
- 3/8" Bolt and locknut wheel axle
- Casters with Delrin® bearings are self-lubricating

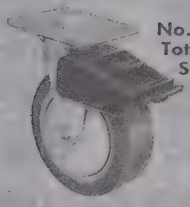
E.R. Wagner Manufacturing Co. CASTERS & WHEELS



# MEDIUM-HEAVY DUTY NSF CERTIFIED CASTERS WITH ROLLER BEARING WHEEL, THREAD GUARD, TOTAL LOCK WHEEL/SWIVEL BRAKE

No. 3KP56
Swivel

No. 3KP59
Rigid

No. 3KP62
Total Lock
Swivel

NSF

- For use with food handling and processing equipment, mobile tool chests and workbenches, platform and stock trucks and carts, distribution carts and dollies, laundry and refuse hampers and trucks, mobile textile handling equipment, and many other applications
- Bright chromed zinc finish
- High strength double ball bearings, hardened swivel raceways for long caster service life
- Foot-operated Total-Lock brake (available on all swivel casters) locks wheel and swivel simultaneously to hold equipment firmly in place
- Roller bearing wheel and 1/2" nut and bolt axle with grease zerk fitting
- Wheel thread guards
- All swivel casters have a unique upper race cap which also serves as a dust cover to protect the upper swivel raceway from contaminates
- NSF Certified

## HEAVY-DUTY SWIVEL & RIGID POWDER COAT FINISH CASTERS

E.R. Wagner Casters & Wheels Manufacturing Co.

No. 4W835 Swivel Plate

No. 2G101 Rigid Plate

- Outperforms stainless steel in capacity and impact resistance
- Unique powder coat over yellow zinc chromate finish withstands a minimum of 750 hours salt spray
- Upper and lower raceway swivel grease seal and swivel grease zerk fitting
- Stainless steel wheel axle
- Noncorrosive Delrin® wheel bearings move easily and quietly under heavy loads
- Duratex (phenolic resin) wheel is highly suitable for deep freeze or high temperature (300°F) applications and performs well in normal or highly moist environments. Caution: Excessive high temperatures may cause the upper and lower grease seals to melt
- Poly II Urethane wheel provides long life, smooth, quiet rolling, and easy cleaning

E.R. Wagner Casters & Wheels Manufacturing Co.

## HEAVY-DUTY SWIVEL & RIGID CASTERS FOR FOOD HANDLING & FOOD PROCESSING

- Designed to prevent accumulation of foreign matter
- Easily cleaned
- Small plate casters have Poly II Urethane wheel with Delrin® bearing
- Large plate casters have mold-on polyurethane on aluminum die cast wheels with roller bearing
- Yellow zinc chromate finish outlasts standard clear zinc
- Total-Lock available on all sizes of small plate swivel casters. Locks both wheel and swivel simultaneously
- All non-Total-Lock swivel casters have upper and lower raceway swivel grease seal
- Field mount side brake kit No. 2G116 (see below) locks wheel only; fits all non-Total-Lock swivel casters

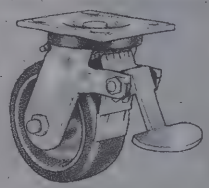
## E.R. Wagner Manufacturing Co. HEAVY-DUTY MATERIAL HANDLING CASTERS FOR PLATFORM TRUCKS

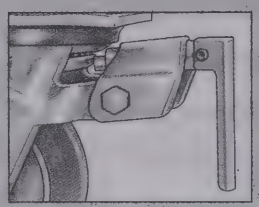
- Heat-treated, hardened bearing raceways with grease zerk fitting for longer bearing life
- Upper raceway has grease seal
- Yellow zinc chromate finish for corrosion resistance
- Roller bearing wheel with 1/2" diameter nut and bolt axle with grease zerk fitting
- Optional side brake kit No. 2G116 for swivel casters (to order, see below)
- Factory installed Total-Lock available for select swivel casters. Locks both wheel and swivel simultaneously
- Factory installed 4-position swivel lock available for select swivel casters

### TOP PLATE DATA



Bolt hole spacing: 2⅝ x 3⅝"
Slotted to 3 x 3"
Mounting bolt size: 3/8" Dia.
Overall plate size: 4 x 4½"
Thickness: 1/4"

No. 3A836 Swivel Plate



Total-Lock

- Foot operated pedal simultaneously locks wheel and swivel
- Castered equipment is held firmly in place
- Easy upward pressure on pedal releases brake

No. 3A837 Rigid Plate

Four Position Swivel Lock

Downward pressure on lever engages lock

Upward pressure releases lock

# HIGH STRENGTH SWIVEL AND RIGID PLATE CASTERS WITH ROLLER BEARING AXLES FOR NONPOWERED APPLICATIONS

- Bright chromed zinc finish
- Large dia., high strength, double ball, hardened swivel raceways with lubrication fitting
- 1/2" bolt and locknut roller bearing axle assembly with spanner bushing and lubrication fitting
- Rugged, 1/4" thick steel plate construction
- Choice of nonmarking Poly II Rubber or Poly II Urethane soft tread, Durafoam polypropylene or Duratex phenolic hard tread wheels
- All 5 x 2" and 6 x 2" swivel plate casters available with or without side wheel brake. Stock Nos. 3W906, 1G427, 1G271, and 1G273 have large size foot lever located on right side of caster. All other wheel brake casters and Brake Kit No. 4A005 have standard foot lever located on left side of caster

**OPTIONAL BRAKE KIT No. 4A005**

No. 4A005. Shpg. wt. 0.7 lbs.
List $9.50.Each.....$8.03

E.R. Wagner CASTERS & WHEELS Manufacturing Co.

# LARGE TOP PLATE 88/83 SERIES AND A8/A3 SERIES CASTERS

- Large diameter heat-treated hardened swivel raceways with grease zerk fitting for longer bearing life
- Upper raceway on 88/83 Series casters has grease seal
- Roller bearing wheel on all casters
- Yellow zinc chromate finish for corrosion resistance
- Total-Lock available on swivel casters. Locks both wheel and swivel simultaneously
- Suitable for manual or power towing at 3 MPH or less at 15 minutes continuous operation followed by 45 minutes rest
- Series A8/A3 swivel casters have an extra large 3/4" diameter keyed kingpin and special high strength bottom race

## SERIES P FOR TOW TRAIL LOADS UP TO 2640 LBS. PER CASTER

- Applications include heavy-duty power towing, air cargo handling, aircraft maintenance and manufacturing, paper and pulp mills, textile dye trucks, automotive manufacturing, steel warehousing, foundries, boat dollies, and gantries
- Manufactured to ISO (International Standards Organization) specifications. Millimeters and kilograms converted to nominal inches and pounds
- Feature swivel head incorporating two large diameter hardened ball races within a rugged kingpinless design
- Load ratings based on maximum towing speed of 10 MPH
- Independently operating directional lock and foot brake for 6, 8, 10, & 12" polyurethane wheel swivel models

For 1/2" Bolts
Top Plate Thickness: Swivel & Rigid 25/64"

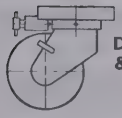
## SERIES T FOR LOADS UP TO 11,000 LBS. PER CASTER

- **Applications include air cargo handling, air-craft maintenance and manufacturing, paper and pulp mills, automotive manufacturing, steel warehousing, foundries, luxury boat dollies, and ship building**
- **For adverse conditions, poor floor surfaces, shock loading**
- **Dual wheel casters carry greater loads without increasing height**
- **Rugged kingpinless swivel affords low height**
- **Rubber or polyurethane wheel treads permanently molded to cast-iron core**
- **Independently operating directional lock and thumb screw brake for all polyurethane wheel swivel models (note changes in height)**
- **Manufactured to ISO (International Standards Organization) specifications. Millimeters and kilograms have been converted to nominal inches and pounds**



**Registered to ISO 9001**

# SPECIALTY THREAD GUARD AND TEXTILE CASTERS

E.R. Wagner CASTERS & WHEELS

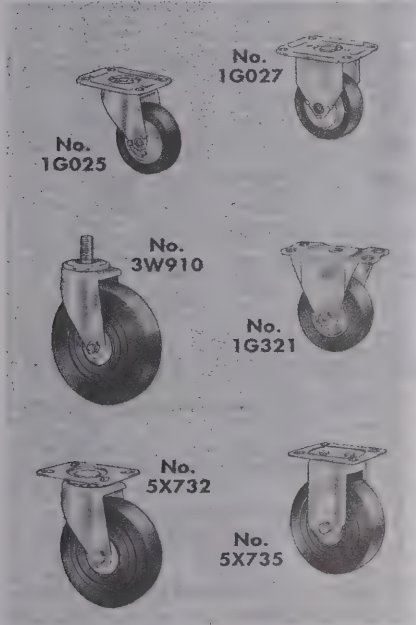
| Section Code | CAPACITY RANGE | Refer to Application Guide Pages |
|---|---|---|
| H | Varied | 2123-2124 |

Durable, easy to maintain casters for applications where contaminates can reduce caster wheel performance, such as apparel handling equipment, laundry hampers, and bakery racks.

### LIGHT DUTY WITH KOTZIN THREAD GUARDS

- Attractive zinc chromate finish
- Polyolefin hard tread wheels with plain bearing and 5/16" rivet axle assembly

### LIGHT AND LIGHT-MEDIUM DUTY WITH THREAD GUARDS



- Attractive zinc chromate finish
- Heat-treated hardened bearing surface
- Self-lubricating wheel bearings
- All 1⅛ and 1¼" tread width wheel casters have 5/16" bolt and locknut wheel axle. 13/16" tread width wheel casters have 1/4" diameter rivet axle

### LIGHT-MEDIUM AND MEDIUM DUTY WITH THREAD GUARDS

- For use on U.S. Postal Service hampers and utility carts
- Attractive zinc chromate finish
- Heat-treated hardened bearing raceways
- 3/8" diameter bolt and locknut wheel axle
- Soft or hard rubber wheels with self-lubricating bearing
- Swivel stem caster No. 3W910 has 5/8"-11 x 1¼" long threaded stem
- Rigid stem caster No. 3W911 has 3/4" diameter x 2½" long round stem with two 0.260" diameter holes located 3/8" and 1⅞" from top of stem

### MEDIUM DUTY WITH THREAD GUARDS

- Attractive zinc chromate finish
- Heat-treated hardened bearing raceways
- Soft or hard rubber wheels with self-lubricating bearing

# SPECIALTY THREAD GUARD AND TEXTILE CASTERS

| Section Code | CAPACITY RANGE | Refer to Application Guide Pages |
|---|---|---|
| H | Varied | 2123 - 2124 |

## ALBION

## SERIES 32 SINGLE-LEG AND SERIES 35 STANDARD TWO-LEG MEDIUM-DUTY TEXTILE CASTERS

- Patented design reduces maintenance cost and increases periods of efficient service
- Flat sided wheels eliminate the need for thread guards
- Large diameter spacer between leg and wheel reduces thread build-up for longer periods of operation
- Constructed with a minimum number of parts to reduce maintenance time and complexity
- Wheels have sealed ball bearings—need no lubrication
- Plated with clear zinc for corrosion resistance and extended life

## HEAVY DUTY SWIVEL AND RIGID ROLLER BEARING WHEEL TEXTILE CASTERS WITH THREAD GUARDS

- Designed for heavy cloth handling trucks, and pin, cone, and bobbin trucks operating in textile plants
- Full thread guard prevents thread buildup around wheel and bearing
- Highly suitable for any textile plant application
- Roller bearing wheel with 1/2" diameter nut and bolt axle with grease zerk fitting
- Heat-treated, hardened bearing raceways
- Upper raceway swivel seal and swivel lubrication fitting for longer bearing life
- Available in both mold-on polyurethane tread with aluminum core and Duratex (phenolic) tread wheels
- Yellow zinc chromate finish for corrosion resistance

## SPECIALTY BRAKE DUAL-LOK SWIVEL STEM CASTERS

No. 4X937 Dual-Lok Brake

No. 3A891 Wheel Brake

- Special brake casters for platforms, carts, and similar equipment
- Two types of brakes: Nos. 3A889, 3A890, and 4X937 feature a foot-operated Dual-Lok brake which locks both caster wheel and swivel. No. 3A891 features a foot-operated brake which locks wheel only
- Attractive zinc chromate finish
- Heat-treated hardened bearing raceways
- Nut and bolt axle assembly
- Soft black rubber wheel

E.R. Wagner CASTERS & WHEELS Manufacturing Co.

## SOFT TREAD WHEELS

**POLY II RUBBER MOLD-ON THERMOPLASTIC RUBBER TREAD WHEELS**—Thermoplastic cushion rubber tread molded and mechanically locked to polypropylene core. Provides maximum floor and load protection, quiet operation, and nonmarking tread. Fit light to medium-duty commercial, industrial, and institutional rated casters. For light to medium loads on hard floors or uneven surfaces. Choice of self-lubricating plastic insert, ball, or roller bearings.

**ALUMINUM CORE MOLD-ON SOFT NATURAL RUBBER TREAD WHEELS**—Soft black natural rubber tread molded on cast aluminum wheel core for noiseless operation in heavy-duty use. Long life roller bearing withstands exceptionally heavy loads. Provides maximum floor protection and impact resistance in industrial applications.

**CAUTION:** Caster housing dimensions vary slightly between different caster manufacturers. Confirm that replacement wheel selected functions properly in your existing housing. For wheel brake casters, check for proper brake engagement with replacement wheel.

**POLY II URETHANE MOLD-ON POLYURETHANE TREAD WHEELS**—Nonmarking polyurethane tread molded and mechanically locked to polypropylene core. Maximum floor and load protection, high load capacity, and quiet operation. Resist impact, mild chemicals, and abrasions. Fit light to heavy-duty commercial, industrial, and institutional casters. For light to heavy loads on hard or carpeted floors and uneven surfaces. Choose self-lubricating plastic insert, ball, or roller bearings.

**ALUMINUM CORE MOLD-ON POLYURETHANE TREAD WHEELS**—Red polyurethane tread molded on cast aluminum wheel core. For medium to heavy loads on hard or carpeted floors and uneven surfaces. Excellent floor and load protection, impact and abrasion resistance, and quiet operation in industrial applications. Long life roller bearings.

(*) Metric wheel with thread guard included. Metric dimensions are 125 mm wheel diameter x 32 mm tread width.
(†) Wheel includes bearing spanner bushing.
(‡) Wheel has a grease fitting.

# E.R. Wagner Manufacturing Co. HARD TREAD WHEELS

**SPARTAN SUPREME SOLID HARD NATURAL RUBBER TREAD WHEELS**—Black hard rubber stain-resistant, tread molded to a hard rubber core. Fit light to medium-duty commercial, industrial, and institutional rated casters. Hard rubber wheels roll easily, resist oil and water, and handle high load capacities on hard surfaces or carpeting. Available in 3, 3½, 4, 5, and 6" dia. sizes and fit 5/16 or 3/8" dia. axles. All hard rubber wheels feature a self-lubricating plastic insert wheel bearing.

**POLY II POLY WHEELS**—Polypropylene hard tread molded and mechanically locked to a polypropylene core. Nonmarking, easy rolling, oil and grease resistant wheels offer good floor protection and high load capacity. For light to medium-duty commercial, industrial, and institutional rated casters. Can be used for light to heavy loads on hard and carpeted surfaces. Available in 3½, 4, 5, and 6" dia. sizes. Fit 3/8" dia. axles. Self-lubricating plastic insert, ball, or roller wheel bearings.

**CAUTION:** Caster housing dimensions vary slightly between different caster manufacturers. Confirm that replacement wheel selected functions properly in your existing housing. For wheel brake casters, check for proper brake engagement with replacement wheel.

**DURAFOAM POLYPROPYLENE HARD TREAD WHEELS**—Resist impact, chemicals, and moisture. Used on platform trucks and heavy-duty carts and dollies. Fit light to medium heavy-duty industrial rated casters with hard tread wheels. Available in 3, 4, 5, 6, or 8" dia. sizes and fit 5/16, 3/8, or 1/2" dia. axles. Durafoam wheels feature plain bore or long life roller bearings on larger diameter wheels.

**PHENOLIC HARD TREAD WHEELS**—Phenolic reinforced with macerated canvas. Roll easily over debris littered floors and offer long service life, high load capacity, good impact resistance, and high and low temperature resistance. For light to heavy loads on hard or carpeted surfaces. 4, 5, 6, and 8" dia. sizes. Fit 3/8 or 1/2" axles. Long life roller bearings.

**SEMI-STEEL HARD TREAD WHEELS**—Cast iron enriched with steel. Long service life, high load capacities, good impact resistance, easy rolling, and superior performance and durability in high and low temperature applications. Offer good performance on rough and chip littered floors and where floor protection and noise are not critical. Fit heavy-duty industrial rated casters. Available in 5, 6, and 8" dia. sizes and fit 1/2" dia. axles. Long life roller bearings.

(*) Wheel includes wheel spanner bushing.

# *Bassick* SOFT AND HARD TREAD WHEELS

**BACO WHEEL**—Top quality soft cushion rubber tread carefully molded to hard rubber core to provide a uniformly thick tread with excellent abrasion resistance and long performance life. Recommended for hand pushed use on hard surfaced floors. Provides maximum floor protection and quiet operation. Operating temperature range is -20°F to 160°F.

**ATLASITE WHEELS**—A hard rubber wheel that is solid molded. Special compound of hard rubber provides these wheels with load capacity and ease of rolling close to that of a metal wheel, but they are more floor protective and quiet running. Atlasite wheels are nonmarking and nonsparking. Resistant to water, oil, and most acids. For hand pushed use on carpets, smooth concrete, and wood floors. Operating temperature is -20° to 160°F.

**BRAVOPRENE WHEELS**—Soft rubber tread mechanically bonded to high impact polypropylene core. Easily cleaned. Corrosion resistant. Quiet operation. Meet National Sanitation Foundation requirements.

**BRAVOTHANE WHEELS**—Polyurethane tread is bonded to high impact polypropylene core. Specially compounded material has low friction for easy rolling under load. Sheds dirt and foreign matter. Easily cleaned. Corrosion resistant. Temperature range is -20°F to 180°F. Meet National Sanitation Foundation requirements.

**All white wheels** consist of white polyurethane tread bonded to white polypropylene core. Used where appearance of cleanliness is important.

**HEAVY LOAD POLYURETHANE WHEELS**—Abrasion resistant polyurethane tread mechanically interlocked on heavy aluminum core gives high load capacity, quiet operation, and floor protection. For stock trucks and similar hand pushed trucks on all floors. Unaffected by water, oil, and most chemicals. Fit Bassick heavy-duty industrial casters. Sealed roller bearings.

**ALCORE RUBBER WHEELS**—Soft rubber tread bonded to aluminum core provides maximum floor and load protection and quiet operation with impact strength. Suitable for hand pushed or conveyor towed application on hard floors. Sealed roller wheel bearings.

# ALBION CAST-IRON, POLYURETHANE, PHENOLIC, RUBBER WHEELS

**CAST-IRON WHEELS**—Made from a high grade iron for high capacity, abrasion resistance, and long wear. Recommended for high temperature and abusive applications.

**ALATHANE WHEELS**—Composed of a polyurethane elastomer, open cast or injection molded on clean, close tolerance cores. High capacity polyurethane resists wear. Nonmarking to protect floors.

**TEXITE WHEELS**—Molded of heavy macerated or chopped cotton denim, impregnated with a phenolic resin. Offer high load capacity and some floor protection. Temperature range: -65° to 250°F.

**MOLD-ON RUBBER WHEELS**—Cushion rubber treads are vulcanized to cast-iron or aluminum cores to cushion loads. Wheel has a straight roller bearing and nylon seal retaining/thrust washer.

Bassick

# HARD TREAD WHEELS

**CANAPHIN (PHENOLIC) WHEELS**—Phenolic resin impregnated with macerated canvas for a hard tread type wheel that offers high load capacity yet protects floor and rolls quietly. Resistant to many solvents and acids. Operating temperature range is -50°F to 260°F constant service, and up to 300°F intermittent service. Sealed roller bearing.

**HEAVY LOAD SEMI-STEEL CAST METAL WHEELS**—Semi-steel wheels blended from high grade cast-iron for toughness and high capacity. Tread machined smooth for easy rolling. Suitable for rough or chip littered floors and high temperature conditions. Used on chip buggies in machine shops and on fixture trucks. Roller axle bearings. Fit Bassick 5 and 6" heavy-duty semi-steel casters.

**V-GROOVED WHEELS**—Metal wheels with machined groove in tread. A high load capacity wheel for running on inverted angle iron tracks for easy rolling and a controlled path. 90° angle V-groove is machined smooth and concentric. Flat surfaces of tread allow rolling on floors when off angle iron track.

## DON'T FORGET THE BACK OF THE BOOK! MANY CROSS-REFERENCE GUIDES AND INDEXES HELP MAKE PRODUCT SELECTION EASIER

Besides complete National Brand and Product Indexes, the back section of this catalog contains a Terminology and Technical Data Section as well as a handy Stock Number/Page Number Cross-Reference Guide. And don't forget, if you need assistance with product selection, help is as close as a call to your local branch.

## ALBION V-GROOVED, FULL PNEUMATIC, SEMI-PNEUMATIC, AND TEXTILE WHEELS

**V-GROOVED WHEELS**—Light, medium, and heavy-duty wheels can be used on floor or angular or round rod guidance tracks. Solid poly offers noncorrosive quiet operation.

**FULL PNEUMATIC WHEELS**—Recommended for most protection for load and floor surface. Tires are mounted on wide rims for maximum cushioning and stability.

**SEMI-PNEUMATIC WHEELS**—High profile, solid center or (zero pressure) hollow center. Cushion rubber tire mounted on a stamped center with a lug base rim.

**TEXTILE WHEELS**—Made of both phenolic and polyurethane treads. Sealed ball bearings. Flat faced wheels reduce string build-up.

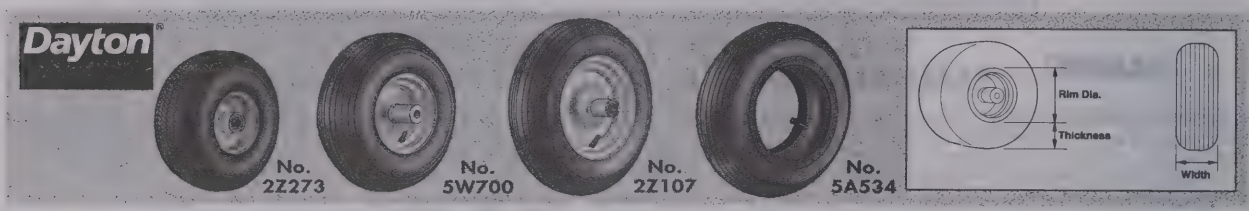
(*) Wheel has a grease fitting.

## E.R. Wagner CASTERS & WHEELS Manufacturing Co. CUSHIONEX SUPREME SOFT TREAD WHEELS

**Black soft natural rubber** with stain resistant tread molded to a black hard rubber core. Wheels fit light-medium and medium-duty commercial, industrial, and institutional casters.



Soft rubber wheels provide maximum floor, load protection, and quiet operation on hard floors and uneven surfaces. Wheels are available in 3, 3½, 4, 5, and 6" diameter sizes and fit either 5/16 or 3/8" diameter axles. All soft rubber wheels feature a self-lubricating plastic insert wheel bearing. Wagner brand.

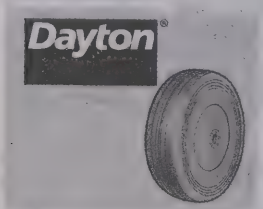
# 4 TO 16" DIAMETER COMMERCIAL AND INDUSTRIAL WHEELS

## HEAVY-DUTY PNEUMATIC TIRE WHEELS

- **Cushion load and handle rough terrain**
- **Pregreased ball bearings with fittings for relubrication**
- **Mounted on steel drop center rims**
- **Bright aluminum finish on hub**



For heavy-duty low speed (less than 15 MPH) applications. For use as new or replacement tires on wheelbarrows, carts, compressors, mowers, and similar equipment. No. 2G329 has knobby tread for added protection against punctures. Replacement tires, tubes, and tire/tube combinations fit pneumatic wheels of similar size. See chart below for description and ordering data. Dayton brand.

## HEAVY-DUTY SOLID BLENDED POLYOLEFIN WHEELS

**Extra strong stain and oil resistant** blended polyolefin plastic is hard, nonmarking and easy to clean. Will not flat spot under load. For gauge wheels on riding mowers, shop and garage equipment, institutional carts, and castered equipment. No. 1A197 has 1/2" oilite bearing; No. 1A198 has 5/8" plain bore with reducer bushing to fit 1/2" axle. Nos. 2G324, 2G323, 2G322, and 2G321 have 3/4" roller bearings with reducer bushing to fit 5/8" axle. Dayton brand.

## HEAVY-DUTY INDUSTRIAL SOLID RUBBER TIRED WHEELS

**For heavy-duty industrial applications** such as platform trucks, handcarts, snow throwers, mowers, and similar products. Heavy-duty solid tires eliminate punctures and flat spots. Tires are made from powdered rubber, blended with chemical accelerators, and cured in ovens under pressure to crosslink the molecules. Withstand heavier loads than semi-pneumatic tires. High impact polyolefin centers are lightweight and retain shape even after impact. Centers will not rust or corrode. Offset or symmetrical hubs with ball bearings. Dayton brand.

| Tire Size (In.) | Dia. (In.) | Hub Type | Hub Width (In.) | Capacity (Lbs.) | Fits Axle (In.) | Stock No. | List | Each | Lots 4 | Shpg. Wt. |

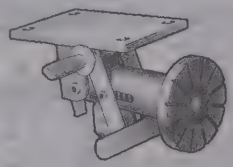
| 2 & 3 | 3A899 | 12.14 | 8.11 | 0.8 |

## POSITION FLOOR LOCKS

- 1000 lbs. maximum load capacity
- Used on platform trucks, fixture dollies or other castered equipment
- Simple foot pressure immobilizes equipment
- Locks when large friction face is pressed against floor
- Brake is independent of casters and can be installed in any convenient location on truck
- Ductile iron construction



### TOP PLATE DATA

# LEVELING JACKS AND MOUNTS

Section Code **I** — Sockets, Brackets, Floor Jacks, Leveling Jacks and Mounts, Wheels

## LEVELING JACKS

- For raising, leveling, and stabilizing portable equipment
- Divided housing with flange plates for bolting above and below frame of equipment
- 5000 lb. capacity
- Zinc plated for rust prevention

| Overall Ht. (In.) | Min. Ht. Below Frame of Equip. (In.) | Max. Extended Ht. Below Frame of Equip. (In.) | Length of Screw Travel (In.) | T & S Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| **18** | 4 1/2 | 13 1/2 | 9 | LJ-9 | **3A892** | $146.42 | **$93.60** | 11.0 |
| **26** | 4 1/2 | 21 1/2 | 17 | LJ-17 | **3A893** | 166.51 | **107.80** | 13.0 |

## LEVELING MOUNTS

**Leveling mounts** swivel 10° in all directions to keep machine tools, racks, assembly lines, and other equipment level, even when on uneven surfaces. All leveling mounts with studs are furnished with jam nuts. Steel mounts are available with yellow zinc or nickel finish. S & W Mfg.

**NOTE: To insure proper leveling mount size for your application, divide the weight of the machine by the number of machine feet. This will equal the pounds or load per foot.**

### STEEL MOUNTS WITH BOLTS

## NEOPRENE MOUNTING PADS

**Resilient cross-ribbed pad** of oil resistant neoprene. Alternating raised ribs provide effective vibration isolation over entire load range. Deflection at 40 PSI is 0.06 in. Most installations do not require bolting or cementing. 3/8" thick sheets can be cut with shears or knife to fit leg or bearing plate of machine. May be used in multiple layers to increase deflection. Vibration Mounting and Controls brand.

| Size (In.) | Thickness (In.) | Load Range | VM&C Model Shear-Flex- | Stock No. | List | Each | Lot 4 | Shpg Wt. |
|---|---|---|---|---|---|---|---|---|
| **2 x 2** | 3/8 | 10 to 50 PSI | Black 2 x 2 | **5C024** | $1.54 | **$0.92** | **$0.83** | 0.1 |

## NEOPRENE AND STEEL VIBRATION PADS

For use under concentrated loads where machine leg has a small area or sharp edges which can cut into the floor.

**Type A** has steel plate bonded between ribbed neoprene pads.

**Type B** has an isolation washer with a 3/4" diameter hole in the center of its steel plate and ribbed neoprene pad. Vibration Mounting and Controls brand.

| Type | Maximum Load Steady | Maximum Load Impact | Dimensions (In.) Length | Width | Thickness | VM&C Model | Stock No. | List | Each | Lots 4 | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|---|---|
| A | 1680 lbs. | 1200 lbs. | 6 | 4 | 7/8 | A-24 | **4C975** | $39.23 | **$23.50** | **$21.15** | 2.1 |

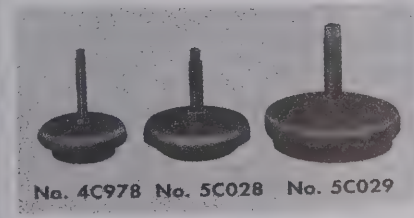
## NEOPRENE AND CORK VIBRATION PADS



Laminated pad consists of 1/2" thick close-grain cork core bonded between two 1/4" thick layers of cross-ribbed neoprene. Pad is 1" thick overall. Combines resiliency of neoprene with acoustal efficiency of cork.

Criss-crossed skid resistant ribs on top and bottom. No bolting or cementing required. Pad can be cut to size with knife or saw. Vibration Mounting and Controls brand.

| Size (In.) | Thickness (In.) | Load Range | VM&C Model | Stock No. | List | Each | Lots 4 | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| **2 x 2** | 1 | 10 to 60 PSI | Cork-Rib Pad 2 x 2 | **5C027** | $2.48 | **$1.49** | **$1.34** | 0.1 |

## LEVELING MOUNTS

Built-in leveling feature provides height adjustment to compensate for unequal mounting deflection or floor irregularities. Utilizes oil resistant neoprene to provide effective shock and vibration control.

Non-skid ribbed surface. No bolting required. Neoprene pad is bonded to a corrosion resistant housing. Zinc plated hardware. Vibration Mounting and Controls brand.

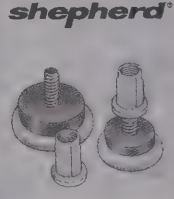
# NAIL-ON CUSHION GLIDES

**For Wood Furniture**

**Nylon Base Cushion Glides** slide easily and harmlessly over carpets and hard floors. Rubber pad is bonded to nonrust nylon base. 24 per pkg.

**Metal Heavy-Duty Rubber Cushion Glides** are made of floor-friendly, corrosion-resistant nickel. Protect carpets and hard floors from furniture damage. 24 glides per pkg.



**To install nylon or metal glides:** mark exact center of each wood leg. At mark, drill pilot hole slightly smaller than glide nail. Tap glide into predrilled hole with a hammer until it seats firmly.

**NOTE:** Not recommended for soft vinyl floors.

# ADJUSTABLE LEVELING GLIDES

**Versatile glides level office/household furniture and some appliances on uneven and irregular floor surfaces.**

Non-rusting nickel base is kind to carpets and hard floors. Can be used on pieces with existing sockets 1/4"-20 thread, 1/2" long. 24 glides per package.

For wood furniture without sockets, plastic sockets are furnished. Simply drill 3/8" diameter hole 1" deep into the center of the leg base. Tap plastic socket into the hole with a hammer. Thread glide into the socket in the leg, and adjust until furniture is level.

**NOTE:** Not recommended for soft vinyl floors.

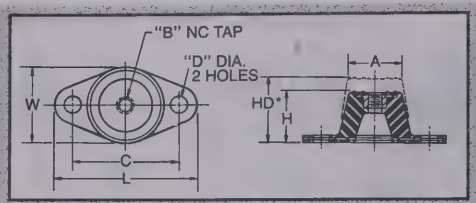
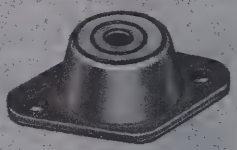
# NO-SLIP DOORSTOPS

## A Big Foot® Doorstops

- **Wide flange holds doors securely in any position**
- **Tough, durable, vulcanized rubber for extra-long life**
- **Will not collapse; will not mar floors or carpeting** • **Gray color**



## B Giant Foot® Doorstops



- **Extra-large size holds doors with clearances up to 2", also holds heavy industrial doors and doors with spring closures**
- **Impact-resistant rubberized material**
- **Highly visible, bright fluorescent yellow helps prevent tripping and accidents**
- **Will not collapse; will not mar floors or carpeting**

# FLOOR MOUNTED VIBRATION ISOLATORS

Install between equipment and stationary support. For top load applications only. Absorb shock, noise, and limit transmission of vibration. Single and double deflection isolators have steel top plate, and threaded insert and steel base both totally imbedded in oil resistant neoprene. Mounting bolts serve as leveling devices. Used on air handling units, air conditioners, machine tools, motor generators, transformers, business machines, pumps. Vibration Mounting & Controls brand.

# FLOOR MOUNT SPRING VIBRATION ISOLATORS

Absorb vibration from air handling units, air conditioners, chillers, compressors, fans, pumps, and heating and ventilating equipment. For critical applications and when required static deflections exceed 0.40". Cast telescoping housing contains color-coded steel spring designed for static deflections up to 1.3". Available with load ranges from 50 to 2600 pounds. Non-skid neoprene acoustical pad attached to base plate. Built-in leveling bolt. Vibration Mounting and Controls brand.

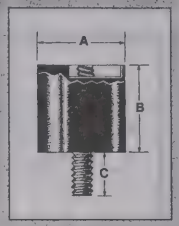
# CYLINDRICAL VIBRATION ISOLATORS



- Absorb transmission of noise, shock, and vibration for general industrial applications
- Use for fans, blowers, air conditioning and refrigeration systems, pumps, compressors, business machines, motors, generators, appliances, and machinery
- Natural rubber isolators are chemically bonded to steel
- All isolators are compression mount with 50 durometer hardness
- Zinc-plated threaded studs
- Not suitable for excess exposure to oil, grease, and solvents or temperatures over 150°F
- Not designed for wall or ceiling suspended installations
- Nos. 3CC15 and 3CC17 are cone-shaped foot mount

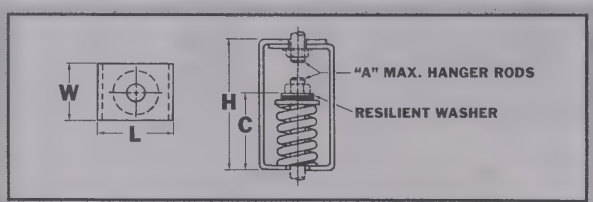
# HANGER MOUNTED VIBRATION ISOLATORS

No. 4C962



Mount between ceiling and vibrating equipment to limit transmission of vibration. Isolators consist of a rectangular steel frame with permanently attached oil-resistant single or double deflection neoprene element. Mounting holes provided for hanger rod for ceiling installation. Used for in-line or tubeaxial fans and blowers, lighting fixtures, duct work, piping, sprinkler systems, unit heaters, and suspended ceilings. Vibration Mounting and Controls brand.

# HANGER MOUNTED SPRING ISOLATORS

No. 5C141

For isolating vibrations, absorbing shock, and reducing noise in critical locations. Hangers mount between ceiling and vibrating equipment. Consist of rectangular steel housing with color coded steel spring in series with a neoprene isolation washer. For critical applications and when required static deflection exceed 0.40". Isolators available with load ranges from 60 to 1300 pounds and static deflections up to 1.3". Vibration Mounting and Controls brand.

# 3 STEPS TO PROPER LADDER SELECTION

## 1. SELECT LADDER MATERIAL

**FIBERGLASS**—Nonconductive, use when working around electricity. Corrosion resistant, ideal for outdoor use.

**ALUMINUM**—Lightweight, easy to maneuver where frequent handling is required. Not for use when contact with electricity is possible.*

**WOOD**—Nonconductive, use when working around electricity. Economical choice for heavy maintenance, construction.

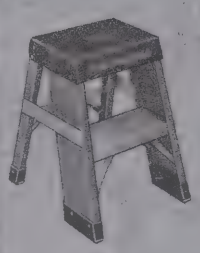
(*) CAUTION: Metal ladders conduct electricity. Do not use where contact may be made with live electrical circuits. Failure to read and follow instructions on use of these products could result in serious personal injury or death.

## 2. SELECT LADDER TYPE & CAPACITY

| Type | Capacity† (Lbs.) | Use |
|---|---|---|
| 1A | 300 | Extra Heavy-Duty Industrial/Contractor |
| I | 250 | Heavy-Duty Industrial/Contractor |
| II‡ | 225 | Medium-Duty Commercial |
| III‡ | 200 | Light-Duty Household |

(†) Total load capacity including combined weight of user, tools, and any materials on ladder.
(‡) Not available. Predominantly for homeowner use. Not recommended for industrial/contractor use.

## 3. SELECT LADDER SIZE REQUIRED



| Stepladders | | | Extension Ladders | | | | |
|---|---|---|---|---|---|---|---|
| Rated Ladder Height (Ft.) | Highest* Standing Level (Ft.) | (In.) | Ladder Height (Ft.) | Section Length (Ft.) | Maximum Extended Ladder Length (Ft.) | Highest* Standing Level (Ft.) | (In.) |
| 4 | 1 | 11 | 16 | 8 | 13 | 9 | 6 |
| 6 | 3 | 9 | 20 | 10 | 17 | 13 | 5 |
| 8 | 5 | 8 | 24 | 12 | 21 | 17 | 3 |
| 10 | 7 | 7 | 28 | 14 | 25 | 21 | 2 |
| 12 | 9 | 6 | 32 | 16 | 29 | 25 | 0 |
| | | | 40 | 20 | 35 | 30 | 10 |

(*) Recommended maximum height user should ascend.

**WARNING: Heed all warning labels placed on ladders.**

# HEAVY-DUTY FIBERGLASS MULTI-PURPOSE STEP STANDS

- **Large structural molded top has diamond tread for a slip-resistant platform—conforms safely to step**
- **Large aluminum steps are twice the area of a standard step and feature heavy-duty side connections**
- **Each step is secured with six, large-headed semi-tubular steel rivets with 30% greater shear strength than solid aluminum rivets**
- **Extra wide rubber boots with thick tread provide sure footing, excellent for use on gratings**
- **Heavy-duty steel gusset bracing supports bottom frame**
- **Fixed braces are made of heavy-duty aluminum**
- **Louisville Ladder brand**

Louisville

**Constructed with nonconductive materials for use when risk of contact with electricity exists**

**No. 3LW39**
**300 Lb. Load Rating**

# ALUMINUM STEP STANDS

Louisville

**Molded top provides slip-resistant work platform**

Sturdy aluminum* step stands constructed for industrial use. Also suitable for the work shop, office, or store. Aluminum construction will support a working load of 300 lbs. Lightweight stands can be carried for use anywhere. Molded top provides a slip-resistant work surface. Each leg is double braced and forms a rigid nonfolding unit. Legs come with heavy corrugated rubber feet which resist slipping and marring floor surface. Louisville Ladder brand.

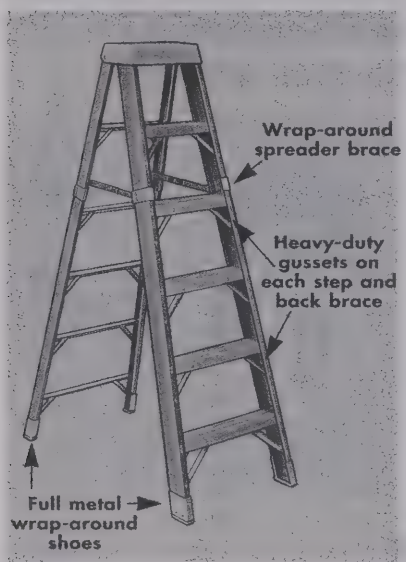
## DON'T FORGET THE BACK OF THE BOOK!
## MANY CROSS-REFERENCE GUIDES AND INDEXES HELP MAKE PRODUCT SELECTION EASIER

**Besides complete National Brand and Product Indexes, the back section of this catalog contains a Terminology and Technical Data Section as well as a handy Stock Number/Page Number Cross-Reference Guide. And don't forget, if you need assistance with product selection, help is as close as a call to your local branch.**

# TYPE 1A FIBERGLASS STEPLADDERS

Louisville
LOUISVILLE LADDER CORP.



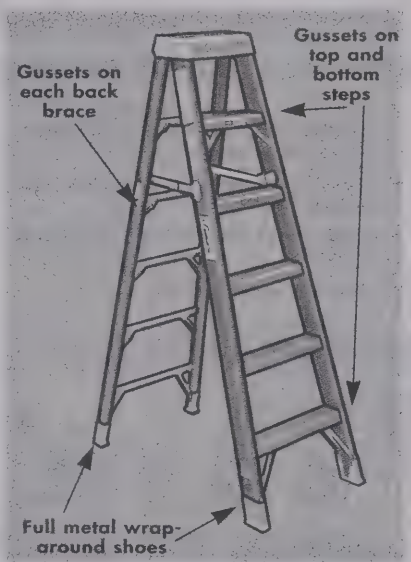
TYPE 1A 300 LBS DUTY RATING

See Ladder Selection Guide on Page 2175.

## EACH LADDER IS TYPE 1A, RATED EXTRA HEAVY DUTY FOR 300 LB. CAPACITY AND OFFERS THESE QUALITY FEATURES:

- Non-conductive fiberglass for work around electricity
- 3" Wide serrated Great Grip™ aluminum steps
- Louisville's 6-rivet Step Design™ adds durability
- Molded rubber feet make ladders resist skidding
- Durable molded polyethelene top with tool tray
- Louisville Ladder's design for durability

## MONARCH FIBER-GLASS STEP LADDER



### For the toughest industrial/contractor applications

**Gussets for each step and back brace**—provide more stability

**Exclusive full metal wrap-around shoe**—protects the base from wear

**Exclusive full metal wrap-around spreader brace**—combats stress where the spreader meets the channel.

## CLASSIC FIBERGLASS STEP LADDER

### Built for the frequent user in industrial/contractor applications

**Heavy-duty gussets on top and bottom step and each back brace**—provide stability where it is needed most.

**Exclusive full metal wrap-around shoe**—protects base from wear.

## ADVENT FIBERGLASS STEP LADDER

### Entry Level

**Suited for extra heavy duty use in industrial/contractor applications**

**U-shaped back brace every 12"**—provides stability. Spreader brace mounted inside of channel for protection.

**All ladders meet the strict guidelines of:**

MEETS OSHA REQUIREMENTS

# FIBERGLASS DUAL ACCESS, PLATFORM, AND STEPLADDERS

**Fiberglass ladders will not absorb moisture;** are resistant to corrosion, dry rot, and warpage; and are nonconductive, having a dielectric strength of 25,000 volts per inch. Fiberglass side rails are made to prevent splintering and provide years of service. 3" wide aluminum steps provide a comfortable work area. Structural molded top with recessed tool tray. Skid-resistant rubber feet. Meet OSHA and ANSI A14.5 Requirements. Louisville Ladder brand.

See Ladder Selection Guide on Page 2175

Replacement Parts Available 1-800-323-0620™

## TYPE 1A 300 LB. CAPACITY EXTRA HEAVY-DUTY STEPLADDERS

Rated for 300 lbs. total working load including combined weight of user, tools, and any material on ladder. Bright orange color.

### DUAL ACCESS LADDERS

- **Designed for entry from either side**
- **Approved for two man use; one per side**
- **Exclusive metal wrap-around shoe**
- **Heavy gauge plated steel hinge**
- **Inside spreader braces secure ladder in open position**
- **Aluminum reinforcing back plates prolong life at key pivot points**
- **Aluminum angle feet have thick replaceable rubber tread on all four legs to provide sure footing**

### PLATFORM LADDERS

- **Designed for prolonged work at one height**
- **Solid fiberglass channel side rails at front and back**
- **15⅞W x 20¼"D slip-resistant aluminum platform**
- **Platform and steps are reinforced with aluminum**
- **Folding platform locks ladder open**
- **Rails extend 21¾" above platform**
- **Exclusive metal wrap-around shoe**

### STOCK MASTER PLATFORM LADDERS

Enhance the qualities of the standard platform ladders with warehouse ladder capabilities. Lightweight mobile platform makes it ideal for restocking shelves. Include all the features of platform ladders above as well as some additional features:

- **Handrails with durable bonded nonconductive coating**
- **4" wheels mounted to back assembly and step cushion handle on bottom step allow comfortable tilt and transport**
- **Bottom brace bar for extra rigidity (pivots for storage)**

## TYPE 1 250 LB. CAPACITY HEAVY-DUTY STEPLADDERS

Rated for 250 lbs. total working load including combined weight of user, tools, and any materials on ladder. Bright yellow color.

- **Designed for lightweight and general industrial use**
- **Heavy molded top has mold-in slots to store tools while working**
- **Full channel back rails and double riveted steps**
- **Heavy-duty plated steel spreader braces are pinch resistant to protect fingers**
- **Thick rubber tread on all four large aluminum angle feet provides improved footing**
- **Reinforcement plates at critical stress areas improve durability**

## PAIL SHELF

For use with standard stepladders above. Folding structural molded shelf with retaining edge provides 8 x 10" platform for hand tools or up to one gallon size paint pail. Not for use as a step. Louisville Ladder brand (S51).

**No. 6X726.** Pail Shelf.
Shpg. wt. 1.7 lbs. List $18.28.
Each.....$17.72

# ALUMINUM STEP, AIRCRAFT INSPECTION, AND AIRCRAFT MECHANIC LADDERS

## TYPES 1A AND 1 ALUMINUM STEPLADDERS

### TYPE 1A 300 LB. CAPACITY EXTRA HEAVY-DUTY PLATFORM LADDERS

Rated for 300 lbs. total working load including combined weight of user, tools, an any material on ladder.

- Designed for prolonged standing at one height
- Aluminum side rails with fully serrated aluminum steps and platform
- Platform is 15⅞W x 20¼"D
- Nearly vertical back legs allow ladder to get close to work surfaces
- Two pair of steel gussets under bottom step for extra support
- Heavy-duty steel gussets on each angle back brace
- Aluminum feet, rubber tread

### TYPE 1 250 LB. CAPACITY HEAVY-DUTY STEPLADDERS

Rated for 250 lbs. total working load including combined weight of user, tools, and any material on ladder.

- Lightweight, easy to maneuver
- Full channel front and back rails
- 3" deep corrugated aluminum steps riveted to railing in 6 places for stability and strength; bottom step has additional 4 gusset brackets
- Pinch-resistant plated steel spreader braces between front and back rails
- Impact-resistant structural molded top
- Aluminum shoes, rubber treads
- Pail shelf No. 6X726 available; see page 2176,2177

## AIRCRAFT DE-ICING INSPECTION LADDER

**Type 1A 300 Lb. Capacity, Extra Heavy-Duty Aluminum Ladder for Industrial Use**

- Protects the aircraft from scratches and damage
- Top caps protect aircraft and user from sharp edges. Specially designed rubber wing pads cover all corners and edges, will not mar surfaces; all fasteners are recessed, no protrusions or sharp edges.
- Four gussets per step provide maximum strength and stability
- Tool holder securely stores inspection wand
- Dual carry handles are positioned for balanced carrying.
- Fixed rubber utility shoe makes setup easy and resists slipping

Designed in cooperation with airline industry professionals for ease of use and maximum protection of the aircraft. Convenience features such as the carry handles and tool holder allow for fast setup and proper inspection techniques. Louisville Ladder brand.

| Rated Ladder Height (Ft.) | Highest Standing Level | Step Size (In.) | Bottom Width (In.) | Fits Wing Heights | Louisville Model | Stock No. | List | Each | Shpg. Wt. |

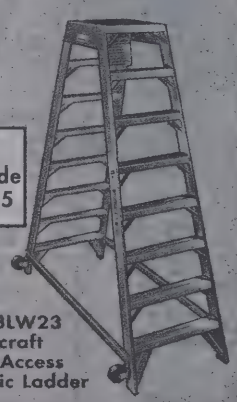
| 8 | 5' 9" | 3 | 25¾ | 6'4" - 7'9" | AH8008 | 3LW22 | $538.00 | $442.25 | 36.0 |

Louisville LOUISVILLE LADDER CORP.

MEETS OSHA REQUIREMENTS

No. 3LW22 Aircraft De-Icing Inspection Ladder



See Ladder Selection Guide on Page 2175

## ALUMINUM AIRCRAFT MECHANIC LADDER

**Type 1A 300 Lb. Capacity for Each Side**
**Extra Heavy-Duty Aluminum Ladder for Industrial Use**

- Dual access ladder is specially designed for aircraft maintenance
- Durable, nonfolding design is extremely rigid, with no hinges or joints to loosen
- Tilt and roll ladder with fixed direction casters that roll easily without wobbling
- Extra large 20 x 21" top platform allows for a stable working area
- Solid rubber, skid-resistant foot pads are a full 3/4" thick for long life in abrasive and oily conditions
- Louisville Ladder brand

| Rated Height (Ft.) | Highest Standing Level | Step Size (In.) | Bottom Width (In.) | Approx. Spread (In.) | Louisville Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|
| 8 | 5'9" | 3⅝ | 38 | 81½ | AM8008 | 3LW23 | $904.00 | $680.00 | 85.0 |

No. 3LW23 Aircraft Dual Access Mechanic Ladder

**CAUTION: Metal ladders conduct electricity. Do not use where contact may be made with live electrical circuits. Failure to read and follow instructions on use of these products could result in serious personal injury or death.**

# TYPES 1A AND 1 WOOD LADDERS

**Type 1A 300 lbs. capacity and Type 1 250 lbs. capacity wood ladders** are constructed of nonconductive select wood to attain high quality, engineering, and design. Built for heavy maintenance and construction jobs. All hardware is extra heavy-duty zinc-plated to resist rust. These ladders meet OSHA Standards and ANSI wood ladder code. Blue Ribbon brand.

### TYPES 1A & 1 STEPLADDERS

- Non-skid rubber treads for added safety
- Heavy-duty, wrap-around zinc-plated top and hardware reduce rust and corrosion
- Blind-bored side rails for moisture resistance
- Rods with rung blocks for added strength and support
- Non-pinch, heavy-duty side locks
- Large 1" thick safety grooved steps

### TYPE 1 PLATFORM LADDERS

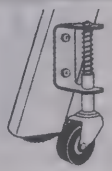
- Spring loaded casters (optional)
- Large 14⅝ x 20" platform area
- Steel guard rails

See Ladder Selection Guide on Page 2175

MEETS OSHA REQUIREMENTS

**Meet OSHA Standard and ANSI Code A14.1 for Wood Ladders**

No. 5W473 Stepladder



No. 3W332 Stepladder

No. 3W100 Platform Ladder

## CASTER SET FOR PLATFORM LADDERS

Set of four 2" heavy-duty spring loaded casters. Ladder climber's weight compresses the caster springs and keeps ladder stationary while in use. Order one set per ladder. Blue Ribbon brand (29012).

**No. 4X740.** Shpg. wt. 4.5 lbs. List $32.50. Each.....**$25.70**

## STEPLADDERS

2, 4, 6, 8, and 10 foot sizes. Steps have 16-gauge steel braces and ZINC-plated hardware to inhibit rust. 1" thick grooved steps. Sturdy hickory rungs braced with 16-gauge steel for extra strength. Nonskid rubber treads on each leg provide an extra measure of security. Ladders fold easily for carrying and storage.

## PLATFORM LADDERS

14⅝ X 20" work platform has protective side and front guard rails. Overall height of 3'9" ladder is 6'7", 5'7" ladder is 8'7", and 7'9" ladder is 10'7½". Double steel rodded beam bracing on back legs. Steel guard rails. Ladders can be converted easily to mobile use by attaching caster set No. 4X740, sold separately.

(*) Height to platform only.

# TYPE 1A FIBERGLASS & ALUMINUM EXTENSION LADDERS

## TYPES 1A FIBERGLASS EXTENSION LADDER

- Fully serrated D-shape rungs provide both slip resistance and comfort
- Patented Quicklatch™ rung lock secures both sections of the ladder, unlocks with one finger

### FE2200 SERIES

Louisville's best extra heavy-duty channel extension ladder for all your industrial needs.

- Heat treated rung washers minimize stress and increase longevity of the rung/rail connection
- Extra heavy-duty cast aluminum swivel shoe allows use in tread down or spike position while offering corrosion resistance.
- Mar-resistant rail end caps protect your work surface from marring while providing longer life to rails
- Rope and pulley system feature on 20' or longer ladders include a 5/16" polypropylene rope and pulley for easier expanding

### FE3200 SERIES

Heavy-duty extension ladder made with the general industrial user and contractor in mind.

- Heavy-duty plated steel swivel safety shoes can be used in tread down or spiked position

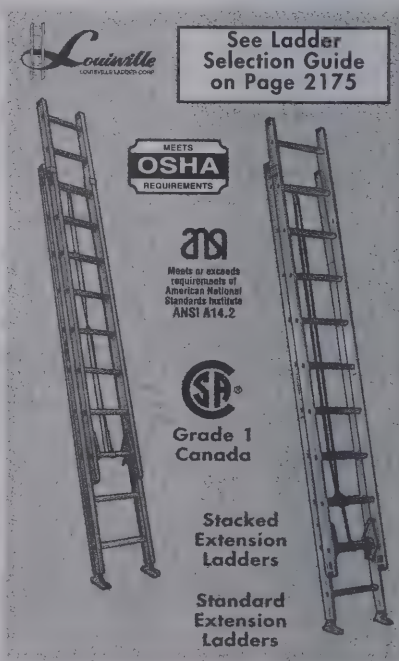
## TYPE 1A 300 LB. CAPACITY ALUMINUM* LADDERS

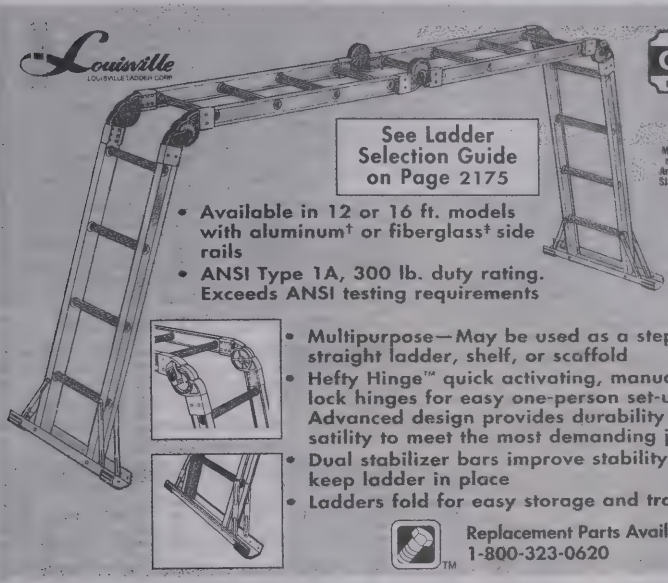


Extra heavy-duty ladders are rated Type 1A for 300 lbs. total working load including combined weight of user and tools.

### STANDARD EXTENSION LADDER

- 3" wide I-beam side rails are joined by 1⅝" serrated aluminum "D" rungs hydraulically double crimped in place for strength and solid footing
- Two outside slide guides at top and two traveling interlocking guides at bottom enable smooth operation
- 5/16" 3-strand polypropylene rope & 1¼" pulley easily raise extension
- Spring assisted rung locks of die-cast aluminum are gravity operated
- Top and bottom caps protect side rail ends
- Cast-aluminum swivel safety shoes with thick rubber tread can be used with tread down or in spike position

### STACKED EXTENSION LADDER



- Double duty ladder can be used as extension ladder or as two single straight ladders when separated
- Extending (fly) section has solid rubber end cap shoes enabling it to be used separately as a straight ladder
- Stacked aluminum I-beam rail have extra heavy-duty outside slide guides secured to top of base section with four rivets per guide
- Quicklatch™ runglock provides easier method of securing fly and base sections with one-finger operation
- D-shaped tempered aluminum rungs are hydraulically double crimped to side rails and serrated on top for a slip-resistant surface
- Cast-aluminum swivel safety shoes with thick rubber tread can be used with tread down or in spike position

(*) CAUTION: Metal ladders conduct electricity. Do not use where contact may be made with live electrical circuits. Failure to read and follow instructions on use of these products could result in serious personal injury/death.

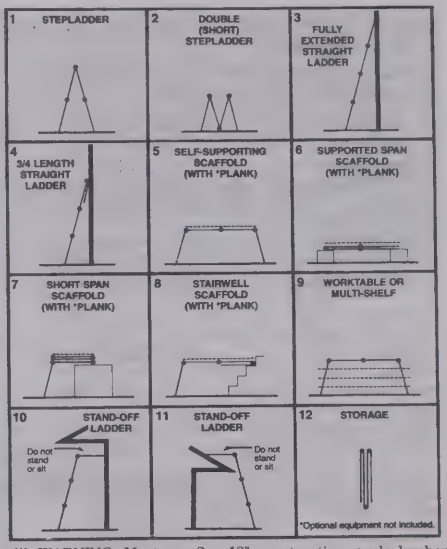
## BIG LOUIE™ 4-SECTION ALUMINUM† & FIBERGLASS MULTIPURPOSE LADDERS

See Ladder Selection Guide on Page 2175

MEETS OSHA REQUIREMENTS

Meets or exceeds requirements of American National Standards Institute

Grade 1 Canada



- Available in 12 or 16 ft. models with aluminum† or fiberglass‡ side rails
- ANSI Type 1A, 300 lb. duty rating. Exceeds ANSI testing requirements

- Multipurpose—May be used as a stepladder, straight ladder, shelf, or scaffold
- Hefty Hinge™ quick activating, manual snap lock hinges for easy one-person set-up. Advanced design provides durability and versatility to meet the most demanding jobs
- Dual stabilizer bars improve stability and help keep ladder in place
- Ladders fold for easy storage and transporting

Replacement Parts Available 1-800-323-0620™

(*) WARNING: Must use 2 x 12" construction grade lumber plank for these positions.

Replacement Parts Available 1-800-323-0620™

MEETS OSHA REQUIREMENTS

Meets or exceeds requirements of American National Standards Institute

Grade 1 Canada

**Two ladders in one: folds to a step or extends to a straight ladder with just a flip of the snap lock Hefty Hinge™**

- Hefty Hinge™ reliable heavy-duty snap lock hinges permit easy one-person set-up with just a flip of the handle. Features specially designed interlocking teeth for a secure connection and stability
- Easy to attach stabilizer bar with slip-resistant rubber feet gives extra width at base to help keep ladder in place during use
- Nonmarring utility shoes have slip-resistant rubber feet with rounded, ribbed profile for greater stability on various surfaces
- "D" rungs, made of serrated heavy-duty extruded flat sided aluminum, provide superior strength and slip-resistance and help minimize foot fatigue
- Extra heavy-duty aluminum construction Type 1A, 300 lb. duty rating. Exceeds ANSI and OSHA requirements

# ALUMINUM STAGES

- "Sure-Foot" aluminum* decking has raised tread spikes for slip-resistance
- Rungs on each end provide wide, easy to grip handles for pulling or carrying stages
- Extra heavy-duty cast aluminum rail end caps on all rail ends for maximum rail protection, long life, and durability
- Reinforced aluminum decking with easily replaceable support braces

Replacement Parts Available 1-800-323-0620

MEETS OSHA REQUIREMENTS

Meets or exceeds requirements of American National Standards Institute

Rail & Toeboard Kits include sockets, posts, guard rail, midrail, and toeboard complete for one side

Two-man load, 500 lb. duty rating. Typically used as suspended stages or scaffold planks. 12" wide stages Nos. 6W706, 6W707, and 6W708 can be used in conjunction with ladder jacks sold separately; see listing below. Rail and toeboard kits are required by OSHA on all stages erected 10 ft. or higher above the ground. Stages are predrilled for easy installation. User should check and conform with local codes. Meet OSHA and ANSI requirements. Louisville Ladder brand.

(*) CAUTION: Metal stages conduct electricity. Do not use where contact may be made with live electrical circuits. Failure to read and follow instructions on use of these products could result in serious personal injury or death.

# WALL SURFACE PROTECTION KIT AND ADJUSTABLE STAND-OFF

**Wallguard™ Surface Protection Kit.** Large 80 sq. in. replaceable thermoplastic rubber pad increases work surface contact over 100 times more than standard ladder rail ends, reducing damaging pressure and providing greater stability. Fits all fiberglass and aluminum "D" rung straight and extension ladders. Attaches easily to rungs with hinged clamps provided. Made of durable, high impact polypropylene co-polymer. Wallguard™ must not be installed on wood ladders. Louisville Ladder brand.

**Adjustable Stand-Off.** Aluminum bracket adjusts ladder away from vertical surface 13 to 25". 48" span clears most windows, works equally well on any single or extension ladder. Attaches easily with two U-bolts provided. Extra heavy-duty rubber tips protect work surface from damage. Louisville Ladder brand.

| Description | Louisville Ladder Model | Stock No. | List | Each | Lots 3 | Shpg. Wt. |

# LADDER LEVELERS AND JACKS

**Ladder Levelers.** Simple one-hand adjustment to level most ladders. 11" max. differential. Attach over rung ends with four bolts per side rail. Shoe swivels 45° in all directions. Heavy-duty plated steel construction. Louisville Ladder brand.

**Ladder Jacks.** Short body jack spans 2 rungs on either D-shaped or round rung ladders. Massive hooks of 3/16" thick aluminum are fully welded and riveted for superior load bearing strength. Six adjustable pitch positions: three inside, three outside. Wing nut and locking plate prevent jack from slipping out of pitch position slots. Intended for fabricated planks 12 to 20" wide, including aluminum stages Nos. 6W706, 6W707, and 6W708 listed above, or wood planks 18 to 20" wide. OSHA and ANSI specify ladder jacks should be used only with 300 lb. (Type 1A) or 250 lb. (Type 1) duty rated ladders. User should comply with local codes.

| Description | Dimensions (In.) W | H | L | Louisville Model | Stock No. | Priced and Sold in Pairs List | Each | Lots 3 | Shpg. Wt. |

# LADDER RACKS AND ROOFTOP CARRIERS

## LOCKING LADDER RACK

- **Zinc-plated with a polyester-epoxy powder coated finish for maximum outdoor protection**

Ladders are loaded & unloaded from side of van. Convenient operating handle located on side for safe, efficient operation. May be padlocked to secure ladders from theft. Use padlocks with 9/16 to 1" shackle height and 1/2 to 2/3" shackle width; see page 2624. Fits most full-size vans. Available as single or double-sided rack. Includes all hardware, assembly instructions. Padlock required; order separately. Load capacity: 500 lbs.

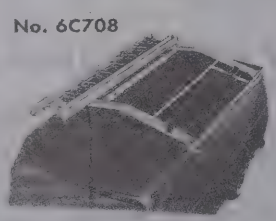
## UTILITY CARRIER

- **Constructed of heavy-gauge steel, zinc-plated and finished with a durable polyester-epoxy powder coat**

Flat 14-gauge steel crossbows with tall outer stops provide versatility for carrying almost any load securely. Fits all full-size vans. Hardware, instructions included. Load capacity: 250 lbs. Secure ladder to rack with optional Tie-Down Kit No. 6C713. Kit includes one plastic-coated front stop and two plastic-coated chain tie-downs with snap hook. Order one kit for each ladder carried.

## PICKUP TRUCK LADDER RACK

- **Constructed of heavy-gauge welded steel, zinc-plated and finished with a baked-on polyester-epoxy powder coat for maximum outdoor protection**



Adjustable to fit full-size pickup trucks. Designed for heavy loads, large carrying capacity—up to five feet wide. Hardware, complete instructions provided. Load capacity: 1000 lbs.

# STEEL ROLLING WAREHOUSE LADDERS AND OUTRIGGERS

## STEEL ROLLING WAREHOUSE LADDERS

Louisville LOUISVILLE LADDER CORP.

4 to 10 Step Models have Hand and Guard Rails; 24"W Steps

- 7"D steps with 10"D top step
- Rugged steel construction
- Support 300 lb. working load
- Flared legs with rubber tipped feet for maximum stability
- Outriggers available separately; see listing below

2 and 3 Step Models have 16"W Steps; No Railing

Replacement Parts Available 1-800-323-0620

MEETS OSHA REQUIREMENTS

No. 2W458

No. 3W231

Meets or exceeds requirements of American National Standards Institute

Ladders with two, three, four, and five steps are equipped with spring-loaded casters which lift ladder when empty for easy mobility and retract to solid footing when ladder is weighted. All others have a device which locks in place upon your first step and remains locked until released by stepping on unlocking pedal.

Steel steps have a formed perforated pattern that reduces slipping and provides self-cleaning features. Durable blue powder coated finish. Ladders shipped unassembled. All models meet OSHA Requirements and requirements of ANSI Code A14.7. Louisville Ladder brand.

**NOTE:** Metal ladders conduct electricity. Do not use where contact may be made with live electrical circuits. Failure to read and follow instructions on the use of these products could result in serious personal injury or death.

## HEAVY-DUTY SAFETY ANGLE STEEL WAREHOUSE LADDERS

Louisville LOUISVILLE LADDER CORP.

MEETS OSHA REQUIREMENTS

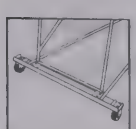
- Large 8½"D steps with 17" top step and 50° climbing angle permit easier ascent and descent
- Steel angle iron reinforced base and rear legs help reduce abusive damage; add stability
- 300 lb. load capacity
- Outriggers available separately; see listing below

Replacement Parts Available 1-800-323-0620

No. 6W693

Meets or exceeds requirements of American National Standards Institute

Extra heavy-duty steel angle warehouse ladders designed for the most demanding requirements. Angle iron reinforcements are five times stronger than tubular steel.



Large ball bearing casters offer easy maneuvering. All models come equipped with a large swivel caster in front and rigid casters in the rear. Stepping on bottom step activates trip bar, locking rubber tipped feet in down position. To move the ladder, just step on the unlocking pedal.

Coated with resilient baked-on electrostatic high visibility orange powder paint for attractive, durable finish. Shipped unassembled. Meet OSHA and ANSI Code A14.7. Louisville Ladder brand.

**NOTE:** Metal ladders conduct electricity. Do not use where contact may be made with live electrical circuits. Failure to read and follow instructions on the use of these products could result in serious personal injury or death.

## OUTRIGGERS FOR STEEL WAREHOUSE LADDERS

Louisville LOUISVILLE LADDER CORP.

Steel angle iron bars attach easily to any of the steel warehouse ladders listed above.

Used to increase base width for added stability. Required on ten step or higher ladders when local codes require a 3:1 height to base ratio. Required in California. Meet OSHA and ANSI requirements. Louisville Ladder brand.

| Fits Warehouse Ladders | Dimensions (In.) W | L | Louisville Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **6 to 12 Step** | 4 | 42 | 328000A | **6W702** | $48.62 | **$37.25** | 13.0 |
| **13 to 15 Step** | 4 | 49 | 328000B | **6W703** | 54.70 | **42.45** | 15.0 |

# NARROW STEEL WAREHOUSE LADDERS

**Steel rolling warehouse ladders** are ideal for narrow-spaced applications. 17" top step and large 8½" deep steps make climbing and working easier.

**1¼ x 1¼" Angle Iron Base**—Designed to reduce abusive damage. Angle iron is more than 5 times stronger than 16-gauge, 1" steel tube.

**Reinforced Front Leg Assembly**—Fortified by steel angle braces to reduce potential of bending. Oversized 2" dia. steel supported rubber feet.

**Rugged, Reinforced 1¼ x 1¼" Angle Iron Rear Legs**—For strength and rigidity.

**Meet ANSI Requirements For Forward Descent.**—Feature a gentle 50° climbing angle for easier climbing.

**Baked-On Powder Paint Finish**—For durability, scratch, and scuff-resistance. Blue color.

**300 lb. Load Rating.**

# NONCONDUCTIVE MOBILE WORK PLATFORMS

- **Fiberglass stringers**
- **300 lb. duty rating**
- **50° step slope allows forward descent**

### ASSEMBLY

**Step**—8½ x 24" aluminum steps with traction holes and heavy-duty fiberglass stringer.

**Nonconductive Platform**—1-man: 24 x 17". 4" toeboard on all sizes.

**Back**—Heavy-duty fiberglass side rail, rigid channel diagonal bracing, and tapered sides.

**Bottom Step**—Dual swivel caster and thick rubber foot.

**Handrail & Guardrail**—Plastic coated steel tubing attaches directly to stringer.

**Brace Bars**—Constructed of steel tubing.

**Six Wheel Design**—Provides a tight turning radius; handle-operated linkage system.

**Whether you phone, fax, write or stop by your local branch to place an order, Grainger can tailor sales terms to meet your needs. Ask about establishing an open line of credit or pay with your VISA, MasterCard, or American Express card.**

# STEEL MAINTENANCE PLATFORMS

Fortruss™ platforms are constructed of high strength steel.* Easily assembled, adjusted, and disassembled by one man. Dust-pin, "pistol-grip" adjustment mechanism offers maximum shear strength and quick, easy platform height adjustment.

Unique caster and "L" locking knob increase platform stability when used. Caster Dual-Lock mechanism stops wheels from swiveling and rolling. Expanded end-frame tubes for easy insertion of casters and stacking of two end-frames.

Two-piece guardrail system has midrail and 4¾" steel toeboard welded in place. Plywood platform measures 65⅜L x 29W x 5/8" thick. Meet OSHA and ANSI A10.8 Requirements. Louisville Ladder brand.

**Standard 6 Ft. High Platform**—Adjusts from 2' 5¾" to 6' 3¼" in approximately 4" increments. Includes two 68" end-frames with steel rungs, two 6' platform truss assemblies, one 29W x 65⅜L x 5/8" thick exterior grade plywood platform with steel edge protection, one set of four 5" diameter casters with dual-lock mechanism, guardrail and toeboard system.

**12 Ft. High Platform**—Includes all components of 6 ft. platform with two additional 68" end-frames, two 6' long platform trusses, one additional plywood platform, four outriggers for added stability, and four additional casters. Maximum platform height with casters is 11'8".

**15 Ft. High Platform**—Includes all components of 12 ft. platform plus two 42" end-frames, two 6 ft. trusses, and one additional plywood platform. Maximum platform height with casters is 14'10". **Never stack higher than 15 ft.**

(*) CAUTION: Metal ladders conduct electricity. Do not use where contact may be made with live electrical circuits. Failure to read and follow instructions on the use of these products could result in serious personal injury or death.

# MINI-FORTRUSS® MOBILE WORK STAND

**Compact, easily portable, mobile work stand allows a variety of working heights for in-plant and on-site use.**

**Features:**

**Center-Locking Hinge** — A spring-loaded, locking pin automatically locks center hinge tubes in place for stable setup.

**Two-Way Casters** — Four positive-locking, ball bearing casters provide a stable base. Nonmarring casters have a quick release feature and are lock-threaded into steel inserts in the scaffold's legs to reduce unit wobble.

**Exclusive Steel Wrap Weld Connection** — Increases strength and durability.

**Premium Powder Paint** — Baked-on finish is durable and provides excellent scratch and scuff resistance. Attractive, even coverage with no drips or runs.

**Compact Storage** — Folds easily to 6¼" wide for storage and transport.

**Specifications:**

**Adjustable Working Height** — Height can be adjusted to 12, 24, 36, and 48".

**Ample Work Capacity** — Provides a stable 17 x 43" work surface, along with 500 lbs. distributed load work capacity.

**End Frame Stops** — Nonpinching stops limit rotation of end frame to 90°.

# TILT TRUCKS

Rubbermaid®

Seamless polyethylene construction will not rust, pit, or corrode

1½ & 2 Cu. Yd. Tilt Trucks

1/2 & 1 Cu. Yd. Tilt Trucks

Replacement Parts Available 1-800-323-0620™

- Utility, standard, or heavy-duty frame
- Vulcanized rubber wheels
- Recycling tilt truck also available

Lightweight and dynamically balanced for easy maneuverability and dumping. Use for any type of refuse collection, industrial, and food product handling. USDA and FDA acceptable materials. Seamless body is easy to clean with high pressure water or use steam to prevent bacterial growth. Heavy-duty models come with side rails for added strength. Single operator can roll truck from collector station to compactor, bailer, or dock containers and easily dump waste. Gray color. Rubbermaid brand.

1/2 and 1 cubic yard models feature inset wheel and axle design to help prevent damage to interior surfaces and equipment. Accommodate domed lid to conceal mounded contents without reducing capacity. No. 5M653 is blue with "We Recycle" imprinted on the side.

2 and 2½ cubic yard models feature double metal handles positioned to give additional control when dumping.

# STRUCTURAL FOAM TILT TRUCKS

Rubbermaid®

No. 5M639

- Inset wheel design allows easy movement through standard commercial doorways and elevators.
- 1 Cu. Yd. Tilt Truck is available with Towable Option

No. 5M642 domed, hinged lid is compatible with both models. Lid design allows for full heaping capacity with lid in place.

- "Constant force" dumping design and upper/lower handles provide greater dumping control with less effort
- Smooth, structural foam construction cleans off easily and eliminates need for metal framing that can rust

**Rugged but lightweight contoured structural foam body** meets the aesthetic needs of interior applications like office buildings, healthcare, and retail. Designed for general refuse collection and light to medium material handling. Requires only a small push to go from resting position into "constant force" dumping motion which permits smoother, more controlled dumping.

**Spacious 3/4 cubic yard size** fits through standard doorways and elevators. Ergonomic "steering handle", two 4" rear swivel casters, and two 12" front wheels provide easy maneuverability. Secondary handle between rear casters helps control truck in final dumping position USDA approved for use in food processing. Gray color. Rubbermaid brand.

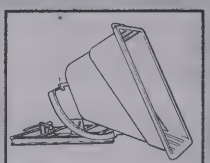
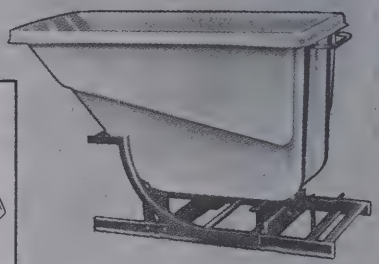
# SELF-DUMPING HOPPERS



## SELF-DUMPING HOPPERS



No. 5Z211
1/2 Cu. Yd. Hopper
with Casters

- Forklift capabilities for elevated dumping and mobility
- Pull release safety latch for easy operation
- Well suited for indoor and outdoor use
- Optional lid available for 1½ cu. yd. models

Replacement Parts Available 1-800-323-0620

Tilt a full 30° below horizontal

No. 5M646
1/2 Cu. Yd. Hopper
without Casters

Self-dumping hoppers tilt a full 30° below horizontal. Easy-to-clean seamless body resists rusting, denting, and pitting. Rotationally molded polyetheylene with steel frame. Available with 6" polyolefin casters or without. Optional lid is also available for Nos. 5M649 and 5M648. Gray color. Rubbermaid brand.

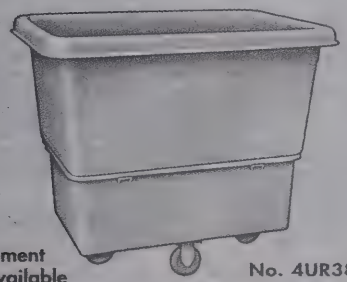
## NATIONWIDE BRANCH NETWORK WITH LOCAL ACCESS IS YOUR SHOPPING ADVANTAGE

Grainger's network of more than 350 local branches provides you nationwide access to our broad selection of product offerings. And with 30-minute "Will Call" service or 24-hour shipping on in-stock items, help is as close as a phone call away. Check the Branch Locations listed in the front of this catalog for the location closest to you.

### DON'T DELAY... ORDER FROM GRAINGER NOW!



Place your order with your local Grainger branch, and you'll be assured of prompt service, technical support, and our "No Hassle" return policy on any product ordered.

# UTILITY TRUCKS AND BIG WHEEL CART

Rubbermaid®

Convenient domed, hinged lids available for all sizes.

New

Replacement Parts Available 1-800-323-0620™

No. 4UR38

## HEAVY-DUTY UTILITY TRUCKS

Ideal for use in industrial and heavy-duty commercial applications such as waste management, work in process, food processing, and laundry.

Constructed of tough polyethylene plastic for exceptional durability and crack resistance. Single step sidewall design with steel support ring increases wall strength to prevent bowing and allows for nesting with other trucks for compact storage. Heavy-duty all metal frame with two rigid casters and two swivel casters mounted in a diamond pattern, provide easy maneuverability for positioning and steering. One-piece seamless construction is easy to clean with spray washer or steam. USDA and FDA acceptable material. Molded in gray color. Optional domed, hinged lids conceal loads and allow extra bulk capacity. Order separately. Rubbermaid brand.

## BIG WHEEL CART

- **Smooth, seamless body for easy use and cleaning**
- **Reinforcement ribs add impact resistance**
- **Large 20" diameter pneumatic wheels for mobility**
- **Optional 5" rear caster provides greater flexibility**

Versatile, two-wheel cart has strong, durable one-piece construction that prevents leaks and cleans easily. For commercial, industrial, food service, and many light hauling applications, including general clean-up and maintenance, transportation, trash collection, material storage, and food processing. USDA acceptable materials.

Made of structural foam that will not rust, dent, bend, or peel. Material is easy to clean, resistant to mild chemicals, and durable in temperature extremes. Cart is lighter than wood or metal carts. 7½ cu.-ft. with 300 lbs. capacity. Overall dimensions: 58L x 32¾W x 28¼"H.

Molded-in one-piece handle provides a comfortable hand grip. Large 20 x 2.125" pneumatic wheels for easy mobility over rough surfaces. Optional 5" rear caster available; order No. 4X835 separately (hardware not included) for greater maneuverability. Brown color with tan wheels. Rubbermaid brand (5642).

## HEAVY-DUTY SERVICE CARTS

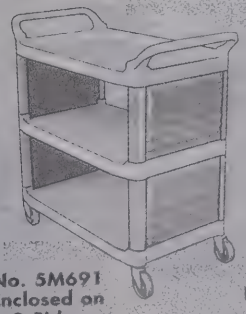
Flat Shelf Cart
No. 5M715

Replacement Parts Available
1-800-323-0620

Lipped Shelf Cart
No. 5Z088

**Heavy-duty structural foam construction** offers a 400 lb. capacity in a lightweight cart. Practically maintenance-free, these carts have no sharp edges to damage walls or furniture. Resists rust and corrosion unlike metal carts. Rugged enough to handle tough manufacturing, warehouse, and maintenance jobs. Features 5" non-marring casters (two swivel and two rigid) for easy maneuverability. Rubbermaid brand.

**Flat Shelf Service Carts**—Top shelf provides smooth work surface with a convenient, built-in storage bin. Ergonomically designed handle allows a more comfortable, natural grip. Front mounting bracket can accommodate a wastebasket or a power strip. Moat detail around top edge keeps small parts from falling off. Flat bottom shelf makes moving packages on and off safe and easy.



**Lipped Shelf Service Carts**—Feature a 4" lip on top and bottom shelves to help contain parts and keep packages from sliding off. All shelves are seamless and leakproof to contain any spills.

Mobile Cabinet

When you need storage plus mobility, Lista mobile cabinets provide safe and secure storage and transportation for parts and tools. Use as tool cart or mobile repair station. High quality, smooth extension drawers extend 95% and have 150 lb. load capacity per drawer. Each mobile cabinet includes two swivel casters with wheel locks and two rigid casters. Casters come fully assembled and premounted. Handles come unassembled. Classic blue color.

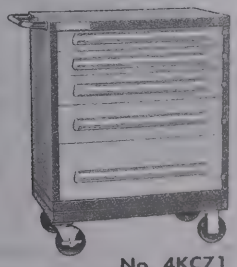
**No. 4VM51 Mobile Workcenter** provides a large worksurface with a 1¾" solid maple butcher block top. Includes five dividable drawers and a hinged door cabinet with one shelf.

**Individual drawer latches** — Keep drawers shut when moving. Automatically latch shut when drawers close.

**Patented PrevenTip® lock system** — One-drawer-at-a-time system prevents cabinet from tipping over.

**Prepartitioned drawers** — Save time setting up and organizing drawers. User can adjust aluminum dividers and partitions as needed.

**Heavy-duty casters** — Nonmarking polyurethane rubber casters move smoothly even over rough surfaces.



**Locking system** — Prevents theft and improves security. Includes two keys.

# STEEL AND PLASTIC SERVICE CARTS

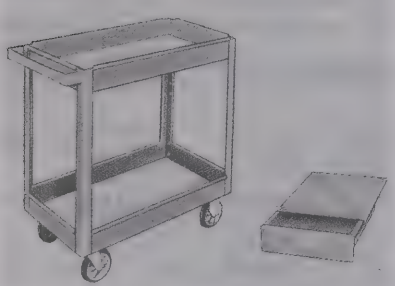
## INDUSTRIAL DUTY 30 AND 36" SERVICE CARTS

Shown with Extra Tray

edsal

Replacement Parts Available 1-800-323-0620

**Designed for efficient handling** of evenly distributed loads weighing up to 1000 lbs. Built for durability by using 16-gauge ribbed steel angle posts, 18-gauge steel trays with mitered edges for extra rigidity, locknuts and bolts which secure all parts, and 5 x 1¼" ball bearing casters with non-marring, smooth rolling poly wheels.



**Both models are 32" high** for convenience in loading or unloading. Two 3" deep trays keep loose parts or packages from falling out; top tray can be inverted to provide a flat top work surface.

**Two rigid casters plus two swivel casters** provide control needed in confined areas and narrow aisles. Extra trays in both sizes are available. Both carts accommodate optional drawer, No. 1W682 (order separately) listed below. Gray powder coat finish. Shipped unassembled. Edsal brand.

## COMMERCIAL STEEL SERVICE CARTS

edsal

**Add efficiency and convenience** to everyday jobs. A material handling step saver for stockroom, shipping and receiving departments, storerooms and assembly lines. Carts are built to handle evenly distributed loads up to 500 lbs.

Service carts come with 3½" deep 20-gauge pan type trays with rolled edges. Top shelf can be inverted to provide a flat working surface. 14-gauge steel posts. Distance between shelves is 20".

Cart Nos. 5W127 and 2W273 accommodate one No. 1W682 optional drawer front mounted; cart No. 3W137 accommodates two drawers side mounted.

Two one-piece rigid plate casters and two one-piece swivel plate casters with a 5 x 1¼" molded polyolefin wheel. Casters provide good floor protection, high load capacity, oil and grease resistance, ease of rollability, and quiet operation. Ideal for use on both hard and carpeted surfaces. Handle mounts on either end. Carts have gray powder coat finish. Shipped unassembled for easier handling and lower shipping costs. Edsal brand.

## DURAMOLD™ PLASTIC UTILITY CARTS

No. 5W563

Rubbermaid®

Replacement Parts Available 1-800-323-0620

No. 5M674

- **Durable, rustproof, corrosion resistant**
- **Low maintenance**
- **Easy to clean**

**Made of honeycombed Duramold™,** a rugged structural foam plastic that resists rust and corrosion. Fights cracks and splinters sometimes experienced with wooden carts. Quieter than metal carts. Never needs painting.

**Utility carts** offer flexibility in shelf space and easy mobility. 3 shelves have 11" clearance each. 4" swivel casters. Smooth finish and brushed aluminum uprights. Beige color. Rubbermaid brand.

## 60" HIGH INDUSTRIAL STOCK TRUCKS

**Convert to five trays with optional tray available**

Replacement Parts Available 1-800-323-0620

**Provide large capacity** for efficiently restocking merchandise shelves, supplying assembly line stations, moving bulky stock, and numerous other material handling jobs in plant or warehouse.

**Trucks are rated for loads up to 800 lbs.** Both 30 and 36" models come with four adjustable 18-ga. steel trays and will accommodate an optional fifth tray for added convenience. Equal distant clearance between trays on 4-tray unit—14"; on a 5-tray unit—10". Each tray is 3" deep and secured with bolts and nuts to 16-ga. ribbed steel angle posts. Angle posts have predrilled holes at 6" intervals to accommodate trays at any desired height arrangement. All trays except bottom one can be inverted to provide a flat surface.

**Two rigid and two swivel ball bearing rubber tired casters** are 5" dia. x 1¼"W. Full width tubular steel handle steers cart. Gray powder coat finish. Stock trucks come unassembled for lower handling costs. Either model assembles easily with screwdriver or nutdriver; hardware provided. Edsal brand.

## MOBILE WORKBENCHES

Move heavy parts and tools to job sites and provide a flat, clean 42W x 25"D work surface. Dimensions include casters and guard rail, 42W x 25D x 32¾"H; with casters, 38"H. Cabinet excluding top is 36W x 24"D. Bench top is 16-gauge steel with 1/8" thick hardboard laminated to the top. Guard rail with 1½" overlap hem keeps parts from rolling off. Supports are 16-gauge steel; cabinet, door and shelves are 20-gauge steel; drawers are 22-24 gauge steel. Drawer dimensions: 12W x 22D x 6½"H.; outside: 13½W x 22½D x 6¾"H. Drawer load rating: 50 lbs. Shelf load rating: 75 lbs. (evenly distributed). Recessed handle pulls and nylon rollers. Removable flat bottom drawers lay flush on bench top surface. Each drawer has adjustable divider with a card holder. Benches have two rigid and two locking swivel 5" dia. x 1¼" hard rubber casters.

- Fully assembled, simply mount casters
- All welded construction; fully lockable for safe storage
- Height from floor to top of work surface is 38", including casters
- Gray enamel finish, brown hardboard top

**No. 1W827 One-Drawer, One-Door Model.** Storage space below drawer is 14¾W x 23¾D x 20½"H, and has one shelf adjustable on 3" centers. Inside dimensions of enclosed cabinet are 20¾W x 23D x 28"H. Cabinet has one shelf adjustable on 3" centers, door lock, 2 keys. Keylock for drawer available separately. Order Part No. CL-1; call 1-800-323-0620. Tennsco brand.

**No. 4W052 Four-Drawer, One-Door Model.** Inside dimensions of enclosed cabinet are 20¾W x 23D x 28"H. Cabinet has one steel shelf adjustable on 3" centers. Lockable door and drawers come with keylock and two keys. All drawers lock simultaneously. Tennsco brand.

**No. 1W827.** One-Drawer, One-Door Model Workbench (MB-2-2542). Shpg. wt. 155.0 lbs. List $497.00. Each.....**$350.75**

**No. 4W052.** Four-Drawer, One-Door Model Workbench (MB-1-2542). Shpg. wt. 183.0 lbs. List $595.50. Each.....**$432.75**

# WIRE AND ADVANCED POLYMER HEAVY-DUTY CARTS

## HEAVY-DUTY WIRE CARTS

- Assembles in minutes, without tools
- Shelves can be adjusted and installed at 1" increments along the height of the posts
- Long lasting nickel chrome finish
- Open wire construction provides air circulation, light penetration, reduces buildup of dirt and moisture, and assures effectiveness of sprinkler system
- 1/4" shelf ledge prevents items from falling off shelf
- 1000 lb. capacity per cart (evenly distributed loads)
- 5" resilient, solid rubber casters have bumper guards to prevent damage to walls
- Two swivel and two swivel-with-brake casters on 69"H carts; four swivel casters on 39"H carts

**Metro Carts are designed** for general storage and transport in factories, warehouses, laboratories, cleanrooms, restaurants, hospitals, nursing homes, retail stores, and offices.

## WIRE SECURITY TRUCKS

- Double doors open 250° for easy access to contents
- Open-wire construction allows complete visibility for quick inventory checks
- Optional shelves adjust on 1" increments along posts
- Bright, long-wearing nickel chrome finish provides extra corrosion resistance

Provide safe storage of expensive materials and sensitive items, as well as quick and protective transportation. Highly suitable for use in tool rooms, warehouses, laboratories, electronic centers, hospitals, hotel/motels, and restaurants. Trucks have full length latch bars on doors with padlock provision for additional security. Padlock not included, see Index. 5" polyurethane swivel casters include bumper guards to prevent damaging walls. Load capacity of security trucks is 1200 lbs*. Shipped unassembled. Easy assembly. Metro brand.

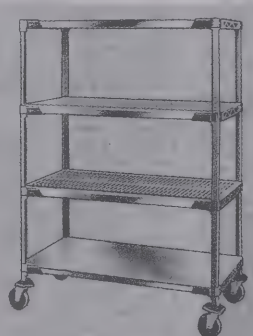
(*) Based on evenly distributed loads.

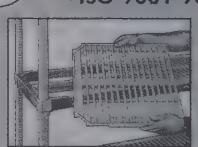
## HEAVY-DUTY POLYMER CARTS



- Add or remove a shelf at any time, without disturbing other shelves
- 5" polymer stem casters offer total corrosion resistance and enhanced durability; two swivel and two swivel-with-brake casters
- Bumper guards prevent cart from damaging walls
- Load capacity is 800 lbs. per cart (evenly distributed load)

**Rustproof:** Polymer shelf mats (polypropylene) and polymer composite shelf frames and posts are extra strong and warranted against rust for a lifetime. Any metal parts are stainless steel.

**Quick to clean:** Open grid shelf mats lift off shelf for easy cleaning and are divided into 12 and 18" modules for easy handling. Shelf frames and posts are smooth and rounded with no sharp edges.



**Fast, easy assembly:** Assembles in minutes, without tools. Attach "wedge connectors" at desired post height and lower shelf into place. Shelves can be adjusted and installed in ½" increments.

Replacement Parts Available
1-800-323-0620

MetroMAX® METRO NSF

## HARDWOOD DOLLIES

Dayton®

- **7/8" thick kiln dried maple hardwood**
- **Varnished finish**
- **Polyolefin casters**

Hardwood dollies are inexpensive castered platforms that save time and manpower in moving bulky loads. Made of durable 7/8" thick kiln dried northern maple hardwood in three styles: solid platform, flush, and carpeted, in three sizes. Recessed bolt holes and varnish finish provide a flat surface for loading. Four polyolefin swivel casters with zinc coated metal parts protect against rust and corrosion. Load capacities up to 1200 lbs. Replacement parts available; call 1-800-323-0620.

## PLASTIC TROLLEY AND MOVING DOLLY

Rubbermaid®
Rubbermaid Commercial Products LLC

New

- **Enables workers to move loads up to 200 lbs. efficiently**
- **All plastic swivel casters provide stability and maneuverability**
- **Reduces lifting and hand carrying heavy, bulky loads**
- **Push/pull handle allows loads to be moved easily**

Durable plastic construction resists dents and corrosion; reduces damage to interior surfaces such as walls and doorways. No. 4UR33, Trolley/Dolly, comes with handle that lets users push or pull loads with comfort—just remove handle to convert unit to dolly. Rubbermaid brand.

All Wood Platform

Dayton®

6-MONTH DAYTON LIMITED WARRANTY

Text of warranty is available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

Steel Frame Platform

**Dayton wood platform trucks** are designed to handle medium-heavy materials. These trucks are built for loads up to 2800 lbs. Countersunk bolts and natural varnish finish provide a flat smooth surface. The steel framed truck deck is surrounded by 2 x 2 x 1/8" angles for greater capacity and protection from rough handling and abuse.

**Two rigid and two swivel casters** allow for easy maneuverability and long life. Roller bearing wheels are either 5 x 2" or 6 x 2" polyolefin for smooth rolling. Removable smooth U-curved tubular steel handle fits into pockets at the steering end of the deck. Metal parts painted with red enamel. Dayton brand.

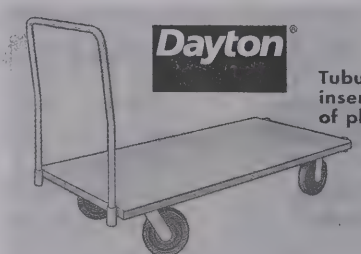
## COMMERCIAL PLATFORM TRUCK

Dayton®

- 24 x 42" platform deck
- 750 lb. capacity*
- 5" diameter x 1¼" casters

**Sized right for shipping and receiving departments** of shops and stores, production line, etc. Welded steel construction holds 750 lbs. Platform deck is 24" wide, 42" long, made of box formed 16-gauge steel sheet with two 14-gauge formed steel reinforcing channels on underside. 1" steel pipe handle is 36" high.

**Truck rides easily** on 5" diameter x 1¼" wide rubber casters; two rigid, two swivel. Ball bearing race casters bolted on (not welded) for easy service. Nonmarring rubber bumpers on front corners. 44L x 36"H overall; platform 6¼"H. Shipped unassembled; easy to assemble, all hardware included. Red baked powder coated finish. Dayton brand.

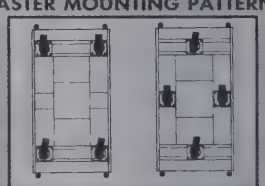


(*) Based on evenly distributed loads.

**No. 1W819.** Shpg. wt. 69.0 lbs. List $148.81. Each.....**$112.50**

## STEEL PLATFORM TRUCKS

**Highly maneuverable trucks have extra heavy-duty welded steel deck construction.** Used in shipping and receiving rooms, warehouses, stockrooms, shops, laboratories, stores. 14-gauge extra heavy-duty formed steel deck has all welded construction with additional 3/16" angle frame reinforcements welded underneath for additional strength.



**Casters meet specified load capacity requirements** and facilitate handling in confined areas. See index for pages describing specific caster models. Two ball bearing swivel and two rigid mounting plate casters are packed in carton in matched sets. Bolt on in standard corner pattern, or diamond (tilt type) pattern. Diamond-tilt pattern permits truck to tilt-balance slightly on center side casters, allowing truck to turn in its own radius. Red baked powder coated finish. Shipped assembled except for casters which bolt to undercarriage. Dayton brand.

- **Easy to handle, maneuver in aisles**
- **500, 1000, and 2000 lb. capacities based on evenly distributed loads**

**Tough honeycombed** Duramold is virtually maintenance-free. Will not rust or dent like steel trucks, nor crack, splinter, warp or discolor as wooden trucks. Available in three sizes with 500, 1000, and 2000 lb. capacities. Used primarily in industrial, sanitary maintenance, and food service applications.

**All units have two rigid and two swivel casters.** Modular caster design provides several optional caster placements for in-the-field changing. Round deck corners guard against damage to furniture, walls, and equipment. USDA approved models have a sealed bottom for sanitary food handling. Gray color. Rubbermaid brand.

## ALUMINUM PLATFORM TRUCKS

- **Ideally suited for hot, wet applications**
- **Natural finish**
- **2000 and 2400 lb. capacities based on evenly distributed load**

Lightweight, corrosion-resistant, aluminum platform trucks have a clean, handsome appearance and are built for heavy-duty use. Use in front office, stock room, warehouse, dock area, or laboratory.

Interlocking extruded sections reinforce and support the smooth deck. Fully bolted weld-free assembly of the complete deck assures a long, maintenance-free life. Removable reinforced push handle can be used at either end of truck. Two rigid and two swivel roller bearing casters. Casters are shipped unmounted. Wesco Mfg. brand.

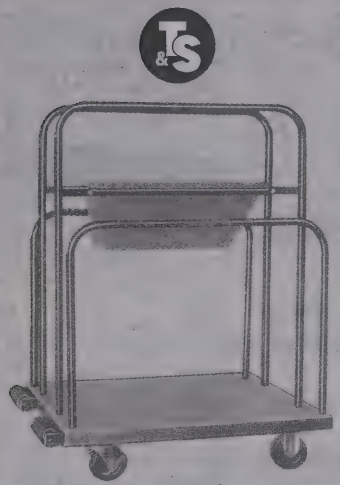
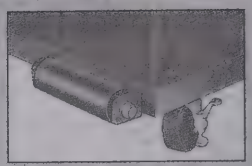
## STEEL NESTING PLATFORM TRUCKS

Platform trucks can be nested for storage when space is limited

- **First nested truck requires 48" of space; each additional truck adds only 12" of length**
- **Hinged platform allows nesting**
- **Rugged powder coated steel platform resists scratches and rust**
- **6" mold-on rubber wheels, two rigid and two swivel**
- **2000 lb. capacity based on evenly distributed loads**

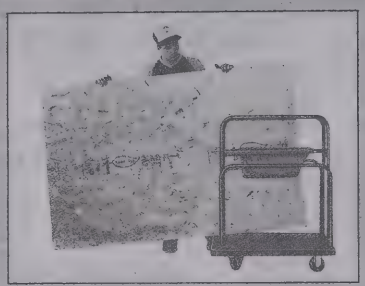


**Steel platform truck** is nestable to save warehouse storage space. For use in warehouses, shipping and receiving areas, mail rooms, and other places where multiple platform trucks are needed.



**Platform dimensions** are 48L x 24W x 10½"H. Handle is 38½"H. Shipped unassembled. Silver enamel handle. Blue enamel frame. Platform is powder coated silver. T & S brand (NPCT).

No. 6W015. Shpg. wt. 150.0 lbs. List $289.68. Each ..... $269.25



# PANEL CARTS

## PANEL RACK CART

Two rollers on base platform facilitate loading and unloading

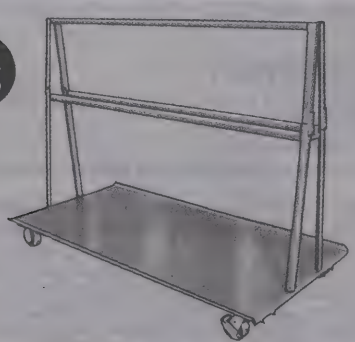
- **1000 lb. capacity**
- **4" dia. x 2" wide phenolic wheels**
- **Two rigid and two swivel casters with brakes**
- **Removable plastic basket included for carrying tools and accessories**
- **Center bar detaches for moving tables, partitions, and other bulky items**

Panel rack carts are designed to move large, hard to handle items such as sheets of plywood, drywall, paneling, doors, and lumber. For use around lumber yards, hardware stores, home centers, and job sites within a plant. Also used for moving doors, tables, and partitions around schools, hospitals, office complexes, and other institutional buildings.

Heavy gauge steel construction. 32L x 26W x 41"H. Shipped unassembled. Painted blue enamel finish. T & S brand (PRCT).

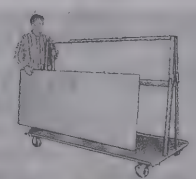
**No. 6W014.** Shpg. wt. 100.0 lbs. List $276.42.
Each.....**$273.25**

## HEAVY-DUTY PANEL CART



- **4000 lb. capacity**
- **Removable vertical supports**
- **5 x 2" Polyurethane casters; two rigid and two swivel with brakes**

Extra heavy-duty steel panel cart has three vertical supports 35" above platform to provide support for sheets of metal, drywall, etc. 12⅛" spacing between vertical supports accommodates wide pipe or multiple sheets.

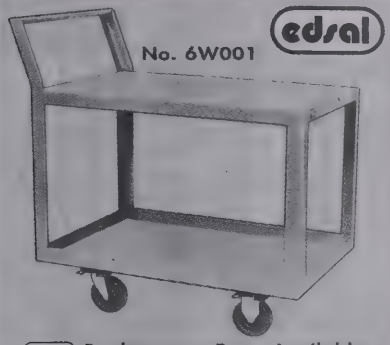


Cart has four 5 x 2" polyurethane casters; two swivel casters, and two rigid casters. Dimensions: 36L x 29½W x 42"H. 4000 pound capacity. Painted blue. T & S brand (PRCT-HD).

**No. 3KR85.** Shpg. wt. 200.0 lbs. List $555.00.
Each.....**$472.50**

## A-FRAME PLATFORM CART

Easy to assemble



- **2000 lb. capacity**
- **Easily moved with two rigid and two swivel 5" polyurethane casters with brakes**
- **Overall dimensions: 36W x 72L x 56"H**

Ideal for use when moving large, bulky sheets of materials. Convenient tool tray located in-between A-frame uprights. Foot-operated caster lock used for securing unit during loading/unloading operations. All welded steel construction. Painted blue. T & S brand (A-3672).

**No. 3KR37.** Shpg. wt. 200.0 lbs. List $444.70.
Each.....**$378.00**

Replacement Parts Available

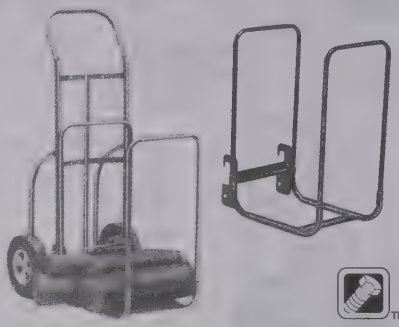
# HAND TRUCK ACCESSORIES

Dayton

Hand truck accessories give standard trucks more versatility. All accessory kits fit Dayton hand truck styles A, B, C, and E found on page 2202. Mounting hardware included in all kits. Dayton brand.



## No. 6B474 CHAIR MOVING KIT

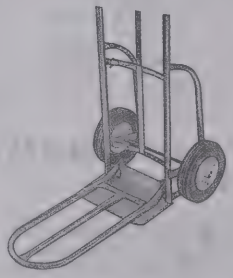
- Converts truck into stack or folding chair mover
- Handles stack chairs and both plain or padded steel folding chairs — up to 12 plain folding chairs
- Tubular steel construction
- Easily detachable when not needed
- Red baked powder coat finish

Replacement Parts Available 1-800-323-0620

## No. 6B471 TUBING AND LOG CARRIER KIT

- Welded tubular steel frame 13½W x 16D x 18½"H
- Easily detachable with or without load
- Red baked powder coat finish

Replacement Parts Available 1-800-323-0620

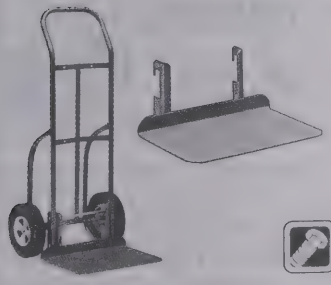


## No. 6B473 HIGH STACK FRAME AND NOSEPLATE EXPANDER KIT

- Gives truck 65" extra high stacking ability
- 14D x 19"W noseplate for light bulky loads
- Tubular steel construction
- Easily detachable when not needed
- Red baked powder coat finish

Replacement Parts Available 1-800-323-0620

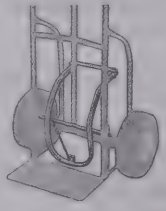
## No. 6W851 NOSEPLATE EXTENSION



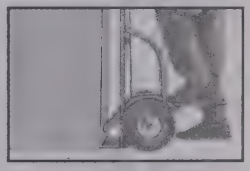
- Increases noseplate to 11W x 22½"L
- Tubular steel construction
- Extension folds back when not needed
- Truck has 200 lb. load capacity when extension is in use
- Red baked powder coat finish

Replacement Parts Available 1-800-323-0620

NOTE: Older model Dayton hand trucks, having U-shaped noseplate back bracket, require No. 2W064 noseplate extension. Call 1-800-323-0620 to order.



## No. 6B472 NOSEPLATE EXPANDER KIT



- Increases noseplate size to 12D x 19"W for bulky loads
- 7-gauge steel nose plate
- Easily detachable when not needed
- Red baked powder coat finish

Replacement Parts Available 1-800-323-0620

## No. 6W852 LOAD REMOVER KIT

Foot pressure extracts hand truck from under load

- Simple foot pressure pushes hand truck from load
- Ideal for flush load stacking
- Tubular steel construction
- Red baked powder coat finish

Replacement Parts Available 1-800-323-0620

# WELDED ALUMINUM GENERAL PURPOSE, APPLIANCE, AND KEG HAND TRUCKS

## 400 LB. CAPACITY LIGHTWEIGHT ALUMINUM TRUCKS

Dayton®

Replacement Parts Available ™ 1-800-323-0620

Lightweight, highly maneuverable hand trucks for loads up to 400 lbs. These are designed for indoor and outdoor use where loads are normally moved on stairways, ramps, over curbings and through narrow passageways. Highly suitable for use on delivery trucks and in restaurants, warehouses, and stores where lightweight trucks are desirable for handling heavy loads. 1" tubular aluminum construction. Frame, cross bars and noseplate welded for strength and durability. Both models feature stairclimber bars, beveled noseplate and steel wheels with rubber tires. Bright aluminum finish. Standard and high-stack models. Dayton brand.

**No. 3W154. Standard Frame with Flow Back Handle.** For regular material handling jobs: loading, unloading, moving stock in warehouses and between buildings. 10" semi-pneumatic wheels with ball bearings.

**No. 3W153. High Stacking Beverage Case Frame with Loop Handle.** Handles a variety of loads over all surfaces, including beverage cases on delivery trucks, in bottling plants, restaurants, cafeterias, and other service areas. 10 x 4" pneumatic wheels. Lightweight construction is easy to lift, hang, store and transport on delivery trucks.

### NOSE EXTENSION FOR Nos. 3W153 & 3W154

Extends 31½L x 11W. Folds up when not needed. Capacity of truck is 200 lbs. when nose extension is down. Bright tubular aluminum construction. Fits Nos. 3W153 and 3W154 aluminum trucks. Bolts to frame. Hardware included.

**No. 5W661.** Shpg. wt. 7.0 lbs. List $45.47.
Each ..... **$36.25**

| Dual | 50½ | **4W325** | 285.50 | **198.50** | 27.0 |

# EXTRUDED ALUMINUM CHANNEL FRAME HAND TRUCKS AND CONVERTIBLE TRUCK

These durable lightweight hand trucks are built to handle 500 lb. loads. Four handle styles to choose from. All hand trucks have extruded aluminum channel uprights with cross bars riveted in place. Vinyl inserts on front of uprights act as load protectors. Toe plates have a beveled leading edge to slide easily under loads. All other structural members are bolted in place to make repairs and accessory modification easy.

No. 6W050 convertible truck is easily adjustable for either vertical or horizontal use. 500 lb. capacity when vertical, 650 lb. capacity when horizontal. Has twin pin handles for easy handling in either position. Large 8½ x 18" beveled noseplate handles bulky loads and acts as a guard to protect loads from unwanted braking or wheel damage. Convertible truck also has 5" rubber tired swivel casters for easy maneuvering on both flat and irregular surfaces. All hand trucks can easily be customized with add-on accessories sold separately. Come completely assembled for immediate use. Dayton brand.

## HAND TRUCK ACCESSORIES

**No. 5W661 NOSEPLATE EXTENSION.** Fits all hand trucks shown here. Extends 31½" long and 11" wide. When in down position, capacity of truck is 200 lbs. Folds up when not in use. Welded aluminum tubular construction bolts to frame. Mounting hardware included.

**No. 6W052 CAST ALUMINUM STAIR & CURB CLIMBER.** Has replaceable steel skid bars. Mounts easily to all hand trucks shown here except No. 6W050. Mounting hardware included.

**No. 6W051 FRAME EXTENDER.** Gives hand truck Nos. 6W046, 6W047, and 6W048 additional load stacking height. Made of 1½" strap aluminum. 15H x 9¼"W. Easily adaptable. Mounting hardware included.

**No. 6W053 LARGE BEVELED ALUMINUM NOSEPLATE.** Measures 18W x 8½"D. Replaces standard noseplate on Nos. 6W046 through 6W049 for moving bulky loads. Mounting hardware included.

# TOUCH-N-TILT™ AND TOUCH-N-TILT LITE ERGONOMIC HAND TRUCKS

Suggested for reducing the risk factors of Awkward Posture, Force, and Repetition.
See page 2493.

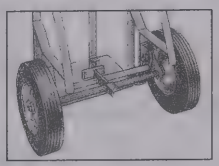
**TOUCH-N-TILT™ Steel and TOUCH-N-TILT™ Lite** magnesium frame hand trucks keep strain of load on truck and off your back reducing fatigue and potential back injuries. Simple, fast activated pivot latch is connected to axle and moves load center off noseplate. This simple weight transfer helps reduce potential back injury and fatigue by reducing the effort needed to break-over a loaded hand truck by up to 66%. Frame design and raised wheel location provide excellent balance in transporting position. Wesco Mfg. brand.

**TOUCH-N-TILT™ Steel Trucks** have 1", 14-gauge double welded tubular steel frame; 8 x 14", 7-gauge beveled noseplate; stair glides; and orange enamel finish. Not recommended for use on stairs with more than three steps. Fully assembled.

**TOUCH-N-TILT™ Lite Truck** frames are made from extra thick magnesium extrusions with riveted full box cross members. Bolt-on handle. Extra strong 14W x 7⅝"D bolt-on noseplate, 1/2" thick at critical points with a beveled front edge and built-in wheel guards. All Lite trucks can be customized with add-on accessories sold separately. Fully assembled.

## TOUCH-N-TILT™ LITE ACCESSORIES

**Stair Glides.** Aluminum stair glides are specially designed for TOUCH-N-TILT™ Lite trucks with 8 or 10" wheels. Easily attach to axle and have special frame connection to allow it to move with TOUCH-N-TILT™ mechanism. Mounting hardware included.



**Folding Nose Extension.** Tubular magnesium nose extension fits all TOUCH-N-TILT™ Lite trucks. 30L x 12"W extension bolts through vertical noseplate's flange and frame, and folds up when not in use. Truck capacity is 500 lbs. when extension is used. Mounting hardware included.

**Frame Extension.** Increases load stack height from 42½ to 52" on TOUCH-N-TILT™ Lite continuous and dual handle hand trucks. Magnesium extrusion is 10W x 16"H. No additional mounting hardware required.

## SHOVEL NOSE WAREHOUSE TRUCK

WESCO Industrial Products, Inc.

- 900 lb. capacity
- Structural pipe sized tube
- 13 x 17" tapered nose
- Wesco Mfg. 5-year frame warranty

Replacement Parts Available 1-800-323-0620

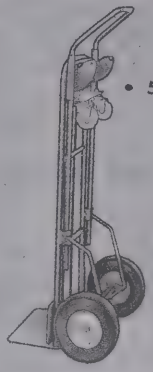
**Extra heavy-duty industrial warehouse truck** is constructed of 1" structural pipe sized tube. Double welded frame has a wide flaring continuous handle for best control. Wheel guards keep load from rubbing on wheels. Oversized, 1/4" thick beveled noseplate is 13" deep and widens to a 17½" width at the rear. Noseplate is designed to slide under almost any load and pick it up without tipping the load forward. Truck comes equipped with 8 x 2" mold-on rubber roller bearing wheels on 3/4" axle. Overall dimensions: 53H x 20½"W. Safety orange color. Wesco Mfg. brand (ST-2HB).

**No. 4W469.** Shpg. wt. 60.0 lbs. List $206.70. Each ..... **$180.50**

## HEAVY-DUTY VENDING MACHINE TRUCK

WESCO Industrial Products, Inc.

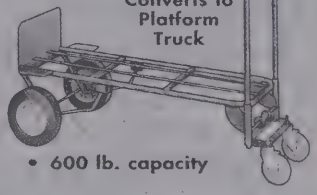
- 1200 lb. capacity
- 4-wheel design supports load



Replacement Parts Available 1-800-323-0620

**Heavy-duty all-welded 66" high truck** easily transports large, bulky, hard to handle vending machines and other appliances. Rear swivel castered support assembly extends easily from stored position. When extended, the load rides on two 3½" diameter mold-on rubber swivel casters and two 8 x 2" mold-on rubber roller bearing wheels. Operator can steer the truck without having to support the load. Heavy-duty noseplate is 24W x 5D x 3/16" thick. Two-piece, 2W x 14-ft. long, heavy-duty nylon belt with front clasp easily secures large loads. Ratchet belt tightener with auto-rewind tightens load to prevent slipping. Caterpillar crawler stair climber aids in going up and down stairs and curbs. Nonmarking, long lasting vinyl on all contact surfaces. Overall dimensions: 66H x 24W x 14½"D. Red enamel finish. Wesco Mfg. brand (WRV-66).

**No. 4W471.** Shpg. wt. 86.0 lbs. List $427.10. Each ..... **$330.50**



## HEAVY-DUTY CONVERTIBLE HAND TRUCK

WESCO Industrial Products, Inc.

- 500 lb. capacity

Converts to Platform Truck

- 600 lb. capacity

Replacement Parts Available 1-800-323-0620

**Strong, durable, versatile truck** for office, warehouse, maintenance department, and delivery vehicles. Two-wheel hand truck has 500 lb. capacity with 8 x 14" beveled noseplate. Converts in seconds to a 600 lb. capacity, 4-wheel platform truck with an extra large 44½L x 14"W bed of 3/4" structural pipe sized tube. Squeeze the spring loaded locks at the back top of the frame to release the hinged handle and out of the way casters. Pivot and extend handle; casters with handle will relock automatically in platform position.

**Truck has 1" 14-gauge tubular steel handle** for best control and maneuverability in either 2 or 4-wheel configuration. Handle can be locked into higher positions for use with taller loads when truck is in 2-wheel configuration. Other features include 10 x 2.75" semi-pneumatic wheels, 3½ x 1¼" bolted on swivel rubber casters, wheel guards and center straps to prevent packages from falling through. Overall height 53". Blue color. Wesco Mfg. brand (156-S23-Z).

**No. 4W470.** Shpg. wt. 52.0 lbs. List $278.20. Each ..... **$237.50**

## DESK DOLLY

WESCO Industrial Products, Inc.

- 400 lb. capacity
- 32W x 16"D vinyl coated steel platform
- 3" rubber swivel casters
- Safety latch

Replacement Parts Available 1-800-323-0620

**Move fully loaded desks without removing drawers and files.** Truck allows one person to move a 400 lb. double pedestal desk for relocating or cleaning and polishing floors. Position the 32W x 16"D platform under desk pedestals, depress handle to raise desk and engage latch. Steel lift platform and removable handle have a mar and skid resistant vinyl coating to protect the desk. Elevated desk moves easily with or without handle on four 3" swivel rubber casters. Lowered height 4¾", raised height 10¼". Overall dimensions 32W x 22"D. Natural aluminum and red vinyl finish. Shipped partially assembled. Wesco International brand (272156).

**No. 4W485.** Shpg. wt. 45.0 lbs. List $242.40. Each ..... **$205.50**

# FOLDABLE PLATFORM AND HAND TRUCKS

## A SUPER FOLDAWAY PLATFORM TRUCK

Used by salesmen, delivery and repair people, and frequent travelers. 350 lbs. capacity. Telescoping aluminum frame has a dual length platform; 20L x 16"W retracted or 28L x 16"W extended. 32" high handle. Vinyl corner bumpers. Transports computers, copiers, tools, samples, and luggage completely supported. Easy steering with 4" rubber casters, two rigid and two swivel. Folded dimensions of 20L x 16W x 9½"H allow the truck to fit into any vehicle. Shipped partially assembled. Wesco International brand (272020).

**No. 5W684.** Super Foldaway Platform Truck. Shpg. wt. 19.0 lbs. List $168.80. Each ..... **$131.30**

## B FOLDING HANDLE PLATFORM TRUCK

Move supplies, forms, files, office equipment or almost anything around the office or shop. Compact size is also ideal for use on delivery vehicles. All steel platform truck has vinyl perimeter bumper to protect walls and furniture. Vinyl covered platform keeps load from sliding. Easy locking 33½" high handle folds flat against platform for compact storage or transporting. Equipped with easy rolling rubber casters; two rigid, two swivel. Shipped partially assembled. Sand color enamel with blue vinyl. Wesco International brand.

| Load Capacity (Lbs.) | Deck Size (In.) W | Deck Size (In.) L | Caster Size (In.) | Wesco Model | Stock No. | List | Each | Shpg. Wt. |

## C SUPER COLLAPSIBLE HAND TRUCK

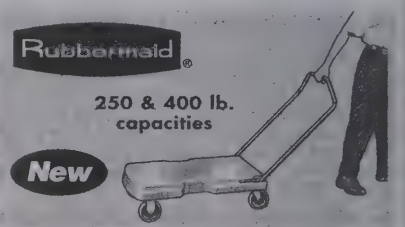
For salesmen, traveling stockers, and servicemen who carry material from vehicle to building. Strong, yet lightweight and easy to load inside any vehicle. 200 lbs. capacity. Welded tubular steel construction. Truck folds from 43¾ to 23¾". Foldable nose plate is 6" deep x 14" wide. Folding nose extension increases nose length from 6 to 12" to accommodate larger packages and improve stability under load. Equipped with long wearing 5" diameter x 1¼" wide polyolefin wheels and channel stairclimbers. Bicycle type plastic hand grip. Folded dimensions: 23¾H x 18W x 7"D; fully extended overall dimensions: 43¾H x 18W x 21"D. Shipped partially assembled. Blue enamel. Wesco Mfg. brand (CT-401).

**No. 2W669.** Super Collapsible Hand Truck. Shpg. wt. 20.0 lbs. List $106.00. Each ..... **$90.00**

## D BAGGAGE CADDY AND CASE TRUCK

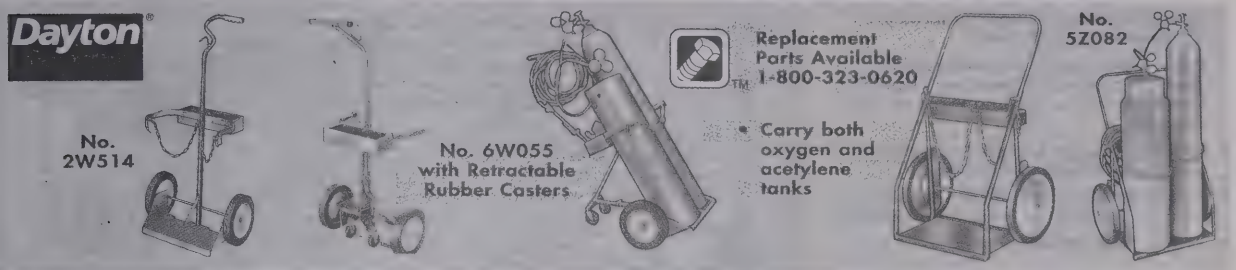
Designed for travelers, flight attendants, salesmen, or anyone who needs to transport luggage, cartons, and cases between the office, airports, hotels, customers. This rugged, lightweight truck has 110 lbs. capacity and is made of durable aluminum and high impact plastic. Compact truck is only 20 x 10¼x 3"D when folded. Fits in any car trunk, under airline seats, or in passenger's overhead compartment. Telescopic handle locks open at 37¼" high. Nonskid nose is 10⅜W x 8¼"D. 2¾" diameter wheels are covered on top and front to prevent bags from rubbing, and have an open back for easy stair climbing. Special "Y" design nylon strap holds load better than an elastic cord and is permanently attached to truck nose. Posi-lock strap adjusts easily to any load size and quickly secures load to truck. Gray/silver color. Wesco International brand (272129).

**No. 6W013.** Baggage Caddy and Case Truck. Shpg. wt. 4.5 lbs.List $72.80. Each ..... **$57.25**



## E TRIPLE TROLLEYS

Tough, honeycomb Duramold maintenance-free construction. Three handle positions to efficiently move loads. Non-skid surface to prevent load shifting, rounded corners, and mark-resistant casters. Won't rust or dent, crack, splinter, warp, or discolor. For offices, restaurants, tool rooms, any confined area where space is limited. When not is use, handle collapses for storage and trolley can be easily carried. Rubbermaid brand.



***New*** **No. 4MC27.** Deck size 32½ x 20½. 250 lb. Cap. Utility Trolley (440000GRAY). Shpg. wt. 23.0 lbs. List $102.40. Each ..... **$78.50**

***New*** **No. 4MC28.** Deck size 32½ x 20½. 400 lb. Cap. Standard Trolley (440100GRAY).. Shpg. wt. 24.0 lbs. List $132.00. Each ..... **$99.90**

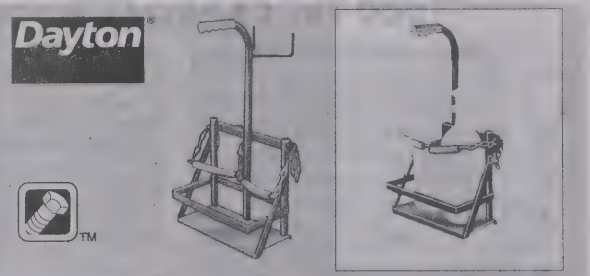
# WELDED STEEL CYLINDER TRUCKS, CARRIER, DOLLY, AND CADDY

## WELDING CYLINDER TRUCKS

Equipped to carry both oxygen and acetylene tanks plus hose and tools for welding and cutting jobs. Constructed of 1" diameter tubular steel. Link chain secures tanks to truck. Steel tool tray stores welding and cutting tips, goggles, gloves. Semi-pneumatic wheels. Red baked powder coat finish. Dayton brand.

**No. 2W514 and 6W055** trucks accommodate 7 to 8½" diameter and 35 to 51" high tanks which include oxygen tank styles D, Q, and S; acetylene tank styles WS and WF. Steel noseplate has divider bar to separate tanks. No. 6W055 also has solid rubber retractable casters for added load handling safety and greater maneuverability. Well suited for laboratories and hospitals or anywhere more mobility is needed. Can be used in upright or tilt position.

**No. 5Z082** truck accommodates 8½ to 12½" diameter and 23½ to 60" high tanks which include oxygen tank styles T, K, KL, LK; acetylene tank styles WTL, WK, WSL.



| Overall Width (In.) | Accommodates Tank Sizes (In.) Diameter | Height | Noseplate Dim. (In.) W | D | Tool Tray Dim. (In.) L | W | D | Wheels Size (In.) | Type | Load Capacity (Lbs.) | Stock No. | List | Each | Shpg. Wt. |

| 32¾ | 8½ to 12½ | 23½ to 60 | 24 | 12¾ | 22 | 5 | 3 | 16 x 1.75 | Semi-pneumatic | 500 | **5Z082** | 148.99 | **116.95** | 70.0 |

## CYLINDER CARRIER

- **Handles tanks 4 to 6¼" in diameter, 14 to 23" high**
- **1" dia. tubular steel construction**
- **13W x 9"D steel noseplate**

Accommodates 4 to 6¼" diameter and 14 to 23" high tanks which include oxygen style R; acetylene styles B and MC. Suitable for heating, ventilating, and air conditioning installations or where brazing must be done in basements, attics, or other confined spaces. Made of 1" diameter tubular steel with 13W x 9"D steel noseplate. Overall width is 15". Red baked powder coat finish. Dayton brand.

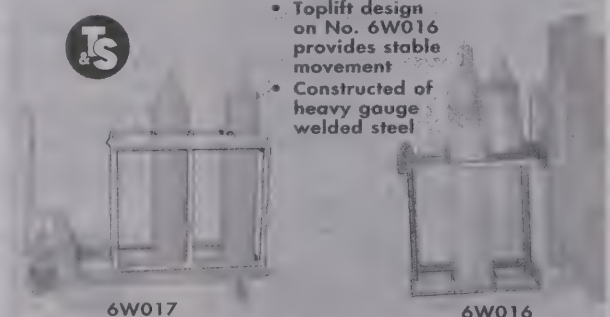
**No. 6W054.** Cylinder Carrier. Shpg wt. 12.0 lbs. List $46.50.
Each ..... $36.10

**Two hard plastic wheels on stand allow moving gas cylinder without lifting it**

## GAS CYLINDER DOLLY

**Simple, two-piece design** facilitates use without lifting gas cylinder. Locking knobs are included to secure the dolly to the gas cylinder. **Not to be used as a stand.**

**Designed for use with** 8" through 9½" diameter gas cylinders. Two hard plastic wheels are used to move the dolly. Cast-aluminum construction. T&S brand (CYL-DS-AL).



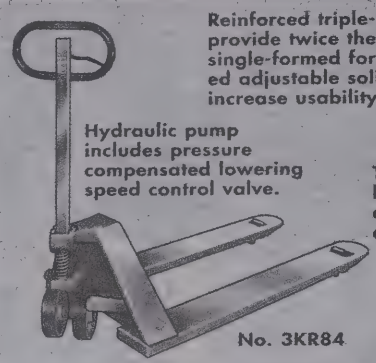
**No. 3KR48.** Shpg. wt. 35.0 lbs. List $242.81. Each ..... $194.25

## CYLINDER CADDIES

Designed for moving and storing gas cylinders. Both units accept cylinders up to 9½" in diameter and 60" in height which include oxygen tank styles O, Q, S, and acetylene tank styles WS and WF. Chain fasteners secure each cylinder in place. Painted blue enamel finish. T & S brand.

**No. 6W016 Fork Lift Cylinder Caddy** holds up to six cylinders. Supports for fork lift are located at center of tanks for greater stability. Cylinders roll in and out individually for convenient access without moving other cylinders.

**No. 6W017 Pallet Truck Cylinder Caddy** holds up to four cylinders. Single row carrying design allows access to areas too small for fork lift.



| Cylinder Capacity | Tank Dia. (In.) | Caddy Dimensions (In.) L | W | H | T & S Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|

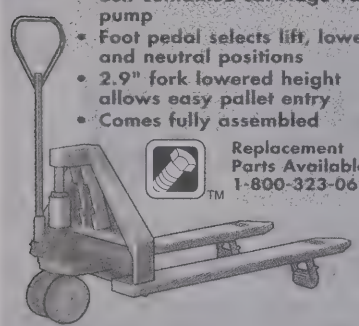
# HYDRAULIC HAND PALLET TRUCKS

## 5500 LB. CAPACITY HYDRAULIC HAND PALLET TRUCK

- Quick lift pump design requires only 12 strokes for full travel
- Ultra-urethane wheels and sealed dual-precision ball bearings require less than 75 lbs. pulling force at full capacity
- Hydraulic pump includes overload and upper limit relief valve
- Fingertip lever control for selecting raising, neutral, or lowering positions
- Articulating steering wheels

**Pallet truck includes** two steering wheels and two front load rollers. Steering wheels include bearing dust covers, providing longer life. Spring-loaded loop handle automatically returns to vertical position when not in use. Hydraulic pump design facilitates easy-access seal replacement. Chrome-plated hydraulic pump piston for long seal life. Red powder-coated finish. Dayton brand.

Dayton®



Replacement Parts Available 1-800-323-0620

### DAYTON LIMITED WARRANTY

**Dayton Electric Mfg. Co. warrants hydraulic unit, frame, and mechanical components for 2 years. Wheels, bearings, and bushings are warranted for 90 days. Warranty does not cover usage in cold storage, brine corrosive, or similar application. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

## 5000 LB. CAPACITY HYDRAULIC HAND PALLET TRUCK

- Self-contained cartridge valve pump
- Foot pedal selects lift, lower, and neutral positions
- 2.9" fork lowered height allows easy pallet entry
- Comes fully assembled

Replacement Parts Available 1-800-323-0620

Heavy-duty pallet truck rolls smoothly, handles solidly, and maneuvers in cramped areas. All-steel frame has dual C-channel formed steel forks with tapered tips. Rugged welded pallet entry slides eliminate roller replacement.

Self-contained cartridge valve pump design minimizes maintenance. Ergonomic, spring-loaded handle automatically returns to vertical position for added safety. Lifetime lubricated bearings eliminate need for grease. Articulating steer axle provides stability on uneven floors. Polyurethane wheels. Red enamel finish. Dayton brand.

### DAYTON LIMITED WARRANTY

**Dayton Electric Mfg. Co. warrants hydraulic unit, frame, and mechanical components for 2 years. Wheels, bearings, and bushings are warranted for 90 days. Warranty does not cover usage in cold storage, brine corrosive, or similar application. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

## 5000 LB. CAPACITY HYDRAULIC HAND PALLET TRUCK

- 2⁹⁄₁₀" lowered height of forks for easy pallet entry
- Handle mounted control lever
- Comes fully assembled

Replacement Parts Available 1-800-323-0620

Built for rugged use. Durable pressed steel fork frame and easy rolling poly wheels. Features nylon entry and steel exit rollers for easy pallet placement, and comfortable ergonomic handle with lower and neutral control lever for fingertip lift and greater security since both feet are always on the ground.

Only minimum maintenance required due to solid steel push rods which need no adjusting. Ten grease fittings prolong truck life. Hydraulic system incorporates the seal in the cylinder not the piston for more reliable operation. Pallet truck is light enough to reduce operator fatigue, yet strong enough to handle loads up to 5000 lbs. Polyurethane wheels. Powder painted safety orange finish. BT brand (BTL2300U).

### BT LIMITED WARRANTY

**BT warrants hydraulic unit and fork frame against defective components or workmanship for 2 years. Wheels, axles, bearings and seals are warranted for 90 days. Warranty does not cover usage in cold store, brine, corrosive, or similar applications. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

## 5000 LB. CAPACITY FOUR-WAY ENTRY PALLET TRUCK

- **1¾" lowered height and 33" width allow entry to pallets from all four sides**
- **3-position hand control**
- **Comes fully assembled**

**Low profile pallet truck** enters 48 x 40" pallets from all four sides. Allows entry into cut-outs on the 48" side as well as the 40" side. All-steel frame is reinforced to handle 5000 lb. capacity loads. Rugged welded pallet entry slides eliminate roller replacement. Wide loop control handle with lift, neutral, and lower functions allows finger-tip control. Lifetime lubricated bearings eliminate need for grease.

Rebuildable hydraulic system has hard chrome-plated pump piston and lift ram with polyurethane seals. Suspension system has heavy-duty thrust bearings. Complete with adjustable push rods, polyurethane wheels, steel load rollers, and a safety yellow finish. Rol-Lift brand.

### ROL-LIFT LIMITED WARRANTY

**Rol-Lift Corporation warrants hydraulic unit, frame and mechanical components for 2 years. Wheels, bearings, and bushings are warranted for 90 days. ## ERGONOMIC BATTERY POWERED HIGH RISE LIFT TRUCK

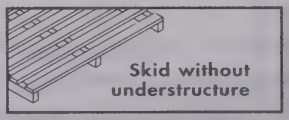
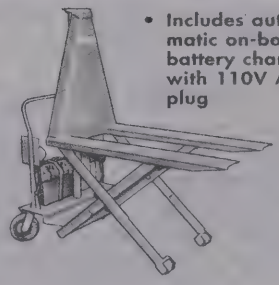
Suggested for reducing the risk factors of Awkward Posture, Force, and Repetition. See page 2493.



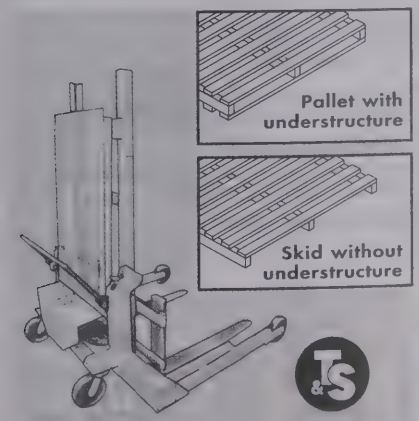
- **2500 lb. capacity**
- **31" raised height; 3½ lowered height**
- **Pendant hand control on coil cord**
- **12 volt deep cycle battery**
- **Two 8 x 2" swivel casters on rear; four 3" load rollers on front**
- **Each fork is 6½"W; overall fork width is 27"; usable fork length is 48"**



Ergonomic lift truck increases worker and machine efficiency and productivity. Reduces muscle fatigue and body injuries by bringing material closer to actual work height. Almost elminates bending, twisting, and lifting motions often associated with cumulative trauma injuries.

Battery-powered high rise lift truck for loading and unloading at worker-friendly height and lowers load for safe transporting. Heavy loads can be lifted by electric hydraulic power and manually moved without use of fork truck. Lift truck simply rolls under load to be moved. Foot brake may be set while loading and unloading for added safety. Use with wire baskets, tote boxes, and wooden skids having no understructure. Painted blue. T&S brand (HIPM-2748/DC).

**No. 6W805.❷** High Rise Lift Truck. Shpg. wt. 741.0 lbs. List $2161.01. Each.....**$2135.00**



❷ Product is covered by California Proposition 65. California purchases or shipments, see first page of Grainger Branch Listing or call any California branch.

- **Includes automatic on-board battery charger with 110V AC plug**

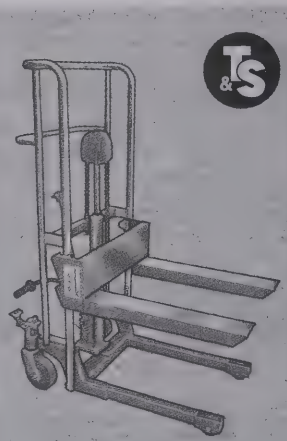
## POWER LIFT PALLET MOVER

- **Service range is 2" lowered to 60" raised**
- **Maximum capacity is 4000 lbs. at a load center of 18"**
- **Adjustable overall fork width is 8-37"**
- **Each fork is 4W x 36"L**
- **Moves easily with two rigid & two total-locking swivel 8" phenolic casters**
- **Heavy-duty 12V DC electric motor**
- **Deep-cycle marine style 12V DC battery**
- **Includes automatic on-board battery charger with 110V AC plug**
- **Overall size: 58W x 60L x 83⅛"H**
- **Straddle I.D. 49" clear**

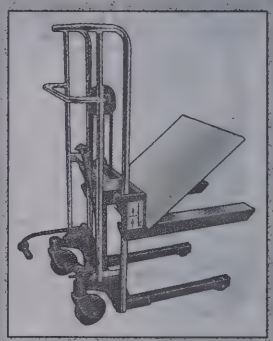
Enables one person to easily move fully-loaded pallets without use of a fork-lift truck. Unique straddle design works well with pallets and skids with and without an understructure. Ideal for loading and unloading semi-trailers.

Lift is raised and lowered with a pendant hand control on coil cord. Telescopic hydraulic cylinder includes an internally-mounted brass velocity fuse with a stainless steel spring. This feature prevents forks from falling in the event of hydraulic system failure. All welded-steel construction. Painted blue. T&S brand (PM/PS-60-DC).

**No. 3KR83.** Shpg. wt. 1000.0 lbs. List $3498.00. Each.....**$3322.00**



# PORTABLE HYDRAULIC LIFT AND ROLLER KITS



## PORTABLE HYDRAULIC LIFT

- **Lift, lower, move, and position loads**
- **880 lb. Capacity**
- **Service range is 3½" lowered to 44" raised**
- **Each fork is 4½W x 24"L**
- **Overall fork width is 22"**
- **Removable chrome platform is 23W x 24"L**
- **Manual hydraulic foot pump for raising and lowering platform**
- **Caster lock for securing unit during loading and unloading operations**
- **Chrome plated handle is 42" high**

User-friendly portable hydraulic lift provides reliable, powerful lifting for miscellaneous material handling jobs. This economical and attractive lift is ideal for commercial or industrial use. Platform may be removed when forks are needed. Hydraulic pump mechanism yields 3/4" of platform travel per stroke. Non-slip chain is used to raise and lower platform. Unit rolls easily on two rigid 3" and two swivel 6" polyurethane casters. All welded-steel construction. T & S brand (HYD-5).

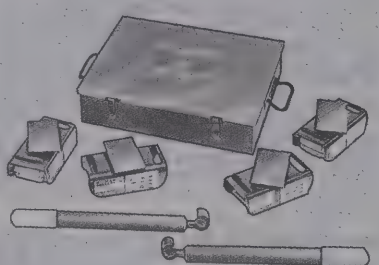
**No. 3KR71.** Shpg. wt. 175.0 lbs. List $715.45 Each.....**$573.00**

**Removable chrome platform for added versatility**

## ROLLER KITS

- **Low height for low clearance moves**
- **Superior load bearing distribution with recirculating chain design**
- **15, 40, and 60-ton kits have smooth chrome ball bearings**

Move heavy equipment easily, safely, and economically. Chain action rollers permit continuous movement over imperfect floor surfaces. Require little or no maintenance. Quality steel construction. Padded swivel tops provide nonslip surface and equalize load bearing on uneven surfaces. Pads on 15, 40, and 60-ton rollers are 1/2" thick neoprene; rubber belting on 3 and 8-ton rollers. All kits include four swivel rollers and two steering handles in a lockable steel carrying case. Hilman brand.

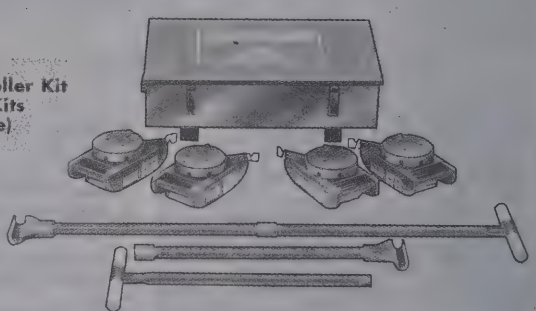


**No. 6W041 3-Ton Capacity Roller Kit.** 14" steering handles.

**No. 6W042 8-Ton Capacity Roller Kit.** 30" two part steering handles can be stored in portable case included. Can handle most light contractor and industrial duty jobs.

**No. 3VH82 15-Ton Capacity Roller Kit.** Four 3¾-ton capacity rollers.

**No. 6W043 40-Ton Capacity Roller Kit.** 48" two part steering handles. Swivel-Lock on rollers can engage every 45° for choice of swivel for turns or rigid for straight moves.



**No. 3VH83 60-Ton Capacity Roller Kit.** Four 15-ton capacity rollers.

**HILMAN ROLLERS**

**No. 6W041**
**3-Ton Capacity Roller Kit**
**(8-Ton Kit Also Available)**

**No. 6W043**
**40-Ton Capacity Roller Kit**
**(15 & 60-Ton Kits Also Available)**

Wesco Mfg. Co. warrants steel welds two years, hydraulics one year. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

No.4W476 Standard Steel Fork

400 & 750 lb. Capacity Models Feature a Wheel Lock (Shown); Floor Lock Comes Standard on 1000 lb. Capacity Models

**Enable one person to handle many difficult lifting and moving jobs.** Save time and manpower in the shop, warehouse, stockroom, receiving department and throughout the plant, wherever aisles and congested areas prevent use of larger equipment.

Loads up to 1000 lbs. can be moved with platform in lowered position. Platform can be hydraulically lifted up to 80" above floor. Footpedal downstroke raises platform up to 1¼"; foot operated release valve controls lowering. Provide stability, mobility, and load balance.

To help keep trucks from moving when loading and unloading, the 400 and 750 lb. capacity models are equipped with a positive action wheel lock; the 1000 lb. capacity models have a foot operated floor lock.

Welded steel construction. Orange enamel finish on all frames except No. 4W474. Black platforms and forks. Push handles. Wesco Mfg.

**No. 4W474 Superlight Lifter** has platform which lowers to floor. Magnesium frame and heavy gauge aluminum platform construction. 8 x 2" wheels.

**Nos. 3W219 and 4W472 Standard Lifters** have platform which lowers to floor. 8 x 2" ball bearing molded-on rubber wheels.

**Nos. 3W220 and 4W473 Deluxe Lifters** have two 3½" swivel casters in front, two 8 x 2" ball bearing molded-on wheels in back. Loads can be pushed horizontally on a level plane or tipped back; platform can be lowered within 5¾" from floor.

**Nos. 3W235 and 4W475 Heavy-Load Platform** models have 5" ball bearing phenolic wheels in front and two 4" swivel casters in back. Designed to roll horizontally at all times, platform and load cannot be tipped back. Platform is 24" and can be lowered within 5¾" from floor.

**No. 4W476 Standard Steel Fork** model has 3/4" thick x 3" wide x 18" long adjustable span forks. Maximum outside fork span is 22". Tips of forks will touch the ground with the back of forks 2¾" from ground.

**No. 4W477 Heavy-Load Fork** model has 1" thick x 3" wide x 30" long adjustable span forks with 25" maximum span. Base leg span is 25½" inside and 32" outside.

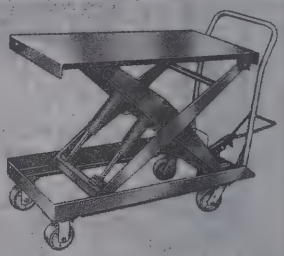
# ERGONOMIC LIFTING AND TILTING EQUIPMENT

**ERGONOMIC LIFTING EQUIPMENT is designed to increase worker and machine efficiency and productivity. It reduces worker fatigue and injuries by bringing material closer to actual work height. It also decreases bending, twisting, and lifting motions frequently associated with cumulative trauma injuries. The following products are specifically designed to provide these ergonomic features for a safer and more productive work environment.**

## HYDRAULIC ELEVATING CARTS



**No. 3KR46**
**400 Lb. Capacity**
**Single Speed Foot Pump**
**1" Lift Per Foot Stroke**

**No. 3KR47**
**800 Lb. Capacity**
**Single Speed Foot Pump**
**Over 1/2" Lift Per Foot Stroke**

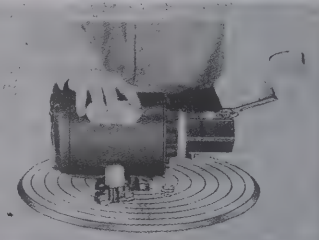
**No. 6W803**
**1000 Lb. Capacity**
**Single Speed Foot Pump**
**1" Lift Per Foot Stroke**

**No. 6W804**
**2000 Lb. Capacity**
**2-Speed Foot Pump**
**3/4 or 1½" Lift Per Foot Stroke**

Portable ergonomic elevating carts minimize worker bending and lifting. Materials can be easily loaded onto cart from table, lowered to safe transporting height, and raised to unload at destination. Move easily on four polyurethane casters; two locking swivel and two rigid. All steel construction. Nos. 3KR46, 3KR47, and 6W803 have chrome platforms. T&S brand.

No. 3KR47 features a double scissor design that allows compact table to achieve a raised height of 51" with 800 lb. load.

No. 6W804 features a 2-speed foot pump. Pressure-compensated control valve allows controlled lowering. Includes two hydraulic cylinders with built-in velocity fuse in each cylinder.



| Load Capacity (Lbs.) | Platform Size (In.) W x L | Height Lowered (In.) | Height Raised (In.) | Caster Size (In.) | Color | T&S Model | Stock No. | List | Each | Shpg. Wt. |

## BENCH TOP TURNTABLE

Suggested for reducing the risk factors of Awkward Posture, Force, and Repetition. See page 2493.

Designed for positioning and rotating loads up to 1000 lbs. Ideal for spray painting, assembly for access to different sides, repairs, and displays. 1/2" rugged steel plate rotates on ball bearings for smooth operation. 18" diameter, 3/4" high. Painted black. Includes serrated rubber top surface. T&S brand (TT-18).

**No. 6W802.** Bench Top Turntable. Shpg. wt. 40.0 lbs. List $139.00. Each.....$136.05

**DESK SPACE AT A PREMIUM?**

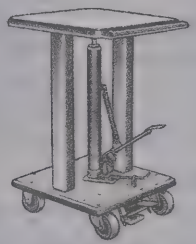
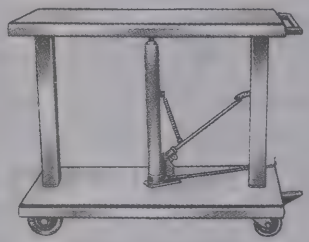
Our Grainger Electronic Catalog is a state of the art CD-ROM selection guide which features products and information from our General Catalog. The perfect reference tool when you need product and technical information on the road. Contact your local branch for more information.



# HYDRAULIC LIFT TABLES

WESCO Industrial Products, Inc.



- Foot operated hydraulic jack raises platform 3/8" with each downstroke of the pedal
- Hand operated lever releases jack and controls rate of descent

No. 3W488

No. 3W489

No. 3W490

No. 4W478

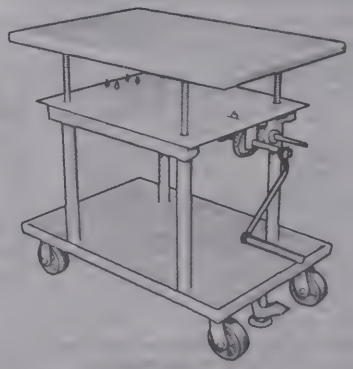
**Foot-operated hydraulic lift tables** for heavy-duty shop use such as lifting dies and castings, moving machine parts, positioning welder's work, leveling feed material for punch presses, conveyors and press brakes, and similar material handling jobs.

**200, 500, and 1000 lb. capacity models** have table and base constructed of 7-gauge steel; 6000 lb. capacity models have 1/4" thick steel table and base construction. All models reinforced at critical points for maximum strength. Casters, included, match load capacity and provide good mobility for moving heavy loads. Gray enamel finish. Wesco Mfg. brand.

**Ergonomic table tilt tops** Nos. 6W783, 6W784, and 6W785, sold separately, can be mounted to lift tables of matching dimensions to enable placing work at most convenient angle.

**No. 3W488 200 Lb. Capacity Table.** Table top revolves 360° allowing loads to be positioned easily and accurately. Includes four 3" polyolefin chemical-resistant swivel casters. Shipped unassembled.

**Nos. 3W489 and 3W490, 500 and 1000 Lb. Capacity Tables,** have two telescoping posts which help stabilize and support loads during operation. Includes bar handle and four 4" phenolic resin roller bearing casters, two rigid and two swivel. Foot operated floor lock holds table in position. Shipped fully assembled.



**Nos. 4W478 and 4W479, 6000 Lb. Capacity Tables,** have four telescoping posts which help stabilize and support heavier loads. Includes bar handle and four 6" phenolic resin roller bearing casters, two rigid and two swivel. Foot operated floor lock holds table in position. Shipped fully assembled.

Replacement Parts Available 1-800-323-0620

| Load Capacity (Lbs.) | Height Range (In.) Lowered | Raised | Table Top (In.) L | W | Wesco Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|

# MECHANICAL LIFT TABLE

- Heavy-duty design provides 2000 lb. capacity
- Provides easy and safe moving and lifting of products
- Two-speed hand crank design
- 24" wide x 36" long platform
- Travel range is 24" lowered to 42" raised
- Moves easily with two rigid and two swivel 5" polyurethane casters
- Foot-operated floor lock minimizes movement during loading and unloading operations

**Adjustable-height portable table** is well suited for a wide variety of material handling applications. Mechanical crank mechanism provides positive height adjustment without downward drift. Two-speed gear mechanism moves loads at 1/8" per crank rotation and light loads at 5/16" per crank rotation. All welded steel construction. T&S brand (MT-2436-LP).

**No. 3KR80.** Shpg. wt. 350.0 lbs. List $875.00. Each.....$787.50

## ORDERING HAS NEVER BEEN EASIER!

**Whether you phone, fax, write or stop by your local branch to place an order, Grainger can tailor sales terms to meet your needs. Ask about establishing an open line of credit or pay with your VISA, MasterCard, or American Express card.**

# ERGONOMIC HYDRAULIC LIFT TABLES

## ECONOMICS OF ERGONOMICS

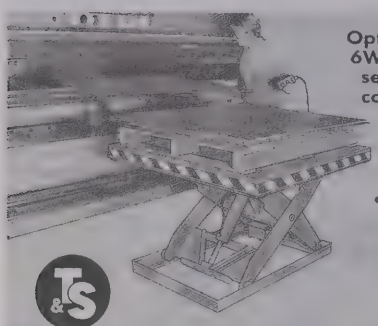
Ergonomic equipment has a payback from at least three different sources:

**1) Increase in efficiency**—If a worker gets tired after six hours of labor instead of four hours, efficiency is increased by over 30% and an added benefit of higher productivity for an additional two hours is earned.

**2) Decrease in lost time and medical expenses which consequently lowers worker compensation costs**—According to the National Safety Council, lost time accidents cost billions of dollars a year. The average lost time injury costs $18,000.

**3) Minimize OSHA fines for ergonomic violations**—OSHA fines can range from shutting down operations at a single work station to shutting down an entire plant; from $5,000 to millions of dollars.

**Example of Equipment Cost/Efficiency Relationship:** What percentage of savings in labor is needed to pay for a $2,000 piece of equipment in one year? Assume cost of labor and burden at $20 per hour:



No. of Hrs. to Pay for Equipment: $\frac{\$2{,}000 \text{ (Equipment Cost)}}{\$20 \text{ (Labor per Hour)}} = 100 \text{ Hrs.}$

Percent Increase in Efficiency to Pay for Equipment in One Year: $\frac{100 \text{ Hrs.}}{2{,}080 \text{ Hrs. per Year}} = 4.8\%$

If efficiency can be increased by only 4.8%, the $2,000 purchase can be paid for in one year. This 4.8% equates to saving 23 minutes out of every 8 hour day on a job. Additional savings are realized by reducing lost time and medical expenses.

## SCISSOR LIFT TABLES

Suggested for reducing the risk factors of Awkward Posture, Force, and Repetition. See page 2493.

**Optional foot control No. 6W796 is also available separately when hand control is undesirable; see page 2221.**

- **Full stroke travel time is 8 seconds**

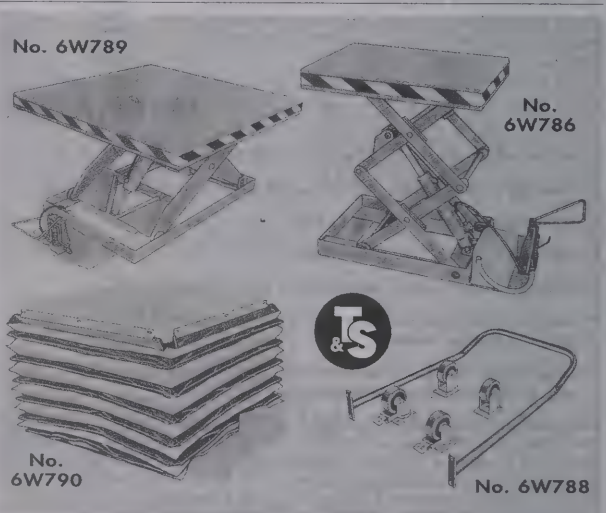
### ELECTRIC HYDRAULIC SCISSOR LIFT TABLES

All-steel electric hydraulic scissor lift tables are typically used by all types of manufacturing and warehouse facilities. Safety features include: electric pinch point guard to protect from pinch points during lowering of table (OSHA Pinch Point Provisions); velocity fuse to stop falling due to loss of hydraulic pressure; fused 24V AC pushbutton control which meets OSHA requirements; maintenance prop; and upper travel limit switch to stop table at maximum height, reducing motor wear. 2 HP, 208-230/460V, 3-phase, 60 Hz totally enclosed motor, (prewired for 230V). No. 6W791 lift table can be used with Nos. 4W505 and 4W506 carousel pallet turns, sold separately, which mount in prepunched holes in tables. To order pallet turns, see page 2312.

| Platform Size (In.) | Load Capacity (Lbs.) | Height Lowered (In.) | Height Raised (In.) | T&S Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| **48 x 48** | 3000 | 7 | 43 | EHLT-4848-3-43 | **6W791** | $3570.00 | **$3453.00** | 770.0 |
| **30 x 60** | 3000 | 7 | 43 | EHLT-3060-3-43 | **6W792** | 3680.46 | **3555.00** | 728.0 |

### HYDRAULIC SCISSOR LIFT TABLES

**Foot pump activated lift tables.** Used by all types of manufacturing and warehouse facilities. Standard features include torsion tubes for side to side stability; velocity safety fuse to stop falling due to loss of hydraulic pressure; flow control valve for uniform lowering speed; 3 x 5 x 1/4" thick angle iron base; and dual speed foot pump. 10-gauge steel deck pivots up for easy maintenance.



Carousel pallet turns, Nos. 4W505 and 4W506, can be mounted in prepunched holes in No. 6W789 lift table only. See page 2312.

#### ORDERING DATA

| Load Cap. (Lbs.) | T&S Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **750** | SCTAB750D | **6W786** | $1318.74 | **$1223.00** | 248.0 |
| **1000** | SCTAB1000 | **6W787** | 1229.73 | **1139.00** | 340.0 |
| **2000** | SCTAB2000 | **6W789** | 2094.60 | **1918.00** | 373.0 |

#### LIFT TABLE SPECIFICATIONS

| Description | Load Cap. (Lbs.) | Platform Size (In.) | Travel Per Stroke (In.) Low | Travel Per Stroke (In.) High | Height (In.) Lowered | Height (In.) Raised |
|---|---|---|---|---|---|---|
| Double Scissor Table | 750 | 20 x 40 | 1¾ | 3½ | 7 | 35 |
| Single Scissor Table | 1000 | 20 x 40 | 1 | 2 | 7 | 31 |
| Single Scissor Table | 2000 | 42 x 42 | 3/4 | 1½ | 8 | 32 |

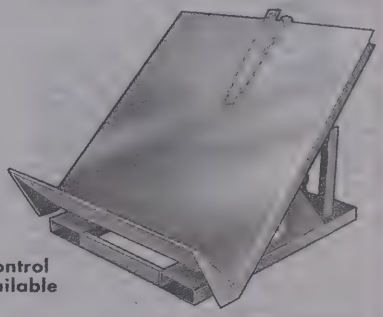
**OPTIONAL ACCORDION SKIRT KIT.** For use with scissor lift table No. 6W789. Shields workers from putting foreign objects including hands, feet, legs, and arms in or around pinch points during raising and lowering of scissor table. Steel frame is covered with 23 oz. vinyl coated polyester fabric with 3" convolutions. Yellow and black alternating color venting for expulsion of air during lowering. Steel rods for uniform raising and lowering. Mounting hardware included. T&S brand (SKK-1).

**No. 6W790.** Shpg. wt. 30.0 lbs. List $342.04. Each ..... **$324.25**

**OPTIONAL HANDLE AND CASTER KIT.** Makes foot pump scissor tables Nos. 6W786 and 6W787 easy to move. Tables are ready to accept handle and locking casters with all hardware included in the kit. Kit includes handle made of tubular steel 18W x 32"H and four 3½ x 1⅜" polyurethane casters; two are double locking swivel and two are rigid. T&S brand (CHK-1).

**No. 6W788.** Shpg. wt. 22.0 lbs. List $90.82. Each ..... **$88.00**

# ERGONOMIC LIFTING AND TILTING EQUIPMENT



**ERGONOMIC LIFTING EQUIPMENT** is designed to increase worker and machine efficiency and productivity. It reduces worker fatigue and injuries by bringing material closer to actual work height. It also decreases bending, twisting, and lifting motions frequently associated with cumulative trauma injuries. The following products are specifically designed to provide these ergonomic features for a safer and more productive work environment.

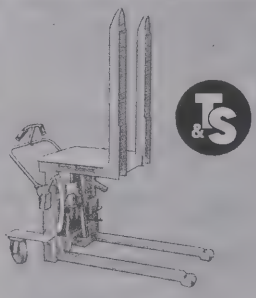
## EFFICIENCY MASTER TILT TABLE

- **Electric hydraulic tilting**
- **Hardened pins and bushings at all pivot points**
- **2 HP, 208-230/460V, 3-phase, 60 Hz motor (prewired for 230V)**
- **Fused 24V AC hand control for added safety**
- **4000 lb. capacity**
- **48" front to back**

Tilts pallets, crates, boxes, and baskets to 45° in 7 seconds to facilitate loading and unloading operations. Restraining chain secures containers during tilting. Table has all welded steel construction for long life. Unique design minimizes pinch points which meets OSHA requirements. 48 x 48" platform. Painted blue. T&S brand (EM200-4848-4).

**No. 6W798.** Shpg. wt. 974.0 lbs. List $2725.53. Each.....**$2687.00**

- **Optional foot control No. 6W796 available separately.**
**See page 2179**

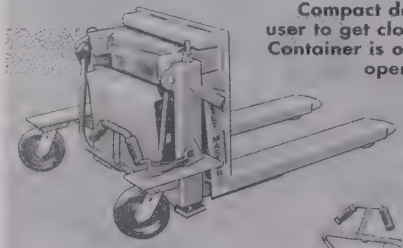


## PORTABLE TILTER

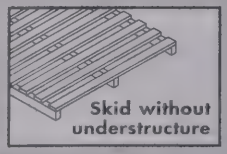
- **Pendant hand control on coil cord**
- **Reliable 2.5 HP DC electric motor**
- **Heavy-duty 12V DC battery yields over 250 complete cycles before charging is required**
- **Internal 10 amp battery charger with 110V AC plug**
- **Battery charge level indicator gauge**
- **Displacement-style cylinder for maximum longevity; increases seal life and minimizes system contamination**
- **Emergency hydraulic system lock-up is provided with internal brass velocity fuse**
- **Special precious metal DC motor contactor for increased reliability and safety**
- **4000 lb. capacity at a 20" load center**
- **8 x 2" phenolic swivel casters**
- **Welded-steel hydraulic reservoir with 1/4" thick walls**
- **Flexible-plastic dust and debris guard is 16 mil thick**

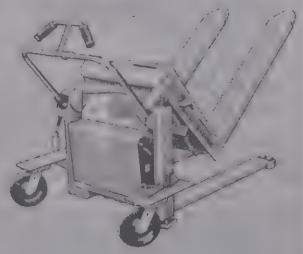
**For moving loads from warehouse to factory floor** or from one work station to another at which point load can be tilted into worker-friendly position. Allows workers to unload deep crates or baskets with minimum bending and lifting. Tilts from horizontal to 90° angle. Not for use with pallets with undercarriage. Steel construction. Lowered height of forks is 3½". Painted blue. T & S brand (TM-40-DC).

**No. 6W797.** ❷ Shpg. wt. 845.0 lbs. List $3313.00. Each.....**$3293.00**



❷ These products are covered by California Proposition 65. California purchases or shipments, see first page of Grainger Branch Listing or call any California branch.





**Ergonomic-style handle for maximum maneuverability and operator comfort**

**Compact design allows user to get closer to material. Container is only 12½" from operator.**

**Skid without understructure**

**Adjustable automatic floor lock engages as forks tilt up**

**LOOK FOR THE MANY NEW PRODUCTS WE HAVE ADDED!**

**Check your frequently-ordered product categories for line extensions and new product offerings. Look for the "New Products" header at the top of the page and the "New" designation next to the stock number.**

# ERGONOMIC LIFTING AND TILTING EQUIPMENT AND WORKER PLATFORM AND STEP

Suggested for reducing the risk factors of Awkward Posture, Force, and Repetition. See page 2493.

## ADJUSTABLE PALLET STAND

- **4000 lb. capacity**
- **Three height adjustments: 20¼, 30½, and 35"**
- **Adjust height, then load pallet**
- **42 x 40" platform**

Economical way to hold pallet at worker-friendly height. Counterbalance design allows one person height adjustment when unloaded. Three height adjustments. Height is adjusted, then pallet is loaded. Load must be removed prior to readjusting height. Nos. 4W505 and 4W506 carousel pallet turns, available separately, can be mounted on prepunched holes in stand. Painted blue. T&S brand (PS-4045).

**No. 6W800.** Shpg. wt. 244.0 lbs.
List $343.18. Each ..... **$329.50**

## SELF-ELEVATING TABLE

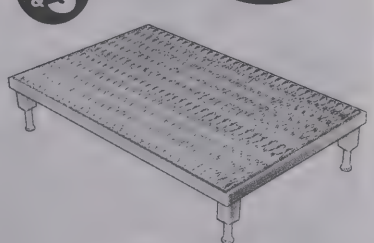
- **460 lb. capacity**
- **Welded steel frame; 20 x 20" platform**
- **Overall dimensions (including casters): 28L x 21¼W x 36"H**
- **Service range 11-33"**

Automatically adjusts height of table top as work material is loaded and unloaded. As weight is removed, springs allow table to rise. Springs can be disconnected as needed for lighter loads to achieve desired results. Included chart gives approximate number of springs needed for weight ranges up to 460 lbs. 3½ x 1¼" polyurethane casters; two double locking swivel, two rigid. Blue enamel finish. T&S brand (ETS-460).

**No. 6W799.** Shpg. wt. 158.0 lbs.
List $893.62. Each ..... **$850.50**

Suggested for reducing the risk factors of Awkward Posture, Static Posture, and Repetition. See page 2493.

## TILTING WORK STAND



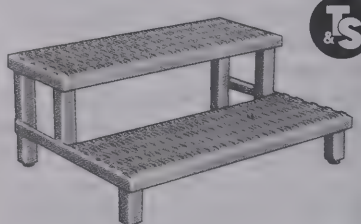
- **300 lb. capacity**
- **Raises platform from 31½ to 42"H**
- **Tilts platform work stand to 30°**
- **Four polyurethane swivel casters, two double locking**
- **24 x 24" platform**

Positions load at worker-friendly height and angle to facilitate production and reduce injuries. Four 3½ x 1¼" polyurethane swivel casters (two double locking) allow unit to be transported from one work area to another while loaded. All steel construction frame, powder-coated silver platform. T&S brand (WT-2424).

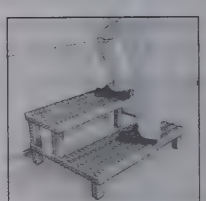
**No. 6W801.** Shpg. wt. 85.0 lbs.
List $544.19. Each ..... **$522.00**

## ADJUSTABLE HEIGHT WORKER PLATFORM

New



- **Height of each leg can be individually adjusted**
- **500 lb. maximum capacity**
- **Minimizes worker fatigue and potential for cumulative trauma injury**
- **Choose between serrated and ergo-matting style platforms**



Sturdy adjustable platform elevates worker to a more ergonomically-correct position such as in shop applications with multiple-shift employees operating the same piece of machinery. Serrated style platform surface ensures safe footing in most wet environments. Ergo-matting style platform surface is ideal for dry environments where operators will be standing for long periods of time. All welded-steel construction. T&S brand.

| Platform Surface | Platform Size (In.) | Service Range (In.) | T&S Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| Serrated | 24 x 24 | 9 to 14 | AHW-H-2424 | ***New*** **4UP76** | $227.51 | **$182.25** | 35.0 |
| Serrated | 24 x 36 | 5 to 8 | AHW-L-2436 | **3KR38** | 224.44 | **179.75** | 35.0 |
| Ergo-matting | 24 x 48 | 9 to 14 | AHT-H-2448 | ***New*** **4UP75** | 264.22 | **211.50** | 75.0 |

## ADJUSTABLE HEIGHT WORKER STEP

New

- **500 lbs. maximum capacity**
- **Heavy-duty construction for long life**
- **Individual step size is 12" wide**
- **Lower step height is adjustable from 7 to 11" high**
- **Non-adjustable upper step is fixed 7" higher than lower step**

Ideal for use as a semi-permanent step or an adjustable height working platform. Serrated-style surface ensures safe footing in most environments. Height is adjustable by simply screwing legs into or out of leg base. Height of each leg may be adjusted individually. All welded-steel construction. T&S brand.

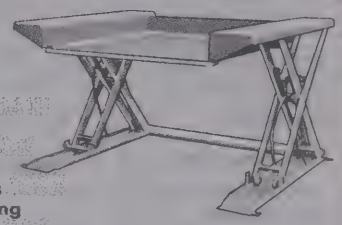
| Overall Size (In.) | Step Size (Ea.) (In.) | T&S Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **24W x 24L** | 12W x 24L | ASP-24 | ***New*** **4UP77** | $236.33 | **$189.25** | 28.0 |
| **24W x 36L** | 12W x 36L | ASP-36 | **3KR39** | 250.69 | **200.75** | 40.0 |

# ERGONOMIC LIFTING AND TILTING EQUIPMENT

**ERGONOMIC LIFTING EQUIPMENT is designed to increase worker and machine efficiency and productivity. It reduces worker fatigue and injuries by bringing material closer to actual work height. It also decreases bending, twisting, and lifting motions frequently associated with cumulative trauma injuries. The following products are specifically designed to provide these ergonomic features for a safer and more productive work environment.**

## GROUND LIFT ELECTRIC HYDRAULIC SCISSOR TABLE

- **Achieves 36" raised platform height in 16 seconds**
- **Pallet truck accessible**
- **2 HP, 208-230/460V, 3-phase, 60 Hz motor (prewired for 230V)**
- **4000 lb. capacity**
- **Fused 24V AC pushbutton hand control, NEMA 4**
- **50L x 52W" platform**



Utilized by all types of manufacturing and warehouse facilities. Designed specifically for use when powered fork trucks are not available. Pallets can be loaded onto table with pallet trucks and raised to appropriate work height. Well suited for smaller companies without access to fork truck.

Safety features include: electric toe guard to shield worker from platform edge pinch points during lowering of table (OSHA Pinch Points Provision); velocity fuses to stop free fall due to loss of hydraulic pressure; fused 24V AC pushbutton hand control; and maintenance prop. Overall size: 74W x 56L x 8"H. T&S brand (EHLTG-5250-4-36).

**No. 6W794.** Shpg. wt. 1674.0 lbs. List $4745.99. Each.....**$4697.00**

**OPTIONAL ACCORDION SKIRT KIT.** Shields workers from contacting pinch points during raising and lowering of scissor table. Helps keep debris away from moving parts. Constructed of steel reinforced 23 oz. vinyl coated polyester fabric with 3" convolutions. Yellow/black alternating color. Steel rods allow uniform raising and lowering. Mounting hardware included. T&S brand (SKK-3).

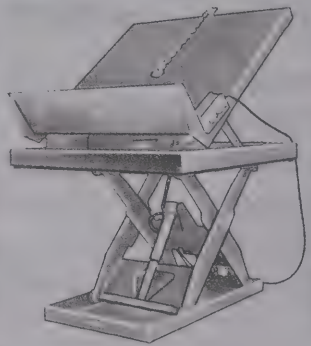
**No. 6W795.** Shpg. wt. 51.0 lbs. List $642.16. Each.....**$608.00**

**Optional foot control No. 6W796 is also available separately when hand control is undesirable; see listing below.**

**No. 6W795 Accordion Skirt Kit**

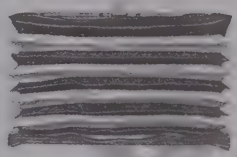
## ELECTRIC HYDRAULIC LIFT AND TILT SCISSOR TABLE

- **Lifts from 11" lowered height to 47" raised height in 8 seconds**
- **Tilts load to 45° angle in 12 seconds**
- **2 HP 208-230/460V, 3-phase, 60 Hz motor (prewired for 230V)**
- **3000 lb. capacity**
- **Fused 24V AC hand control**
- **48 x 48" usable platform**



Typically used by all types of manufacturing and warehouse facilities. Performs both lifting and tilting operations. Restraining chain and lip keep load in place during tilting.

Safety features include: electric toe guard to shield worker from pinch points during lowering of table (OSHA Pinch Points Provision); velocity fuses to stop travel due to loss of hydraulic pressure; fused 24V AC hand control; upper limit travel switch to stop travel at maximum height reducing motor wear; and maintenance prop. Hand control used for raising, lowering, and tilting meets OSHA requirements. T&S brand (EHLTT-4848-3).

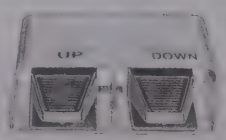


**No. 6W806.** Shpg. wt. 1203.0 lbs. List $5449.95. Each.....**$5270.00**

**OPTIONAL ACCORDION SKIRT KIT.** Shields workers from contacting pinch points during tilting and leveling of table platform. Helps keep debris away from moving parts. Constructed of steel frame and 23 oz. vinyl coated polyester fabric with 3" convolutions. Yellow/black alternating color. Steel rods enable uniform raising and lowering. Mounting hardware included. T&S brand (SKK-2).

**No. 6W807.** Shpg. wt. 133.0 lbs. List $513.37. Each.....**$486.75**

**No. 6W806**



**No. 6W807 Accordion Skirt Kit**

## FOOT CONTROL

For use with electric hydraulic lifts Nos. 6W791, 6W792, 6W793, 6W794, and 6W798. Ideal when operation of On/Off switches by hand is either undesirable or unsafe. Plugs in when hand control is removed. Switch contacts are SPDT and UL Listed. Double pedal design. Includes OSHA required steel foot shield. T&S (FC-1).

**No. 6W796.** Shpg. wt. 13.0 lbs. List $175.00. Each.....**$165.25**

# HOIST SELECTION GUIDE

## HOIST SELECTION GUIDE

| In order to properly select a hoist, consider the following: | | Example:** | |
|---|---|---|---|
| **1. WEIGHT CAPACITY** | Determine the maximum gross weight you will apply to it. (Remember to add for Lifting, Supporting, and Positioning devices.) | **1. 2400 lbs.** | This weight includes all the components of the load (pallet, drum, sling, etc.) |
| **2. INPUT VOLTAGE** | Nominal Voltage*: Single Phase 115 or 230 volt Three Phase 208, 230, or 460 volt | **2. 230V, 3-Phase** | Nominal voltage available. |
| **3. LIFT SPEED** | The speed you want to lift the load. Industry standard for 1/8 - 1 ton is 16 ft./min. (FPM). 2 ton is 8 FPM. | **3. 8 FPM** | Common lift speed for a 2-ton hoist. |
| **4. CHAIN LENGTH (Lift)** | Measure from the point of mount to the floor. | **4. 12 Feet** | Height from I-beam to floor. |
| **5. LOAD MOVEMENT** | Determine actual distance the load must be lifted and lowered. | **5. 7 Feet** | Actual lift height |
| **6. NUMBER OF LIFTS** | Determine the number of lifts per hour. | **6. 15 Lifts** | Amount of lifts per hour for job |
| **7. START/STOPS** | The number of times the operator activates the pushbutton control. Rule of thumb: 8 start/stops per cycle (load lift and lower). | **7. 120 Start/Stops** | 15 x 8 = 120 |
| **8. OPERATING TIME** | All hoists are rated with a "Service Classification". To determine this classification for your job, use the following calculation: | **8. Calculation:** | |
| **Minutes Run Time = Then calculate:** | Feet of Load Lift x Lifts per Hour x 2 ÷ Hoist Speed | 7 ft. x 15 lifts x 2 ÷ 8 FPM =26.25 Min. Run Time/Hr. | |
| **% On Time =** | Minutes Run Time ÷ 60 | 26.25 ÷ 60 = 44% On Time/Hr. | |
| Once a percent On Time is determined, see "Hoist Service Classification" to determine the hoist needed. | | **Selected Hoist:** With the above known, the selected hoist should offer: 2-ton capacity, 230V, 3-phase operation, 15 ft. lift, 8 FPM, and have a 44% or "H4" Service Classification. | |

(*) Nominal voltage is ±10% of rated voltage. (**) Example is based on having Nominal Voltage and 80°F ambient still air. Higher temperatures and/or voltages outside of nominal range will result in reduced duty cycles.

## HOIST SERVICE CLASSIFICATIONS

| Service Classification | Typical Areas of Application |
|---|---|
| **H2** | Light machine shop and fabricating industries and service and maintenance work, where loads and use are randomly distributed with capacity loads infrequently handled, and where total running time of equipment does not exceed 15% of the work period and 75 start/stops per hour. |
| **H3** | General machine shop, fabricating, assembly, storage, and warehousing use, where loads and operation are randomly distributed, with total running time of equipment not exceeding 25% of the work period and 150 start/stops per hour. |
| **H4** | High volume handling in steel warehousing, machine shops, fabricating plants, mills, and foundries. Manual or automatic cycling operations in heat-treating and plating operations. Total running time of equipment normally approaches 50% of the work period and 300 start/stops per hour. |
| **H5** | Bulk handling of material in combination with buckets, magnets, or other heavy attachments. Equipment is often cab operated. Duty cycles approaching continuous opertion are frequently necessary. |

# CM SHOPSTAR® 300 AND 600 LB. ELECTRIC CHAIN HOIST

- **Compact, lightweight, powerful**

**STANDARD OVERLOAD DEVICE**—Protects hoist and operator from dangerous overloads.

**THERMALLY PROTECTED HOIST DUTY MOTOR**—provides greater efficiency with less heat build-up for higher duty cycles.

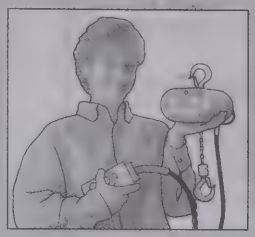
**DUAL BRAKE SYSTEM**—Electro-mechanical motor brake and regenerative braking.

**LIFETIME GEAR TRAIN LUBRICATION**—No oil changes, dripping, product contamination, or disposal concerns. Ideally suited for food, paper, texile, pharmaceutical, and other clean environment applications.

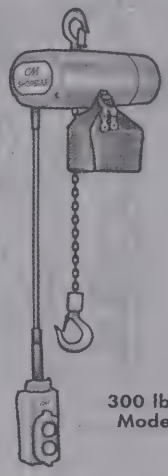
**PRECISION BEARINGS**—For longer gear-train life and smoother oepration.

**TOTALLY ENCLOSED NON-VENTILATED HOIST FRAME**—Protects motor from environmental contamination.

**NEMA 12 INDUSTRIAL RATED CONTROL STATION**—Uses low current 115V control.



**5:1 DESIGN FACTOR**—Meets or exceeds ASME/ANSI B30. 16 standards.



**Ruggedly built for standard industrial applications.** Made in U.S.A.

**H4 service classification**-- See page 2222

In addition to our new product listings from the leading brand names, Grainger now offers you more than 78,000 products to meet your maintenance, repair, or operation supply needs.

# 300 AND 500 LB. ELECTRIC HOISTS AND CHAIN CONTAINERS

## 300 AND 500 LB. ELECTRIC CHAIN HOISTS

**Safety Latch Swivel Hooks** — Provide positive load engagement.

**115 Volt Pushbutton Control** — Rocker switch pushbutton design gives "up", "off" and "down" positions while meeting NEMA 1 requirements.

**12" Power Cord with Three Prong Plug** — Offers simple installation to 115V, 60 Hz outlets.

**Light Commercial, Intermittent Duty** — Offers 10 minutes "ON" time per hour and thermal protection.

**Upper and Lower Limit Switches** — Protect the load and hoist by preventing chain overtravel.

**Reliable Electric Disc Motor Brake** — Stops and holds the load, even with loss of power.

**Grease Gear Case Lubrication** — Provides extended gear life.

**7/32" Steel Chain** — Provides extended chain wear.

**H2 Service Classification** — See page 2222

Dayton compact multipurpose electric chain hoists are economically suitable for light-duty use. The 500 lb. model is double chained. UL Listed (SA5495). Dayton brand.

**Replacement Parts Available**
**1-800-323-0620**

| Maximum Capacity (Lbs.) | Chain Lift (Ft.) | Lift Speed (Ft./Min.) | Volts 60 Hz | Motor HP | Motor Phase | Amps at Low Voltage | Control Cord (Ft.) | Min. Dist. Between Hooks (In.) | Housing Dimensions (In.) L | W | D | Stock No. | List | Each | Shpg. Wt. |

## 500 LB. ELECTRIC WIRE ROPE HOIST

**Safety Latch Swivel Hooks** — Provide positive load engagement.

**115 Volt Pushbutton Control** — Rocker switch pushbutton design gives "up", "off" and "down" positions while meeting NEMA 1 requirements.

**12" Power Cord with Three Prong Plug** — Offers simple installation to 115V, 60 Hz outlets.

**Light Commercial, Intermittent Duty** — Offers 10 minutes "ON" time per hour and thermal protection.

**Paddle Limit Switch** — Provides positive protection in the "up" direction.

**Reliable Electric Disc Motor Brake** — Stops and holds the load, even with loss of power.

**Grease Gear Case Lubrication** — Provides extended gear life.

**H2 Service Classification** — See page 2222

Dayton compact electric wire rope hoists are economically suitable for light-duty use. UL Listed (SA5495). Dayton brand.

**Replacement Parts Available**
**1-800-323-0620**

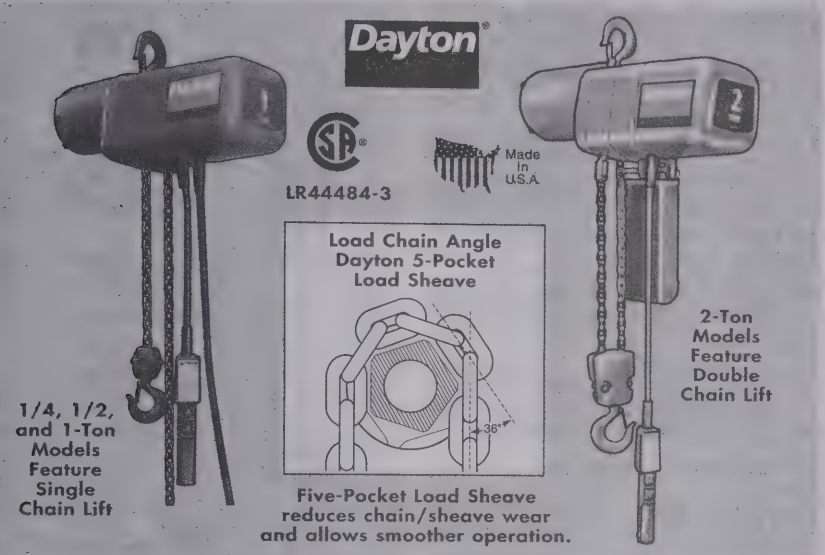
**WARNING:** Hoists listed above are not to be used for lifting, supporting or transporting people, or lifting loads over people.

Dayton

Keeps surplus chain away from work area.



Suspended from bottom of hoist.

## COIL CHAIN CONTAINER

**For use with Dayton 300 and 500 lb. capacity electric chain hoists listed above.**

| Height (In.) | Width (In.) | For Use with Hoist Models: | Chain Lift (Ft.) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **10** | 3½ | 4Z358 (300 lb. cap.)<br>4Z811 (500 lb. cap.) | 10 | **3KR20** | $40.16 | **$34.50** | 2.0 |

# 1/4, 1/2, 1, AND 2-TON ELECTRIC CHAIN HOISTS

**24 Volt Pushbutton Control with Strain Relief** — Ergonomic design meets NEMA 3R requirements with low voltage for safer operation.

**Adjustable Limit Switches** — Protect the load and hoist by preventing overtravel in varying hoist applications.

**Overload Limiting Clutch** — Prevents hoist damage from heavier-than-rated loads.

**Multiple Disc Motor Brake** — Stops and holds the load, even with loss of power.

**Oil Bath Gear Case Lubrication** — Provides cooler operation and longer gear life through positive lubrication.

**Safety Latch Hooks** — Rigid top and swivel load hooks provide positive load engagement.

**15-Foot Power Cord** — Provides convenient connection to the power source.

**H4 Service Classification** — Refer to page 2222

Designed and built for most industrial lifting applications. Meets or exceeds all industry standards, including ASME/ANSI B30.16 and CSA LR 44484-3 requirements. Dayton brand.

**Replacement Parts Available**
**1-800-323-0620**

*) Single phase hoists are wired for 115V, 60 Hz operation; three phase hoists for 460V, 60 Hz operation. Hoist easily reconnects for use at 230VAC.

**WARNING:** Hoists are industrial duty units and are not designed for lifting, supporting, or transporting people or lifting loads above people.

# ELECTRIC CHAIN HOISTS AND CHAIN CONTAINERS

## CM VALUSTAR® 1/4, 1/2, 1, AND 2-TON ELECTRIC CHAIN HOISTS

FREE DELIVERY on orders of $900 or more
See Freight Policy

Chain Container Not Included. Order Separately, See Below.

1/4, 1/2, and 1-Ton Models Have Single Chain Lift

Replacement Parts Available
1-800-323-0620

**Ruggedly Built for Standard Industrial Applications** — Produces more motor starts and run time with less maintenance.

**Life Lubricated Gears** — No oil changes, dripping, product contamination, or disposal worries. Ideal in food, paper, textile, and pharmaceutical applications.

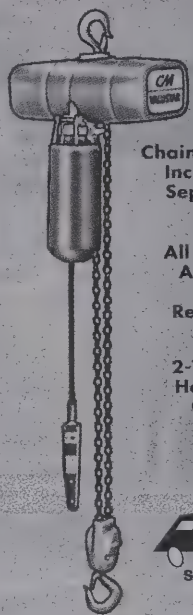
**Ergonomically Designed Snap-Action Control Station** — NEMA 4 station is designed to reduce operator fatigue and uses low current 115V control voltage for added operator protection.

**Machined Liftwheel with Calibrated CM Hoistalloy Chain** — Precision fit assures long chain life and smooth operation.

**Solid-State Starting** — Increased reliability and reduced maintenance on single phase hoists. No contacts to arc, burn, or corrode.

**Protector Overload Limiter** — Protects hoist and operator from dangerous overloads.

**Ease of Maintenance** — Complete OSHA inspection in minutes and no special tools required.



**Low Headroom** — Allows use in restrictive areas.

**Powder Paint Finish** — Keeps your hoist looking new for years, even in corrosive environments.

**Operates On** — 110-120 VAC, 60 Hz,1-Phase or 208-240 VAC/440-480 VAC, 50/60 Hz, 3-Phase

**H3 Service Classification on Single Phase Hoists**

**H4 Service Classification on 3-Phase Hoists** — Refer to page 2222.

Chain Container Not Included. Order Separately, See Below.

All Hoists Meet ASME/ANSI B30.16 Requirements

2-Ton Models Have Double Chain Lift

FREE DELIVERY on orders of $900 or more
See Freight Policy

Replacement Parts Available
1-800-323-0620

# CM LODESTAR® 1/4 TO 3-TON ELECTRIC CHAIN HOISTS

1/4, 1/2, and 1-Ton Models Have Single Chain Lift

All Hoists Meet ASME/ANSI B30.16 Requirements

Replacement Parts Available
1-800-323-0620™

**High Duty Cycle** — Provides more motor starts and run time.

**Life Lubricated Gears** — No oil changes, dripping, product contamination, or disposal worries. Ideal in food, paper, textile, and pharmaceutical applications.

**Exceeds ANSI Requirements and meets B-10 Bearing Life** — Assures long service.

**Ergonomically Designed Snap-Action Control Station** — NEMA 4 station is designed to reduce operator fatigue and uses low current 115V control voltage for added operator protection.

**Machined Liftwheel with Calibrated CM Hoistalloy Chain** — Precision fit assures long chain life and smooth operation.

**Solid-State Starting** — Increased reliability and reduced maintenance on single phase hoists. No contacts to arc, burn, or corrode.

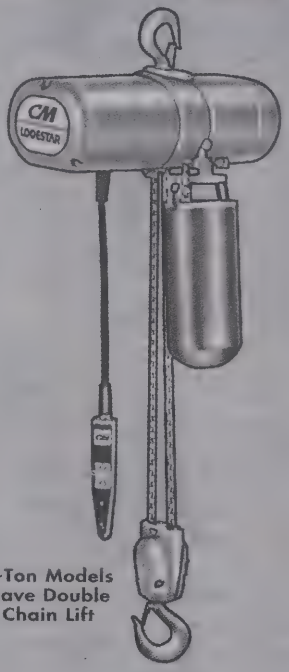
**Exclusive Lodestar Protector** — Protects hoist and operator from dangerous overloads.

**Ease of Maintenance** — Complete OSHA inspection in minutes and no special tools required.

**Dual Braking System** — Equipped with an Electro-mechanical hoist brake designed to automatically lock load in place in the event of a power failure. Also uses energy efficient regenerative braking comparable to system used in large capacity cranes.

**True 30-Minute Rated Motor** — Designed for maximum efficiency with minimum heat. Heavy-duty winding arc design is very tolerant of voltage fluctuations.

**Adjustable Screw Limit Switches** — Preset at the factory, but are field adjustable to stop hook travel at any desired location.



**Low Headroom** — Allows use in restrictive areas.

**Powder Paint Finish** — Keeps your hoist looking new for years, even in corrosive environments.

**Operates On** — 110-120 VAC, 60 Hz, 1-Phase or 208-240 VAC/440-480 VAC, 50/60 Hz, 3-Phase.

**H4 Service Classification** — See page 2222.

Industry Workhorse

2-Ton Models Have Double Chain Lift

**CM QUALITY ASSURANCE PROGRAM**

- ISO 9001
- Vendor Certification
- International FEM rating L4-1AM ISO M4
- Gears and hooks forged and chain manufactured by CM in ISO 9002 factory

**Chain Container Not Included, Order Separately.**
**See Previous Page for Listing.**

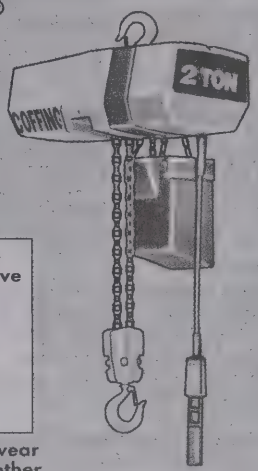
*) First number represents hoist code number. Second number represents suspension hook code number.

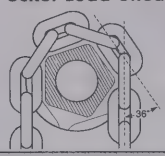
**WARNING:** Hoists are industrial duty units and are not designed for lifting, supporting, or transporting people.

# ELECTRIC CHAIN AND WIRE ROPE HOISTS



## COFFING®

1-Ton Electric Chain Hoist



LR44484-2

Made in U.S.A.

2-Ton Electric Chain Hoist

**Load Chain Angle 5-Pocket Load Sheave**

Reduces load chain wear while providing smoother lifting than conventional 4-pocket sheaves.

Wire Rope Hoist

- Plain trolleys included with wire rope hoists for ease of mounting on 6 to 18" American Standard "I" Beams
- Wire rope hoists have a machined drum with precise grooving for smoother drum winding

**Replacement Parts Available**
**1-800-323-0620**

**Solid-State Starting Switch on Single Phase Motors** — Offers greater reliability than conventional centrifugal switches.

**Safety Latch Hooks** — Rigid top and swivel load hooks provide positive load engagement.

**Multiple Disc Mechanical Load Brake** — Controls lowering speed even with power off.

**Oil Filled Transmission** — Provides cooler operation and better lubrication for longer gear life.

**Multiple Disc Direct Acting Motor Brake** — Stops and holds the load, even with loss of power.

**Adjustable Upper and Lower Limit Switches** — Protect the load and hoist by preventing overtravel in varying hoist applications.

**Helical Gearing** — For quiet, smooth operation.

**Overload Limiting Clutch** — Prevents hoist damage from heavier-than-rated loads.

**24 Volt Pushbutton Control with Strain Relief** — Ergonomic design meets NEMA 3R requirements, with low voltage for safer operation.

**Aluminum Alloy Housing** — Provides lightweight durability and meets NEMA 1 requirements.

**Electrical Panel** — Allows easy access to all electrical connections.

**H4 Service Classification** — See page 2222.

Coffing Electric Hoists are designed for industrial lifting, load spotting, and material handling, making them suitable for textile and paper mills, fabrication, processing, assembly, and general maintenance applications. Meet or exceed all industry standards, including ASME/ANSI B30.16 and CSA LR44484-2 requirements. Coffing brand.

(*) Single phase hoists are wired for 115V, 60 Hz operation; 3-phase hoists for 460V, 60 Hz opertion. Hoists easily reconnect for use at 230VAC.
(**) Minimum distance from underside of beam to saddle of lower hook based on standard 6 x 12.5# I beam.

**WARNING:** Hoists listed above are not to be used for lifting, supporting, or transporting people, or lifting loads over people.

## COFFING®

Suspended from bottom of hoist

## CHAIN CONTAINER

**For Use with Coffing Electric Chain Hoists Listed Above. Polyethylene container keeps surplus chain away from work area**

| For Hoist Capacity (Ton) | Chain Lift (Ft.) | Bucket Ht. (In.) | Coffing Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| 1/2, 1, & 2 | 20 | 10 7/16 | 927JG17 | **4Z812** | $54.02 | **$48.90** | 2.2 |

## QUANTUM 3-PHASE, DUAL SPEED ELECTRIC CHAIN HOISTS

**Dual Speeds with 5:1 or 6:1 Ratio** — Fast transferring (16 or 18 FPM) and precise (3 FPM) positioning/spotting gives operators superb load control. Comparable dual speed hoists have only 3:1 ratios.

**UL and C-UL (Canadian) Listed (5D48)** — The only hoist with complete UL and C-UL Listing. The entire hoist (including it's components) has passed UL's stringent tests.

**Lifetime Guaranteed, All Steel Brake Discs** — Part of Quantum's state-of-the-art AC motor brake. Secondary regenerative braking action provides controlled descent.

**Emergency Stop System** — A standard safety feature on Quantum hoists.

**Zinc-Plated Grade 80 Load Chain** — Incorporates a special two layer infusion process for increased corrosion resistance.

**NEMA 4X Pendant Enclosure, NEMA 3R Hoist Enclosure** — Allows use outdoors.

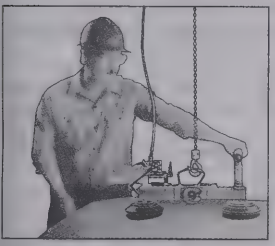
**Factory Set Clutch** — Protects against overloading.

**Low Voltage (42 Volt) Pendent Control Circuit** — Minimizes electrical shock hazard.

**Five-Pocket Load Sheaves** — Precisely matched to Quantum load chain, providing smooth operation and maximum chain life.

Helical/Spur Gear Set — Provides quiet, reliable operation. Grease lubrication adheres better and is less likely to leak than oil bath systems.

**Fail Safe Mechanical Limit Switches** — Recessed to prevent accidental activation.



**H4 Service Classification** — see page 2222

WARNING: These hoists are not for lifting or transporting people or loads over people.

## CM MAX POSITIONERS

CM

Flange Adjustment: 2⅝ - 5⅝"

Minimum Radius Curve: 24"

**Lift, maneuver,and position loads from 3 to 360 lbs, with continuous operation.**

The CM Max air positioner offers precise positioning, ergonomics, and safety for operations that require repetitive lifting of lighter loads. Handles up to 300 lbs. with virtually no operator effort. Ideal for fabricating, machining, and assembly applications.

**OPERATOR NEGATES GRAVITY**—Enables positioning a 100 lb. load with a force of only 5 lbs. Fingertip movement within a float window of ±8".

**OPERATES ON 90 PSI (6 BAR)**—Lowest required pressure for rated capacity in the industry. Allows capacity use with slight fluctuations in volume.

**PATENTED PRESSURE COMPENSATED FLOW CONTROL**—Maintains constant hook speed for each load. Also prevents unattended loads from creeping upward.

**PATENTED LOST LOAD PROTECTOR**—Prevents uncontrolled upward movement of hook and attachments if load is lost.

**LIMITLESS CYCLES**—Provides reliable performance and productivity.

**ERGONOMICALLY DESIGNED PENDANT**—Minimizes operator fatigue and risk of cumulative trauma disorder.

**INTEGRAL TOOL PORT**—Pneumatic tooling can be supplied without supply line modifications.

**CHAIN LIFT MEDIUM**—Delivers long life with no undesired load rotation.

**EXCLUSIVE LOCK OUT/TAG OUT DEVICE**—Prevents undesired operation.

**FORGED LOWER SWIVEL HOOK**—Allows 360° rotation of load.

**100% PRESHIPMENT INSPECTION AND LOAD TESTING**—Ensures trouble-free operation with factory maintained test records.

(*) Working range. Vertical lift from hook in lowest position to hook in highest position.
(†) Reach. Vertical distance from bottom of balancer to hook in lowest position. Actual reach may be adjusted at installation and under no circumstances should it be less than 84".
(▲) Net prices, not subject to discounts.

# AIR CHAIN HOISTS & CHAIN CONTAINERS

## 300 LB. CAPACITY LIGHT-DUTY AIR CHAIN HOIST

ARO®

No. 6B461

- Extremely lightweight, only 15¼ lbs
- Versatile and portable for quickly and easily moving from one work station to another

Replacement Parts Available 1-800-323-0620™

No. 6B462 Fabric Chain Container

- Variable speed operator control with pull chain for inching loads into place
- Standard 10 ft. lift
- Recommended air supply hose is ⅜" I.D. with 90 PSIG (air line lubricator required, see Index under Lubricators, Air Line for listings)
- Consumes 22 CFM running continuously, only 8 CFM for an average lift
- Self-adjusting mechanical brake is automatically applied if air supply is cut off or lost

An economical, convenient way to lift loads too heavy to be done safely by hand. Rotary vane air motor runs cool. Overloads simply cause motor to run slow and stall without damage unlike with electric hoists. Hoist is equipped with 360° rotating safety-latch top hook. Hook throat opening is 29/32". Fits most trolleys. Air inlet is 1/4" NPT. Fabric chain container is available, order separately. ARO brand.

### FABRIC CHAIN CONTAINER

For use with No. 6B461 Light-Duty Air Chain Hoist. Safely stores excess chain and keeps it away from the work area. ARO brand (44120).

**No. 6B462.** Fabric Chain Container. Shpg. wt. 2.0 lbs. List $83.93. Each .....**$76.30**

## SEVERE-DUTY HIGH PRODUCTION AIR CHAIN HOISTS

INGERSOLL-RAND MATERIAL HANDLING

No. 6B463

No. 6B468

- Pendent handle has cast-in guards for protection against accidental operation
- Top and bottom latch hooks swivel 360° and meet OSHA Standards

- Severe-duty rated—full load at full speed 24 hrs/day for greater durability than electric hoists
- Closed air system operates in dusty, corrosive, humid environments. No electrical contactors to wear out or corrode
- Upper and lower limit switches prevent overtravel of hook and load
- 10 ft. lift
- Only 70 CFM at 90 PSI needed to operate any model (air line lubricator required, see Index under Lubricators, Air Line for listings)
- Variable speed from inching crawl to full speed
- Self-adjusting disc brake comes on automatically if air power is lost. Tested to over a million cycles
- Anti-friction ball and roller bearings maximize hoist performance
- Seven motor vanes with stainless steel springs provide positive, instant motor starts with excellent low speed control
- Fast 1/4 ton hoist reaches 101 FPM with 550 lbs
- Meet ANSI B30.16 Requirements

Ingersoll Rand's MLK and HLK severe-duty air chain hoists operate with less maintenance and down time than similar hoists. Their air motors pack more HP in a smaller size than electric motors and are inherently spark resistant. Will not overheat or burn out if stalled.

Units are lightweight for portability and handling. Internal muffler reduces sound to 85 dBA. Come standard with a top hook ready for installation. Chain container is available, order separately from listing below. Ingersoll-Rand brand.

**WARNING:** These hoists are not for lifting or transporting people or lifting loads over people.

# MANUALLY OPERATED CHAIN HOISTS

## CM SERIES 622 MANUAL CHAIN HOISTS

**High Quality Steel Construction**—Ideal for construction applications.

**Lightweight**—Easy to relocate. Up to 40% lighter than comparable hoists.

**Low Headroom**—allows use in tight areas.

**Heat-Treated Gears**—for long life.

**High Efficiency**—accomplishes more work with less effort

**Self-Adjusting Brake**—assures maximum load control.

**Load Chain Reeving**—½-2 ton models are single reeved, 3 ton model is double reeved.

**Meet ASME/ANSI B30.16 Requirements.**

**Rugged chain hoists** are engineered to be fully portable and constructed of high quality steel for greater durability. Compact design and low headroom allow installation even in confined areas. Two-stage gear reduction system utilizes hardened gears and operates in grease lubrication for long life. Friction reducing roller and ball bearings allow easy operation. Forged swivel style upper and lower hooks have latches. CM Hoist brand.

(‡) Pulling force in pounds required to lift rated load.

**WARNING:** Do not use for lifting, supporting or transporting people, or lifting loads over people.

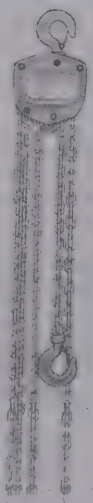
## COFFING® MANUAL CHAIN HOISTS

**Heat-Treated, Grease Lubricated Spur Gearing**—Provides highest efficiency with minimal pulling on chain.

**Lubricated Bushings, Bearings, and Gears**—Insure smooth, efficient ease of operation.

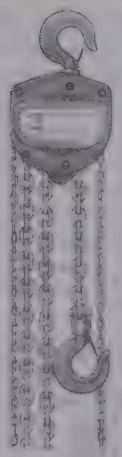
**Compact, Rugged Steel Housing**—Preserves overhead space while protecting gears and bearings for indoor and outdoor service.

**Ratchet and Pawl Mechanical Load Brake**—Provides protective control for lifting, holding, and spotting load.



**Through Hardened Load Chain**—Provides greater chain life with added strength and wear resistance.

**Safety Latch Swivel Hooks**—Provide positive load engagement.



**Load Chain Reeving**—All models are single reeved.

**Designed to handle most industrial lifting applications.** Meets or exceeds all industry standards including ASME/ANSI B30.16 requirements. Coffing brand.

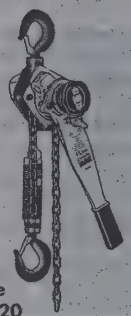
# LEVER CHAIN HOISTS AND RATCHET CHAIN HOIST/PULLERS

## LEVER CHAIN HOISTS

**Metric Rated**—Metric rating (2200 lbs/ton) gives 10% more lifting and pulling capacity. All units are single chain fall.

**"Arrow Notch" Free Chain System**—Align arrows with notches and flip the selector to neutral for easy free chaining. Fail-safe system automatically engages if a load is applied.

**Zinc/Nickel/Chrome-Plated Finish**—More durable and corrosion resistant than paint.



**All-Steel Construction**—Provides maximum strength at minimum weight.

**Operator Friendly**—Rubber grip on the handle for a sure, comfortable hold; short handle stroke and 360° rotation for tight spots; an audible "click" double disc brake for exact load positioning and tensioning; hardened swivel hooks with safety latches secure and align loads; capacity-adjusted handle force minimizes overloading.

**Alloy Chain**—Alloy steel wire is precision formed and induction-welded. Heat-treated and quenched for extra surface hardness. Grade 100 chain.

**Meets or Exceeds ANSI/ASME B30.21**—All units are load tested to 150% of rated load.

## 3/4 TO 3-TON RATCHET CHAIN HOISTS/PULLERS

**State-of-the-Art Free Wheel Control**—Allows quick and easy "free chaining" to take up slack chain.

**Cushioned Grip Short Handle**—Rotates 360° to provide operator comfort and ease of operation in tight places.

**Double Gear Reduction**—Reduces operator's effort.

**Compact and Lightweight Rugged Steel Housing**—Protects gears and bearings for both indoor and outdoor service.

**Ratchet and Pawl Mechanical Load Brake**—provides positive load control for precise positive positioning of the load.

**Through-Hardened Load Chain**—Provides greater chain life through added strength and wear resistance.

**Safety Latch Swivel Hooks**—Provide positive load engagement.

Designed and built for most industrial lifting, pulling applications. Meets or exceeds all industry standards including ASME/ANSI B30.21 requirements. Coffing brand.

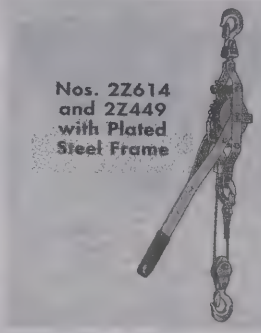
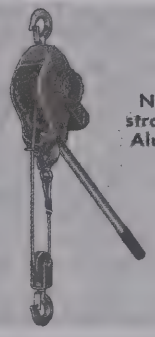
(*) Pulling force in pounds required to lift rated load. (**) Maximum throat opening with hook latch.

**WARNING:** Hoists listed above are not to be used for lifting, supporting, or transporting people, or lifting loads above people.

# CABLE PULLERS AND ADJUSTABLE STEEL GANTRY CRANES



## RATCHET CABLE PULLERS



- **Durable solid steel ratchet pawl and holding dog; no laminated plates**
- **Two and three hook models**
- **Heat-treated, drop-forged alloy steel latch hooks**
- **Preformed galvanized aircraft cable**
- **One-piece solid construction**

**Dayton ratchet pullers** have positive locking ratchet teeth with greater metal surface engaging holding mechanism. Large ratchet diameter with high tooth count permits accurate positioning of loads. Heat-treated, drop-forged steel latch hooks are zinc plated to resist corrosion. All models come with preformed galvanized aircraft cable and self-aligning cable guide which minimizes cable wear.

**No. 2Z449**, 2000 lb. capacity model has 3 hooks and single or double line operation. Pulley hook assembly removes easily for single line use on lighter loads.

**No. 4Z312**, 3400 lb. capacity model has 3 hooks, heavier construction and stronger cable for handling heavy loads with double line rigging. Snap-on, quick reversing handle bends when load exceeds recommended capacity.

### RATCHET PULLER SPECIFICAITONS AND ORDERING DATA

| Rated Load Capacity (Lbs.)* | Maximum Pull Distance (In.) | Min. Dist. Between Hooks (In.) | Cable Dia. (In.) | Cable Length (Ft.) | Stock No. | List | Each | Shpg. Wt. |

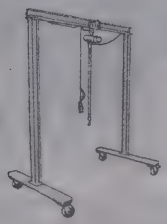
(*) Complies with ASME B30.21 Requirements for pulling, lifting and tensioning. Not to be used for lifting people or loads over people.
(▲) Net prices, not subject to discounts.

## PORTABLE ADJUSTABLE-HEIGHT STEEL GANTRY CRANES

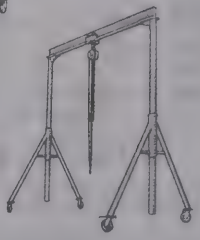
Gantry cranes include two uprights and one crossbar I-beam. Move easily with four swivel casters. Accepts most manual and electric hoists (not included). All models shipped unassembled. T&S brand.

**Nos. 3KR60, 3KR61, 3KR62:** Adjustable-height* steel gantry crane is ideal for heavy-duty lifting applications. Uprights include ratchet puller/"come along" attachment points for height-adjustment operations ("come along" not included). Each phenolic caster includes a four-position swivel lock in 90° intervals. Welded-steel construction. Blue color.



**Nos. 4UP86, 4UP87, 4UP88:** Adjustable-height* aluminum gantry crane is designed for use in outdoor lifting applications. Aluminum material will not rust. Lightweight design is ideal for two-person assembly in field. Great for use in applications where constant assembly and knockdown is required. Non-scuff polyurethane-on-steel casters include four-position swivel locks in 90° intervals. Welded-aluminum construction.

**Nos. 4UP90, 4UP91, 4UP92:** Fixed-height work-area portable gantry crane is designed to maximize material handling requirements in light-duty lifting applications. Lightweight design allows for easy mobility. Includes four polyurethane-on-steel swivel casters. Welded-steel construction. Blue color.



(*) Height may be adjusted by using come-along, fork truck or overhead crane in 6" incremmts.

# FREE-WHEELING HOIST TROLLEYS

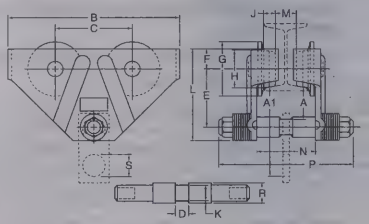
## INGERSOLL-RAND PT SERIES UNIVERSAL BEAM TROLLEYS

**Maximum Versatility** — Single trolley fits broadest possible range of tapered and flat beams. Compatible with all hoist brands.

**Wide Range of Flange Widths** — A single, extra long hanger shaft adjusts from minimum suggested beam flange widths out to 8.06".

**Strength and Durability** — All steel trolley is metric rated (2200 lbs/ton) and designed at 5:1 to hold either manual or powered hoists. Axles are "rivet locked" in place, and perfectly aligned to ensure optimum load distribution and smooth rolling.

**Less Effort, Maintenance-Free** — Solid caster wheels are supported by sealed "lubed-for-life" bearings that never need greasing.



**Safety Enhanced** — Rail sweeps/drop stops remove debris from the beam and prevent a load from dropping should an axle or wheel break.

**Low Headroom**— Connect directly to hanger shaft. Use the convenient suspension bail for quick hoist changeout or oversized hooks.

| Stock No. | Headroom to Shaft (In.) | Headroom to Bail (In.) |

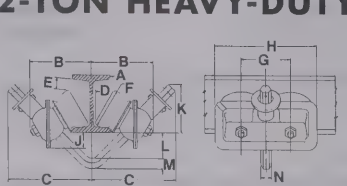
## FREE-WHEELING TROLLEYS

**Dayton**

**Replacement Parts Available**
**1-800-323-0620**

- **Adjustable to fit standard dimension I-beams; will NOT work on H-beams**
- **Wheels are smooth running and resist wear**



Dayton low headroom trolleys are designed for use with electric, air, and manual overhead hoists. Hardened pressed steel wheels have carburized treads to resist wear. Wheels run on ball bearings for smooth operation. Side plates extend beyond wheels to act as bumpers. Adjustable to fit standard dimension I-beams, refer to dimensions below.

| Capacity (Tons) | Fits I-Beam* (In.) Vert. H | Fits I-Beam* (In.) Horiz. W | Clearance Dimensions (In.)* A | B | C | D | E | F | G | K Dia. | M | Min. Radius (In.) | Stock No. | List | Each | Shpg. Wt. |

(*) Dimensions given are for minimum I-beam and will vary with larger beams.
**Caution:** Obtain professional structural engineering assistance to determine load carrying capability of new and existing structural steel beamwork.

## 1/2, 1, & 2-TON HEAVY-DUTY TROLLEYS

Heavy-duty design allows up to five times longer wheel life than conventional trolleys. For low headroom applications. Exclusive DIAL FIT collars for simple one man installation; no space washers needed. Operate on flat and tapered flange structural steel beams. Accept all types of hand and electric hoists. High quality steel construction and double row ball bearing wheels.

# BEAM CLAMPS

## COFFING®

**Reliable and Rugged**—All steel construction is durable yet lightweight.

**Adjustable**—Fits securely on a wide range of flange widths and beam sizes.

**Low Headroom**—Built-in suspension bar provides close mounting.

**Special Design**—Clamp jaw design reduces flange stress by distributing load away from flange edge.

# UNIVERSAL MOTOR-DRIVEN TROLLEYS

## CM®

Replacement Parts Available
1-800-323-0620™

**Accepts any hook mounted hoist up to 2 tons**

**Universal Mounting Plate**—For use with all hook mounted hoists.

**Hardened Cast Iron Wheels**—Provide long wheel life. Operate on tapered or flat flange beams and patented track.

**16 Ft. Drop to 4-Button Single Speed Control Station**—Comes ready for applications of up to 20 ft. of lift.

**Lifetime Lubricated Double Row Ball Bearings**—Assure long maintenance-free operation.

**115V Control Circuit**—Has lower current draw.

**78 FPM Travel**—Moves at average walking speed.

**Junction Box**—Provides universal connection for any hoist.

**Trolley Guards**—Protect wheels from end stop or other trolley collision damage.

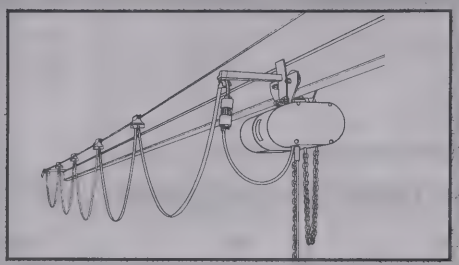
# ROUND CABLE/HOSE CARRIER AND CABLE REELS



## ROUND CABLE/HOSE CARRIER

**AERO-MOTIVE**

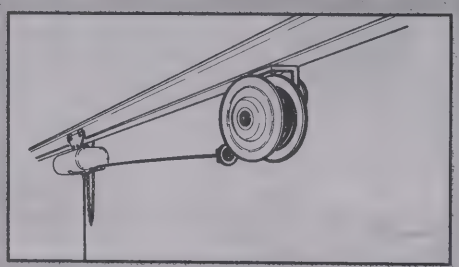
Registered to ISO 9001

- Handles electrical cables or hoses for moving equipment
- Holds cables or hoses with 0.49 to 0.91" diameters

This festoon type carrier is an economical method of handling electrical cables or hoses and is ideal for powering moving hoists, cranes, and other mobile equipment. Carrier can be supported by 1/4" O.D. nylon or vinyl covered wire rope (refer to Index) and handles round cables or hoses with diameters ranging from 0.49 to 0.91".

Carrier body is molded from nylon with concave nylon wheels, stainless steel shafts, and galvanized steel fasteners and axles. Recommended travel distance between carriers is 15 to 50 feet; total weight per carrier should not exceed nine pounds. Aero-motive brand (5121).

**No. 4V078.** Shpg. wt. 0.4. lbs. List $19.93.
Each ..... **$18.84**



## SPRING DRIVEN CABLE REELS

**AERO-MOTIVE**

Registered to ISO 9001

- Provide power to moving equipment in industrial applications
- Weathertight, dusttight aluminum construction with long life mainspring

Provide power to hoists, cranes, machine tools, and other moving equipment in industrial applications. Weathertight, dusttight aluminum construction with long life mainspring, declutching drive hub, NEMA 4 enclosure and permanent lubrication.

Also feature type SO cable with four roller guide, prewiring to junction box, removable ratchet lock, and 600V, 30 amp slip ring. Adjustable guide arm. Polymer, oven-cured yellow finish. Constructed to NEC and UL standards. UL Listed. Aero-motive brand.

# CLAMPS AND HANDGRIPS

No. 3KR24 TSH Plate Clamp

No. 3KR27 Multi-Purpose Clamp

No. 3KR29 Hand Grip Clamp

No. 3KR32 CZ92 Universal Clamp

## CZ UNIVERSAL

Can be used for both vertical and horizontal-to-vertical lifting. When any of the cam's straight line, convex teeth are flattened between unique wear indicator grooves, it is time to change the cam. 100% proof tested with certificate of test attached to each clamp.

## TSH SCREWCAM PLATE CLAMPS

For turning plates from horizontal to vertical as well as through a 180° arc. The convex, serrated cam swivels on a ball joint so that the area of cam engagement increases as load increases. Drop forged body and shackle. 100% proof tested with certificate of test attached to each clamp.

## MULTI-PURPOSE TSGU CLAMPS

Offer the same superior gripping features as TSH clamps with the added benefit of a swiveling pad. Can be used for a variety of lifting applications. Both gripping surfaces of swivel pad are smooth and and non-marring. 100% proof tested with certificate of test attached to each clamp.

## HAND GRIP

Designed to carry or pull any object that will fit into its jaws. Grips and releases automatically.

## CZ92 UNIVERSAL CLAMPS

Available in 1/2, 1 and 2-ton capacities. Drop forged and heat treated components, with gripping surfaces of case hardened alloy steel. When any of the cam's straight line, convex teeth are flattened between unique wear indicator grooves, it is time to change the cam. Specially designed "Cam Engaging Lever" keeps the cam in contact with the plate. Tension arm and spring mechanism facilitate attaching and removing the clamp. Clamps will not lift plate when in "lever open" position.

**WARNING:** Never tamper with a clamp's tension arm and spring mechanism during a lift.

## CM ALLOY SWIVEL HOOKS WITH LATCH

- **Alloy steel**
- **Heated treated, quenched & tempered**
- **Design factor 5-1**
- **Built in distortion detectors**

Alloy Swivel hooks are primarily used in rigging applications where the swivel feature allows other rigging elements such as wire rope and chain to remain straight without twists.

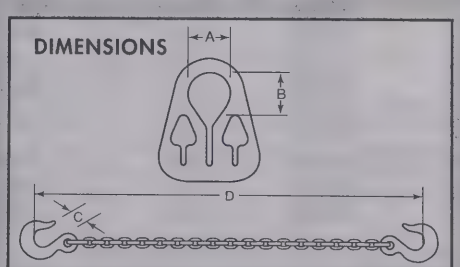
# LIFTING SLINGS

## GRADE 80 ALLOY STEEL CHAIN SLINGS

High strength Herc-Alloy Grade 80 steel chain and attachments are specifically recommended for overhead lifting. Chain and components are heat-treated and chain slings are proof tested for high working load limits. Chain is electrically welded and elongates in excess of the 15% minimum requirement. Tensile strength of chain slings meets or exceeds all existing OSHA, government, and ASTM specifications. Chain is hallmarked "HA-800" for positive identification. Chain slings are provided with drop forged identification tags and certificate of test. Tags show grade, type, size, reach and working load limit.



| TYPE | DESCRIPTION |
|---|---|
| SGG | Single, grab hook each end |
| SPG | Single, pear master link with grab hook |

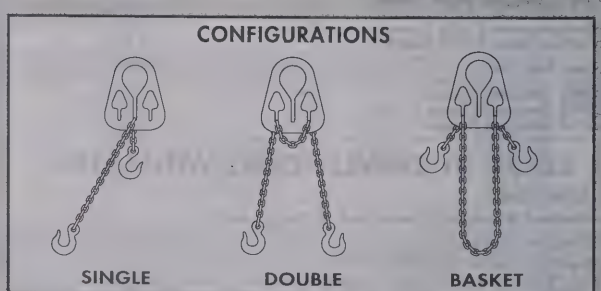
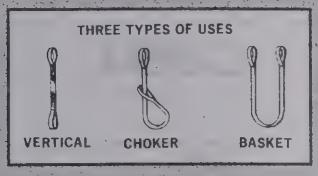
## ADJUST-A-LINK SLINGS



**IMPORTANT: Read Warning Sheet Supplied With Each Sling.**

- Constructed of Grade 80 alloy chain and hooks
- Proof tested; supplied with certificate of test

LiftAll®



Adjust-A-Link slings handle odd-shaped, hard to position loads. Can be used in either 1 or 2 point lifts. For use in machine shops and maintenance areas where headroom is limited, and for portable hydraulic cranes. Adjust-A-Link brand by Lift-All.

# PERMALOC® WIRE ROPE SLINGS

LiftAll®

IMPORTANT: Read Warning Sheet Supplied With Each Sling.

For use with overhead hoists, winches, and cranes in lifting and lowering applications where heat, abrasion, sharp edges, or low head room are present. Permaloc® wire rope slings are fabricated using a Flemish Eye mechanical splice. Constructed of 6 x 19 IWRC (Independent Wire Rope Core) class rope which is the most widely used for general material handling.

Recommended temperature range is -60°F to 400°F. Each sling is tagged. Eye and Eye style is marked with Vertical, Choker, and Basket capacities. Bridle sling style is tagged for two leg capacity in degrees of angles. Lift-All brand.

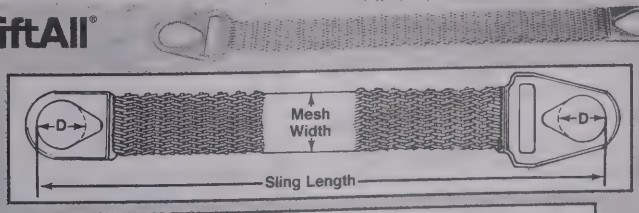
# HARDWARE WEB SLINGS

LiftAll®

IMPORTANT: Read Warning Sheet Supplied With Each Sling.

- **Large hook openings**
- **Smooth plated forged alloy steel**
- **Abrasion-resistant**



Hardware web slings have patented Unilink hardware which provides positive web entrapment in the bearing slot; eliminates the chance of webbing sliding around side to side as on conventional triangles, or out of the shallow groove on the cross bar of chokers. Either end acts like a choker fitting. Slings feature larger hook openings than triangles or chokers, and smoothed forged alloy steel that is plated to resist rusting. Use where abrasion may cut nylon eyes or where crane hooks are rough or jagged. Slings are made of Tuff-Edge™ webbing. Lift-All brand.

# WIRE MESH SLINGS

LiftAll®

IMPORTANT: Read Warning Sheet Supplied With Each Sling.

- **Galvanized high tensile steel mesh**
- **For use in basket or choker hitch configuration only**

Roughneck wire mesh slings are made from 10-gauge mesh for use in metalworking or other industries where loads are abrasive, hot or tend to cut web slings. Mesh slings grip loads firmly without stretching; easily maintaining balanced loads. These have alloy steel fittings with galvanized high tensile steel mesh which withstands temperatures up to 550°F. Fittings are plated for protection and have large openings so even smallest sling will fit most crane hooks. Use in either basket or choker hitch configuration only. Lift-All brand.

## SPECIFICATIONS AND ORDERING DATA

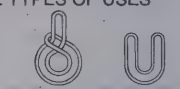
# LIFTING SLINGS

**Slings meet or exceed all OSHA and ASME B30.9 standard**

Tuflex slings have a Tuff-Tag™ to provide permanent identification. Roundslings are unaffected by sunlight (UV) or grease. Polyester core resists most acids. Temperature range is -50°F to +200°F. Lift-All brand.

- Color coded capacities for quick identification
- Easy, positive sling inspection procedure
- Wear points shift with each new use to give maximum sling life
- All load fibers protected by 2-wall cover
- Sling flattens against load to grip tightly
- Low stretch of only 3% for better load control

## TUFLEX™ ROUNDSLINGS



LiftAll®

**IMPORTANT: Read Warning Sheet Supplied With Each Sling.**

**CAUTION: Remove roundsling from service if damage to the cover exposes red striped white core yarns.**

**Highly Maneuverable Configuration:**

## 12" CRANE SCALE

- 12" dial with widely spaced graduations for maximum readability
- Wide angle viewing due to special bezel design and dial position
- Accurate to 1/2 of 1% of capacity
- Integral zero adjustment to tare loads up to 20% of capacity
- Lightweight design for ease of movement between work stations
- Zero is directly below top shackle with field adjustment to 180° position

WT12 series dynamometer with factory installed safety hook for specific use as a crane scale. Calibration certifiable and traceable to NBS. Chatllion brand (WT12-5000H).

**No. 5A359.** 5000 Lb.Crane Scale. Shpg. wt. 20.0 lbs. List $808.11. Each ..... **$735.00▲**

(▲) Net prices, not subject to discounts.

**CAPACITY: 5000 lbs. x 20 lbs.**

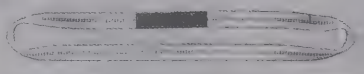
# SAFE-LINE NYLON SLINGS

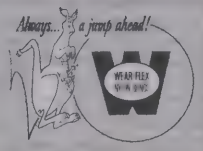
**Safe-Line Endless Loop Slings are strong**, efficient, and economical. They can be used in a vertical, choker, or basket hitch style. Load contact points change with every lift, increasing sling life and safety.

**Available in single and double strength**, slings have permanently woven "black line" rated capacity identification. One black line identifies slings with 1000 lbs. rated capacity per inch width for each sling leg. Two black lines identify slings with 2000 lbs. rated capacity per inch width for each sling leg.



**Safe-Line slings have Cordura® nylon** "armor jacket" protection which protects the internal load carrying yarns. Cordura® yarns have more than 100% better wear resistance than standard lifting yarns. Red "safety alert" inner warning yarns show when the tough Cordura® jacket is damaged or cut indicating when the sling should be removed from service.

Nylon slings are adversely affected by acids, sharp abrasive loads, and temperatures above 180°F. Meet or exceed all OSHA and ASME/ANSI B30.9A standards. Wear-Flex® brand.



Cordura is a Dupont registered trademark.

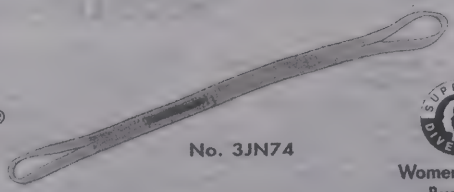
# REVERSE EYE NYLON SLINGS

**Wear-Flex® Reverse Eye Nylon Slings** have a reverse eye at both ends with eye widths equal to 1/2 the body width. These slings have both eyes standing open at 90° to the sling body, allowing perfect choker or basket hitching without any twisting of the eyes or sling body.

**Tough, durable, heavy-duty slings** have a double service life. Reversing the eyes allows the other side of the eyes and sling body to be used as a second wearing surface.



**Both sides of the sling body and eyes are reinforced** with gray Cordura® wear pads. Cordura® yarns have more than 100% better wear resistance than standard lifting yarns.

**Meet or exceed all** OSHA and ASME/ANSI B30.9A standards.

Cordura is a Dupont registered trademark.

# NYLON WEB SLINGS

Slings meet or exceed all OSHA and ASME B30.9 standards

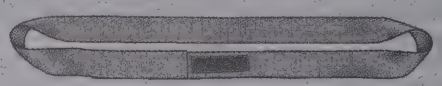
Web slings protects loads from being scratched or marred as may occur with chain or cable slings. Red core yarn indicates wear for easy inspection and replacement. Tuff-Tag™ provides permanent identification for the life of the sling. Eyes of 3" and 4" wide slings are tapered and twisted to fit better on hooks.

**Light-Duty**

- **Wider bearing surface per capacity for added load protection**
- **1/8" thick, yellow finish, sling webbing, one ply**

**Heavy-Duty**

- **Tuff-Edge sling web for longer life than other webs**
- **3/16" thick, silver finish, black polymer coated edge yarns, one ply**
- **30% more resistant to edge cutting, 67% more resistant to edge abrasion**



**Extra Heavy-Duty**

- **Uses two plies of Tuff-Edge sling webbing for long life**
- **Higher capacities per width**

Nylon web slings resist alkalies, but are damaged by acids. Always use pads to protect slings from cuts. Recommended temperature range: -50°F to +200°F. Lift-All brand.

**IMPORTANT: Read Warning Sheet Supplied With Each Sling.**

# WIDE LIFT NYLON SLINGS

- **Slings meet or exceed all OSHA and ASME B30.9 standards**

Wide lift slings are basket hitch type. These slings distribute the load over a wide area, and give good balance to extra wide, large, and heavy loads. Can be used in paper mills, construction sites, and for lifting pipe. Eyes are tapered to fit snugly on crane hooks. Lift-All brand.

**IMPORTANT: Read Warning Sheet Supplied With Each Sling.**

## WIDE LIFT NYLON SLING SPECIFICATIONS AND ORDERING DATA

| Body Width (In.) | Length (Ft.) | Capacities Basket Hitch (Lbs.) | Eye Width (In.) | Eye Length (In.) | Lift-All Model | Stock No. | List | Each | Shpg. Wt. |

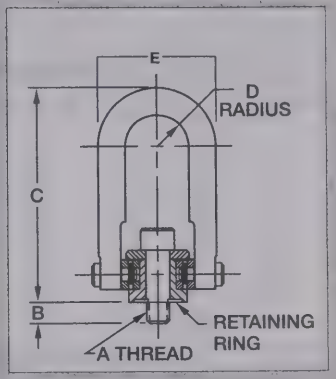
## SWIVEL HOIST RINGS

- 100% magnetic particle inpection
- Easy disassembly for periodic non-destructive inspection
- Heat-treated alloy with black oxide finish
- Rings and bodiess are magnafluxed per ASTMEI444-94A



Hoist rings pivot 180°, rotate 360° simultaneously to allow lifting from any direction. Preferable to eyebolts.

# FORGED EYE BOLTS AND EYE NUTS

## HOT GALVANIZED FORGED EYE BOLTS

**Eye bolts are N-C threaded** before galvanizing and assembled with hex nuts tapped oversize. Loads are based on a safety factor of 5 to 1. When tested all eye bolts are pulled at a uniform rate of speed in a direct tension. Any deviations as angular lifts, shock loads, modification of the basic forging, etc., will result in drastically reduced maximum loads. C-1035 steel.

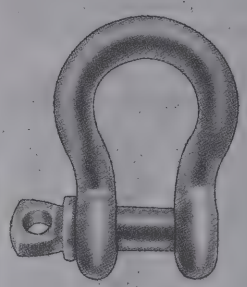
**LIBRARY OF TECHNICAL MANUALS**

Helpful reference books for the tradesman, student, and homeowner. Topics cover electricity, electric motors, welding, plumbing, refrigeration, air conditioning, pneumatics, hydraulics, and much more. See Index under Books, Technical.



# FORGED SHACKLES

**Size, work load, and trademark** are permanently marked on all galvanized shackles. Loads are based on a safety factor of 5 to 1. When tested, all shackles are pulled at a uniformed rate of speed in a direct tension. Meets Federal Specification RRC-271d Type IV Class 2.

ANY DEVIATIONS AS ANGULAR LIFTS, SHOCK LOADS, MODIFICATION OF THE BASIC FORGING, ETC., WILL RESULT IN DRASTICALLY REDUCED MAXIMUM LOADS.

## GALVANIZED STEEL CABLE

Galvanized aircraft type cable is commonly used for winching, hoisting, barriers, garage and cargo doors, farm and marine applications. Available in 7 x 7 or more flexible 7 x 19 construction. 3/16" also available vinyl jacketed for improved cable life. Comes in convenient self-dispensing carton. Exceeds US Federal Spec. RR-W-410D, ASTM Spec. A-90, SAE Spec. J-684C and ANSI Spec. B30-10.

No. 4KH25

## 50 AND 100 FOOT LENGTHS PRECUT CABLE

Precut lengths of galvanized aircraft type steel cable packaged in a reusable carton. Up to 3000 lb. capacity. Cable lengths made of 7 x 19 construction for greater strength and flexibility. Precut Champ cables have permanent loop with thimble eye on one end, safety-fused on the other. Choice of galvanized steel cable with or without vinyl jacket.

No. 6W025

# WELDED STEEL CHAIN

CM

**GRADE 30:** General Purpose Chain. Low Carbon Steel Construction. High Degree of Uniformity. 3/16, 1/4, 5/16, and 3/8" Sizes.

**GRADE 43:** Higher Strength-to-Weight Ratio Than Grade 30. Carbon Steel Construction. 1/4 and 3/8" Sizes.

**GRADE 70:** Higher Strength-to-Weight Ratio Than Grade 43. High-Harden Ability Steel. 5/16 and 3/8" Sizes.

Chain Lengths Over 20 Ft. Come in Plastic Pail

## PROOF COIL, GRADE 30, STEEL CHAIN

Proof coil chain is excellent general purpose chain of standard quality for all ordinary applications. Frequently used for fabricating tow chains, light-duty binding chain and logging chains. **Do not use for overhead lifting.** Links are low carbon steel electrically welded to produce a high degree of uniformity.Electroplated zinc finish. Proof tested. Chain fittings and accessories listed on page 2249.

### GRADE 30 PROOF COIL CHAIN—PAILS AND 20 FT. LENGTHS

## HIGH TEST, GRADE 43, STEEL CHAIN

High Test Grade 43 chain is an electrically welded carbon steel chain often used for load binding, towing, logging and other applications requiring higher strength-to-weight ratios than Proof Coil chain. See tables below for working load limitations. **Do not use for overhead lifting.** Proof tested.

### GRADE 43 HIGH TEST CHAIN—PAILS AND 20 FT. LENGTHS

| Trade Size (In.) | Working Load Limit* (Lbs.) | Feet per Pail† | Material Diameter (In.) | Inside Length (In.) | Inside Width (In.) | Links per Foot | CM Model | Stock No. | List | Each | Lots 3 | Shpg. Wt. |

## TRANSPORT, GRADE 70, STEEL CHAIN

Grade 70 chain is made from a high-harden ability steel for higher strength-to-weight ratio than Proof Coil and High Test chain. Specifically developed for use on load binding and towing applications and meets stringent Dept. of Transportation regulations with a chain that is smaller, lighter in weight, and easier to handle. **Do not use for overhead lifting.** Electrically welded and heat treated. Proof tested.

## CLEVIS SLIP HOOK

Chain passes through hook to make a slip-loop around the load. Clevis pin attaches hook to chain. Nos. 3X693, 1A622, and 3X694 are forged carbon steel with electroplated zinc finish. Nos. 5A565 and 5A566 are forged steel painted orange. All are heat treated for use with chain as specified in the table below. Not for use in overhead lifting. CM brand.

| Trade Size (In.) | Use Only with Chain | Clevis Opening (In.) | Throat Opening (In.) | Working Load Limit* (Lbs.) | CM Model | Stock No. | List | Each | Lots 10 | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|---|
| **1/4** | 3/16", 1/4" Gr. 30 & 43 | 3/8 | 15/16 | 2600 | M904ZL | **3X693** | $5.09 | **$4.17** | **$3.95** | 0.5 |

## CLEVIS GRAB HOOK

Prevents chain from passing through the hook. Use to secure chain. Clevis pin attaches hook to end of chain. Nos. 3X691, 1A623, and 3X692 are forged carbon steel with electroplated zinc finish. Nos. 2A091 and 5A720 are forged steel painted orange. All are heat treated for use with chain as specified in the table below. Not for use in overhead lifting. CM brand.

| Trade Size (In.) | Use Only with Chain | Clevis Opening (In.) | Throat Opening (In.) | Working Load Limit* (Lbs.) | CM Model | Stock No. | List | Each | Lots 10 | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|---|

## CONNECTING AND CLEVIS LINKS

For temporary chain repair and coupling of attachments to low carbon chain only. Drop forged, weldless carbon steel, heat treated. Forged pins join the halves of the links together, and interlocking lugs distribute the load. Self-colored finish.

For use with chain as specified in the table below. Clevis pin on each end joins two chain links to form a continuous chain. Double clevis is forged, heat-treated and tempered. Zinc-plated finish. Do not use in overhead lifting applications. CM brand.

| Trade Size (In.) | Use Only with Chain | Inside Width (In.) | Inside Length (In.) | Working Load Limit* (Lbs.) | CM Model | Stock No. | List | Each | Lots 10 | Shpg. Wt. |

(†) Double clevis.

## LOAD BINDERS

Load binders take up slack and secure chain around loads in one operation. They are used in steel, lumber, and machine hauling jobs as well as logging and oil field rigging. Orange paint finish resists rusting. CM brand.

No. 4X462. Drop forged construction including grab hooks.

No. 4Z439. Drop forged construction with swivel links and alloy grab hooks.

No. 5A861. Ratchet type binder. Drop forged construction with alloy grab hooks.

| Chain Size (In.) | Use Only with Chain | Take-Up (In.) | Working Load Limit* (Lbs.) | CM Model | Stock No. | List | Each | Lots 5 | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|
| **1/4** | 1/4" Grade 30 | 2 3/4 | 2600 | 320104 | **4X462**† | $25.87 | **$20.66** | **$19.63** | 3.0 |

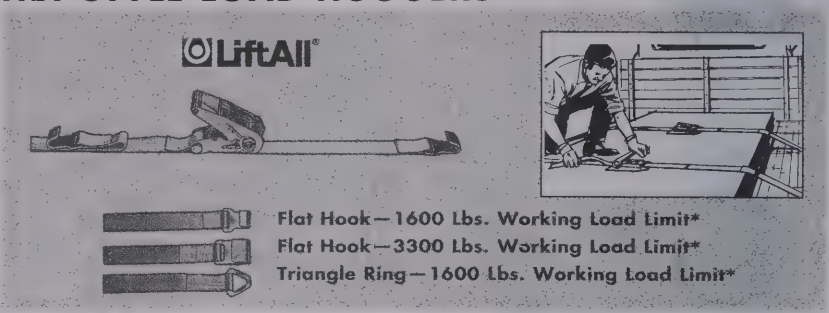
(*) WARNING: Do not exceed working load limit. Do not use for overhead lifting. (†) Non-ratchet type binder.



# LOAD HUGGERS

## RATCHET STYLE LOAD HUGGERS

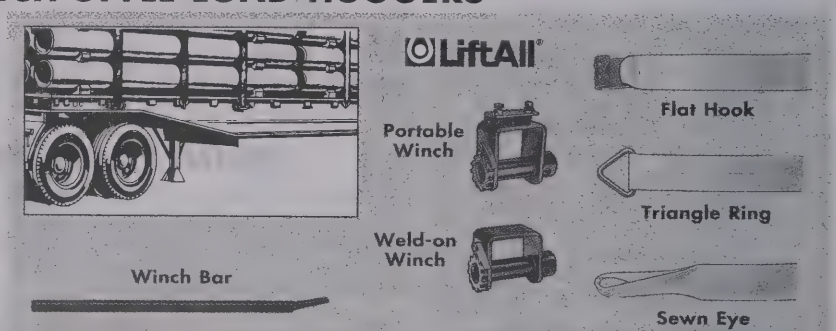
**Load huggers secure bulky loads** and shipments in place to guard against damage from slipping or shifting. These ratchet style huggers are used by rail, truck, trailer, ship, and other freight handlers, including moving and storage haulers to protect their loads from damage.

**1600 lb. huggers** come with a choice of flat hook or triangle ring terminations at each end; 3300 lb. hugger comes with flat hook terminations only. Hook engages in appropriate fixed keepers on the truck, feed-thru end slips through the ratchet reel. Pumping action on the ratchet draws strap tight over the load. Hugger is 27 ft. long x 2" wide, and comes in two pieces. Strapping fabric is of bright yellow polyester webbing. Ratchet is heavy-duty steel. Lift-All brand.

**IMPORTANT: Read Warning Sheet Supplied With Each Strap or Tiedown.**

| Working Load Limit* (Lbs.) | Breaking Strength (Lbs.) | Fitting Style | Web Strap W (In.) | Web Strap L (Ft.) | Lift-All Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|
| **1600** | 5,000 | Flat Hook | 2 | 27 | 60501 | **2W726** | $43.30 | **$36.80** | 4.8 |
| **3300** | 10,000 | Flat Hook | 2 | 27 | 61001 | **2A468** | 52.83 | **40.55** | 6.0 |
| **1600** | 5,000 | Triangle Ring | 2 | 27 | 60503 | **2A467** | 40.66 | **34.50** | 4.8 |

(*) WARNING: Do not exceed working load limit. This is the maximum load which may be applied per the Commercial Vehicle Safety Alliance.



## WINCH STYLE LOAD HUGGERS

- **5,000 lbs. working load limit***
- **15,000 lbs. breaking strength**
- **12,000 lbs. California Highway Patrol rating†**
- **4" wide x 27 ft. long**
- **Straps, winch, bar sold separately**

**Heavy-duty 4" wide polyester straps** meet or exceed California Highway Patrol specifications. One end of strap termination comes with choice of 3" flat hook, 4" forged triangle, or sewn eye; other end is unsewn and fits into winch roller wheel. Winch, sold separately, tightens strapping over the load and the ratchet pawl locks strapping in place. Standard winches must be welded to the carrier body.

**Portable winches** bolt on to carrier body and can be repositioned as needed any time. 11/16" space between mounting clamp and winch housing. Winch bar, sold separately, is 33" long with knurled handle for better grip. Bar provides leverage to crank winch tight; can be used with either model. Lift-All brand.

**IMPORTANT: Read Warning Sheet Supplied With Each Strap or Tiedown.**

| Description | Fitting Style | Strap W (In.) | Strap L (Ft.) | Lift-All Model | Stock No. | List | Each | Shpg. Wt. |

(*) WARNING: Do not exceed working load limit. This is the maximum load which may be applied per the Commercial Vehicle Safety Alliance. (†) This rating is determined and accepted by the state of California.

## MINI-RATCHET LOAD HUGGERS

- **Vinyl coated "S" and hook & keeper styles available**

**For securing farm, commercial, and recreational loads.** Attach to hand trucks, dollies, appliance movers, boats, etc. and can also secure tarpaulin covers on small trailers. 1" wide nylon web strap is 10 feet long. All steel mini-hand ratchet. Blue color webbing. Lift-All brand.

**IMPORTANT: Read Warning Sheet Supplied With Each Strap or Tiedown.**

| Working Load Limit* (Lbs.) | Breaking Strength (Lbs.) | Fitting Style | Nylon Web Strap W (In.) | Nylon Web Strap L (Ft.) | Lift-All Model | Stock No. | List | Each | Shpg. Wt. |

(*) WARNING: Do not exceed working load limit. This is the maximum load which may be applied per the Commercial Vehicle Safety Alliance.

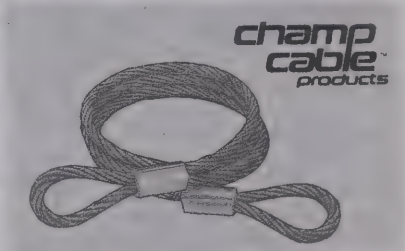
# LOCK-M-UP™ VINYL JACKETED CABLES

### CHAMP CABLE PRODUCTS LIFETIME LIMITED WARRANTY

**Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

Galvanized cable has heavy-duty, clear vinyl jacketing that prevents scratching and abrasion when winching machinery, tools, and other equipment. Not to be used for lifting operations. Comes with pull-proof loops. Champ Cable products brand.

| Cable Size (In.)* | Length (Ft.) | Working Load Limit† (Lbs.) | Champ Cable Products Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **1/4** | 6 | 1400 | 50570 | **6W037** | $14.58 | **$12.05** | 1.2 |
| **3/8** | 9 | 3000 | 50580 | **6W038** | 25.79 | **21.30** | 3.2 |



(*) Size of cable only; 3/8 and 1/2" respectively including vinyl jacketing.
(†) WARNING: Do not exceed working load limit.

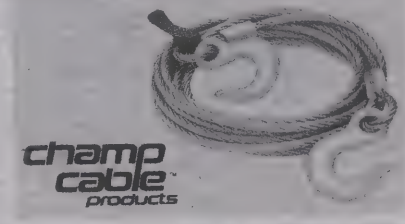
# LOCK-M-UP™ SECURITY CABLES

### CHAMP CABLE PRODUCTS LIFETIME LIMITED WARRANTY

**Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

Galvanized security cables with pull-proof loops secure motors, tools, machinery, almost anything that needs to be locked up. Not to be used for lifting. Multiple wire strands resist regular wire cutters and hacksaws. More difficult to cut than chain. Champ Cable products brand.

| Cable Size (In.) | Length (Ft.) | Working Load Limit* (Lbs.) | Champ Cable Products Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **3/16** | 6 | 1900 | 50590 | **6W039** | $6.92 | **$5.72** | 0.5 |
| **5/16** | 6 | 5000 | 50600 | **6W040** | 12.84 | **10.62** | 1.4 |



(*) WARNING: Do not exceed working load limit.

# EMERGENCY TOW CABLES

### CHAMP CABLE PRODUCTS LIFETIME LIMITED WARRANTY

**Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

Champ flexible galvanized cables with forged hooks and pull-proof loops are 9 times lighter than chains. Corrosion-resistant. Can be coiled for easy handling. Come complete with Velcro cable straps for storage. Champ Cable products brand.

| Cable Size (In.) | Length (Ft.) | Working Load Limit* (Lbs.) Towing | Lifting | Champ Cable Products Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|

| **3/8** | 50 | 15,000 | 3000 | 50355 | **6W036** | 81.33 | **67.25** | 14.0 |

(*) WARNING: Do not exceed working load limit.

# VEHICLE RECOVERY STRAPS

Strong, lightweight weather-resistant Tuff Edge™ nylon web straps with Polymer coated edge yarns that help protect against cutting and abrasion. Eyes at each end are lined with a wear pad for added durability and resistance to slippage. Straps have red inner warning markers which become visible when surface area is cut or worn, indicating a hazardous condition exists and the strap must be replaced. Silver color with black edges. Lift-All brand.

| Length (Ft.) | Width (In.) | Web Tensile Strength (Lbs.) | Assembly Break Strength (Lbs.) | Rated Capacity (Lbs.) | Lift-All Model | Stock No. | List | Each | Shpg. Wt. |

# ELECTRIC AND HYDRAULIC WINCH SELECTION GUIDE

**WINCH RATING**—Vertical lift rating given for industry reference only. It is a measure of actual maximum force to which the winch system may be subjected. Nos. 4Z326, 5W660, 4Z327, and 5W474 are rated for 10 ft. pull with drum 1/3 full (3-5 layers of cable). Capacity decreases approximately 50% with full drum. All other winches are rated on first layer of cable, the capacity will decrease 10-15% for each additional layer of cable, because the hub's working diameter is increasing. For double line operation, use only the pulley block provided with the unit.

**WINCHING VS. HOISTING**—Electric winches are designed for intermittent duty pulling operations and **are not to be used for lifting, supporting, or transporting people, or lifting loads over areas where people could be present.** Winches do not have the features necessary for overhead hoisting. For hoists, refer to the "Hoist" section of this catalog.

POWER — All Dayton electric and hydraulic winches have power "in" and "out". Some also have a clutch and/or free-wheel feature. See chart below.

DUTY CYCLE—Unless specified otherwise, most electric DC and AC powered winches **cannot be operated continuously.** To do this will overheat and damage the motor. The maximum normal duty cycle is 1-3 minutes ON, followed by a 20-minute cool-down period. For more frequent operation needs, refer to long cycle or longer duty rated electric units, and continuous duty rated hydraulic winches.

## FEATURE EXPLANATION FOR CHART ABOVE

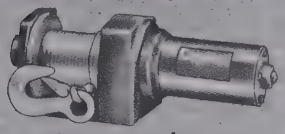
1. **Clutch Release**—Ability to control lowering a load with a clutch instead of winch motor.
2. **Free Wheel**—Ability to pull cable freely from the winch drum by hand under no load conditions.
3. **Pulley Block**—For double line winch operation. Increases pulling capacity of winch, but results in lower load speed and longer run time.
4. **Circuit Breaker**—Electrical overload protection for motor. Note: Will not protect against motor overheating due to excessive run time.
5. **Mechanical Brake**— Friction within the winch gears or a separate friction brake device which automatically holds the load in position when the power switch is released.
6. **Power Source**— Operating power needed. For 12 volt DC models, it is important to keep vehicle running while using winch.

## ROLLING LOAD CAPACITY

To calculate the rolling load capacity of a winch (the amount of load which can be pulled up an incline) multiply the vertical lift capacity, single or double line, by the factor shown in the chart at the right. Multiplication Factor shown includes a 10% rolling friction factor.

**Maximum Pull Capacities For Rolling Type Loads at Various Angles of Inclines**

| Percent Incline | Multiply by: | Percent Incline | Multiply by: |
|---|---|---|---|
| Level Surface | 10.00 | 30 (17°) | 2.61 |
| 5 (3°) | 6.67 | 50 (26°) | 1.86 |
| 10 (6°) | 5.02 | 70 (35°) | 1.53 |
| 20 (11°) | 3.40 | 100 (45°) | 1.29 |

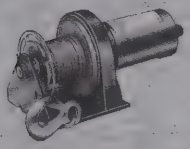


More ways to move and store products safely and securely.

# MULTI-PURPOSE ELECTRIC WINCHES

## Dayton® 12VDC ELECTRIC WINCHES

### 1500 to 3000 Lb. Capacity Models:

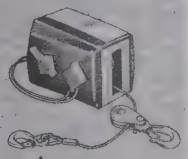


**Typical Applications: light vehicle recovery, bail loading and other agricultural jobs. Lawn and garden trailer loading, and raising and lowering basketball backboards.**

A

No. 3VJ64

- Cable tension plate
- Remote station
- High speed planetary gears



B Nos. 6X190 & 6X191

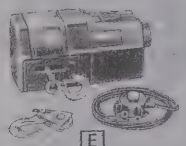
- High speed planetary gears
- Winch mounted switch

C Nos. 5W660 & 4Z326

- High efficiency spur gears
- Includes quick mounting kit
- Stainless steel front plate
- Emergency hand crank

### 2500 to 4500 Lb. Capacity Models

**Typical Applications: Vehicle recovery, skid pulling and truck & trailer loading. Opening and closing gates, moving dumpsters, and other miscellaneous pulling.**



- Cable tension plate
- Protective motor covor
- High speed planetary gear train
- Integrated solenoids with handheld switch on 12 ft. lead (except Nos. 3VJ65 & 3VJ67)

D

No. 6Z002

- Hawse fairlead

E

Nos. 3VJ65 & 3VJ67

- Prewired switch
- Hawse fairlead

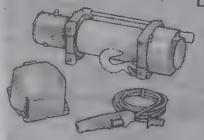
F Nos. 3VJ68 & 3VJ69

- Hawse fairlead

G No. 3VJ70

- Roller fairlead

### 6000 to 10,000 Lb. Capacity Models:



**Typical Applications: Heavy vehicle recovery, tow trucks and trailers, machine pulling and other heavy pulling jobs.**

- All Units include integrated solenoids with handheld switch on 12 ft. lead

H No. 5W786

- Protective motor cover
- High speed planetary gears

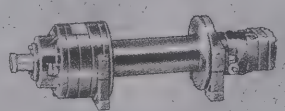
# ELECTRIC AND HYDRAULIC WINCHES AND WINCH ACCESSORIES

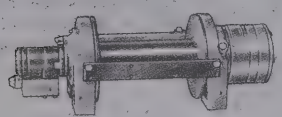
## 12VDC SMALL CRANE WINCH

Dayton® For Winch Features Comparison Table, See Page 2252



Designed for lifting and holding. Features include 5:1 safety factor and full load mechanical brake.

- Integrated solenoids with handheld switch on 12 ft. lead
- Holds up to 50 ft. of 1/4" wire rope (optional)
- Roller fairlead
- All steel high speed planetary gear train



| Vertical Lift Capacity (Lbs.) Single Line | Full Load Amps | Winch Dimensions (In.) L | W | H | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| 1,000 | 80 | 15 7/64 | 8 3/64 | 6 | 3VJ66 | $483.85 | $368.75 | 30.0 |

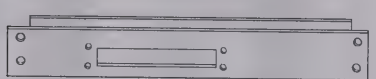
## HYDRAULIC PLANETARY WINCHES

Dayton®

No. 3VJ73

No. 3VJ75

- Power "In" and "Out"
- Continuous duty rated
- Require open center control valve
- Can be rail or foot mounted
- High torque SAE 2 bolt flange motors
- High speed all steel planetary gear train
- Full rating at 2000 PSI and 15 GPM
- Meet SAE J-706



### HYDRAULIC WINCH SPECIFICATIONS *

## VEHICLE FRONT MOUNTING PLATE FOR No. 5W786 WINCH

One-piece steel mounting plate for mounting No. 5W786 winch to secure surfaces. No cutting, welding, or drilling required. Painted black. Dayton brand.

**No. 5W787.** Vehicle Front Mounting Plate. Shpg. wt. 25.0 lbs. List $75.50. Each.....$50.75

## DAYTON REMOTE CONTROL SWITCH KITS

**Remote Kit for Winches Nos. 6X190 and 6X191.** Operates winch from vehicle dash or other permanent location up to 10 ft. away. Kit includes remote switchplate, one pair 10-ft. 8-gauge winch motor wires, and hardware. Switchplate attaches to standard switch supplied with winch. Not for hand held use. Dayton brand.

**No. 6X192.** Shpg. wt. 1.6 lbs. List $28.18. Each.....$18.85

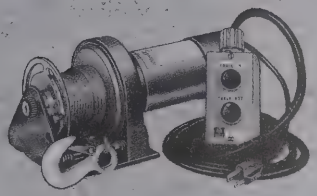
**Remote Switch for Nos. 4Z326 and 5W660 12V DC Winches.** Operates winch from vehicle dash or other permanent location up to 10 ft. away. Uses switch supplied with winch. No wiring required.

**No. 5X500.** Shpg. wt. 2.0 lbs. List $43.14. Each.....$32.10

**Remote Switch for Nos. 4Z327 and 5W474 115V AC Winches.** 10 ft. cord with hand-held pendant with "OUT-OFF-IN" rocker switch.

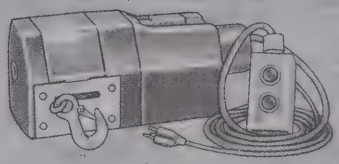
**No. 4X088.** Shpg. wt. 1.2 lbs. Each.....$40.20

No. 6X192



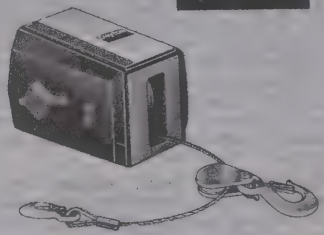
No. 5X500

# 115/230VAC ELECTRIC WINCHES



Replacement Parts Available
1-800-323-0620

All Winches Have Power" In" and "Out"



Dayton

A No. 5W659

B No. 3VJ63

C Nos. 5W474 & 4Z327

### A No. 5W659

- Cable tension plate
- All steel high speed planetary gear train
- Prewired switch
- 40 Ft. wire rope

### B No. 3VJ63

- 5:1 Safety factor
- Cable tension plate
- High speed planetary gear train
- Prewired switch
- Automatic full load mechanical brake
- Protective motor cover and wire rope shield

### C Nos. 5W474 & 4Z327

- Stainless steel front plate
- High efficiency spur gears
- Includes quick mounting kit
- Emergency crank handle

**A ground fault circuit interrupter is recommended for all outdoor applications of 115V, 60 Hz winches.**

For Winch Features Comparison Table, See Page 2252.

WARNING: NOT to be used as a hoist for lifting, supporting or transporting people or loads over area where people could be present.

# MANUAL WINCHES AND ACCESSORIES

## MANUAL WINCHES

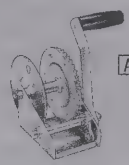
**Applications include**—ratchet winches for pulling, skidding. or rolling. Brake and worm winches for the above plus lifting and lowering.

**A, B & C Zinc Plated Ratchet Winches.** Zinc plating provides superior corrosion resistance, even in salt water applications. All feature comfort grip which provides a secure hold while cranking. A & B have "grabber" one-way ratchet that locks load in "on" position and freewheels in "off" position. C has two-way ratchet that allows you to bring cable in the bottom or over the top of the drum.

**D & E Zinc Plated Brake Winches.** Zinc plating provides superior corrosion resistance, even in salt water applications. Self-activating, double disc brake system provides a positive load hold when handle is released. Oversized drum hub improves cable life.

**D 4KG30. Dual Handle, 2-Speed Brake Winch.** Does the same job with less effort than a single handle winch. Shifts on the fly, lets you change speeds without releasing handles, giving you better load control. Commonly used in steep incline and lifting applications.

**F & G Worm Gear Winches.** Holds load in place when handle is released. Provide a quieter operation than standard ratchet winches. Gear design and ratio require little effort to move loads over 1 ton. Gear shaft has oil impregnated bushing for reduced friction.



**F Worm Gear "Poultry" Winch.** Split drum design allows movement of two independent cables, common in the poultry industry. Applications include raising and lowering food and water feeders, opening and closing of ventilation curtains. Loop drive for ceiling applications operated by a shepherd hook with 1/2" drill.

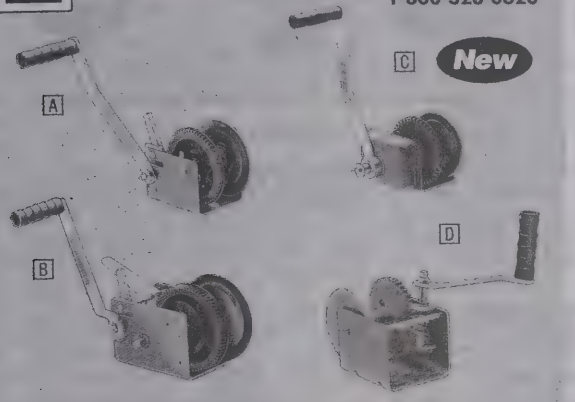
## BLOCKS AND SHEAVES



For high load and medium speed applications. Heavy-duty wire rope and aircraft cable. Forged fittings, zinc finish is weather resistant. Steel sheaves. Bronze bearings are self-lubricating.

# MANUAL WINCHES AND ACCESSORIES

Registered to ISO 9001

Replacement Parts Available 1-800-323-0620™

**3-YEAR DUTTON-LAINSON LIMITED WARRANTY**

Text of warranty available on request.
See "Manufacturers' Warranties" on page opposite inside back cover

- **Useful for a wide variety of applications including moving heavy wheeled equipment, machinery, vehicles, boats and farm implements**
- **Choose from standard ratchet winches, two-speed deluxe ratchet winches, brake winches or worm gear winches**
- **Ratchet winches A & B recommended for hauling and pulling applications where the ability to pull line freely from the winch is necessary. Manually operated ratchet locks load in position and will freewheel with ratchet released. Not recommended for lifting applications**
- **Brake and worm gear winches, C & D, are self-locking, and recommended for hauling, pulling and lifting applications when freewheeling is not a requirement. Recommended for unskilled users, especially on rental equipment, etc**
- **Brake and worm gear winches (both self-locking) can be used for vertical lifting, but should not be used for overhead hoisting or moving people**
- **All winches feature: heavy-duty construction, hardened steel drive gears, large diameter molded hand grip, permanently lubricated bearings, copper-brazed gears and reinforced arc-welded reel assemblies**
- **Metallic copper bronze powder-coated finish TUFFPLATE™ finish on all plated parts for additional rust resistance**

**A Standard Ratchet Winches Nos. 6Z001 and 2Z601** are single speed models.

**B Deluxe Ratchet Winches Nos. 2Z602 and 2Z603** are two-speed with quick attach handle for easily changing from one gear ratio to the other. No. 2Z603 has a manually operated hand brake to help control freewheel out mode.

**C Brake winches Nos. 6W045 and 4PD85** have self-activating brake to hold load whenever hand crank is released. Minimum load required for proper operation is 50 lbs. No. 4PD85 has a brake lock-out lever to allow free wheeling under no-load conditions.

**D Worm Gear Winch No. 4Z183** has worm gear drive which holds load whenever crank handle is released. Vertical drive shaft includes both a handle for normal hand cranking and loop drive ring for remote operation with shepherd's hook.

(*) Vertical lift rating for industry reference only; a measure of actual maximum force to which the system may be subjected. (†) Winch drum capacity given as a reference only.
Winches are not supplied with cable, order separately. All models except 4Z183 are designed to accept web strap in addition to rope or cable.

**WARNING: Winches are not to be used as a hoist for lifting, supporting or transporting people or loads over areas where people could be present.**

# WINCH CABLE AND STRAP ASSEMBLIES

For use on manual and electric winches. Heavy-duty thimble eye and professionally swaged loop. Zinc plated hook with safety latch. Flexible 7 x 19 galvanized cable.

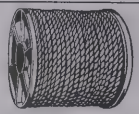
## POLYESTER WINCH STRAPS

For use with hand winches. 2" x 20 ft. 5,000 lbs. break strength. Heavy-duty forged latch hook.

**No. 4KH21.** Shpg. wt. 1.3. List $21.48 Each ..... $16.54

## PULLEY BLOCK WITH SWIVEL HOOK

Increases the pulling capacity of your winch with double line operation. 2,400 lbs. safe working load. For use with winchlines up to 1/4".



**No. 4KH24.** Shpg. wt. 3.2. List $25.87 Each ..... $19.92

# ALL-PURPOSE AND WIRE-PULLING ROPE

CROWE ROPE INDUSTRIES LLC

Hank

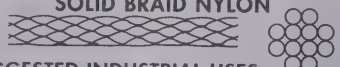
Reel

Ball

Coilette

**ALL-PURPOSE NYLON and POLYPROPYLENE ROPES** are for general use in construction, electrical, marine, transportation, safety, scaffolding, industrial, and home maintenance applications. These synthetic ropes are stronger, lighter in weight, less expensive, and easier to handle than natural fiber ropes. Excellent resistance to rot and mildew and will not deteriorate when exposed to oil, grease, and most chemicals. Rope fibers are treated with ultraviolet stabilizers to reduce deterioration from the sun. Duraline® brand by Crowe Rope Industries LLC.

**NYLON:** The strongest rope available for general purpose use. Its physical properties provide excellent resistance to abrasion and high elasticity absorbs sudden shock loads. Handles easily and holds knots well. White color.



## TWISTED NYLON

**SUGGESTED INDUSTRIAL USES:**
• tow rope • tie downs • dock and anchor lines • towing hawsers • farm ropes • slings • hand and block lines • utility stringing lines • textile drive ropes

Strong general purpose rope is easy to splice (use minimum of four tucks).

## SOLID BRAID NYLON

**SUGGESTED INDUSTRIAL USES:**
• tie downs • mason line dies • utility ropes • sash cords • rigging • pulleys • winches • blocks • flagpole cords • awning cords

Braided-in lock stitch. Retains round shape under heavy loads. Will not splice. Resists abrasion better than twisted ropes.

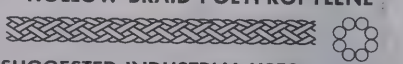
(*) Approximate load of which new, unused rope breaks. Minimum is 10% less.
(†) Maximum safe working load is the maximum load a rope should carry in situations where danger exists to life, bodily injury or valuable property. Dynamic loading occurs when rope is subjected to sudden and extreme stress or shock loads; dynamic loading of a rope voids the figure given as a working load.

## TWISTED NYLON TWINE

**SUGGESTED INDUSTRIAL USES:**
• general tying • mason and chalk line • conduit fish line • trap line • plumb line

Constructed from 100% filament nylon. Used extensively by building and sporting goods trades.

**POLYPROPYLENE:** High strength with light weight. Physical properties provide low elasticity, low water absorption, good electrical resistance, and good buoyancy.



## TWISTED POLYPROPYLENE

**SUGGESTED INDUSTRIAL USES:**
• wire pulling ropes • barrier ropes • truck ropes • hand lines • drive ropes • guide lines • pulling and sagging lines • tie downs • mooring lines • lariats and lead ropes • pool and safety float lines • catenary lines • rigging • hoisting • rope falls

A good general purpose rope. Suitable for wire pulling applications. Slick surface pulls through conduit pipe and obstructions with little friction and may be used with standard pulling machines. Tight lay produces a hockle resistant rope which is excellent for use in scaffolding. Yellow color.

## HOLLOW BRAID POLYPROPYLENE

**SUGGESTED INDUSTRIAL USES:**
• well rope • safety lines • tie downs • dock and anchor lines • trucking tie downs • hand lines • general purpose cords

The most versatile rope available and the easiest to splice. Lightweight and resistant to rotation, this rope floats and will not rot. Resistant to marine growth. Can remain in water for years with little or no effect on rope fibers. Black color improves resistance to deterioration from sunlight.

## TWISTED POLYPROPYLENE TRUCK ROPE

**SUGGESTED INDUSTRIAL USES:**

• general purpose tie down rope • well rope • golf course barriers • tarp tie downs • temporary storage tents and canopies

Black with distinctive orange marker yarn and internal manufacturer's identification tape. Approved and made to specifications of the trucking industry for all states. Black color with orange marker yarn, resists sunlight deterioration.

# POLY-CORD AND POLY-STRAP TIE DOWNS

Designed for a wide variety of applications including automotive, hardware, marine, recreation, farm, home, and garden. Made with Proflex 1253®, a unique blend of elastomers developed and tested in conjunction with Uniroyal Chemical. Salt water, sunlight, and ozone have little or no effect on performance and life expectancy. Will not crack, break, or leave ugly scuff marks. Return to original length regardless of frequency or duration of stretching. Polyflex brand.

**Poly-Cord®** features hooks made from nylon and fiberglass molded right into cord. Hooks will not scratch, gouge, or spark like metal hooks. Primarily used as a tensioning device for lighter duty applications. For use up to twice its length.

**Poly-Strap®** uses two galvanized steel hooks. Primarily used as a securing device for heavier duty applications.

# VACUUM CUPS

**For moving nonporous objects without marring or scratching surface**

Designed for manually moving hard-surface materials and objects such as glass, marble, sheet metal, and appliances. Rubber gripping pad attaches firmly to almost all nonporous surfaces by simply pumping plunger until vacuum is created.

All cups have spring-balanced pumps with red-line vacuum indicators that provide a visual warning if cup should lose holding power. 8" dia. model is available with either metal or ABS polymer handle.

Come complete with plastic carrying case, except No. 6A984 which has heavy plastic pad protector. Wood's Powr-Grip brand.

**No. 6A984 Vertical Metal Handle**

**No. 6A986 Horizontal Metal Handle**

| Cup Dia. (In.) | Handle Type | Maximum Lift Load Cap.* (Lbs.) | Powr-Grip Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **6** | Metal, Vertical | 70 | LJ6VH | **6A984** | $80.51 | **$79.75** | 3.0 |

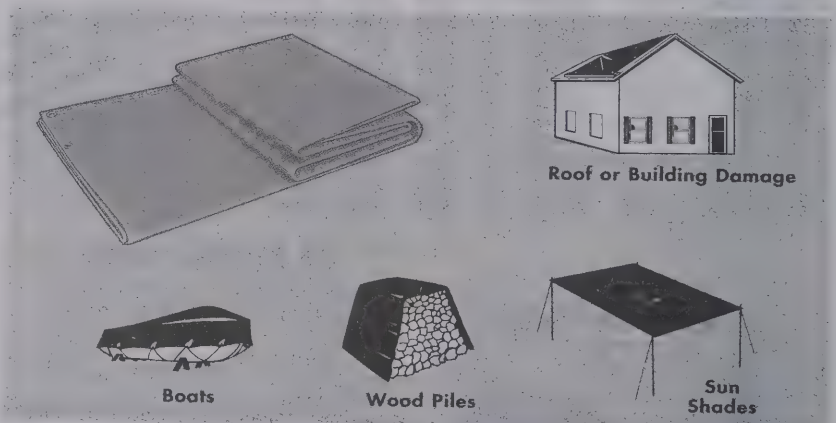
# TARPAULINS AND POLY FISH LINES

## CANVAS TARPAULINS

**Water-Repellent. Mildew-Resistant. Prevents Condensation Build-up**

- **Dependable weather protection for permanent and temporary storage and coverage of equipment used outdoors**
- **Tarps "breathe" to prevent build-up of damaging condensation**
- **Special wax treatment increases resistance to moisture and mildew**
- **Rust-resistant brass grommets simplify tying down**

All purpose 10 oz. canvas tarpaulins provide dependable weather protection for all permanent or temporary storage and coverage needs. Durable canvas tarps breathe to prevent condensation build-up underneath. These are especially practical in covering equipment used outdoors by contractors, farmers, industrial plants, and recreational facilities. Fabric has special wax treatment to resist water and mildew. Rust-resistant 1/2" ID brass grommets spaced approximately 3½ ft. apart simplify tie-down. 1½" seams double lock-stitched with mildew-resistant thread. Finished size is slightly smaller than cut size. Canvas is subject to shrinkage due to variable climate conditions. Tarps are tan color. J. C. Goss brand.



| Cut Size (Ft.) | Finished Size | J.C. Goss Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **8 x 10** | 7' 6" x 9' 6" | 10-0810 | **1A585** | $48.80 | **$36.90** | 9.6 |

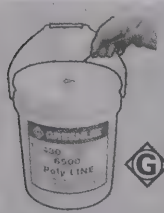
## POLYETHYLENE TARPAULINS

- **Lightweight and low cost**
- **Waterproof, rotproof, chemical-resistant, and virtually rip-proof**
- **Treated to resist ultraviolet rays**
- **Weighs the same wet or dry**



High density 8 x 10 weave (1,000 Denier) of polyethylene fibers is coated on both sides with polyethylene sheets 1.8 mils thick and is specially treated with an absorber to resist ultraviolet rays from the sun. Used for covering and protecting equipment and materials on construction sites, farms, around the home, as sunshades, for covering sports equipment, and boats. Larger size tarps are well suited for roofing applications and also may assist in covering damage caused by natural disasters.

Fabric weighs only 3.4 oz. per square yard, wet or dry, and handle easily at high or low temperatures. Seams are heat-sealed with polyethylene rope lined hems. Aluminum grommets approximately every three feet. Facilitate tie-downs with Crowe Rope brand three-strand twisted polypropylene rope Nos. 2W728 and 2W729. For ordering information, see page 2258. Tarps are blue color.

GREENLEE®

## POLY FISH LINE

- **Resists tangling when dispensing**
- **Will not rot or mildew**
- **Use to pull rope through conduit**
- **Use with power fish tape systems**
- **Not for pulling wire or cable**

# ZIPPERS, CONSTRUCTION FILM, AND MASKING TAPE

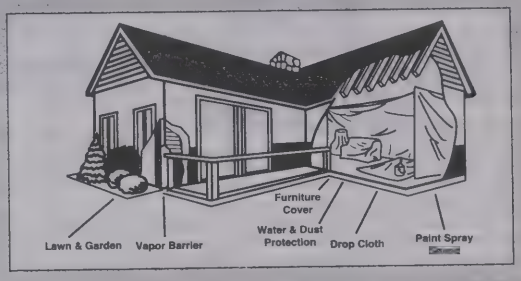
## STIK'N ZIP® PEEL AND STICK ZIPPERS

Pack of 2, seven foot, self-adhesive zippers permanently stick on plastic and are designed to create access and entryways through plastic. Easy to install, the zippers can be used to create any width doorway, open from both sides, and are ideal for controlling dust or exposure to weather. Ideal for use in remodeling projects, asbestos removal, lead abatement, greenhouses, shelters, boats, barns and more. Strom Inc. brand (8302).

**No. 4KN02.** Shpg. wt. 0.6 lbs. List $20.00. Each Pkg. of 2 .....$16.00

Strom

No. 4KN02

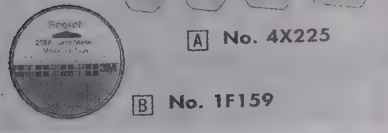


## PLASTIC CONSTRUCTION FILM

POLAR PLASTICS INC.

Made from high strength polyethylene resin, film protects against dust, water, and chemicals. Choose from a variety of sizes and thicknesses, in clear or black. Manufacturer guarantees plastic to be of full weight and size. Polar Plastic brand.

**Low density polyethylene film offers unlimited uses, including:**



- **Vapor Barrier: For walls, floors and ceilings. 6 mil is twice the barrier of 4 mil.**
- **Drop Cloth: For paint and spraying applications**
- **Concrete Curing: For use under and over slabs or sidewalks**
- **Outdoor Protection: Use for covering windows and doors to keep outside elements out**
- **Equipment Protection: Provides protection from dust, water, and chemicals. Use black for outdoor use because of its greater resistance to UV rays**
- **Liner: For containers or pits of non-toxic materials**

## MASKING TAPE

Scotch™

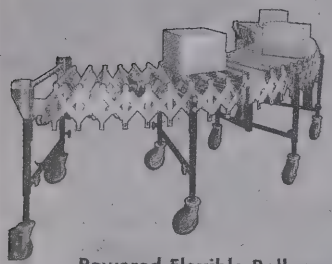
A No. 4X225

B No. 1F159

### A SCOTCH™ MASKING TAPE

Use for general paint masking applications. Crepe paper backed tape with rubber-based adhesive which easily conforms to irregular shapes. Adheres well to many different surfaces. 60 yards/roll.

### B LONG MASK



Use for industrial applications where exposure to sunlight is expected and clean removal required. Ideal for outdoor painting applications. Specialty masking tape. Should be applied to clean and dry surfaces. Crepe paper backing. 60 yards/roll.

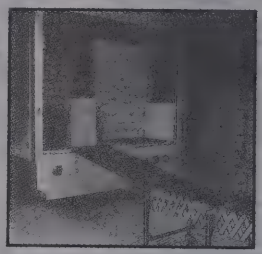
# FLEXIBLE/EXPANDABLE POWER ROLLER AND GRAVITY SKATEWHEEL CONVEYORS

Powered Flexible Roller Conveyor in Curved Position



Best/Flex Skatewheel Conveyor in Folded Position

Replacement Parts Available 1-800-323-0620

Flexible/Expandable Conveyors are also portable so they can be positioned almost anywhere.

Extend-A-Stick Conveyor connects expandable conveyor to truck for easier unloading.

**Flexible/Expandable Conveyors** store folded to save valuable floor space when conveyor is not in use, and quickly expand to go to work. Both flexible and portable, they can be positioned in a straight line or a curve wherever they are needed. A great solution for loading and unloading trailers, temporary conveyor lines in warehouse operations, shipping department, packaging applications, temporary manufacturing lines, assembly areas, and a wide variety of other material handling applications. Best brand.

**Standard Features Include:**

**Self-Tracking** — Packages follow conveyor path without side rails or engineered curves.

**Unique Design** — Side plates feature high tensile strength with ribbed construction for greater durability. Assembled with shoulder bolts and locknuts. No flimsy clips or rivets.

**Lock in Place** — Locking device on heavy-duty, easy rolling swivel casters locks both wheel and swivel simultaneously for greater rigidity while conveyor is in use.

**Adjustable Height** — Telescoping legs made from heavy-duty square tubing adjust conveyor height.

Shipped assembled in folded position. Multiple sets may be connected for additional lengths or for connecting to existing conveyor system by using optional leg connect brackets No. 6A203, available separately. Optional package stops are also available.

## POWERED FLEXIBLE ROLLER CONVEYORS

- **3:1 expansion ratio**
- **Height adjustment from 31½ to 44½"**
- **6" swivel casters**
- **100 lb. load capacity per lineal ft.**
- **Roller axle centers extended: 5"**
- **1½" zinc-plated rollers constructed with 1/2" solid steel axle and precision bearings for maximum performance and extended life**
- **Operate on 120VAC**

**Drive Motor Specifications:**

- **Multiple drive motors**
- **Approximately 3 amps per 12 ft. of conveyor**
- **DC drive motors with AC-DC converter**
- **Motor rated for continuous duty cycle**
- **Stop/Start cycle: 300 times per hour**

Powered rollers eliminate dead spots. Power is transmitted to every roller by a durable polyurethane belt similar to line shaft conveyors. Control box located in the middle of conveyor allows adjustment of line speed from 0 to 120 ft. per min. On/Off switch is located at both ends of conveyor for easy access. Conveyors are reversible at the flip of a switch; no special wiring required.

## BEST/FLEX GRAVITY SKATEWHEEL CONVEYORS

- **4:1 expansion ratio**
- **Height adjustment from 28½ to 41½"**
- **5" swivel casters**
- **Come in two load capacities: 200 lb. capacity per lineal ft. with nylon skatewheels and 300 lb. capacity per lineal ft. with steel skatewheels**
- **Patented structural steel bridge support spans the entire conveyor width for additional strength**

## CONVEYOR ACCESSORIES

**PACKAGE STOPS** create a barrier for packages traveling on conveyor for rerouting or further processing.

**EXTEND-A-STICK CONVEYORS** offer easy transition from truck beds to expandable conveyors for unloading, or for use as a gate in aisles or walkways for personnel and equipment to pass through. Units are 5 ft. long with a load capacity of 250 lbs. per lineal ft.

**LEG CONNECT BRACKETS** connect two or more roller or skatewheel conveyors to provide any length needed. Come in sets of two.

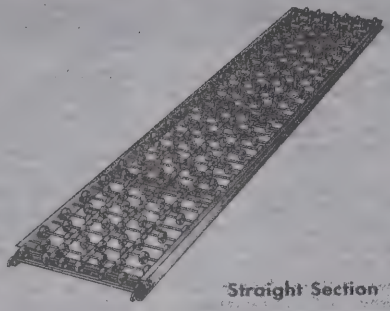
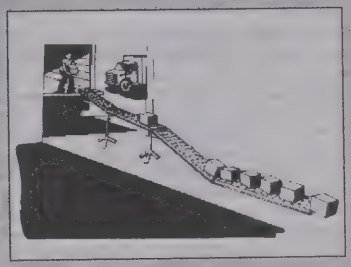
# GRAVITY SKATE WHEELED CONVEYORS AND TRIPOD STANDS

**SKATE WHEELED CONVEYOR FEATURES**



- Galvanized steel or aluminum construction
- Straight sections 10 feet long
- Curved sections 90° arc, 36" uniform inside radius
- 12 and 18" overall width

MTD CONVEYOR PRODUCTS



Replacement Parts Available 1-800-323-0620

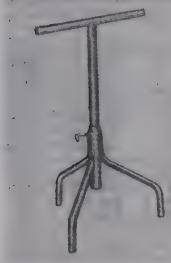
Curved Section

Straight Section

Gravity skate wheeled conveyors are commonly used in two general applications: temporary set-ups to reduce hand carrying boxes and packages in truck loading-unloading; and in permanent systems that require moving packages and loads over long distances through a building. A gravity wheeled system consists of straight and curved conveyor sections having free-spinning wheels fixed within a framework and supported by stands or other supports of appropriate height. These conveyors are intended for handling lightweight cartons and packages.

Choice of construction is galvanized steel or aluminum. Aluminum conveyors are lightweight, highly portable, ideal for short term set-ups. Steel conveyors are generally chosen for more permanent systems because of their greater load capacity. Frame side rails are 2½ x 1 x 0.125" extruded heat-treated aluminum or 12-gauge galvanized steel. The wheel assemblies rotate independently and feature long life design with seven precision-hardened and ground ball bearings and hardened ball raceways and cones. MTD brand.

**10-Foot Straight Conveyor Sections.** Choice of galvanized steel or aluminum. Available in 12 and 18" width. 12" wide sections have 10 wheels per foot of length; 18" wide sections have 16 wheels per foot. Both sizes are 10 feet long with hooks and rods fixed to the frame ends for joining sections together.



**90° Curved Conveyor Sections.** Choice of galvanized steel or aluminum. Available in 12 and 18" widths. Uniform inside radius is 36". 12" wide sections have 10 wheels per foot of length. 18" wide sections have 16 wheels per foot. 22 separate axles in each section maximize load distribution. Curved and straight sections of the same width join together easily with two hooks and rod attached to ends of the frame.

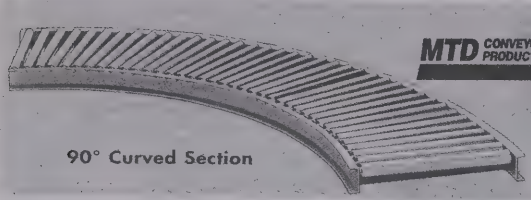
(*) Deduct conveyor weight from frame capacity to determine load capacity. Tripod supports are spaced every 10 feet.

## CONVEYOR TRIPOD STANDS

MTD CONVEYOR PRODUCTS



Adjusts 25 to 43" High

Stands support straight or curved conveyor sections in position and provide the appropriate slope for loads to move along by gravity. May be used with gravity skate wheeled or roller conveyors. Jig welded steel construction. Adjustable height range from 25 to 43". Maximum vertical load capacity is 400 lbs., but recommended for light-duty applications only. MTD brand.

# GRAVITY ROLLER CONVEYORS AND H-STANDS

90° Curved Section

Replacement Parts Available 1-800-323-0620

10 Ft. Straight Section

Gravity roller conveyors are used for conveying heavier products than may be carried on skate wheel conveyors or that have an uneven conveying surface. Consist of steel rollers having high load capacity bearings, solid steel hex axles, and galvanized steel roller tubes. Rollers are set within a welded frame supported by tripod or H-stands available separately.

Frames are painted with durable epoxy powder paint in green color. To ensure smooth product transfer, a minimum of three rollers must be underneath conveyed product at all times. All conveyors are supplied with buttplates on both ends for joining conveyor sections when they are used directly on the floor. Width of conveyor is designated by the between frame (BF) dimension. This differs from outside frame (OF) dimension of skate wheel conveyors which includes frame width. MTD brand.

**Light-Duty Steel Conveyors.** Frames have either welded or bolted construction with 1 x 2½ x 1" 12-gauge formed steel channels, complete with buttplates. Punched on 1½" centers. Frame capacity is 350 lbs. with supports on 10 ft. centers and 1300 lbs. with supports on 5 ft. centers.

1⅜" OD rollers are made from 18-gauge galvanized steel with a 5/16" hex shaft. Each roller has 90 lb. capacity. 10 ft. conveyor sections consist of 80 rollers, 90° curved sections consist of 38 rollers. Rollers are set high on 1½" centers, and roll easily, making these conveyors suitable for small, light packages.

**Medium-Duty Steel Conveyors.** For use in heavier duty applications because of their heavier gauge steel construction. Frames are either welded or bolted 1⅜ x 3½ x 1⅜" 11-gauge formed steel channels, complete with buttplates. Punched on 3" centers. Frame capacity is 1200 lbs. with supports on 10 ft. centers and 3000 lbs. with supports on 5 ft. centers.

1.9" OD rollers are made from 16-gauge galvanized steel with a spring retained 7/16" hex shaft. Each roller has a load capacity of 260 lbs. 10 ft. conveyor section consists of 40 rollers, 90° curved sections consist of 16 rollers, set high on 3" centers. Thicker walls and larger diameter roller make it suitable for rough duty applications.

(*) For actual ratings, subtract weight of each conveyor section from capacity shown. (†) 36" inner radius. (‡) 30" inner radius.

Choose H-stand that is 2" wider than conveyor between frame (BF) dimension.

# CONVEYOR H-STANDS

H-stands are used for permanent conveyor setups or for heavy-duty applications. May be used with either gravity skate wheeled, roller, or ball transfer conveyors. Constructed of two 2-piece adjustable supports and two cross ties. H-stands are painted with durable epoxy powder paint in green color. H-stands bolt directly to conveyor side-rail lower flange for a more stable support. This allows stand to remain attached to conveyor when moved.

Lower leg of H-stand has a welded footpad which can be anchored to the floor for permanent installations. Pivoting mounting bracket allows sloped installations.

A minimum of two H-stands are required for a single stand alone conveyor. Only three H-stands may be necessary for two sections of conveyor, since the H-stand is used to bridge the two sections. A stand is always recommended in the middle of a 90° curve. MTD brand.

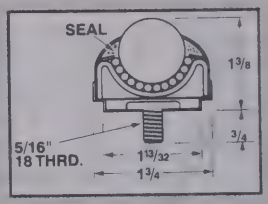
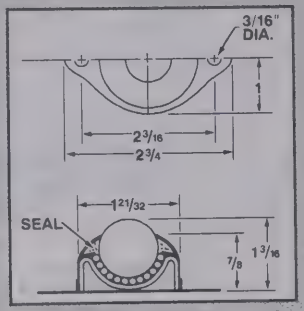
# BALL TRANSFER CONVEYORS

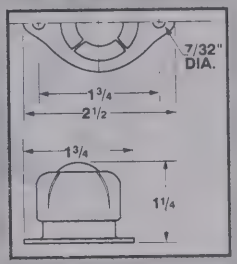
Ball Transfer Table



(H-stands not included. To order H-stands, see page 2264)

Ball Transfer Drop-in Plate





No. 6A211 Steel Ball Transfer

No. 6A212 Steel Ball Transfer

No. 6A213 Nylo® Ball Transfer Prevents Marring of Product

Multi-directional feature of ball transfer conveyors provides a low cost means of changing direction of a load almost instantly. Applications include free movement of tools, dies, assemblies, and production line components. Metzgar brand.

**Transfer Tables** are made of 12-gauge, 3½ x 1¼" galvanized steel frame with 12-gauge galvanized bed. Balls are 1" diameter carbon steel that rotate on 80 support ball bearings. Balls are mounted on 3" centers in a straight line pattern. Each ball is contained in a zinc plated hardened cup. Table has 16 balls per square foot with 65 lbs capacity per ball. Table sizes available from 24 x 24" to 36 x 48". For use at end of conveyors to transfer load to another conveyor or as a workstation. H-stands (available separately) may be used as supports.

**Transfer Drop-In Plates** allow addition of ball transfer units to existing conveyor systems. Sizes are determined by between frame (BF) dimension to correspond with sizes needed to fit gravity skate wheel or gravity roller conveyor. Drop-in plates provide the ability to position work or change direction of work within gravity system. Units fit within frame of gravity conveyor and feature a straight line pattern.

## BALL TRANSFERS

**Individual Steel Ball Transfers** are available in stud mount or two hole flange mount for creating custom designed systems. Individual units can be mounted to any surface such as plywood or plate steel. Steel ball transfers are sealed and lubricated. Seal prevents dirt and debris from entering ball bearing area. Units contain 80 ball bearings for long life and durability. Capacity of ball transfers is 65 lbs. per individual ball. Box of 25.

**Nylo® Ball Transfers** prevent marring of products such as polished stainless steel and glass. Unaffected by food acids, steam cleaning, detergents, sand, oil, and dirt. Nonclogging, self-cleaning, and require no lubrication. Nylo balls can be removed from cup for easy cleaning without tools. Conform to all food sanitation laws. Capacity of each Nylo ball is 20 lbs. Box of 25.

# POWERED BELT CONVEYORS

**Floor-to-Floor Inclined Belt Conveyor** offers efficiency in assembling, shipping, and receiving operations. Bulky boxes and bundled items as well as furniture, crates, and bagged goods can be accommodated. Floor-to-floor conveyor increases usable space by utilizing areas such as basements. Allows uninterrupted flow of goods. Unit includes reversing controls, two sets of pushbuttons for easy start/stop operation, guard rail, and floor supports. Run length is 27½ ft. with a maximum lift height of 10 ft. Infeed and discharge height is 30". Center drive unit has a belt take up for easy tension adjustment. Steep grade belt for nonslip surface and ease of product movement. Pre-engineered with a nose-over and power feeder. Shipped complete, ready for assembly and installation. Simplified bolt together construction. 12-gauge frame, 6" galvanized material. Metzgar brand.

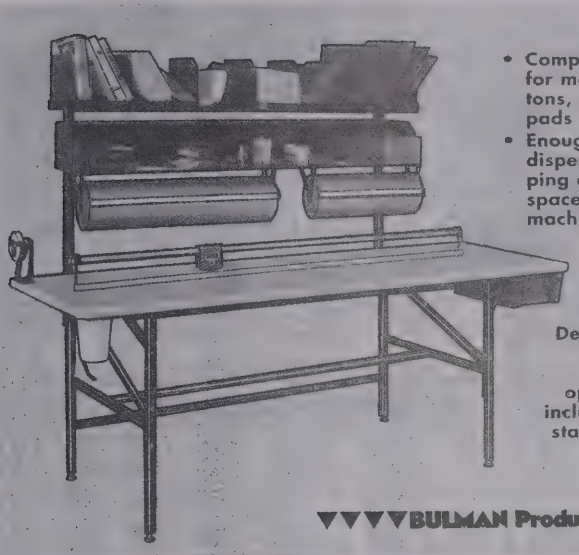
**Portable Power Conveyor** is easily relocated for temporary conveyor setups. Versatile conveyor transports cartons, bales or bags, and other similar items. Fast and powerful, it can be used horizontally or inclined to 30°. Unit comes equipped with heavy-duty undercarriage that features durable 8" wheels for easy one man maneuvering. Switch prewired to motor gives forward, stop, and reverse control. 6 ft. power cord included. Belt is constructed of 3-ply rubber with Roughtop nonslip surface. 1/8" aluminum frame. 15 ft. long. Metzgar brand.

**Portable Press Conveyors** allow easy movement of parts or scrap material from press area to storage or parts bin. Helps keep press area clean and efficient. Unit features side guard angles with lower flipper plate. Flipper plate keeps items from falling to floor and holds them until belt cleat picks them up. Belt is made of PVC with a friction surface and molded PVC cleats 1½" high on 12" centers. Conveyors come complete with drive motor and start/stop switch. 12-gauge frame, 6" galvanized material. Adjustable heavy-duty support legs. Metzgar brand.

**No. 4W609** has a 7 ft. overall length. Discharge height range is 4'4½" to 4'10½". Maximum parts bin height is 3'8".

**Horizontal Belt Conveyors** can be used as worktables for assembly line operations, inspections, sorting, and packing, as well as in loading dock operations. Suitable for small manufacturing facilities or warehouses. Allow future expansion. Frame is heavy-duty 12-gauge galvanized 6" deep box channel. Heavy-duty supports (included) are adjustable for a height range of 31 to 45" from floor to top of belt. Belt is constructed of PVC 120 material with smooth surface. Units are shipped with belt installed. Metzgar brand.

**No. 4W611 Starter Unit** is 12 ft. long and comes complete with motor and nonreversing switch.



**No. 4W612 Add-On Unit** is 10 ft. long and comes complete with supports and additional belting. Multiple add-on units can be connected to extend conveyor up to 52 ft. long without changing motors.

(*) 600 lb. capacity in horizontal position, 300 lb. capacity in 30° inclined position.

Electric and pneumatic vibrators for unjamming parts in conveyor lines available. See pages 255 thru 256.

## DELUXE PACKING TABLE

- Compact, accessible storage for mailers, envelopes, cartons, plastic bags, tapes, pads
- Enough countertop space for dispensing materials, wrapping and packing as well as space for scales, tape machines, dispensers

Deluxe packing table accommodates wide range of optional equipment including paper cutters, staplers, sealing tape, and scales

▼▼▼▼BULMAN Products, Inc.

**Convenient, efficient workstation** for packing, wrapping, packaging, mailing, and shipping operations. Compact, functional layout provides fast, easy access for storage and retrieval of work supplies and for dispensing equipment. Requires minimum floor space.

**Unit features heavy-duty hold-down device** and dowel for dispensing control of large rolls of packing material stored beneath countertop. Materials such as kraft paper, air bubble cushioning, urethane, polyethylene foams, single face corrugated and cellulose wadding up to 1/2" thick can be efficiently dispensed. Varying roll widths can be unrolled simultaneously. Holds 9 to 32" dia. rolls. Table includes rotary shear cutter mounted to countertop for cutting all types of thick packing materials as well as films and paper. Comes with plastic parts storage drawer.

**Packing table has strong, tubular steel frame construction.** Countertop is made of 1¼" edge finished high-pressure laminate particleboard, and is adjustable from 34 to 36" high. Table is 96W x 36D x 76"H. Frame has gray powder coat finish. Easily assembled; unit shipped unassembled in two cartons. Bulman brand (A-670).

**No. 7Z374.** Packing Table. Shpg. wt. 300.0 lbs. List $1099.00. Each.....**$1043.00**

### [A] BULMAN PAPER CUTTER

Roll paper cutter dispenses light to heavy kraft and other papers. Cuts evenly, using either side of spring-loaded blade. Constructed of 18-gauge cold rolled steel. Mounts on wall, countertop, or under counter. Includes rubber grommets for counter protection. Equipped with dowel holders and knife arms which lock in open position for easy roll changing. Holds up to 9" diameter paper. Office gray powder coat finish. Shipped unassembled, and flat. Pull legs apart to complete assembly. Bulman brand.

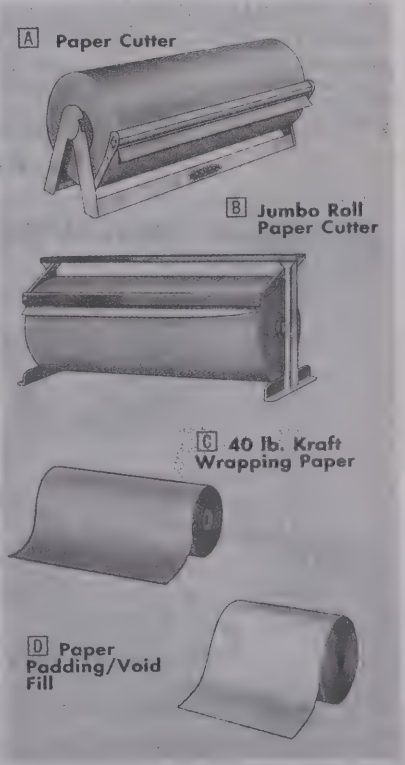
| Width (In.) | Bulman Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 24 | A500-24 | 5A128 | $42.96 | $34.40 | 4.0 |
| 36 | A500-36 | 5A129 | 53.98 | 43.20 | 5.8 |

### [B] JUMBO ROLL PAPER CUTTER

Heavy-duty cutter cuts cleanly. Uses gravity cutting blade mounted on extendable arms for safe, easy loading. Holds up to 18" diameter and up to 36" wide rolls of kraft paper. Rugged, 11-gauge steel construction for strength and durability. Gray powder coat finish. Cutter shipped unassembled. Must be permanently mounted to surface. Counter mount only. (Mounting hardware not included.) Bulman brand (A45-36).

**No. 5A130.** Shpg. wt. 25.0 lbs. List $233.33. Each.....**$194.75**

### [C] 40-LB. KRAFT WRAPPING PAPER



High quality virgin kraft paper for wrapping packages for shipment. 9" dia. roll approximately 1,225 ft. long. Also used for floor and wall protection by painters and contractors; eliminates bulky tarps and drop cloths. Recyclable. Tan color. >

| Width (In.) | Stock No. | List | Each | Lots 5 | Shpg. Wt. |

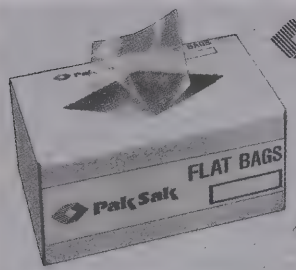
| 24 | 4X874 | $47.77 | $39.85 | $37.86 | 31.0 |
| 36 | 5W582 | 86.00 | 71.75 | 68.16 | 49.0 |

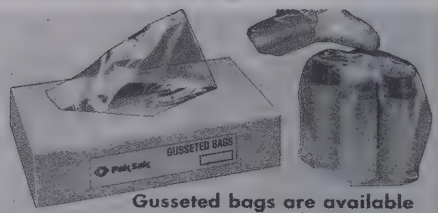
### [D] PAPER PADDING/VOID FILL



Bogus kraft padding paper for packing fragile items. 15" dia. roll, 24"W, approximately 1,175 ft. long may be placed near packing bench. Padding tears off easily, provides excellent cushioning to protect parts, instruments, glass, and similar fragile items. Made from recycled material and is recyclable. Light tan color.

**No. 4X875.** Shpg. wt. 60.0 lbs. List $57.31. Each $47.80; Lots 5.....**$45.41**

# POLYETHYLENE BAGS AND IMPULSE SEALERS



## POLYETHYLENE BAGS

Flat bags are available in 11 different sizes, in dispenser boxes of 500 or 1000 bags

No. 5A528 flat bag assortment contains 500 bags, in 5 different sizes

Gusseted bags are available in 2 sizes, in dispenser boxes of 500 or 1000 bags

No. 6A225 Paper Twist Ties

Clear 2 mil. (0.002 in.) bags are made from virgin resin. Clean and clear for visual inspection, and stronger than many paper products. Bags are tough, reusable, and will seal out dust and moisture. Available in small quantities. Bags come in dispenser boxes of 500 or 1000 bags. Eliminates ordering more bags than necessary. Pak Sak brand.

Flat polyethylene bags, having full-width top opening, are easy to fill. To seal, use twist ties, staples, tape, or heat sealers.

Gusseted bags have accordion folds on both sides to accommodate bulky items. Features are otherwise identical to flat polyethylene bags above.

**No. 5A528.** FLAT POLYETHYLENE BAG ASSORTMENT. Contains 100 each: 3 x 5", 4 x 6", 5 x 7", 6 x 10", and 10 x 12" bags. Shpg. wt. 3.8 lbs. List $61.23. Each.....$57.05

**No. 6A225.** PAPER TWIST TIES. Economical, convenient, fast and easy way to seal polyethylene bags. Reusable.1/4W x 6"L. 2000 ties per box. Shpg. wt. 1.7 lbs. List $5.89. Each .....$4.81▲

## POLYBAG IMPULSE SEALERS

- **Rugged construction and solid-state timer for dependable service**
- **Long life element without "hot" spots or "cold" spots**
- **Consistent 1/16" wide (5/64" on No. 4LT32) seals on all gusseted and flat polybags**
- **No warm-up required, sealer only draws power when sealing**
- **Ideal anywhere a secure, airtight, waterproof seal is needed**
- **Seal time can be adjusted from 0.2-1.3 seconds (0.2-3 seconds on No. 4LT32) for different thickness bags**
- **Nos. 4LT36 and 4LT28 come with spare heating element and upper fabric cover. No. 4LT32 comes with two spare heating elements**

Maintenance kits of consumable items are also available and include: for Nos. 4LT36 (Kit # 488-9697) and 4LT28 )Kit #485-7785), two heating elements and two fabric upper covers. For No. 4LT32 (Kit # 488-9747), kit consists of two heating elements and an 18" wide x 9¼" roll of Teflon Fabric. Kits and all other parts are available by calling toll-free 1-800-323-0620. Midwest Pacific brand.

**Nos. 4LT36 and 4LT28 Light to Medium-Duty Hand Operated Sealers.** No. 4LT36 will seal up to an 8" width bag. No. 4LT28 has 12" sealing capacity. Both are hand operated, tabletop, and are UL listed. (MP8 and MP12)

**No. 4LT32 Medium to Heavy-Duty Foot Operated, Jaw Type Sealer.** Seals bags up to 18" wide and leaves both hands free to pack and insert larger bags. (MP18F).

# CLOTH PARTS BAGS AND MAILING BAGS

**100% cotton drawstring bags are sold in packages of 100 bags**

Mailing Bags

Parts Bags

**100% Cotton Drawstring Parts Bags** are more flexible than paper bags, conform to the shape of their contents, and require no glue, staples, or tape to close. Use for storing and separating small parts such as screws, nuts, and washers. Drawstring not only closes bag, but also provides a means of attaching enclosed parts to a larger member of an assembly. Come in dispenser packages of 100 bags. Millhiser brand.

**100% Cotton Drawstring Mailing Bags** have a white cardboard mailing tag overstitched to the bottom of bag. Tags are ruled for name and address, typed or handwritten, and have room for postage. Tags can also be used for content identification and other pertinent information. Drawstring closes bag and provides means of attaching bag to larger pieces of an assembly. Come in dispenser packages of 100 bags. Millhiser brand.

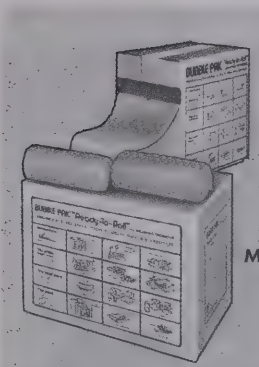
# LABELING TAGS



3 x 6" wired tags for attaching shipping label or other identification. Tag is heavy-duty natural kraft paper with wire through reinforced hole. Come in cartons of 1000.

**No. 4X886.** Shpg. wt. 7.8 lbs.
List ..... $46.43.
Each ..... **$38.70**

# BUBBLE AND POLYETHYLENE FOAM PACKAGING MATERIAL

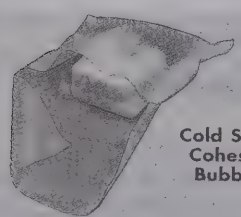
## AIR CAP® BUBBLE PACKAGING MATERIAL

No. 2W670 Lightweight Single Roll

No. 3W368 Mediumweight Double Roll

- **Comes in easy dispensing Ready-to-Roll cartons**
- **Perforated every 12" for easy tearing**

The original air-bubble packaging material. Air bubbles are formed between two layers of transparent polyethylene and nylon cushion and protect fragile items from damage in handling and shipping. Saves time, labor, and packaging costs. Lightweight, clean and easy to use. Dispenses quickly from self-dispensing Ready-to-Roll carton. Two densities available, each comes in 12" wide rolls cross perforated every 12" for easier tearing. Air Cap brand by Sealed Air Corp.



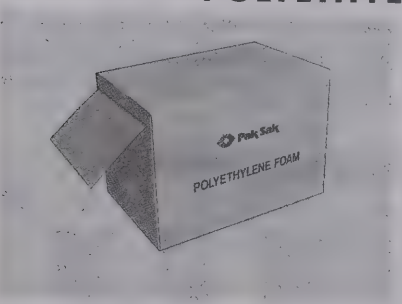
**No. 2W670—Lightweight Cushioning/Intimate Wrap:** ideal for small parts, electronic components, timers, controls, gauges, meters. One roll 12" wide x 175 ft. long.

**No. 3W368—Mediumweight Cushioning/Void Fill:** recommended for mid-sized items, calculators, test equipment, motors, pumps, carton lining, and filling empty areas in cartons. Two rolls 12" wide x 85 ft. long per Ready-to-Roll carton.

| Material Description | Bubble Height (In.) | Carton Size (In.) L | W | H | Air Cap Model | Stock No. ❸ | List | Each | Lots 5 | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|---|
| Lightweight | 3/16 | 19¼ | 12⅛ | 19½ | SC-120 | 2W670 | $52.51 | $43.80 | $41.61 | 5.0 |
| Mediumweight | 5/16 | 25 | 18 | 18 | ST-120 | 3W368 | 63.00 | 52.50 | 49.88 | 6.0 |

❸ These products are covered by OSHA Hazard Communication Standard and Material Safety Data Sheets (MSDS) are available. See page opposite back cover.

## COLD SEAL® AIR CAP® COHESIVE BUBBLES



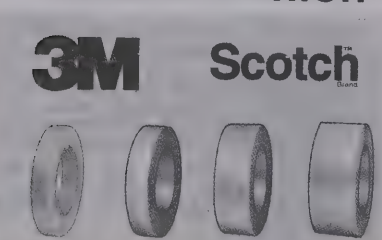
Cold Seal® Cohesive Bubbles

- **Provides airtight, long lasting, tamper evident seal**
- **Easily dispenses from Ready-to-Roll carton**

Bonds instantly to itself and not to the packaged product. Barrier sealed bubbles prevent air loss in the bubbles, giving reliable, long lasting product protection. Forms air tight pouch resisting water, dirt, grease, and abrasion. Tamper evident, once opened, it cannot be resealed. Labor-saving, no waste or extra sealing materials needed. Self-dispensing Ready-to-Roll carton allows quick application. 12" wide x 175 ft. long roll perforated every 12" for easy tearing. Packaged products should not be exposed to direct sunlight for extended period of time. Cold Seal brand by Sealed Air Corp.

**No. 5W581.** Cohesive Bubbles. Shpg. wt. 5.0 lbs. List $73.40. Each ..... **$61.20**

## POLYETHYLENE FOAM PACKAGING MATERIAL



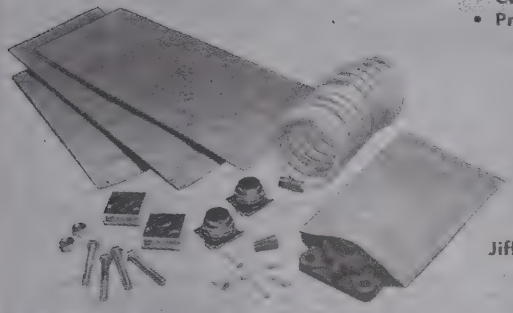
- **Gives product protection without bulkiness**
- **Applications include interleaving and light cushioning**
- **Ready-to-Roll carton dispenser allows quick and easy use**
- **1/8" thick foam**

A low cost, lightweight, all purpose packaging material. For use in a variety of applications including surface protection, interleaving, and light cushioning. Nonabrasive, waterproof, flexible, and an efficient alternative to corrugated inserts, polypropylene foam, kraft paper, or bogus paper.

Polyethylene foam material is clean, non-dusting, and enhances appearance of the product. Comes in self-dispensing Ready-to-Roll carton for quick and easy use. 1/8" grade foam is perforated every 12" for ease in tearing off from dispensing carton. Carton dimensions are 12L x 48W x 40"H. Roll is 12" wide x 175 ft. long. Pak Sak brand.

**No. 6A226.** Polyethylene Foam Packaging Material. Shpg. wt. 5.0 lbs. List ..... $46.95. Each ..... **$33.90**

## HIGH PERFORMANCE MASKING TAPE



A tough and extremely smooth high performance crepe paper tape. Excellent for paint masking as well as general purpose holding, bundling, protecting and miscellaneous industrial applications. Tape will generally function during bake cycles of up to 200°F for periods up to 1 hour; should not be subjected to outdoor exposure. Can be qualified to meet Fed. Spec. PPP-T-42C Type 1 and MIL-T-21595D Type 1. Available in 60 yard rolls. Natural color. Scotch brand (232).

# MAILING ENVELOPES

- Cushioned protection
- Product security

Jiffy® Padded Mailers

Jiffylite® Bubble Mailers

## JIFFY® PADDED MAILERS

Rugged, all purpose product protection. Double folds protect corners. Consistent cushioning is created by interior fibers that expand as the package is handled. Double glued bottom flap and seamless side construction provide extra product security. Can be taped or stapled closed. Made with 60% recycled material and are recyclable. Come in package of 25. Jiffy brand.

## JIFFYLITE® BUBBLE CUSHIONED MAILERS

Cushioned protection. Nylon barrier bubble lining and fully laminated outside surface provides stiffness, puncture resistance, and durability. Light weight lowers postage costs. Heat sealable closure reduces labor costs and creates a water-resistant, tamper-evident package. Come in package of 25. Jiffylite brand.

# ELECTRIC STAPLERS AND STAPLES

Staplex®

No. 6A227 Little Giant Automatic Electric Stapler

No. 6A228 Thick Wire Automatic Electric Stapler

## LITTLE GIANT AUTOMATIC ELECTRIC STAPLER

Staples automatically when work is inserted. Staples 2 to 20 sheets of 20 lb. paper or equivalent. Recommended for stapling paper, cardboard, reports, header cards, packages, or cloth. Stapler has fully adjustable depth to 3" (7.6 cm) and quick front loading that holds a full track of standard size 1/4" staples, No. 6A229 Staplex Type DS. Power-packed to do full day workloads. Heavy-duty design features rugged cast duraluminum housing. Movable contact assembly and direct-drive solenoid mechanism assure a neat, uniform, tight clinch. Completely portable. 4" wide x 7½" deep x 7" high. 110-125V, 50-60 Hz. Staplex brand (SJM-1).

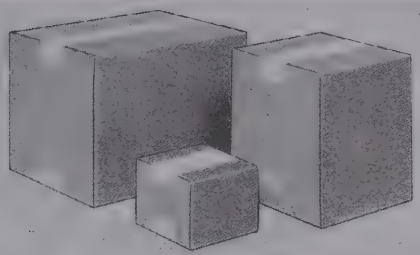
**No. 6A227.** Little Giant Stapler. Shpg. wt. 9.8 lbs. List $219.50. Each.....**$197.50**

**High Speed Staples.** 1/4" leg staples. Uniformly manufactured from high carbon steel and properly glued for top performance in electric staplers. Prevents jamming. Packed 5000 per box. Staplex brand (DS).

**No. 6A229.** High Speed Staples. Shpg. wt. 0.4 lbs. List $3.75. Each.....**$2.23**

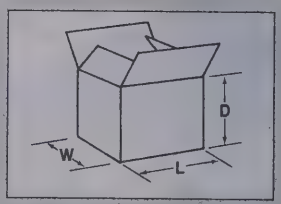
## THICK WIRE AUTOMATIC ELECTRIC STAPLER

Automatically staples padded shipping bags, corrugated mailing envelopes, and bubble packs. Powerful direct-drive solenoid system and thick wire long leg staples assure a positive and tight clinch. Packages stay closed during tough handling, preventing loss and pilferage. Great for heavy chipboard, kraft stock, "clamshell" blister packages. Adjustable contact assembly allows depth to 4¼"; assures neat, uniform stapling. Reduces packaging and shipping costs considerably; eliminates fatigued hands. 110-125V, 50-60 Hz. Staplex brand (S-RD).



**No. 6A228.** Thick Wire Stapler. Shpg. wt. 12.0 lbs. List $367.90. Each.....**$349.50**

**Thick Wire Staples.** Thick gauge and extra long leg wire staples hold firmly in material. Packed 5000 per box. Staplex brand (RLD).

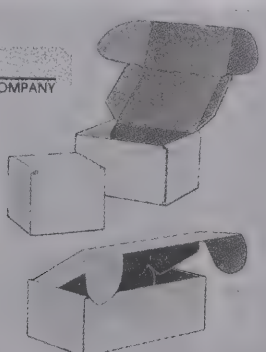


**No. 6A230** Thick Wire Staples. Shpg. wt. 0.8 lbs. List $8.40. Each.....**$8.29**

# STOCK AND SHIPPING CARTONS

## STOCK AND SHIPPING CARTONS

ACORN
CORRUGATED BOX COMPANY



**200-pound test corrugated stock cartons** are widely used by manufacturers, wholesalers, retail stores, parts departments, and mail order houses to ship and store products. Meet Federal specifications for domestic shipments and are approved for express, rail and truck carriers. All set-up cartons meet Parcel Post and UPS shipping requirements.

21 sizes available for normal shipping and stock needs. Maximum weight of box and contents permitted is 65 lbs. Completely recyclable and made using a minimum of 30% recycled materials. Brown kraft surface. Shipped flat in bundle quantities. Easy to assemble and seal using reinforced or plain gummed tape. Quality Container brand.

# AIR AND MANUAL STAPLERS AND STAPLES

No. 6Z161
1¼" Hand Clincher

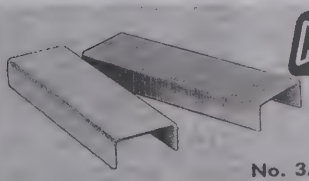
No. 6Z163
1¼" Air Clincher

No. 6Z165
1¼" Roll Air Clincher

- **Staple penetration is controlled easily with minor manual adjustments. Provides either full or blind depth penetration and either loose or tight clinch**
- **Readily removable magazine permits easy clearance without use of tools**
- **Efficient design of units ensures minimum air consumption**

Reliability, versatility and economy describe this line of pneumatic and manual packaging staplers. The Roll Air Clincher, with its staple capacity ten times that of ordinary staplers, is preferred by packaging professionals in high volume packaging applications. The Air Clincher is a practical choice because of its reduced size and weight; the Hand Clincher is a dependable, no-maintenance stapler. Carton Closing Corp. brand.

**Hand Clinchers** are manual staplers capable of closing thousands of cartons without maintenance. The new two-handle design permits a more accurate positioning of stapler on carton surface and minimizes the effort required to clinch staple. 1¼" stapler No. 6Z161 uses "C" staples; 1⅜" stapler No. 6Z162 uses "A" staples.



**Air Clincher** is the workhorse of the packaging industry. Its pneumatic system speeds carton closing operations. Air pressure: 80 PSI; air consumption: 0.08 cu ft. 1¼" stapler No. 6Z163 uses "C" (1¼" crown) staples; 1⅜" stapler No. 6Z164 uses "A" (1⅜" crown) staples.

**Roll Air Clincher** is a high production roll stapler with a capacity of 1000 staples. Performs up to 250 carton closings without needing to be reloaded yet, is the lightest roll stapler on the market. Air pressure: 80 PSI; air consumption: 0.08 cu. ft.

# 3M PACKAGING TAPE

## A SCOTCH™ BRAND HIGH PERFORMANCE BOX SEALING TAPE

A packaging tape featuring high performance "Scotchpro" film backing and adhesive system highly resistant to edge tear and end splitting. Meets U.S. Postal Regulations.

## B SCOTCH™ BRAND SUPERIOR PERFORMANCE BOX SEALING TAPE

Strong "Scotchpro" film backing and adhesive has high holding power providing excellent adhesion to many types of surfaces. Excellent resistance to edge tear and splitting from impact shock. Backing also provides excellent water chemical and abrasion resistance as well as good thermal properties. For single strip closure of regular slotted containers. Can also be used for single strip closure of treated box surfaces. Appendix of Fed. Spec. PPP-B-636J covers use of No. 355 under Method I for single strip closure. Applicable Fed. Spec. MIL-T-43036B. Amend 2 Type II (transparent only). Meet Commercial Item Description.

## C SCOTCH™ BRAND HIGH PERFORMANCE BOX SEALING TAPE

A general purpose packaging tape developed primarily for single strip closure of regular slotted containers. Features a strong, yet conformable "Scotchpro" film backing which provides resistance to edge tear and splitting often caused by shock from impact. Adhesive sticks at a touch. Applicable Fed. Spec. PPP-T-70A with waiver for length and CID A-A-1684A.

## D SCOTCH™ BRAND HIGH PERFORMANCE COLD TEMPERATURE BOX SEALING TAPE

Strong "Scotchpro" film packaging tape with backing and adhesive system especially suited for use in cooler areas as in the food processing industry. Once applied, it adheres very well to boxboard surfaces subject to temperatures below 0°F. Used primarily to seal regular slotted containers. Abrasion, tear, moisture, and chemical resistant. Chemically acceptable by the USDA for use on packaging materials in minimal contact with meat or poultry food products prepared under federal inspection.

## E SCOTCH™ BRAND HIGH PERFORMANCE PRINTED BOX SEALING TAPE

3M manufactured Scotchpro™ biaxially oriented polypropylene backing. Pressure-sensitive hot melt rubber resin. Tan with red printed message, "Fragile Handle With Care". Heavy-duty, conformable backing with high resistance to edge tear and splitting. Adheres instantly to a wide variety of surfaces. Complies with the environmental considerations of ASTM D1974-92.

## F SCOTCH™ BRAND PREMIUM INDUSTRIAL GRADE PAPER BOX SEALING TAPE

Tough backing remains strong under moist conditions. Good cross directional tensile makes it suitable as a splicing tape. Meets Federal Specifications and Commercial Item Description.

## G HIGHLAND™ BRAND INDUSTRIAL BOX SEALING TAPE

All purpose tape for single strip sealing of regualr slotted containers. Has strong, yet conformable "Scotchpro" transparent film backing. Provides very good resistance to edge tear and splitting.

## H HIGHLAND™ BRAND BOX SEALING TAPE

Pressure sensitive acrylic adhesive with biaxially oriented, conformable polypropylene backing. Resistant to edge tear and splitting. Adheres instantly to a variety of surfaces. Good adhesion to recycled fiberboard. Good aging in sunlight or fluorescent lighting. Provides reliable closures and long aging.
